

IBM InfoSphere BigInsights Services QuickStart

Accelerate your business results

Highlights:

- Work alongside our experts to plan for your BigInsights installation
- Leverage IBM experts to seamlessly install and configure your IBM InfoSphere BigInsights Enterprise Edition solution
- Participate in information sharing with our experts and review your business use cases
- Create an effective go forward plan for the deployment of your solution including recommendations on the roll out of the many powerful features that BigInsights has to offer

As part of the IBM Big Data Platform, IBM InfoSphere BigInsights enables new solutions to turn large, complex volumes of data into insight, cost effectively. InfoSphere BigInsights delivers an enterprise-ready big data solution by combining Apache Hadoop, including the MapReduce framework and the Hadoop Distributed File Systems (HDFS), with unique technologies and capabilities from across IBM.

Overview

Information Management (IM) Software Services will work alongside you to accelerate your adoption of this new exciting technology and increase your knowledge around its vast capabilities.

Our technical experts will guide you in selecting the right use case and designing and planning your BigInsights implementation. We will leverage our best practices, tools and implementation experience to expedite the install and configuration of InfoSphere BigInsights into your enterprise environment.

As part of our QuickStart Services, we work with you to create a deployment plan, including options around the deployment of additional BigInsights features such as GPFS, High Availability and LDAP configuration.

When embarking on an IBM InfoSphere BigInsights Implementation, the expertise of the IM Services team can facilitate your implementation efforts. Leveraging our expertise will allow you to achieve the business benefits you are striving for in an accelerated, cost effective, low risk manner.
