IBM Cloud Data Services

Providing the right self-services tools for data team member success

IBM Cloud Data Services (CDS) provide a hybrid, open source-based approach that application developers, data scientists and IT architects seek to address their data-intensive needs and deliver both immediate and longer-term benefits.

IBM Cloud Data Services is the most complete portfolio of managed services for data and analytics. Our open approach gives every member of the data team self-service access to the right tools for their jobs.

Our skilled and knowledgeable IBM Analytics Services experts are ready to help you be successful. We can maximize the value of your technology investment and address your critical business needs.

What we offer

IBM Cloud Data Services offers a comprehensive, flexible, trusted platform for your Cloud based data needs. Access a wide range of pre-integrated services based on more than 18 popular open source and IBM technologies. Use our open, hybrid cloud services across the globe, with a choice of PAYGO or dedicated options and depend on 24x7 support and security as well as bare metal and virtualized options for best performance.

Our Cloud Data Services are designed for self-sufficiency however we also realize that at times, to accelerate your success, it is beneficial for you to work alongside our IBM Analytics Services experts. We have designed some specific Cloud based offerings to compliment the CDS portfolio.

Cloud data services offerings:

- Accelerator
- Jump Start
- Migration

About IBM Analytics Services

The Analytics Services organization provides expert services exclusively focused on the IBM Analytics product portfolio. Our depth of experience and extensive proven practices help clients mitigate risks, raise the quality of their implementations and build valuable skills. We have provided guidance, advice, reviews, assessments and assistance to thousands of clients around the world enabling them to maximize the return on investment for both their on premise and cloud based analytics solutions.

Engage
