Démonstrations

Démarche de mise en oeuvre de Lotus Symphony - Edifixio

Q&A

Une stratégie claire pour faire évoluer le paradigme autour du document

Lotus Symphony 3

Lotus Symphony 3 représente une avancée majeure depuis la 1ère beta public en Automne 2007.

Basé sur le “code stream” d'OpenOffice 3

Nouvelles expériences utilisateur et nouvelles fonctionnalités

Focus particulier sur le support du format Microsoft Office et l'interopérabilité avec des utilisateur MS Office

Nouveautés

- Support ODF 1.2
- **Support des objets OLE**
- Nouveaux modèles de documents
- Nouveaux plugins

Interopérabilité

- **Support MS VB Macro**
- MS Office 2007
- Intéropérabilité amélioré avec OoO
- Rendu des objets graphiques

Améliorations

Nouveau service dans la barre contextuelle
Support des graphiques
Expérience Utilisateur
Nouveaux APIs

Lotus Symphony est "ouvert"

OpenOffice.org

- ▣ Large communauté
- ▣ IBM utilise & contribue
- ▣ Lotus Symphony 3 est basé sur le "codestream" de OO 3.0

Eclipse

- ▣ Nouvelle interface utilisateur
- ▣ Modèle d'extension basé sur des plug-ins facilitant l'intégration de service métier

LOTUS SYMPHONY

Communauté Web

- ▣ Gratuit et accessible
- ▣ Ouvert, transparent
- ▣ Forum de support
- ▣ Forum de développeurs

ODF

- ▣ OpenDocument Format
= Format de fichier standardisé
- ▣ Non adhérence du contenu à l'application
ODF Toolkit

