# Trends: Third Generation Database Technology

Carl Olofson– Feb. 2010

## 1<sup>st</sup> Generation

Vendor proprietary databases (IMS, IDMS, Datacom)

## 2<sup>nd</sup> Generation

RDBMS for Open Systems, dependent on disk layout, limitations in scalability & disk I/O

## 3<sup>rd</sup> Generation

Most data warehouses will be stored in a columnar fashion  
Most OLTP databases will either be augmented by an in-memory database (IMDB) or reside entirely in memory  
Most large-scale database servers will achieve horizontal scalability through clustering

## Trends: Key Drivers of Technology Changes for Warehouses

The Data Warehouse  
Institute - 2010

What problems will eventually drive you to replace your current primary data warehouse platform?  
(Select nine or fewer.)

Figure 3. Based on 1,752 responses from 417 respondents; 4.2 responses per respondent on average.

Introducing Informix Ultimate Warehouse Edition

3

The Sweet Spot

4

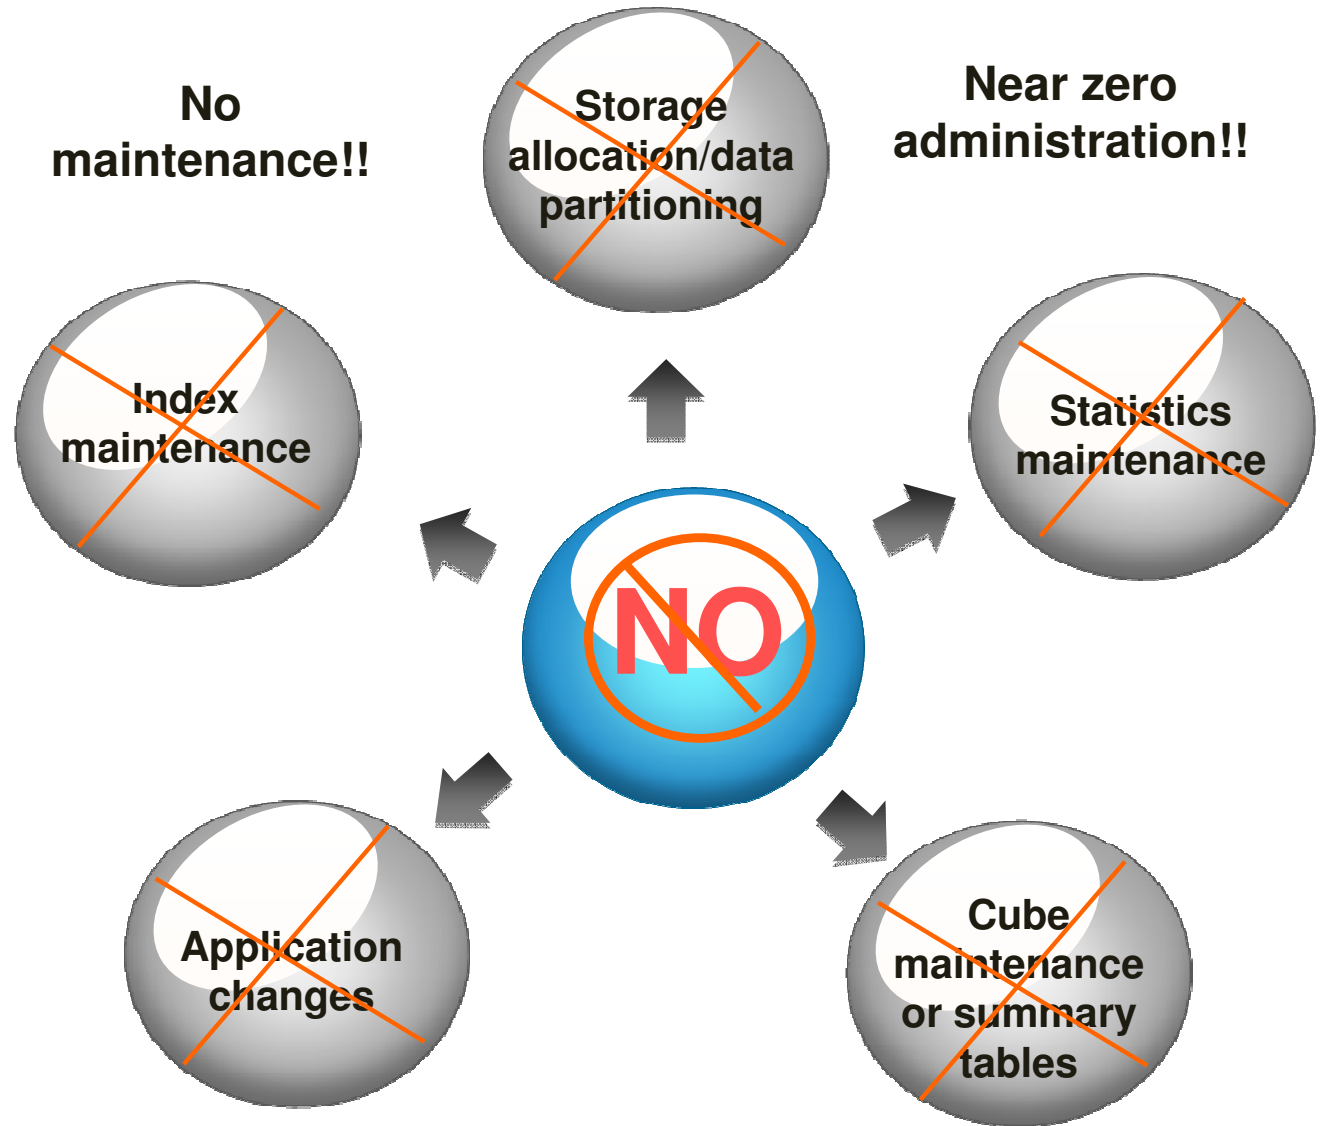

Conclusion

## New order of Performance!

## Take "No" for an answer!

# Informix Ultimate Warehouse Edition

## What it is

- New Informix edition for warehouse
- Packaged as:
  - Informix Ultimate Edition
  - **Informix Warehouse Accelerator (IWA)\***
  - Compression (Informix)

