## At a glance

IBM® Security AppScan® V8.6 portfolio delivers:

- A new next-generation Dynamic Application Security Testing (DAST) scanning engine that helps provide better scalability, performance, accuracy, and consistent results across the portfolio.
- New JavaScript™ analysis capabilities ( JavaScript Analyzer) have been added to the DAST Engine. The XSS Analyzer is a cutting-edge learning system capable of detecting Cross-site Scripting vulnerabilities by learning application behavior and server-side protections, and generating unique exploits tailored for each specific scenario.
- User-agent settings and templates to facilitate testing of web applications designed for mobile clients.
- New integration between IBM Security AppScan Enterprise and IBM Security QRadar to better correlate vulnerabilities.
- IBM industry-leading Static Application Security Testing (SAST) solution to mobile applications, including Android applications
- A new Application Discovery Assistant that automates time-consuming configuration steps and provides more accurate and complete dependency analysis.
- Support for JavaServer Faces (JSF) and Struts2 via the extensible application framework feature.

For ordering, contact Your IBM representative or an IBM Business Partner. For more information contact the Americas Call Centers at 800-IBM-CALL (426-2255). Reference: YE001

## Overview

Application security and risk management requires both advanced security testing and deep integration into the application development lifecycle. IBM Security AppScan (formerly known as IBM Rational® AppScan ) application security portfolio continues to deliver on both with Static, Dynamic, and Interactive Application Security Testing (Glass box feature). IBM Security AppScan portfolio provides a platform for centrally managing application security testing and risk management as critical elements of application lifecycle management.

**IBM Security AppScan Enterprise** is an enterprise-class solution for application security testing and risk management. IBM Security AppScan Enterprise provides robust capabilities for governance and facilitates collaboration between development, quality assurance, and security teams across the organization. It centrally manages Dynamic, Static, and Interactive security assessments. It provides enterprise metrics and trending for monitoring application security program progress. It also integrates with IBM Security QRadar to incorporate application vulnerability data into overall security intelligence.

**IBM Security AppScan Source** analyzes source code during the early stages of the application lifecycle to identify security vulnerabilities with Static Application Security Testing (SAST), while integrating security testing with software development processes and systems. IBM Security AppScan Source addresses mobile application security by providing the ability to test Android applications.

---

## Key prerequisites

---

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

---

## Planned availability date

---

- June 12, 2012: Electronic delivery
- June 15, 2012: Media delivery

---

## Description

---

The most efficient way to stay ahead of application security vulnerabilities is to build software securely, from the ground up. The challenge is that the majority of developers are not security experts, and secure coding is historically not identified as a priority. As a result, web-based and non-web-based applications alike continue to be deployed with vulnerabilities ready for exploitation, putting sensitive data at risk of a breach.

The onerous task of vulnerability identification and remediation cannot be successfully addressed by limited IT security resources. The best way to engage development in the process of application security is to provide tools that fit into the existing environment and workflow, and that generate results in an understandable language. The IBM Security AppScan portfolio provides a number of offerings that enable application security testing across the full application lifecycle.

IBM Security AppScan is a leading application security test suite designed to help manageability testing throughout the software development lifecycle. AppScan offers a time-saving solution for all types of security testing: outsourced, individual, and enterprise-wide analysis, and for all types of users including application developers, build managers, quality assurance (QA) teams, penetration testers, security auditors, and senior management.

The IBM Security AppScan portfolio includes offerings used to test live applications or source code, validate findings, and prioritize and report results. Reports include issuing advisories and advanced fix recommendations designed to educate and help developers and security auditors remediate the identified vulnerabilities.

IBM Security AppScan offerings:

- IBM Security AppScan Enterprise is a web-based, multi-user solution that provides centralized application security scanning, data consolidation and reporting, remediation capabilities, executive dashboards, compliance reporting, and seamless integration with AppScan Standard.
- IBM Security AppScan Source automates the analysis of source code to identify vulnerabilities and facilitate their remediation by integrating with development processes and tools, including build systems and IDEs.

## **What's new**

### **IBM Security AppScan Enterprise**

IBM Security AppScan Enterprise V8.6 integrates IBM's next generation Dynamic Application Security Testing (DAST) scanning engine. The new engine was re-designed from the ground up to provide better scalability, performance, and accuracy.

The DAST engine's JavaScript analysis capabilities ( JavaScript Analyzer), as well as the new Cross-site Scripting (XSS) analysis module (XSS Analyzer) have been added to AppScan Enterprise. The XSS Analyzer is a cutting-edge learning system capable of detecting Cross-site Scripting vulnerabilities by learning application behavior and server-side protections, and generating unique exploits tailored for each specific scenario. In addition, Glass-box Interactive Application Security Testing (IAST) assessment results can now be published from AppScan Standard to AppScan Enterprise Server.