Lotus Symphony 3 Presentations

Lotusphere2011

Construire des présentations est simple et intuitif via Lotus Symphony 3

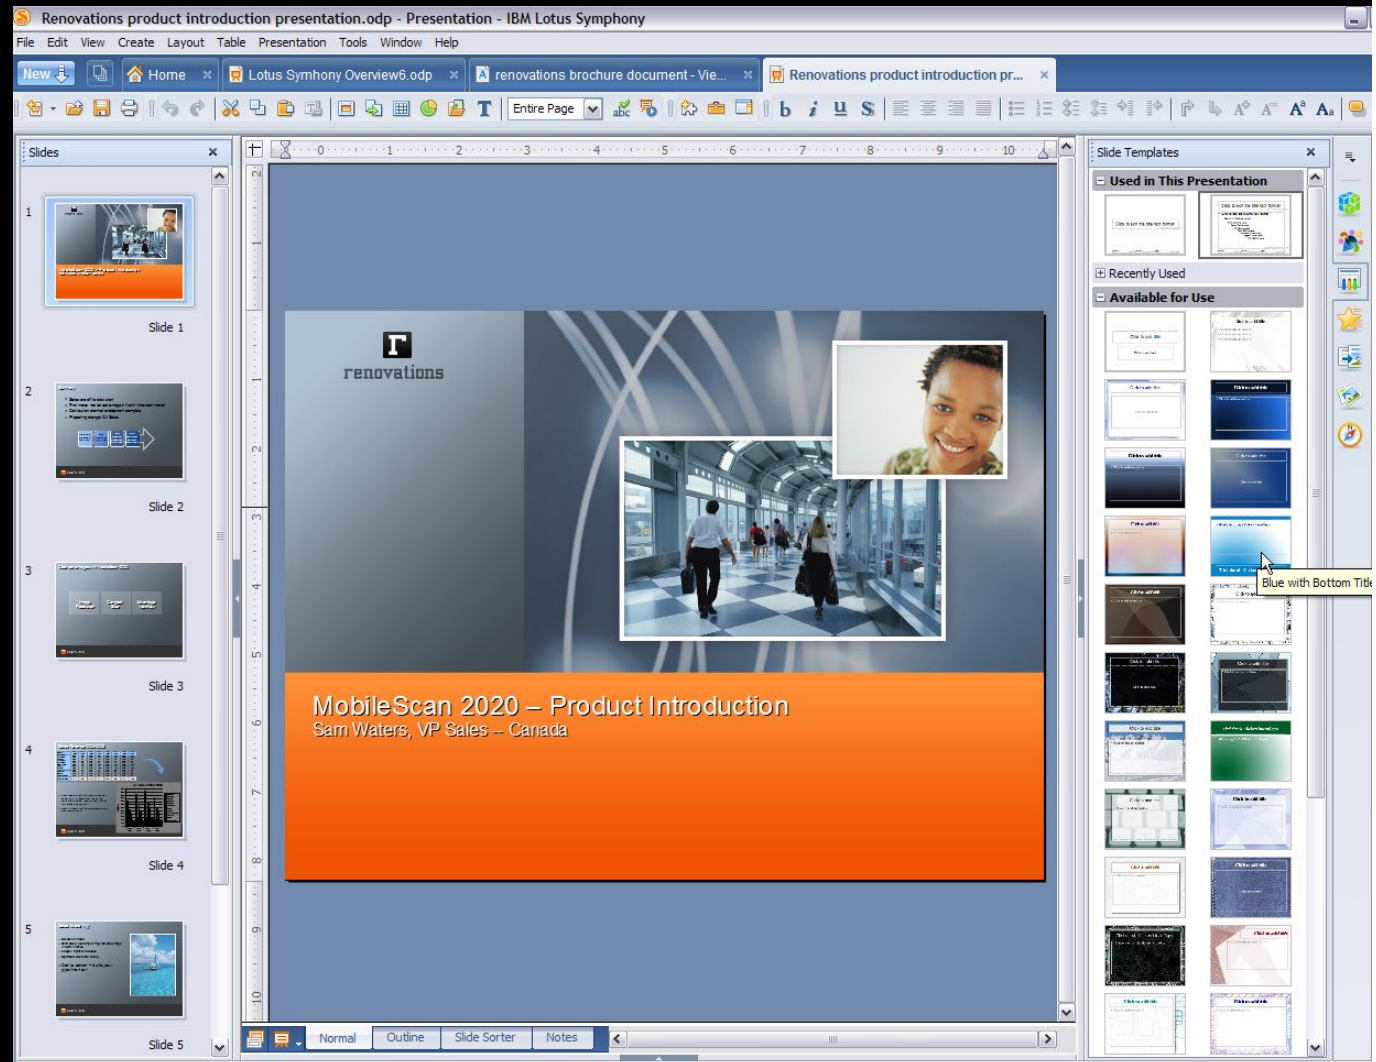

Gestion des modèle et masque de présentation simple et intuitive

Gestion multi-écran

Nouvelles animations, polices de caractères

Amélioration des effets d'animation via une accélération matérielle

Utilisé actuellement pour cette présentation

Lotus Symphony 3 Documents

Lotus Symphony 3 Documents délivre plus de services à l'utilisateur

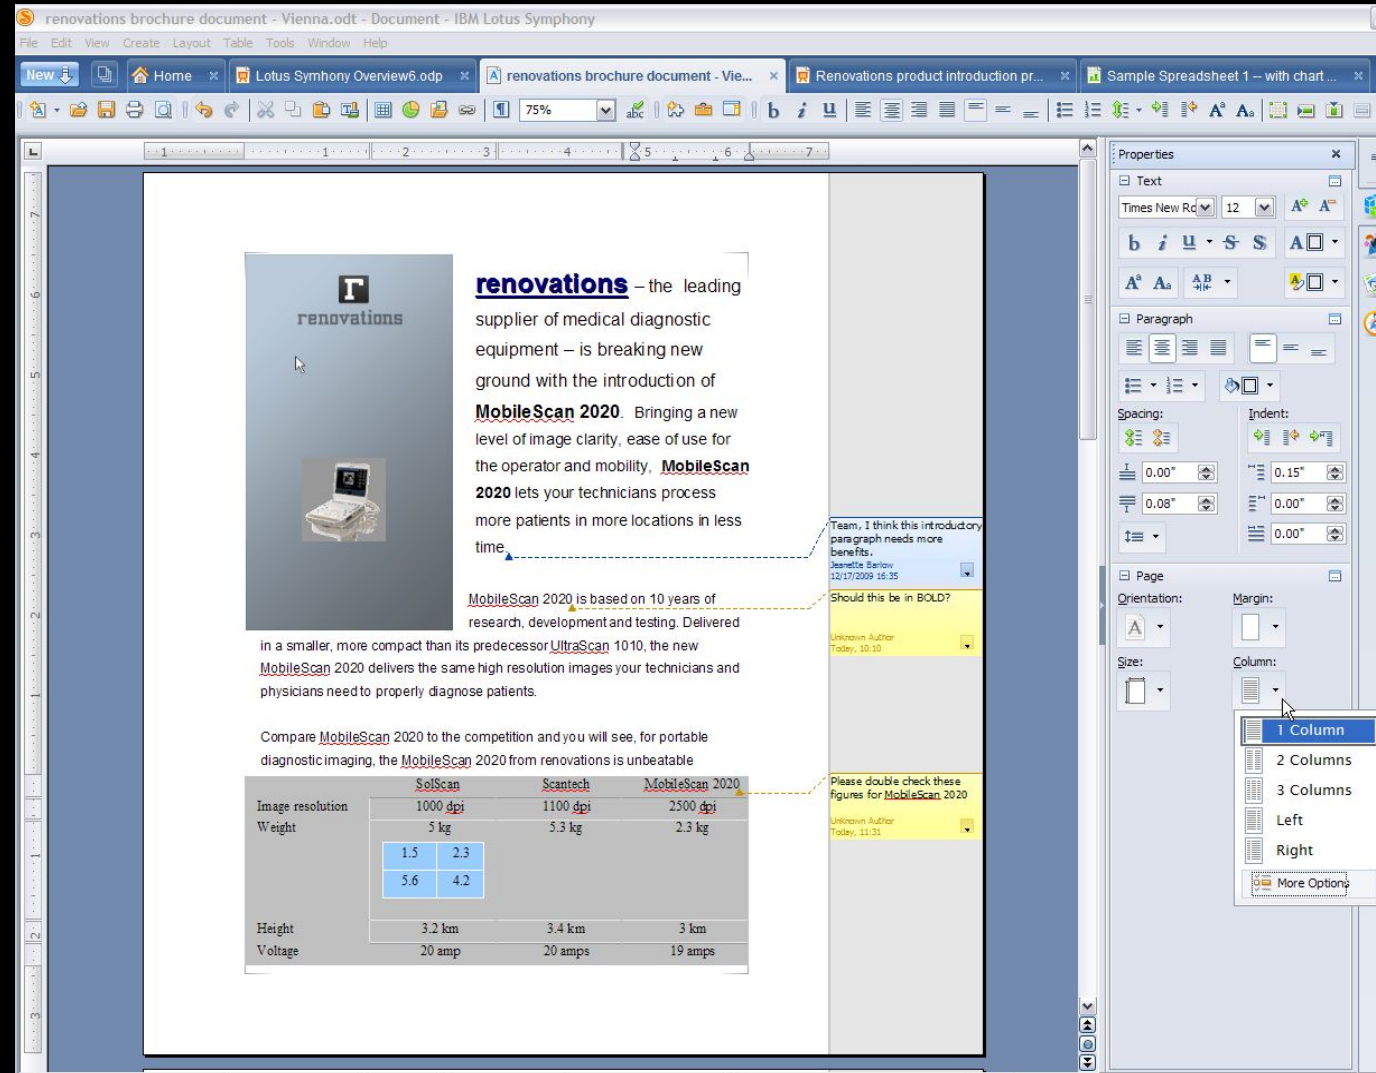

Support des tableaux imbriqués

Support de masques de document Multi-page

Support des documents maîtres

Amélioration de l'export PDF

...

Lotus Symphony 3 Spreadsheets

Lotusphere2011

Calcul, manipulation et analyse des données simplifiées

Nombre de maximum de colonnes : 1024

Déplacement des lignes et colonnes simplifié

Fonctionnalité de zoom plus importante

Amélioration des performances sur les fonctions de tri et les formules

Fonction "Detective"

"Equation Solver"

Nouvelles formules

Amélioration et augmentation du nombre de type de graphique

Sample Spreadsheet 1 -- with chart and datapilot - renovations.ods - Spreadsheet - IBM Lotus Symphony

LotusLive Symphony fournit des éditeurs via le Web

The screenshot displays the LotusLive Symphony web editor interface. The main window shows a document titled "Renovations Green Data Center" with a text editor containing the following text:

environmental concerns can take on a whole new meaning when they begin to impede the company's ability to grow. Corporate data centers are well known as significant power users. If the company's data center cannot accommodate new servers or storage because of power availability or infrastructure constraints, bringing new capabilities online can become a major challenge in terms of both time and money.

