IBM Information Management Software Services
IBM Netezza QuickStart Offering

Highlights

- *Efficiently leverage the power and the performance of the Netezza platform by gaining knowledge transfer from our experts*

- *Accelerate the time to value and return on investment with standard practices brought by our experts*

- *Become self-sufficient and learn how to best administer your solution for future expansion*

IBM provides the broadest and most comprehensive portfolio of data warehousing, information management and business analytic software, hardware and solutions to help customers maximize the value of their information assets and discover new insights to enable more effective and faster decisions and optimize their business outcomes. IBM Netezza® pioneered the data warehouse appliance space by integrating database, server and storage into a single, easy to manage appliance that requires minimal set-up and ongoing administration while producing faster and more consistent analytic performance.

IBM Netezza experts from software services provide the technical leadership and expertise to ensure that IBM Netezza technology is appropriately architected, designed, and implemented to meet the client's business and technology requirements. Our consultants bring their experience in architecting and developing solutions in a large and complex Massively Parallel Processing (MPP) infrastructure to ensure that IBM Netezza's platform integrates and performs seamlessly into your existing environment.

Overview

The IBM Netezza QuickStart Offering allows for a smooth transition and adoption of this new technology. The objective is to get you up and running quickly with your first deployment of Netezza in order to leverage the value of the Netezza high performance appliance.
This QuickStart is heavily focused on providing you with the knowledge and enablement you need for success. Our consultants will work side-by-side with your team to conduct on-site training and share standard practices to allow your team to quickly and independently maintain your Netezza environment.

1

This QuickStart offering includes the following main activities:

Project Planning & Analysis:

- Review of the project scope, objective and approach
- Select together with IBM one data source to load to the Netezza platform
- Analyze the data source
- Delivery of a scope, objective and approach document

Assistance during implementation:

- Create the database in Netezza leveraging an existing data model
- Load the data into the Netezza platform
- Provide assistance during testing
- Delivery of a high level architecture diagram

Project hand-off and next step recommendations:

- Document standard practices and lessons learned
- Make recommendations on how to best scale the system for future usage
- Make recommendations on how to best administer for further expansion of the solution
- Conduct knowledge transfer to your team on Netezza knowledge base, online help, and technical support
- Provide next step recommendations
- Delivery of an engagement summary report and next step recommendations

Your independence is our greatest success

That is the underlying theme to our delivery approach for the Netezza QuickStart. We believe that nothing is more important than transferring our knowledge to your organization. This provides you with long-term self-sufficiency through our mentored and parallel working approaches

Engage today

With a world-wide team of highly trained services professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership

Available for whatever the delivery approach your business requires, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
