# IBM Smart Analytic 9700/9710 System Capability

## *Data warehousing & analytics in integrated, optimized software*

IBM provides the most comprehensive portfolio of data warehousing, information management and business analytic software, hardware and solutions to help Clients maximize the value of their information assets and discover new insights to enable more effective and faster decisions and optimize their business outcomes. IBM zEnterprise pioneered enterprise data warehouse by integrating the database, server and storage into an easy to manage environment that requires minimal setup and administration while producing faster performance.

Today's leading organizations require more from their database appliances. These environments must accommodate growth and minimize expenses while enhancing business analytics. They must also be integrated, optimized and organized for simplicity. The 9700/9710 is a zEnterprise Analytics System with DB2 for z/OS database software that delivers extreme speed and performance.

Our Software Services experts provide the technical leadership and expertise to ensure that the 9700/9710 is leveraged to meet the client business and technology requirements. This results in fast more consistent performance. Thousands of Clients rely on IBM Software Services, the industry's premier experts, to help them leverage their investments to keep data available and accessible and increase efficiency while keeping costs down.

## Overview

A 9700/9710 service offering is designed to get your organization up and running quickly and to allow for a smooth transition. This service offers project planning and execution, product enablement and on-site support. In other words, IBM consultants offer a range of services to leverage the value and performance of 9700/9710. The services are heavily focused on providing you with the knowledge and enablement you need for success. Our consultants will work side by side with your team and share standard practices. Services range from end-to-end project consulting to specific targeted services.

### Highlights:

- Reduce the cost and complexity of your Business Analytics with the Enterprise System z Data Warehousing solution, a single platform that offers the highest scalability and availability

- Ensure your IDAA system is installed and configured for optimum performance

- Leverage best practices brought by IBM experts to rapidly introduce this new technology into your legacy environment

**Services include:**

- Installation
- Hands-on mentoring
- Technical assessment
- Proof of concept
- Architecture design
- Design and implementation assistance
- Project mentoring
- Performance analysis
- Database and application migration
- Knowledge transfer

When engaging IBM Information Management Software Services, you can be confident that you are working with the industry's leading experts. Your staff will gain skills quickly with expert advice and knowledge transfer directly from our experienced consultants.

- Harness the extreme speed of the 9700/9710 to keep data available and accessible with IBM Services
- Gain skills quickly with expert advice and knowledge transfer from IBM Experts
- Rely on IBM professionals for rapid deployment of new updates while you focus on critical business issues

Our Software Services are designed to offer a full range of options depending on your needs and budget. Whether it is through the full-lifecycle or at specific checkpoints, our experts will help ensure project success.

**Services options:**

- **Technical Assessment:** Identify features and feasibility
- **Proof of Concept:** determine business value and requirements, establish project scope including benchmarks or prototypes, align deliverables with requirements, and determine resources needed to accelerate the implementation process
- **Architecture Design:** System architecture design based on the unique 9700/9710 capabilities
- **Design and Implementation Assistance:** Database schema design, application implementation approaches, and integrating IBM 9700/9710 with other tools and/or systems
- **Project Mentoring:** Full life-cycle management of your implementation
- **Performance Analysis:** Analyze a particular performance problem in the system and recommend database tuning/application optimization
- **Database and Application Migration:** Conduct an inventory of the origin and target requirements, create migration scripts, leverage IBM conversion tools, and perform data and application migrations

IBM 9700/9710 Services provide dedicated services to ensure successful implementation of the 9700/9710 product in your particular environment. Tailored packages include installation, configuration and hands-on training customized to your specific needs.

## Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.