## What it does

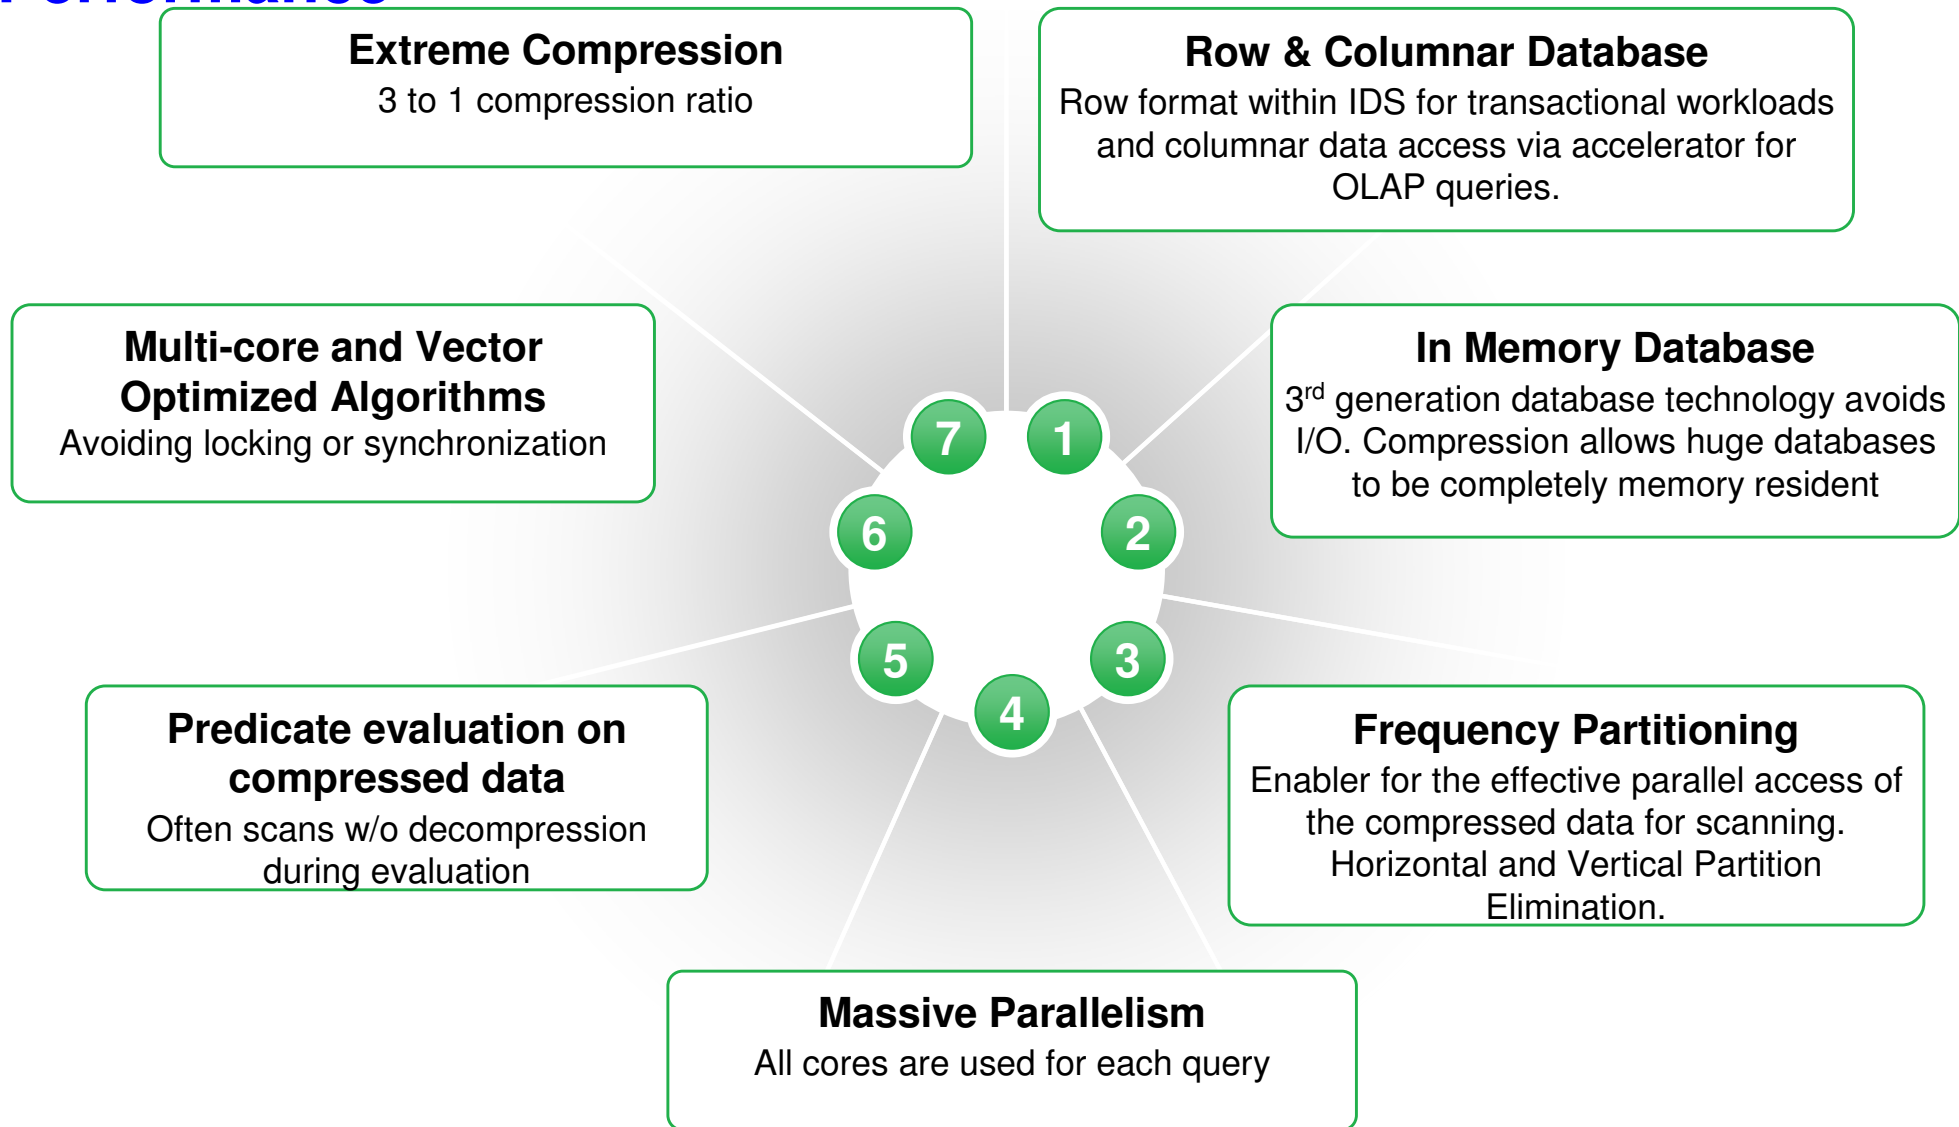

- Compresses and processes data mart entirely in memory
- Uses a deep columnar approach for optimizing performance
- Runs as an add-on to Informix

## Benefits

- Order of magnitude or more performance gains
- Transparent to BI apps – queries continue to run against Informix
- No maintenance
- Manage warehouse on Informix

\*Informix Warehouse Accelerator requires a Linux Intel system as it relies on optimizations in that environment

