

# IBM Information Management Software Services

## InfoSphere Guardium Health Check Offering

### Overview

The InfoSphere Guardium Health Check Service includes the analysis of your Guardium environment to validate that your Guardium solution is configured and is performing according to your specifications. Our Services experts will gather and review the information about your Guardium solution and after an in-depth analysis of the information, will provide you with a findings and recommendations report and present these findings to your Executive sponsor team.

### Highlights

- *Leverage IBM expertise to review your Guardium solution*
- *Identify technical, usage and performance matrix of your solution*
- *Analyze and recommend appropriate action to better leverage your investment*
- *Increase satisfaction and independence in administrating your Guardium environment with this proactive approach*

Data security has become one of the most important issues for organizations to address, and is an essential requirement for doing business in a globally networked economy. The ability to efficiently provide protected and secure information across an enterprise to authenticated users, and grant or deny access to information and system resources is a fundamental part of information governance. InfoSphere Guardium provides the simplest, most robust solution for continuously monitoring access to high-value databases, assuring the integrity of trusted information in your data center and automating governance controls in heterogeneous enterprises.

### Tasks involved include:

- Review the Health Check Requirements Checklist
- Conduct interviews to better understand the usage of the system
- Perform environment reviews and analysis
- Review solution configuration and performance
- Compile findings and recommendations
- Deliver a report of findings and recommendation
- Present findings and recommendations to the customer executive sponsor

## **Your independence is our greatest success**

That is the underlying theme to our delivery approach for the InfoSphere Guardium Health Check Offering. We believe that nothing is more important than transferring our knowledge to your organization. This provides you with long-term self-sufficiency through our mentored and parallel working approaches

## **Engage today**

With a world-wide team of highly trained services professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

## **Our experts are ready to assist your organization with:**

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership

Available for whatever the delivery approach your business requires, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
