

## Information Management Software Services InfoSphere DataStage Version 8 Install Package for Cognos 8 Data Manager customers

### Highlights

- Professional installation of InfoSphere DataStage V8 by IBM Information Management experts
- Install InfoSphere DataStage for one environment where Cognos 8 Data Manager is currently deployed
- Identify existing and new areas where InfoSphere DataStage can augment the BI environment where Cognos 8 Data Manager is deployed for a follow-up project
- Transfer knowledge of InfoSphere DataStage standard practices to your team
- Develop System Administration skills through onsite mentoring and hands on activities

The InfoSphere DataStage V8 Install Package consists of a fixed scoped project leveraging expert consultants, a repeatable proven processes and standard collateral to reduce costs and project risks and ensure seamless installation of InfoSphere DataStage. Avoid spending unnecessary time and money during software installation by leveraging our experienced consultants. Information Management Software Services draws on years of deployment experience, proven methodologies, and standard practices to support a timely, reduced risk delivery of a successful product installation.

### Installation Offering Scope

The Installation offering contains four components to ensure a successful installation:

#### 1. Preparation Phase

- Before the consultant arrives on-site it is important that you ensure that all the prerequisites are in place. The expert consultant will be delivering an environment prerequisite checklist to support you with this preparation phase.

#### 2. Information Server

##### Product Installation

- Relying on the environment prerequisite checklist, our experts consultants will work with your team to install InfoSphere DataStage according to the installation plan developed during the preparation phase.

#### 3. Post-Installation Configuration

- Once the actual product installation has been completed, our Information Management consultant will run a basic configuration to validate that the installation has been done properly.

#### 4. System Administration Handoff

- Once the configuration of the environment is complete, the Information Management consultant will provide knowledge transfer by demonstrating the system and informing your team on standard procedures for maintenance routines, back-up methodologies and problem reporting.

### Deliverables

The following items will be delivered to you:

- An environment prerequisite checklist to make sure all prerequisites are met before the start of the engagement
- A system configuration document with specific configuration parameters of your environment
- An install checklist that designates the completion of this package

## Information Management Software Services

IBM offers a broad set of Services offerings designed to maximize your success with Information Management Software through standard practices developed across numerous successful deployments. Intended to establish a foundation of product knowledge and guidelines, these strategic workshops and offerings are customized to your existing environments, standards, and methodologies.

IBM aims to provide the most cost effective and expedient means of achieving project goals through the use of Information Management Software, repeatable processes, and consistent deliverables. To achieve these goals and ensure the continued success of our initiatives, IBM leverages standard methodologies, proven consulting expertise and experience refined throughout hundreds of successful client engagements.