User-agent settings and templates have been included to facilitate testing of web applications designed for mobile clients. A new integration between AppScan Enterprise and IBM Security QRadar enables QRadar to pull identified application vulnerabilities from AppScan and correlate these vulnerabilities with other types of security information to provide additional intelligence to identify and mitigate security risk.

### **IBM Security AppScan Source**

IBM Security AppScan Source V8.6 extends IBM's industry-leading Static Application Security Testing (SAST) solution to mobile applications. AppScan Source v8.6 supports static analysis of Android mobile applications and uses extensive Android-specific security research to provide a comprehensive solution to automate security analysis of Android applications. Organizations can now proactively address Android security risks before confidential information is compromised.

IBM Security AppScan Source V8.6 improves ease-of-use and ease-of-deployment capabilities. The installation and out-of-the-box experiences are enhanced and the new Application Discovery Assistant automates time-consuming configuration steps and provides more accurate and complete dependency analysis.

IBM Security AppScan Source V8.6 continues to advance IBM's static analysis capabilities. The extensible application framework feature, Framework-for-a-Framework, now supports JavaServer Faces (JSF) and Struts 2. New scan configuration capabilities enable users to apply predefined scan configurations, or apply their own customer scan configuration and rules. Custom scan configurations can be saved and easily shared with developers to improve analysis speed and to streamline results.

## **Accessibility by people with disabilities**

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

---

## Program number

---

Program number	VRM	Program name
5724-T52	8.6.0	IBM Security AppScan Enterprise
5724-Z34	8.6.0	IBM Security AppScan Source for Automation
5724-Z35	8.6.0	IBM Security AppScan Source for Analysis
5724-Z36	8.6.0	IBM Security AppScan Source for Development
5724-Z37	8.6.0	IBM Security AppScan Source for Remediation

---

## Education support

---

Comprehensive education for IBM products is offered through Worldwide Education Delivery Services. A wide range of training options are available, including classes led by instructors, learning on demand, on-site training, and blended learning solutions.

For additional information, visit

<http://www.ibm.com/training>

---

## Offering Information

---

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

---

## Publications

---

No publications are shipped with these programs.

The IBM Publications Center is available at

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries, free of charge.

### Specified operating environment

---

#### **Hardware requirements**

##### **IBM Security AppScan Source 8.6**

Disk space: Approximately 1.5 GB of available hard-disk space (2 GB required for installation)

Media drive: CD-ROM or DVD-ROM drive

Memory: 2 GB of RAM or more recommended

Processor: Intel™ Pentium™ IV-class processor or equivalent. 3.0 GHz or faster desktop or mobile processor recommended

##### **IBM Security AppScan Enterprise V8.6**

Disk space

Approximately 4 GB for the AppScan Enterprise Server and Jazz™ Team Server  
Approximately 10 GB of free space for scan logs on the Dynamic Analysis Scanner  
Approximately 200 GB of free space on the system hosting the SQL Server database (equals approximately 400,000 pages)  
Approximately 330 MB for the Web Services Explorer - GenericService Client tool (GSC) version 8.1 used to test Web Services for security vulnerabilities

Memory: 4 GB of RAM (minimum) or more recommended

Processor: Pentium Class PC (P4 - 3 GHz or greater; faster processor or multiple processors recommended). Dual-core CPU recommended for any load when running on x86-based hardware, whether using Linux™ or Windows™ operating systems.

#### **Software requirements**

##### **IBM Security AppScan Source V8.6**

###### *Operating systems*

Linux (On 64-bit Linux , Security AppScan Source runs in 32-bit mode.)

- Red Hat Enterprise Linux (RHEL) 5, 6, and 6.2

Solaris - AppScan Source for Automation only

- Solaris 10

Windows (On 64-bit Windows , Security AppScan Source runs in 32-bit mode)

- Windows 7 Enterprise, Professional, and Ultimate
- Windows Server 2003 R2 SP2 Enterprise and Standard 32-bit x86
- Windows Server 2003 Enterprise and Standard 32-bit x86
- Windows Server 2008 Enterprise and Standard 32-bit x86
- Windows Server 2008 R2 Enterprise and Standard
- Windows Vista Business, Enterprise, and Ultimate
- Windows XP Professional

### *Prerequisite system requirements*

#### License Use Management

- Rational License Key Server 8.1.1, 8.1.2, and future fix packs

### *Other system requirements*

#### Compilers

- Microsoft™ Visual Studio 2005, 2008, 2010
- gcc for Linux and Solaris
- Studio C and C++ compilers for Solaris and Linux
- Jasper Version 1 (Tomcat Version 3)
- Jasper Version 3 (Tomcat Version 5)
- WebLogic V8 and 9
- WebSphere® Application Server V6.1 and 7.0

#### Databases

- Oracle Database 10g and 11g

Integration - For integration scenarios with various AppScan Source products refer to AppScan Source product help.

