

DB2 Linux, UNIX and Windows HealthCheck Package

Fixed scope, fixed price services

Deliverables:

- Executive Presentation
- Recommendations and Findings Report
- Completed Checklist

What is a Package Offering?

Information Management Implementation Packages are fixed scope, fixed price services to help IBM clients ensure that they have a technically sound and functional system framework necessary for the successful development and deployment of their IBM Information Management solution.

The DB2 for Linux, UNIX and Windows HealthCheck service includes the analysis of one DB2 instance of one non-partitioned Database for an OLTP system. IBM will collect information about the DB2 LUW environment such as CPU and I/O configuration settings related to DB2, DB2 Database Manager and Database Configuration, Operating System and Database Monitoring data as listed in the HealthCheck Requirements Checklist. After an in-depth analysis of the information, IBM will provide a recommendations and findings report of the results of this analysis with a formal executive review.

Tasks Involved

T1. Kickoff Meeting

- Review the HealthCheck requirements checklist
- Review the services description
- Define/review project plan

T2. Environment review and analysis

T3. Presentation to executive team

T4. Recommendations and Findings Report

T5. Completed DB2 LUW HealthCheck Checklist

Purpose

This package will provide an independent assessment to look at the setup and usage of the DB2 environment. We will identify exposures in the setup and use of DB2 that could potentially cause unavailability or extended recovery times. Our experts will identify opportunities for achieving improved performance, availability and scalability of the DB2 subsystem. Opportunity to:

- Receive skills transfer
- Learn proven practices based on leading edge experience
- Reflect on the current status of DB2 usage, potential issues and the right priorities going forward.

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
