# Innovate2013

 Key to Innovate

## Leveraging IBM JazzHub for Development & testing on the Cloud

Sreenivasan (Raj) Rajagopal

Senior Product Manager, IBM Rational

[rajagops@us.ibm.com](mailto:rajagops@us.ibm.com)

**Twitter** : @SreenivasanRaj/@JazzHub

# Agenda

- **What** is JazzHub?
- **Why** Develop in the cloud?
- **How** to leverage JazzHub for Dev & Test on the cloud?

# Click. Code. Create.

Everything you need to build great software.

# JazzHub Beta 3

Make your next project easy.

Explore projects

Create a project

Working with classroom and research projects?  
Visit the Academic JazzHub.

### Public or private

Share your genius *in free public projects*, or keep it confidential with private projects.\*

\*Private projects free for beta!

### Find your rhythm

Simple bug tracking or serious agile team development. Integrated tracking, etc.

### Develop with free

Code in the cloud with you love... Eclipse, Visual Studio, the built-in Jazz editor. You can even link your GitHub repo.

# JazzHub: IBM Rational's Premier SaaS offering

## • What is JazzHub?

–JazzHub is a fully hosted software development tool in the cloud, complete with task tracking, agile planning, and integrated source control

## • Key capabilities and value

–JazzHub allows users to develop and collaborate on software projects in the cloud. Projects can be public– and exposed to the rest of the web– or private, and only seen by their team.

–Easy to use and extremely quick time to value

- No downloads required, users can register and create their first project in under a minute

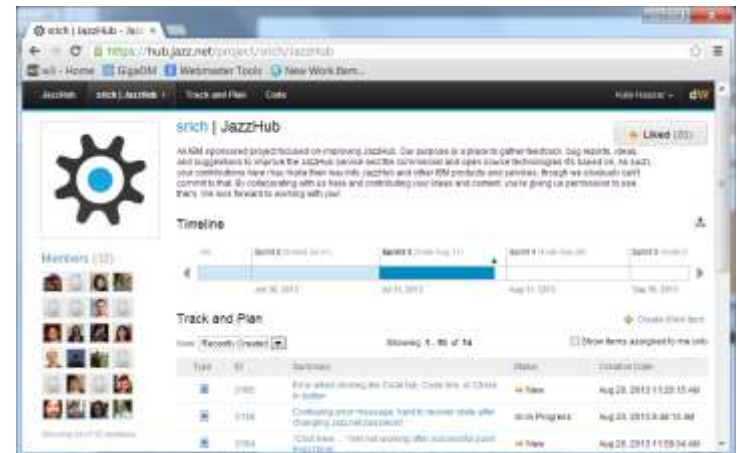

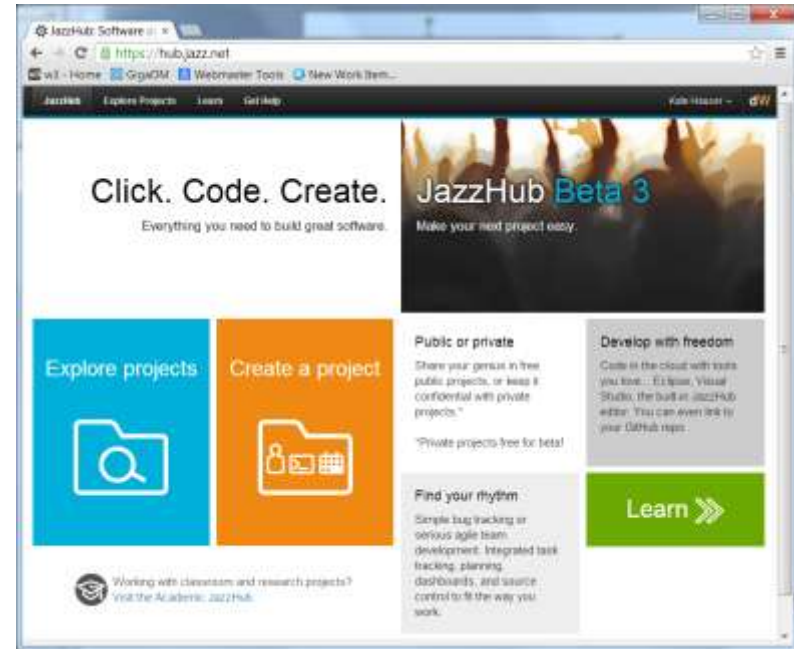

–Flexible code management options: use JazzHub's browser based IDE, code locally with an Eclipse client, or integrate with an existing GitHub project.

–IBM's premiere hosted environment for Cloud application development, with built-in DevOps capabilities

## • Call to action

–Explore **JazzHub.com** and register to create your own project

–Come, build great software !