For CIOs, that translates into finding ways to expand the capacity of data operations to meet the growth requirements of the business. A growing number of CIOs are realizing that environmental concern and business success can go hand in hand—and that a green, or environmentally friendly, data center may actually be one of the best ways to both accommodate growth and make a positive impact on their business's bottom line.

Adding to the trend, most governments are mandating that IT organizations take extra precaution to

Transitioning to a green data center

How do you go about creating an energy-efficient green data center? IBM's 30-plus years of extensive, hands-on experience in designing, supporting and operating data centers has allowed it countless opportunities to learn what works and what doesn't. It's also provided us with a unique perspective on how to apply that learning to help create workable strategies for improving energy efficiency.

[We applied these strategies in engagements with customers](#)

As the following graphic shows, the technologies and strategies for improving data center energy efficiency span the data center ecosystem. Companies typically achieve the best results by integrating power and cooling changes with advanced technologies such as virtualization, energy efficient hardware and software, and power and workload management initiatives.

[Often, the initial investment levels are prohibitive. To counter balance this, many organizations](#)

Data center energy efficiency opportunities

The sidebar on the left shows a menu with options like "Text Properties", "Image Properties", "Heading", "Bulleted List", "Numbered List", "Align", "Superscript", "Subscript", "Indent", "Decrease Indent", and "Duplicate Formatted Section".

