I3.31 February 2000 PTF Pak - 000231

29 February 2000

To All ICMS Technical Support Personnel:

This document contains a summary of the PTFs that are being shipped for ICMS Release I3.31 in the Feb-00 PTF Pak, 000231. The Pak has been tested in a customer test environment to ensure that you are receiving a quality product.

This PTF Pak has been compiled from a number of separate PTFs. These were developed as fixes to problems that have been identified from customers, and projects.

Please note PTFs should be installed into the library ICMSPTF. If you have installed an individual PTF, received after the previous I3.31 PTF Pak has been installed, then you must determine whether or not it, and/or any of its pre-requisites, need to be reapplied after you have installed this Pak.

Fix Distribution Process

The Fix distribution process for PTFs and PTF Paks is as follows.

- Problem reported by the Country Level 2 on behalf of a customer.
- Problem resolved, tested and inspected.
- PTF sent to the reporting Country Level 2 together with information on any pre-requisite PTFs
- The Country Level 2 sends the PTF to the customer. Any changes for customer specific objects must be made prior to the PTF installation.
- The PTF Pak is built (from all PTFs sent to all Country Level 2s since the previous PTF Pak), tested and sent to all Country Level 2s.
- The Country Level 2 sends the Monthly PTF Pak to customers. Any changes for customer specific objects must be made prior to the PTF installation.

I3.31 Feb-00 PTF Pak Contents

The Pak is made up of the following individual PTFs closed off between 1 January to 17 February 2000.

PTF #	Objects	Description
308577	CL0525	SC29785 - Incorrect processing when determining if the access number belongs to the current customer in Calling Card service order connection
308559	BL0190	SC29779 - Valid Service Code rejected in Mass Credit/Debit Adj. Entry
308503	SV2526	SC29724 - Equal Access - When service order is posted the post date on the Equal Access Transaction file (IMTEQA00) is 0 and is not updated.
308502	SV0575 SV0576	SC29721 - Cannot out S&E if item has been expired
308500	SV0905	SC29763 - Multiple Miscellaneous Parameters for a New Connection S/O not being updated
308488	CP2705	SC29714 - Billing Recovery incorrect, resulting in double discounting
308480	PL5308	SC29710 - Additional features can not be added to a linecard
308472	BR0005	SC29705 - Account billed in two cycles with the same Bill Date causing corrupt Statement Enquiry data.
308470	SV1930	SC29729 - Treatment Cut-off selects and posts the Service Types that are not selected.
308457	BL0405	SC29769 - Resync - In Rate Period Maintenance validation of Year not complete
308436	BL2300 BL4115A	SC29842 - Resync - Pending Deposit Report: Regional Identifiers missing from report header
308420	BL2600 BL2600CL	SC29679 - Account Treatment Override Edit/Purge (Override ending date error)
308412	LN0280	SC29665 - Service Order post crashed: SV2502 attempts to write duplicate record to BLPRIM00
308375	PL5312 SV0010 ICMSMSGF	SC29600 - Problems with Line cards
308361	FM2505	SC29638 - Resync - No fault outage credit applied - only debit applied.
308358	BL2750 BL2351 SV0171	SC29730 - Programs can not compile under V4R3 and V4R4 OS/400.
308339	PL0110C FX308339 FX308339CL FX308339DF FX3339P1	SC29563 - Incorrect century populated on work file.
308337	PL2425 PR5100 PR5100DF SV0001 SV3030	SC29561 - Order types not able to be used where >10 default stages have been defined.
308323	PR5015	SC29546 - Inconsistent information when viewing a de-activated order
308298	BL0802CLB	SC29534 - Hardcoded date in remittance processing