# JazzHub: A Self Evident, Self-Serve Software as a Service

Value	Capability
Simplicity and Ease of Use. Get Started on real work in less than a minute	Start an Agile Project in less than a minute Create as many as you like
	Manage all your Projects in one view. Easily Invite Members to join your projects
	Search Public Projects to find interesting info that you can reuse Project Details, Read Me, Links – Better Searchability/Visibility (Community Improvements), Seamless Code Re-use – Tag, Discover , Share
	Create Private or Public Projects – For Free
Enterprise Class Collaborative Development Capabilities that increase productivity for individuals, team and team of teams.	Agile Planning & Tracking and Industry Leading Change Management
	Source Code Control – Jazz SCM
	ORION based IDE on the WEB
	Full Eclipse Client Support
	*GitHub Integration
	A First Class Project Dashboard that provides a single version of the truth
Personal Task Management (find a better value)	Manage all your Projects in one view. Easily Invite Members to join your projects. Control your Project
Online Community Support – Engineering Direct Access	Via Online Help, Forums – Our engineers monitor and respond to issues directly
Team Organization	(Post October Capability)
High Reliability & Trust	SoftLayer based Infrastructure

Software as a Service

# WHY DEVELOP IN THE CLOUD?

# Context : Systems of Engagement

**Figure 3** Systems Of Engagement Are The Future Of Technology-Led Business Innovation

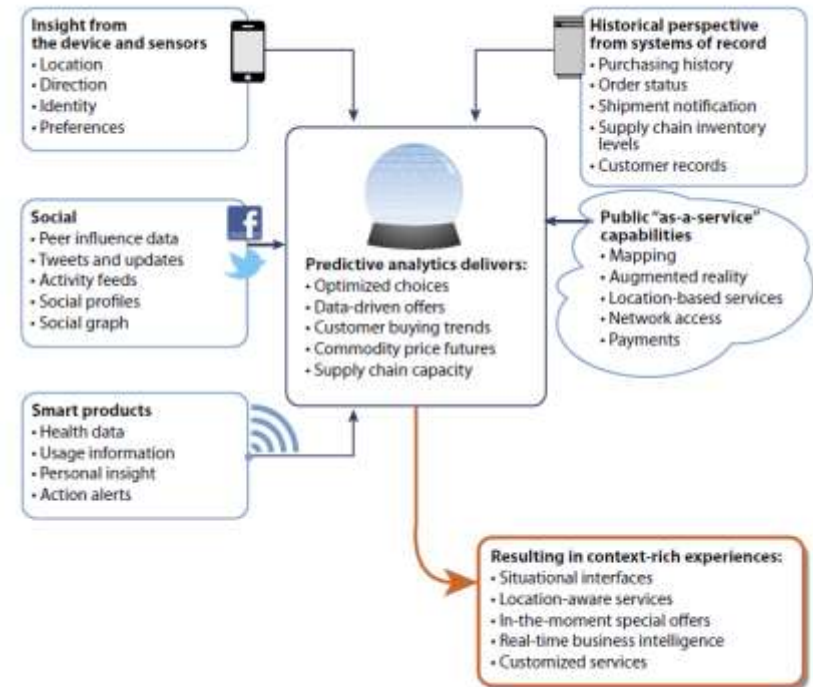

60544 Source: Forrester Research, Inc.

Engagement goal	What makes it possible	Enabling technologies	Examples
Empowering people	Harnessing social and mobile collaboration tools to connect people to each other and to you	<ul style="list-style-type: none"> <li>• Social networks</li> <li>• Mobile collaboration</li> <li>• Wireless networks</li> <li>• SaaS solutions</li> </ul>	<ul style="list-style-type: none"> <li>• Activity feed apps that keep mobile pros in touch</li> <li>• Social apps that capture status, complaints, and ideas</li> </ul>
Projecting value	Providing task-specific apps to reach customers in their context and moments of decision	<ul style="list-style-type: none"> <li>• Task-oriented apps</li> <li>• Business app stores</li> <li>• Links to systems of record</li> <li>• Predictive analytics</li> </ul>	<ul style="list-style-type: none"> <li>• B2B catalog app with pricing and availability</li> <li>• Order management mobile app linked to the web app</li> </ul>
Accelerating decisions	Putting information, data, and analytics into the hands of decision-makers at the moment of determination	<ul style="list-style-type: none"> <li>• Data dashboards</li> <li>• Predictive analytics</li> <li>• Search</li> <li>• Information access</li> </ul>	<ul style="list-style-type: none"> <li>• Data dashboard with operations or financial data</li> <li>• Mobile access to the portal, search, and files</li> </ul>
Developing smart products	Using mobile apps as the control interface and to extend products' value and differentiation	<ul style="list-style-type: none"> <li>• CPUs and sensors</li> <li>• Wireless connections</li> <li>• Smart app APIs</li> <li>• App store</li> </ul>	<ul style="list-style-type: none"> <li>• Smart dishwasher that tracks energy use</li> <li>• Smart scale with weight management app ecosystem</li> </ul>