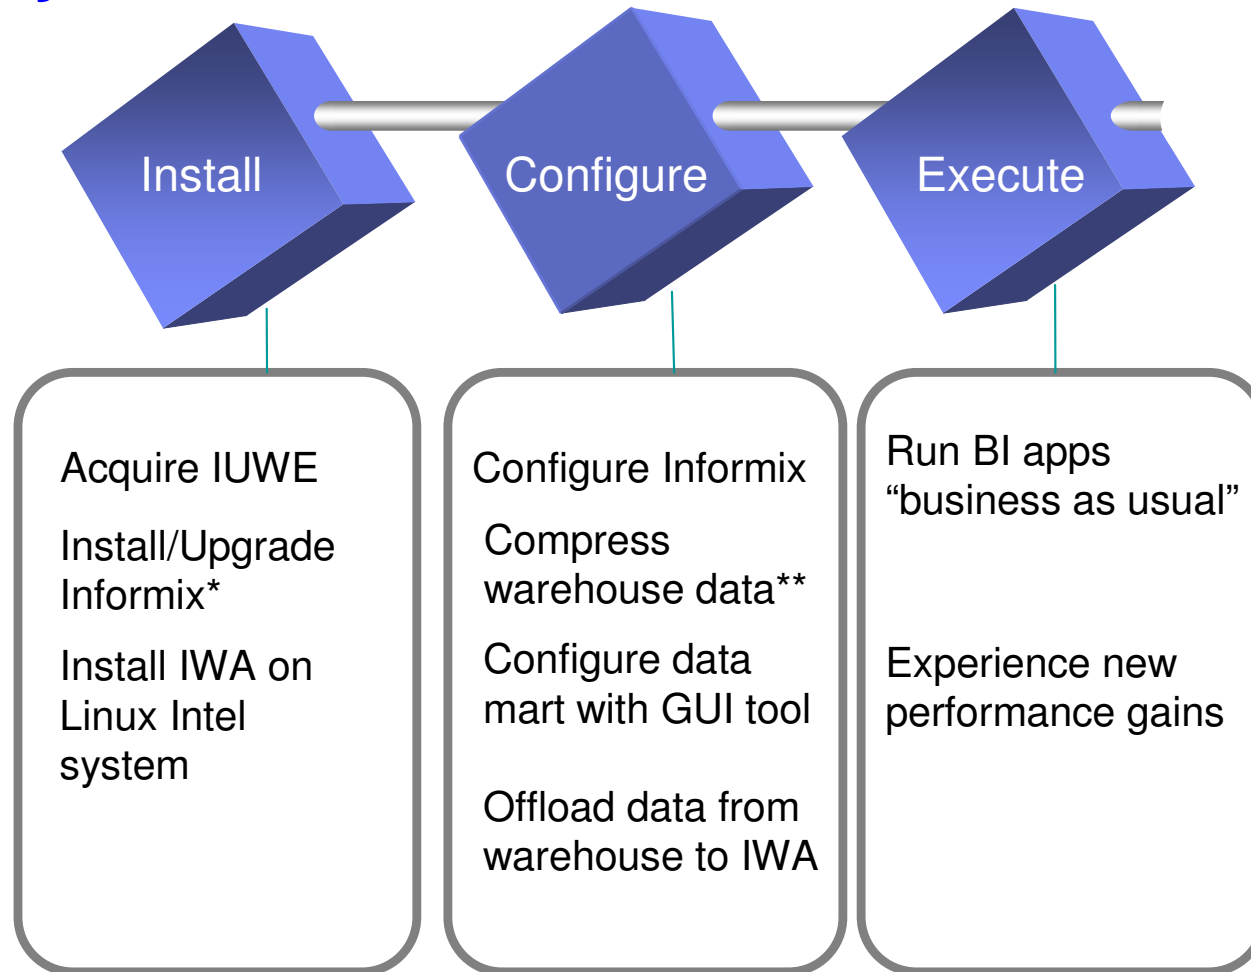

# Informix Warehouse Accelerator – Breakthrough Technology for Performance

Comes with Smart Analytics Studio, a GUI tool, for configuring data mart and monitoring IWA