PTF #	Objects	Description
308289	CP2705 CP2805 CP2850B	SC29553 - V4R4 changes to returned data from system API
308261	BL4077 BL4077P1 BL4077P2 BL4077P3 BL4077P4 BL4077P5 BL4077P6	SC29499 - Directory Report does not print Address Details.
308238	CD0690BJ CD0692BJ CD0693BJ CD0694BJ CD0695BJ CD0696BJ	SC29460 - Credit Card Reports with date selection criteria, do not cater for dates in *MDY Format.
308234	LN5014	SC29451 - 'S/O not in last stage' message not System Parameterized
308233	SV0120 SV0120FM	SC29464 - Negative Units not requiring User Confirmation in Entry.
308213	PR5010	SC29539 - Resync - Service Request remains closed is Open S/O added to S/R which contains De-activated orders
308113	SV4020 SV4020P	SC29692 - Service Order Entry Statistics report has incorrect total displayed.
308020	SV2700CL	SC29613 - BNC Post driver intermittently corrupts parameter used for submitting SV2600BJ causing crash.
307942	SV0588 ICMSMSGF	SC29623 - Resync - Message SV05881 is missing in ICMSMSGF
307793	BL2012	SC29599 - Billing Rememberisation updates with wrong Cycle
307395	EC0011R	SC29790 - Can not exit Variable ECA screen once installment dates/amounts have been entered.
307388	BL5007 BL5007CL BL8001 PL0375	SC29805 - Resync - S&E Information screen inconsistent if the access number has been deactivated
307362	SV4110	SC29802 - Resync - S/O Activity Report not handling franchise
307339	PG1001	SC29615 - Service Order Purge Failing
307335	CD0720	SC29801 - Incorrect date presentation on Credit Charge Card Extraction Summary Report
307264	PL0560	SC29808 - Resync - The Cable Pair is physically deleted after the line has been disconnected; should have been changed to status 'S'.
307224	P@PL4410A PL4409	SC29809 - Resync - Screen Crash on Print Line Card Menu
307138	BL4218BJ	SC29810 - Security Refund Batch is posted instead of producing an Edit Listing.
307114	CD0692 CD0692P1	SC29820 - Spelling mistake in Credit/Charge Cards Cancelled Transaction Report header
306983	BL3800 BL3800FM BL3801 BL3801FM	SC29836 - Resync - Remittance Organisation Interface List and History Screens not standard

PTF #	Objects	Description
	BL3801 BL3801FM	List and History Screens not standard
306952	AN0051	SC29677 - Incorrect message displayed for pagers
306941	BL4075B	SC29804 - Resync - Incomplete Write Off Selection Report
306924	FM2505 FX100117 FX100117CL FX100117DF FX1117P1	SC29607 - Resync - Billing run dumps because of an error that occurs during fault post
306914	SP0052 SP0054 SP0054P1	SC29821 - Resync - Job Information Report does not have 'Total Report' figure
306852	CL1726	SC29829 - Resync - TAPIN Report ID should be the same as the file in error
306774	WF0191 ICMSMSGF	SC29824 - Resync - WFM - Classification Group Maint - Expiry Date not allowed.
306757	PL4090	SC29822 - Resync - Network Architecture Report has invalid header
306746	DB0158 DB0158DF	SC29819 - Resync - "No records displayed" message missing from empty S/O Type / Features Maintenance screen
306739	BL5022	Resync - A/R Adjustment Entry Current Balance amount is not consistent
306488	EC5010, EC5010DF	SC29792 - Resync - ECA Purge - The Date Parameter Role Should Be Clarified On The Screen
306416	CL2501 MS2507 PL0886 PR2580 SV2501 SV2502	SC29616 - S/O Posting Failure
306387	BR0020	SC29830 - Package Plan Discounting report needs to include adjustments
305712	SV3010	SC29813 - Resync - Service Order Stage Standard Warnings Not Working
305439	AA6000 AA6000CL AA6000DA	SC29771 - Resync - A6000 does not delete a completed BOW status record if there is no bucket found in the generic database
305272	SV2507.	SC29521 - Resync - Billing run failure caused by S/O Post (order type - ER)
305083	PL0260 PL0260CL ICMSMSGF	SC29770 - Resync - Switch Cut and EN Redesignation jobs crashing when submitted to batch
303810	PR5100	SC29562 - Resync - Populates wrong dates in the stage history file when the ICMS system date format is other than DMY.
003483	See section on new functionality.	Enhanced E911 Function

New Function

In an exception to our normal policy, this PTF Pak does contain an update to the E911 Function. This was developed as an I3.31 PTF - 003483 - and covers the following PMRs logged in Retain.