- Rational Application Developer for WebSphere Software V7.0, V7.5, V8.0, V8.0.1, V8.0.2, V8.0.3, V8.0.4, and V8.5, and future fix packs
- IBM Eclipse SDK 3.3.0, 3.4.0, 3.6, 3.5, 3.7 and future modification levels and fix packs
- Security AppScan Enterprise 8.6 and future modification levels and fix packs
- Microsoft .NET Framework 2.0, 3.0, 3.5, 4.0
- Microsoft Visual Studio 2005,2008, 2010

#### Defect tracking systems

- Microsoft Team Foundation Server 2008, 2010, and future fix packs
- Rational Team Concert™ 2.0.0.2, 3.0, 3.0.1, 4.0 and future fix packs
- Rational ClearQuest® 7.0, 7.1.2, 7.1.1, 8.0, and future fix packs
- HP Quality Center 9.2, 10.0, 11.0 and future fix packs

#### Reports

- Adobe™ Reader Version 6.0 or later ( Windows )
- Adobe Reader Version 5.0 ( Linux )

## **IBM Security AppScan Enterprise V8.6**

### *Operating systems*

Linux (On Linux , Security AppScan Enterprise is used only with Security AppScan Source.)

- Red Hat Enterprise Linux (RHEL) 6 and 6.2

#### Windows

- Windows Server 2003 R2 Enterprise and Standard
- Windows Server 2003 Enterprise and Standard (Also install .NET Framework 4.0)
- Windows Server 2008 and 2008 R2 Standard and Enterprise

Windows (The following Windows operating systems are only for client-side of Enterprise Server and Dynamic Analysis Scanner.)

- Windows 7 Enterprise, Professional, and Ultimate
- Windows Vista Business, Enterprise, and Ultimate
- Windows XP Professional

#### *Prerequisite System Requirements*

##### .NET

- Microsoft .NET Framework 4.0 and future fix packs

##### Browsers

- Microsoft Internet Explorer 7.0, 8.0, 9.0 and future modification levels and fix packs
- Mozilla Firefox 10.0 and future fix packs (Used for both Manual Explore and Dynamic Assessment Plugins.)

##### Databases

- Microsoft SQL Server Standard and Enterprise 2005, 2008, and future fix packs
- Microsoft SQL Server 2008 R2 and future fix packs

##### License Use Management

- Rational License Key Server V8.1.1, 8.1.2, and future fix packs (Required for floating user licenses)

##### Web servers

- WebSphere Application Server V6.1.0.27 and future fix packs
- WebSphere Application Server V7.0.0.9 and future fix packs
- Apache Tomcat 5.5.30 and future fix packs
- Microsoft Internet Information Services V6.0 and future fix packs (IIS6 must be enabled on the Windows 2003 Server for installs.)
- Microsoft Internet Information Services V7.0 and future fix packs (IIS7 must be enabled on the Windows 2008 Server for installs.)

#### *Other system requirements*

##### Integration

- IBM Security SiteProtector System V2.0 Service Pack 8.1 and future fix packs
- WebSphere Portal Server V6.0.1.4 and future fix packs
- Rational AppScan Source V7.0 and future releases, modification levels, and fix packs
- Rational AppScan Standard V7.7 and future releases, modification levels, and fix packs
- Rational Team Concert V2.0.0.2, V3.0, V3.0.1, and V4.0, and future fix packs
- Rational Quality Manager V2.0.1, V3.0.1, and V4.0, and future fix packs

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

## **Planning information**

---

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express® . Product upgrades and technical support are provided by the Software Subscription and Support (Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (Software Maintenance) can be extended by the purchase of a renewal option, if available.

### **Packaging**

IBM Security AppScan is distributed with:

- International Program License Agreement (Z125-3301)
- License Information document
- DVDs
- Publications (refer to the [Publications](#) section)

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

### **Security, auditability, and control**

---

Security AppScan V8.6 uses the security and auditability features of the operating system software. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

## **Software Services**

---

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can use the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

<http://www.ibm.com/software/sw-services/>

---

## Licensing metric definitions

---

### Authorized User Single Install

Authorized User Single Install is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Authorized User has accessed or has access to more than one Install of the program, the Authorized User requires a separate entitlement for each such Install. Licensee must obtain separate, dedicated entitlements for each Authorized User given access to the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

### Floating User Single Install

Floating User Single Install is a unit of measure by which the program can be licensed. A Floating User is a person who is accessing the program at any particular point in time. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one Install of the program, the Floating User requires a separate entitlement for each such Install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

### Install

Install is a unit of measure by which the program can be licensed. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each Install of the program.