Presence Awareness

environmental issues are now front-page around the world and faced with increasing urgent warnings about the consequences of the projected rise of both energy demands and greenhouse gas emissions, government and businesses alike are now focusing more attention than ever on the need to improve energy efficiency.

For most CEOs, whose sights are firmly fixed on business growth and expansion, energy consumption and environmental concerns can take on a whole new meaning when they begin to impede the company's ability to

Gestion de tâches intégrée dans le processus de création

- Les équipes créent des documents dans le cadre d'une activité, tâches...
- Affecte des tâches non pas sur l'ensemble du document, mais sur des sections unitaires.
- L'utilisateur peut visualiser ces actions dans le contexte du document ou de l'ensemble des documents.

The screenshot displays a Lotus Notes application window titled "High Street Business Plan2". The interface includes a menu bar (File, Edit, View, Create, Layout, Table, Tools, Help) and a toolbar with various icons. A dialog box titled "Assign a Section" is open, showing the following details:

- Assignee:** john_doe@connections.com
- Assigned to:** Write this section Review this section
- Description:** Write "Business Description" section in the document.
- Users must be defined as "Authors" of the document in "My Files" before they can be assigned tasks.**
- Buttons:** OK, Cancel

The background document content is partially visible, showing sections like "Business Description" and "Legal Structure" with placeholder text.

CREATED WITH LOTUS SYMPHONY

Lotus Symphony Multi Media Library

The screenshot displays the Lotus Symphony 3.0 application window with a document titled "Sample Document V1.odt". The "View" menu is open, showing options like "New", "Default", "Normal", "Web Layout", "Sidebar", "Status Bar", "Rulers", "Properties Panel", "Navigator", "Field Shadings", "Fields", "Comments", "Nonprinting Characters", and "Hidden Paragraphs". The document content includes a section titled "MANAGEMENT" and text about the Division of Human Resources.

An inset window titled "Lotus Knowledge Site - Google Chrome" shows a help page for "Lotus Symphony 3.0". The page includes a "Watch video" link, a "Send via email" link, and a "Favorites" icon. The main heading is "Edit the Maximum Area to be Printed on a Page". Below this is a numbered list of 8 steps:

1. Click the View menu.
2. Ensure Normal is checked, if not select it.
3. On the sidebar, click the Properties icon.
4. Expand the Page area.
5. Click the Margin icon.
6. To choose a default setting, select either Narrow, Normal, or Wide.
7. To enter a custom value, under custom, enter the appropriate margin sizes.
8. When finished, click outside the Margin menu.

Other sections on the help page include "Other languages available for solution" with language flags, "Content Ranking" with a star rating system, and "Related solutions" with links to "Edit the Maximum Area to be Printed on a Page" and "Set Area Properties".

Michel Bolze - Edifixio

Agenda

Le contexte Edifixio

La démarche de Migration

Le constat

La mise à disposition de notre expérience

Le contexte Edifixio

Edifixio

Intégrateur de systèmes – Business Partner IBM

150 personnes

Une utilisation active des outils bureautiques mais pas forcément complexe

Des échanges continus et des co-constructions avec les clients et partenaires

Début 2011

Un problème de renouvellement de licences Microsoft

Un souci de réaliser des économies pour mieux investir

Notre décision

Migrer un groupe d'une cinquantai

La démarche de migration

Identification d'utilisateurs pilotes

Valider « l'utilisabilité » de l'outil dans un contexte pluriel

Construire le “comment démarrer”

Mettre en oeuvre la structure des bases de connaissance (Lotus Connections)

Message de la Direction

Notre besoin est couvert et les économies sont là

Désinstallation du pack office et mise à disposition de postes libre service

Structure de support de proximité par les utilisateurs pilotes

Partage d'expérience et échange au sein de Lotus Connections

Consolidation des “tips” et des informations du net par un Responsable Solution

Le constat

Une mise en service immédiate

Adoption immédiate et sans problème bloquant

Aucun impact client

Importance de la proximité des utilisateurs et donc du volume de personnes concernées

Un gain immédiatement palpable pour les utilisateurs aussi

13 000 Euros sauvés,

Immédiatement ré-investis dans un hub vidéo

Un coût associé au change management relativement masqué

Un usage de plus pour notre réseau social et son adoption

La mise à disposition de notre expérience

Notre offre de service “5 jours pour bien démarrer avec Symphony”

- 1/ Identification des populations pouvant facilement migrer de par leurs usages des outils bureautiques et du ROI associé
- 2/ Identification des utilisateurs pilotes devant sécuriser le message de la Direction et construction du kit de démarrage
- 3/ Mise à disposition des bases de connaissances et prise en main associée
- 4/ Préparation du déploiement (installation, postes libre service, communication ...)
- 5/ Mise en place du réseau d'animation et de support