PMR #	Atlas #
15282	701496
00004	701103
86538	701155
02671	700927
01290	700388
01272	701357
00394	701188
24117	701177
00393	701400
01279	701147
23587	No atlas

The E-911 Business Process is made up of four distinct areas. They include the following:

- MSAG Load Maintenance Process
- Bulk SAM / Bulk Number Process
- Service Orders Process
- External Process.

In the E-911 MSAG Load Maintenance Process, new Master Street Address Guide (MSAG) records are received from an external supplier and loaded into an ICMS MSAG version database. The MSAG records are checked against a SAM Validation File and any exceptions can be printed and manually corrected. From there the updates are checked against either PLSAMV or MSAG, depending on which the business chooses. The updated records then become part of the Bulk SAM process

In the E-911 Bulk SAM / Bulk Number Process, Bulk Service Address Master and Bulk Number additions and changes result in new and modified Automatic Location Information (ALI) records. The ALI records are extracted and prepared for export to the Public Safety Answering Point (PSAP) Bureau.

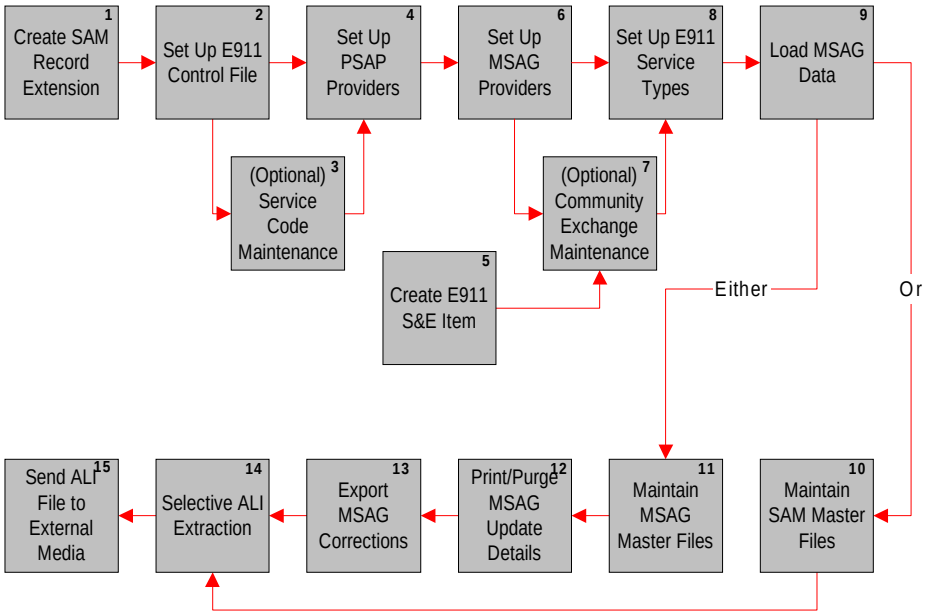
At the same time in the Service Order Process, day to day service order creation and maintenance also result in new and modified ALI records. These are extracted and prepared for export at the same time as those from the Bulk SAM and Number Processes.

In the E-911 External Process, PSAP Bureaus receive ALI updates from the Telco. The ALI detail is used by the emergency service to assist in locating the Emergency Caller.

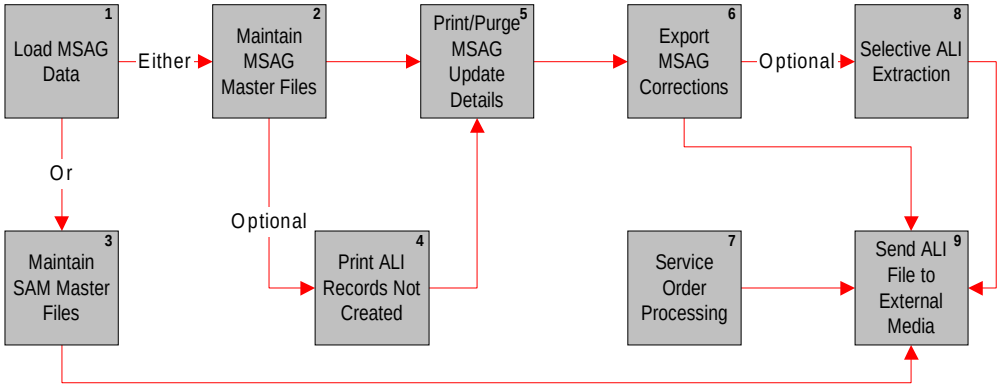
The diagrams below show the procedures that make up the Generic ICMS E911 Set Up and Ongoing Processes

Set Up and Ongoing Processes.

