Information Management software

IBM Information Management Software Services
IBM Smart Analytics System Services Capabilities

Thousands of customers world-wide leverage IBM Information Management (IM) Enterprise Data Warehouse (DW) Software Services to ensure their data warehouse environment is soundly architected and running efficiently. This enables you to meet the demands of your business efficiently and in a timely manner.

Through years of data warehouse product implementation success, we have harvested the knowledge, standard practices, methodologies, tools and proven architecture to enable you to achieve your goals more quickly and with decreased risk.

Highlights

• *Powerful warehouse foundation with broad analytic capabilities*

• *Scalable and fully-integrated IBM hardware and software*

• *Consultants with deep product and industry skills*

• *Flexible and robust project delivery approach leveraging proven methodology, standard practices and accelerators*

The IBM Smart Analytics System is a complete, off the shelf, ready to use analytics solution designed to accelerate your businesses ability to quickly deliver insight where and when it's needed, and to adjust and grow based on your company's ever changing business needs.

Powered by InfoSphere software, the system leverages a modular component based approach of pre-tuned and pre-integrated IBM hardware, software, and storage capabilities designed to accelerate the deployment, the efficiency, and return of your investment delivered from IBM's comprehensive portfolio of business analytic solutions.
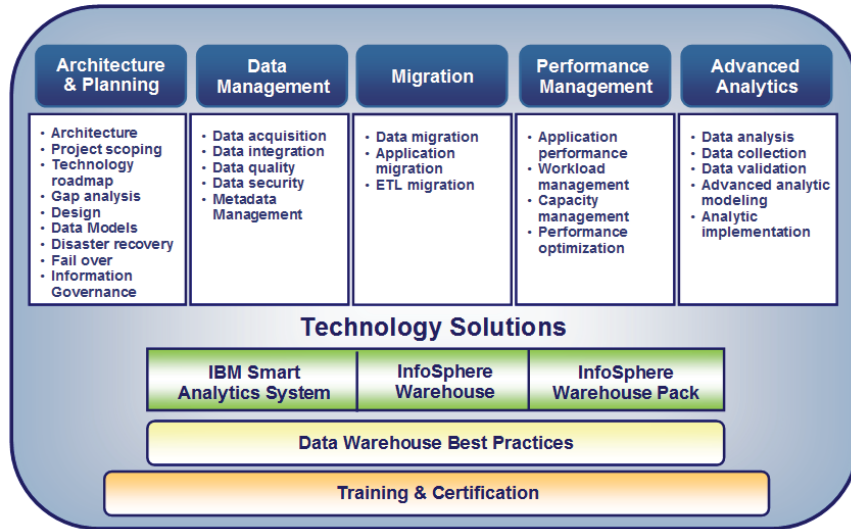

Our capabilities
The IBM IM Enterprise DW Software Services team provides a wide range of services, from industry data models, architecture, design and integration through to implementation capabilities for clients in all industries worldwide. Also, through our on-shore, off-shore model we are able to provide you with the flexibility of a cost effective delivery service.

Our project approach is agile and iterative to quickly provide insight into project deliverables and status early in the project lifecycle.

Our capabilities include:

IBM Smart Analytics System Software Services Capabilities

Architecture & Planning	Data Management	Migration	Performance Management	Advanced Analytics
• Architecture • Project scoping • Technology roadmap • Gap analysis • Design • Data Models • Disaster recovery • Fail over • Information Governance	• Data acquisition • Data integration • Data quality • Data security • Metadata Management	• Data migration • Application migration • ETL migration	• Application performance • Workload management • Capacity management • Performance optimization	• Data analysis • Data collection • Data validation • Advanced analytic modeling • Analytic implementation
