# IBM® WebSphere® Everyplace® Deployment V6 Changing the Server Administrator Password

@business on demand.

© 2005 IBM Corporation  
Updated October 3, 2005

## Configuration Wizard Overview

- The Everyplace Deployment configuration wizard:
  - ▶ Allows install to default many options
  - ▶ Allows additional configuration needed for production
  - ▶ Hides the underlying complexities
  - ▶ Simplifies choices
- Available options include:
  - ▶ Upgrade to Microsoft® Active Directory 2003
  - ▶ Update Everyplace Deployment Administrator Password
  - ▶ Update DB2® UDB Administrator Password

## Using the Configuration Wizard

- Configuration Wizard is accessible from Start Menu  
... Programs ... IBM WebSphere ... WebSphere  
Everyplace Deployment
  
- Select the configuration to change
  - ▶ Upgrade to Active Directory 2003
  - ▶ Update WSED Administrator Password
  - ▶ Update DB2 Administrator Password

## Updating Everyplace Deployment Administrator Password

- Behavior is different depending on user registry
  - ▶ Local user registry - sets the password
  - ▶ Active Directory - assumes password is already changed
- Updates server configuration with new password

## Verifying the Configuration Change

- Run First Steps from the Windows Start Menu ... Programs ... IBM WebSphere ... WebSphere Everyplace Deployment
- Select Verify Installation

## Troubleshooting the Configuration Change

### General

- Verify that the Everyplace Deployment servers are stopped
- Check eds\_config\_trace.log

Armonk, NY 10504-1785  
U.S.A.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.