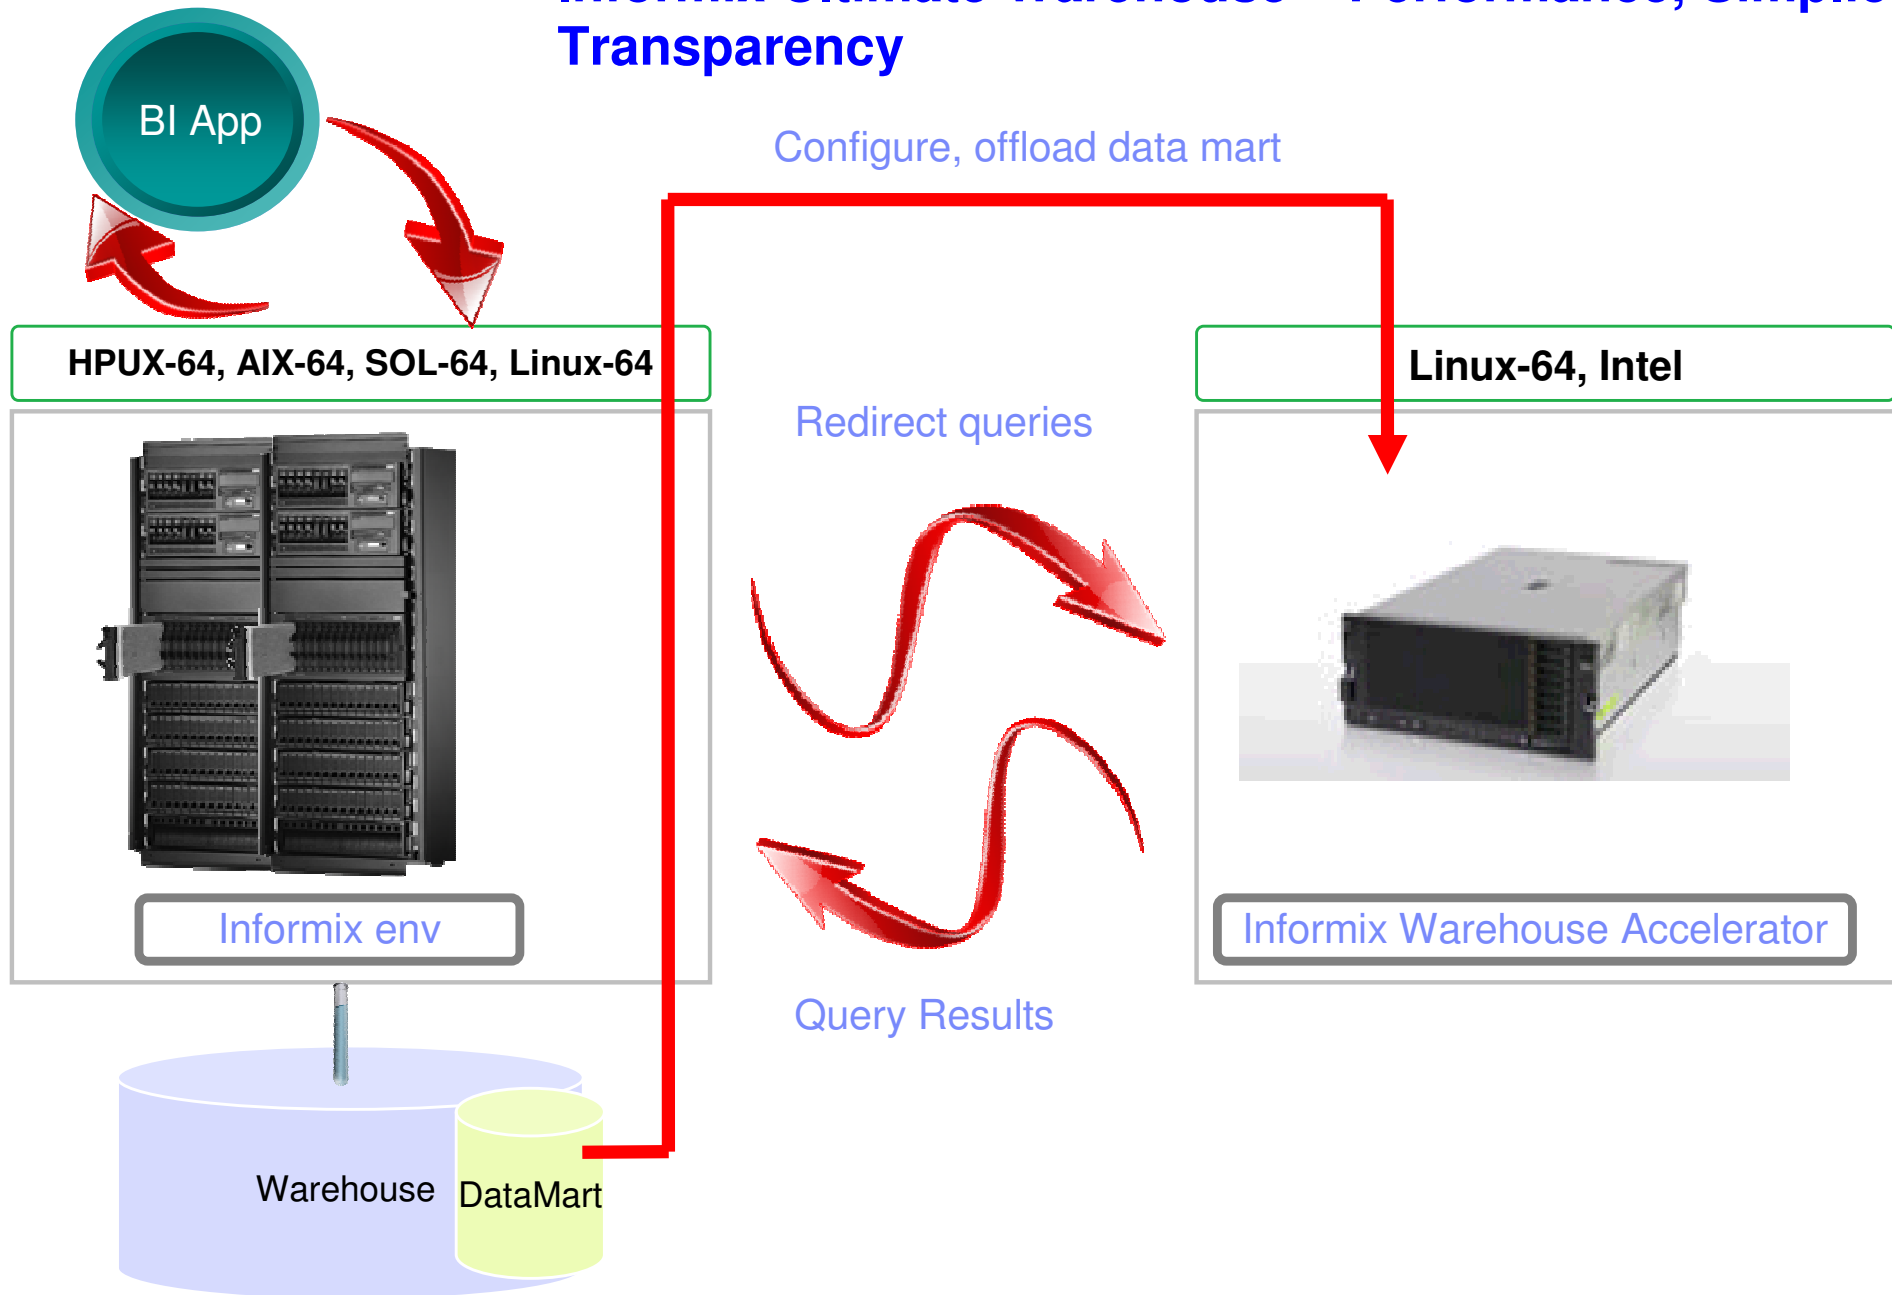

# Informix Ultimate Warehouse – Performance, Simplicity, Transparency

\*Informix Ultimate included with IUWE can be installed on any of 4 supported 64-bit platforms

