IBM InfoSphere Guardium QuickStart Offering

Accelerate your time to value

Due to compliance mandates, database security has become one of the most important issues for organizations to address and is an essential requirement for doing business in a globally networked economy. The ability to efficiently provide protected and secure information across an enterprise to authenticated users and grant or deny access to information and system resources is a fundamental part of information governance.

IBM InfoSphere Guardium Database Activity Monitor provides a simple, robust solution for continuously monitoring access to high-value databases, assuring the integrity of trusted information in your data center and automating governance controls in heterogeneous enterprises. It is one of the most widely deployed solutions for continuously monitoring access to enterprise databases and simplifying compliance audits with automated and centralized controls for heterogeneous environments. IBM InfoSphere Guardium Database Activity Monitor can help you with the following:

- Prevent data breaches, insider fraud and unauthorized changes to sensitive data
- Monitor privileged users such as database administrators, developers and outsourced personnel
- Virtually eliminate the overhead and complexity of native DBMS audit logs
- Automate compliance reporting, vulnerability and configuration assessments, and data discovery

Overview

This offering is designed to support the deployment of InfoSphere Guardium Database Activity Monitor. It covers the installation and configuration of InfoSphere Guardium Database Activity Monitor.

The goal of this service is to provide a working environment encompassing basic monitoring functions by leveraging our standard, proven approach. The offering also includes eight hours of knowledge sharing on the solution architecture, product feature and functions, basic monitoring configuration, as well as overall system administration.

Highlights:

- Leverage IBM experts to implement your solution quickly at low cost and low risk

- Gain IBM InfoSphere Guardium skills efficiently through working along side our Lab services experts

- Gain insight into what is required to successfully rollout the IBM InfoSphere Guardium solution across your entire enterprise

Project approach

Our Lab services expert will work with your project team to provide technical direction and a project framework for the implementation of the IBM InfoSphere Guardium Database Activity Monitor.

This project flow consists of the following:

1. Installation & Configuration Planning
2. Assistance with appliance installation and configuration
3. Assistance with S-tap agent installation and configuration
4. Set-up for database activity monitoring

Our Lab services experts will work side-by-side with your team to conduct information sharing and share standard practices to allow your team to quickly and independently maintain your InfoSphere Guardium environment.

We will provide the technical leadership and expertise to ensure your InfoSphere Guardium Database Activity Monitor solution is appropriately architected, designed, and implemented to meet your business and technology requirements.

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Information Management Lab Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met. Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Information Management Lab Services team will produce results quickly, and will help to put your project on the road to success.