Generic ICMS E-911 Set Up Process



Generic ICMS E-911 Ongoing Process



For complete information on the E911 Process please refer to the updated version of the KnowledgeBase I3.31 E911 Update, which is available from your Country Level 2.

Y2K Related Items

There are no items in this Pak designated as Y2K related fixes.

Installation Instructions

For full details on how to install a PTF Pak please refer to the '*ICMS Product Support User Guide & Utilities Manual*', a copy of which can be obtained from your Country Level 2 Organisation.

Pre-Requisites

The following PTFs and Paks must be installed, in the following order, prior to the installation of the Feb-00 PTF Pak:

- 991231 Dec-99 PTF Pak sent 4 February, 2000

Database File Changes

Database file or datastructure changes in this PTF Pak are listed below. An up to date copy of ICMSFREF can be found in savefile RI33000231.

PTF	File / Datastructure	Comments
003483	EMCNTL00 EMEINF00 EMEINF01 EMEINF02 EMMUPD00 EMMUPD01 EMTRAL00 EMTRAL01 EMTRAL02 SCPARM00 SCPARM02 SCPARM03	File changes for E911. These must be run even if you are not intending to use the E911 function.

File Content Changes

The following files have been shipped with content. For these files below, the content changes **must be reviewed** for each file prior to installing the changes to ensure that they are appropriate for your site.

For those files with a 'C' (copy file add) type extract you must confirm that each record being added does not already exist in your database. It is possible that records have either been manually added to your database with the same key or added by prior application of the individual PTF.

For those files with an 'R' (copy file replace) type extract the content changes should be reviewed prior to installation to determine which if any of the changes should to be applied to your database.

You should -

1. Ensure that a backup of the file is available
2. Compare the contents of the current version being used with the contents of the file in this Release and note the additions and/or any changes or deletions.
3. Determine whether or not you should follow the database instructions or instead add the new or changed records to your version of the file manually or not at all if the records exist already in the copy of the file in your database.

If these procedures are not followed then the potential is there to overwrite data that has been configured to suit your specific implementation, including changes made to descriptions for NLS.

REMEMBER it is critical that no content changes be applied without ensuring that you will not lose data from the file that is specific to your site.

PTF	File	Comments
003483	SYMSEV00	Record added to ensure that any S/O that fails E911 Validation after Auto Activation goes to the E911 Error Stage.

Conversions

PTF	Object	Comments
308339	FX308339 FX308339CL FX308339DF FX3339P1	Datafix to correct the century for dates in three Plant Linecard Files
306924	FX100117 FX100117CL FX100117DF FX1117P1	Datafix to change Service Code from TL to appropriate non-TL Service Code for Faults posted for non-TL services
003483	CV348301 CV348301P1 CV348302 CV348303 CV348303P1	All Customers intending to use the enhanced Enhanced E911 functionality **must run all** the Conversions outlined in the Post Install Instructions. The Post Install Instructions form part of the PTF Pak Implementation Instructions contained in the Documentation Savefile II33000231 Those Customers who are **not** intending to use the Enhanced E911 functionality **must run** the conversions for files SCPARM00 and EMCNTL00. This is required to populate added fields in these files with default values. Please refer to the Post Install Instructions for full details.

Other Details

The Pak should be installed in its entirety. You cannot choose individual objects from within it and install these only. The only exception is the updating of any Content File changes as detailed above.

Feedback

If you have any issues with this PTF Pak, or suggestions for improving the process please send it via Notes E-mail to **"ICMSU Support/New Zealand/IBM@IBMNZ"**, or Internet Id **"ICMSUSUP@nz1.ibm.com".** Please use the problem reporting process for any ICMS product problems.
