

Information Server Architecture Planning & Roadmap Workshop

Mapping your journey to success with IBM InfoSphere Information Server

Highlights:

- Provides a clear understanding of approach, prioritization and steps on the implementation of InfoSphere Information Server
- Creates a roadmap leveraging InfoSphere Blueprint Director to define an end-to-end information flow, allowing business-driven development by aligning business and IT views
- Available to clients that already have, or are considering purchasing or upgrading to, any of the InfoSphere Information Server Packages

Before you begin any important journey one of the most critical success factors is to have a plan. Why should the journey to information management success be any different? You need a plan that will help you to remove risk from your implementation and guide you to toward success rapidly while ensuring your solution fits your unique business requirements.

IBM InfoSphere Information Server enables you to understand, cleanse, monitor, transform, and deliver data, as well as to collaborate to bridge the gap between business and IT teams. The InfoSphere Information Server platform provides a variety of options when shaping your software solution. Let us guide you through the critical first step of understanding the options open to you and how to best apply them.

Overview

Our Information Management Software Services experts will leverage their extensive consulting experience and our proven methodology to help you align the feature rich solution with your business needs to build a roadmap that will focus on your success.

With input from your business executives and through collaboration with your technical leaders our experts will take you through the following steps:

- Assessment of your environment and mapping out of your business objectives, project initiatives and challenges
- A review of your product inventory and metadata assets
- A mapping of your organizational structure as it pertains to your Information Server solution implementation
- An overview of the Information Server framework and the Information Server suite components
- An overview of metadata management and change management process

At the conclusion of the workshop you will be given a customized solution implementation roadmap using InfoSphere Blueprint Director and a set of recommended standard practices. Leverage this valuable information to jump start your implementation!

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met. Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
