In this section you will learn how to edit an existing template and change the selection criteria.

The view entry panel is displayed

```
 Process   Options   Help
_____
File Manager                    View Entry Panel
Command ===> █_____

Input Partitioned, Sequential or VSAM Data Set, or HFS file:
   Data set/path name ADLAB.CUST1_____    +
   Member . . . . . . _____      (Blank or pattern for member list)
   Volume serial  . . _____        (If not cataloged)
   Start position . . _____   +
   Record limit . . . _____      Record sampling  _

Copybook or Template:
   Data set name  .   'TSS12.ADLAB.TEMPLATE'_____
   Member . . . . .   CUST1000      (Blank or pattern for member list)
Processing Options:
 Copybook/template   Start position type   Enter "/" to select option
 1  1. Above          _  1. Key            /  Edit template   2 Type (1,2,S)
    2. Previous          2. RBA            _  Include only selected records
    3. None              3. Record number  _  Binary mode, reclen 80___
    4. Create dynamic

 F1=Help      F2=Split     F3=Exit      F4=Expand     F7=Backward   F8
 F9=Swap      F10=Left     F11=Right    F12=Cancel                  Enter
```

 F7=Up        F8=Down     F9=Swap      F10=Left     F11=Right   F12=Ca   F3
```

4   IBM File Manager for z/OS Base Feature for z/OS V10 tutorial   © 2010 IBM Corporation

The existing record selection criteria in the saved template will select only records with an acct-balance grater than 1000. In this example, for a record to be selected, the acct-balance has to be > 1000 and the cust-id has to be less than 5000. Press F3 to save the criteria updates and process the template.

The template was saved and the results from adding criteria are displayed

The template was updated and saved so now only records meeting the criteria specified for acct-balance and cust-id are displayed.

Press F3 twice to return the primary option menu.

That is the end of this section, which described how to change an existing copybook template.