\*\*Compression feature included with IUWE can be used to compress warehouse data optimizing storage

# Informix Ultimate Warehouse – Performance, Simplicity, Transparency

# IBM Smart Analytics Studio

The screenshot displays the IBM Smart Analytics Studio interface for configuring a data mart. The main window shows a diagram of the data mart structure, including a source table 'tf\_ast\_201...' (0.4 GB) and several target tables such as 'td\_dwh\_sta...', 'td\_dwh\_ges...', 'td\_dwh\_beru...', 'td\_dwh\_arb...', 'td\_dwh\_ber...', 'td\_dwh\_ges...', 'td\_dwh\_alter', and 'td\_dwh\_alte...'. Each table lists its columns and size. The diagram uses arrows and join symbols to show data flow and relationships between tables.

On the left, the 'Data Project Explorer' shows the project structure: 'demo' > 'Data Marts' > 'dm\_ast\_201101 (demo)'. Below it, the 'Data Source Explorer' shows 'Database Connections' > 'demo (Informix 11.5)' > 'demo' > 'Accelerators' > 'DEMO (Fully Operational)' > 'dm\_ast\_201101 (Er...)'.

At the bottom, the 'SQL Results' pane is active, showing the 'Execution Plan' for the 'DEMO' accelerator. The 'General' tab is selected, displaying the following information:

- Name:** DEMO (Fully Operational)
- Shared Memory available:** 0.3 GB of 0.4 GB
- Trace Profile:** DEFAULT
- Cluster status:** (1 of 1 coordinators and 1 workers active)

Additional controls in the 'General' tab include 'Start', 'Stop', 'Configure Trace...', 'Save Trace...', and 'Change Authentication Token' buttons.

Easy to use graphical tool for data mart configuration

Conclusion

# Customer Test Scenarios

## Federal Agency - Germany

- 537 Queries executed over a 30 GB data mart
- 432 Queries accelerated via IWA
- Performance with IDS+IWA was **90 times** faster than XPS

## Federal Agency - USA

- Sample data set from 2 TB warehouse
- 8 representative queries ran **127 times** faster

## Large Shoe Retailer

- BI Queries on 150 GB data set
- Fact table – 1 billion rows
- Queries against Informix – 22 minutes
- Queries against Informix + IWA : **4 secs, 330 times faster**

## Large Global Retailer

- 10 GB data mart sample
- Fact table – 25 million rows
- Queries against Informix – over 20 mins
- Queries against Informix + IWA: **4 secs, 300 times faster**

## Sample Customer Result – US Federal Agency

The numbers say it all!

Query	Description	Informix	Informix w/ IWA	Notes	Improvement
1	Find Top 100 Entities	1:28:22	0:01:28	Fact Table Scan	6023.23%
2	Find Top 100 Members	1:22:32	0:01:05	Fact Table Scan	7640.45%
3	Summarize all transactions by State and County	1:34:37	0:00:14	Fact Table Scan	41708.49%
4	Summarize all transactions by State, County, City, State, Zip, Program, Program Year, Commodity and Fiscal Year	1:48:58	0:00:41	Fact Table Scan	15800.89%

## Sample Customer Result – Large Shoe Retailer

The numbers say it all!

Query	Informix (secs)	Informix w/ IWA (secs)	Improvement
1	1320	4	330 times
2	63	2	31 times
3	220	2	110 times
4	1800	4	450 times
5	120	2	60 times
6	1800	2	900 times
7	2700	2	1350 times

4

Conclusion

# Summary

1

Informix Ultimate Warehouse Edition is a new Informix warehouse offering based on 3<sup>rd</sup> generation database technology

2

IUWE is for Informix, XPS and Red Brick customers and ideal for speeding up queries against star or snow-flake schemas

3

Using deep columnar, compression and in-memory data mart processing, IUWE can provide an order of magnitude or more performance gains