## Ordering information

---

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Product group: IBM Security AppScan	(PID)
Product Identifier Description	
IBM Security AppScan Enterprise V8.6	5724-T52
IBM Security AppScan Source for Automation v8.6	5724-Z34
IBM Security AppScan Source for Analysis V8.6	5724-Z35
IBM Security AppScan Source for Development V8.6	5724-Z36
IBM Security AppScan Source for Remediation V8.6	5724-Z37

Product category: Security AppScan

Refer to the [Basic license](#) section for trade-up information.

## Passport Advantage customer: Media pack entitlement details

Customers with active maintenance or subscription for the products listed are entitled to receive the corresponding media pack.

Media packs description	Part number
IBM Security AppScan Source for Development V8.6	BT00VML
IBM Security AppScan Source for Remediation V8.6	BT00WML
IBM Security AppScan Source for Analysis V8.6	BT00UML
IBM Security AppScan Source for Automation V8.6	BT00TML
IBM Security AppScan Enterprise Server V8.6	BT0H1ML
IBM Security AppScan Enterprise Dynamic Analysis Scanner V8.6	BT0H2ML

## Current licensees

---

### ***New licensees***

Orders for new licenses will be accepted now.

Shipment will begin on the planned availability date.

## Basic license

### **Ordering information for Passport Advantage**

Passport Advantage allows you to have a common anniversary date Software Subscription and Support (SW S&S) renewals, which can simplify management and budgeting for eligible new versions and releases (and related technical support) for your covered products. The anniversary date, established at the start of your Passport Advantage Agreement, will remain unchanged while your Passport Advantage Agreement remains in effect. New software purchases will initially include twelve full months of Software Subscription and Support (also referred to as Software Maintenance). Software Subscription and Support in the second year (the first year of renewal) can be prorated to be coterminous with your common anniversary date. Thereafter, all Software Subscription and Support (Software Maintenance) will renew at the common anniversary date for twelve full months of Software Subscription and Support (Software Maintenance).

Refer to the IBM International Passport Advantage Agreement and to the *IBM Software Support Handbook* for specific terms relating to, and a more complete description of, technical support provided through Software Subscription and Support (Software Maintenance).

The quantity to be specified for the Passport Advantage part numbers in the following table is per required number of Authorized User Single Install, Floating User Single Install and Install. To order for Passport Advantage, specify the desired part number and quantity.

Description	Part number
IBM Security AppScan Enterprise (5724-T52) IBM Security AppScan Enterprise Reporting Only User Authorized User Single Install License + SW Subscription & Support 12 Months	D056CLL

Consult your IBM representative if you have any questions.

IBM Security AppScan is also available, via Web download, from Passport Advantage .

### **Subscription and Support**

Subscription and Support must be ordered to receive voice technical support via telephone during normal business hours, and future releases and versions, at no additional charge. The capacity of Subscription and Support (for example, Processor Value Units or terabytes) must be the same as the capacity ordered for the product licenses.

To order, specify the Subscription and Support program product number and the appropriate license or charge option.

IBM is also providing Subscription and Support for these products, via a separately purchased offering, under the terms of the IBM International Agreement for Acquisition of Support Maintenance. This offering:

- Includes and extends the support services provided in the base support to include technical support via telephone during normal business hours.
- Entitles you to future releases and versions, at no additional charge. Note that you are not entitled to new products.

When Subscription and Support is ordered, the charges will automatically renew annually unless canceled by you.

---

## **Terms and conditions**

---

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage . It is not available as shrinkwrap.

## **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

### **License Information form number**

- IBM Security AppScan Enterprise (5724-T52): L-LARS-8SQG57, L-LARS-8SQHHT
- IBM Security AppScan Source for Automation (5724-Z34): L-NLII-8SMLFK
- IBM Security AppScan Source for Development (5724-Z36): L-NLII-8SMLFK
- IBM Security AppScan Source for Remediation (5724-Z37): L-NLII-8SMLFK
- IBM Security AppScan Source for Analysis (5724-Z35): L-NLII-8SMLFK

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Limited warranty applies**

Yes

### **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information about known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### **Program technical support**

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is

in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

### ***Money-back guarantee***

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

### ***Volume orders (IVO)***

No

### ***Passport Advantage applies***

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

### ***Usage restriction***

Yes. For information, refer to the License Information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### ***Software Subscription and Support applies***

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

***System i Software Maintenance applies***

No

***Variable charges apply***

No

***Educational allowance available***

Not applicable.

---

## **Statement of good security practices**

---

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

---

## **IBM Electronic Services**

---

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM . Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent

for problem reporting enables IBM to provide better support and service for your IBM server.

To learn how Electronic Services can work for you, visit

<http://www.ibm.com/support/electronic>
