Upgrade to take advantage of the power of DB2 LUW and optimize your database to better handle future growth. IBM DB2 LUW provides the ultimate performance, scalability, reliability, availability, and security.

What's Involved

When you engage IBM Software Services, you can be confident that you are working with the industry's leading database experts. Data Server consultants from Software Services assist you with a custom installation plan of DB2 Data Server products to match your environment. Gain DB2 LUW skills quickly and efficiently with expert advice and knowledge transfer directly from our consultants on the administration and operational procedures required to support the Information Management software in your unique environment. We ensure that your team is fully prepared to support your new software.

Highlights

- ***Leverage the industry's premier database experts to seamlessly upgrade with minimal downtime***
- ***Take advantage of the power of DB2 LUW and optimize your database for future growth***
- ***Gain DB2 LUW skills quickly and efficiently with expert advice and knowledge transfer directly from our consultants***

Today's leading organizations require more from their database environments to accommodate their growing infrastructures and capitalize on new market opportunities. Getting up and running quickly with new technology is essential to business success. Thousands of customers leverage IBM Software Services to ensure their database environment is installed and running with minimal downtime.

What is a Quick Start Service?

A Quick Start Service from IBM Information Management Software Services provides assistance with installation and configuration processes and helps you exploit the newest functionality in IBM® DB2® LUW, for example:

- XML
- data compression
- data partitioning

Our consulting team will deliver a custom report detailing the installation process for your specific environment, configuration modifications made to the default database settings, and specific operational information required to administer your unique database system.

This service offering may include:

- Create a customized roadmap to take you beyond basic implementation
- Installation and configuration of DB2 LUW
- DB2 initial database creation
- Analysis and review of new DB2 LUW functionality
- Leverage DB2 LUW Autonomics and Storage Management to minimize administration time and issues
- Mentoring of your IT staff
- Training Roadmap Discussion
