

# IBM zSeries Clinic

## **Autonomics** - *Migrating from A to B* *Manual vs Automatic with IBM Software*

**Friday, May 7, 2004**

**IBM will highlight how a company typically approaches migration efforts & costs manually versus some of the tool choices available for autonomics.**

*How would you like to be able to migrate from VSAM to DB2 without rewriting the code? Do you have a plan to move critical VSAM data to DB2?*  
([VSAM Transparency](#))

*Do you still have unsupported OS/VS COBOL? Did you know DB2 V8 will not support it? How would you like to upgrade your old unsupported COBOL to LE automatically?* ([Debug Utilities Advanced Function](#))

*How valuable would it be to take CICS, DB2, IMS and generate user-defined MQSeries messages?*  
([BEP - Business Event Publisher MQ](#))

*What if you could take your Easytrieve Plus applications and reports and convert and run them in COBOL, keeping the EZT+ syntax intact? What are the benefits of being able to continue using the Easytrieve Plus language without the need for the ISV tool?* ([Migration Utility](#))

Lightyear Consulting will join IBM to present some of the tools for this clinic as well as participating in the Q&A.

### **Teleconference Information**

Date: Friday May 7th at 1:00 ET  
Time: 1:00 - 3:00 PM ET

Audience: Technical Support & Managers,  
Application Developers & Managers,  
Company Vendor Management

Host:

*PJ Baron*

*Category Leader, AD Tools, Americas  
(PD, CICS, SCLM and MU tools)*

### **How To Register**

**Register today at:**

[www.ibm.com/software/zseries/telecon/may7](http://www.ibm.com/software/zseries/telecon/may7)

Your e-mail confirmation will include the dial-in information for the call and the location of the teleconference presentation material.

Please direct any questions about this event to PJ Baron at [pbaron@us.ibm.com](mailto:pbaron@us.ibm.com) or 732.926.2072.