Source: Mobile is the New Face of Engagement, 2012 © Forrester Research, 2012

**Figure 4** Systems Of Engagement Use Context To Deliver A Great Mobile Experience

60544 Source: Forrester Research, Inc.

## Terminology :

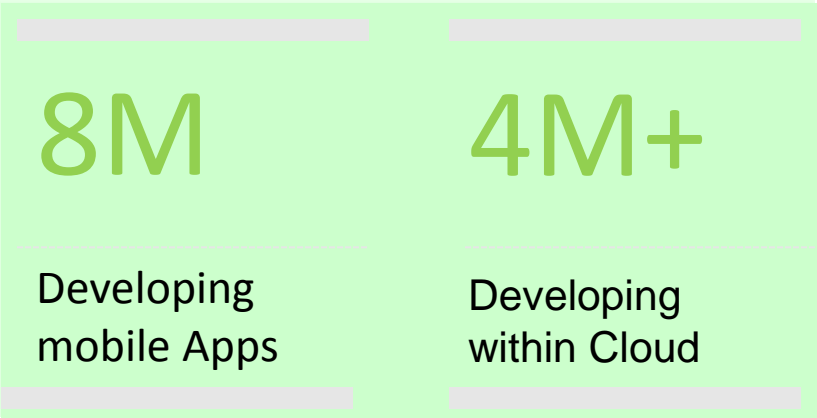

- **Systems of Engagement:** new types of application development that harnesses mobile, social, cloud, and big data to deliver contextual, user-focused apps and smart products
- **Systems of Interaction:** applications that integrate back-end/SoE systems with SoE
- **Systems of Record:** traditional back-office business applications

# A Shift under way

## Global Developer Population 2013

2013 Global Developer Population:

# 18M+

Targeted audience

Strong affinity with targeted audience

### Growth Estimates:

- Estimated Global Dev Population by 2017: 23M+
- **Estimated Mobile/Cloud Dev: over 70% of all new dev**

# The new development reality:

**Consumerization  
of technology**

*Developers making more  
decisions*

**Cloud & Mobile  
Revolution**

*Changing the types of  
software that gets built*

**Systems of  
engagement**

*Line of Business and  
marketing driving*

***New Development Reality***

# Systems of Engagement – A Typical Development Scenario

## Mobile Dev, Test & Deploy

- Identify Mobile Platform to target (iOS,Android)
- Write Code (xCode,Eclipse, other)
- Use **jQueryMobile** (if targeting multiple devices)
- Test using Simulators
- Include **BugSense** to monitor quality
- (Optionally) use uTest Services for test coverage
- Lean Start Up** Process
- Development Collaboration using **GitHub, Atlassian, BaseCamp, Adobe / Balsamiq / MockingBird (wireframe)**
- Deploy to Apple / Android Stores
- (optionally) Build/host a WebSite(HTML5) on Heroku to download Apps
- Dev collaboration using **GitHub**..pick any off the shelf issue mgt sln

## Cloud App Dev, Test & Deploy

- Identify web-stack to use (eg: **node.js** for real-time applications like online games, collaboration tools, chats etc., mongo dB for storing/operating on unstructured data, Expressjs for UI)
- Use **IDEs like codenvy, c9, orion**
  - Desktop IDEs : Eclipse , Visual Studio
- Write code
- Use **jQuery** as needed
- Deploy to a PaaS (**AWS, Google App Engine, Heroku, Azure**) to Scale
- Use **MemCache, NewRelic** and other services as needed to manage memory, monitor performance etc
- Use **Google Chrome Dev tools** (eg: node inspector) to debug
- Lean Start up** Process
- Dev collaboration using **GitHub**..pick any issue mgt : **Atlassian, Trello,omega.**

# The Case for Developing in the Cloud

- More and more applications have moved to the Web, to mobile devices, and are being run in Cloud environments
- Rational's Application lifecycle tools offer lifecycle capabilities in the Web
- But Development tasks are largely still done on the desktop in environment like Eclipse or Visual Studio
- Could we offer this experience in the Web, and integrate it into the software lifecycle?
- This is what we're delivering with JazzHub.

# The new development reality:

**Consumerization  
of technology**

*Developers making more  
decisions*

**Cloud & Mobile  
Revolution**

*Changing the types of  
software that gets built*

**Systems of engagement**

*Line of Business and  
marketing driving*

***New Development Reality***

# Who is this New Developer? What do they need to develop applications in this new environment ?

- Who are they?

- Trust open source model to deliver high quality free software

- Use tools like Heroku, GitHub, and AWS

- What do they want? How do they work?

- Tool preference heavily influenced by tool popularity and what mentors use

- Seek answers for technical problems online via search, forum interactions, communities, etc.

- Value simple getting started, ease of use and core functions

- Comfortable with cloud / SaaS model – may already be paying for multiple cloud offerings in personal life (Amazon storage, Spotify, Dropbox, etc.)

- Prefer straight forward pricing.

- Instant gratification– greatly reduced development cycles

40% of developers are 30 or younger.

Average age worldwide is 39, North America avg. age is 49

Agile techniques are used by 11.2 million+

1 in 3 use cloud/virtualization

## Cloud products and services

### Private Cloud

Transform your business by reducing IT complexity and empowering innovation.

### Infrastructure as a service (IaaS)

Scale new business models with easily customized enterprise-class virtual resources.

### Platform as a service (PaaS)

Develop cloud apps fast with a collaborative, cloud-based, automated platform.

### Software as a service (SaaS)

Respond to market trends faster than ever with new applications.

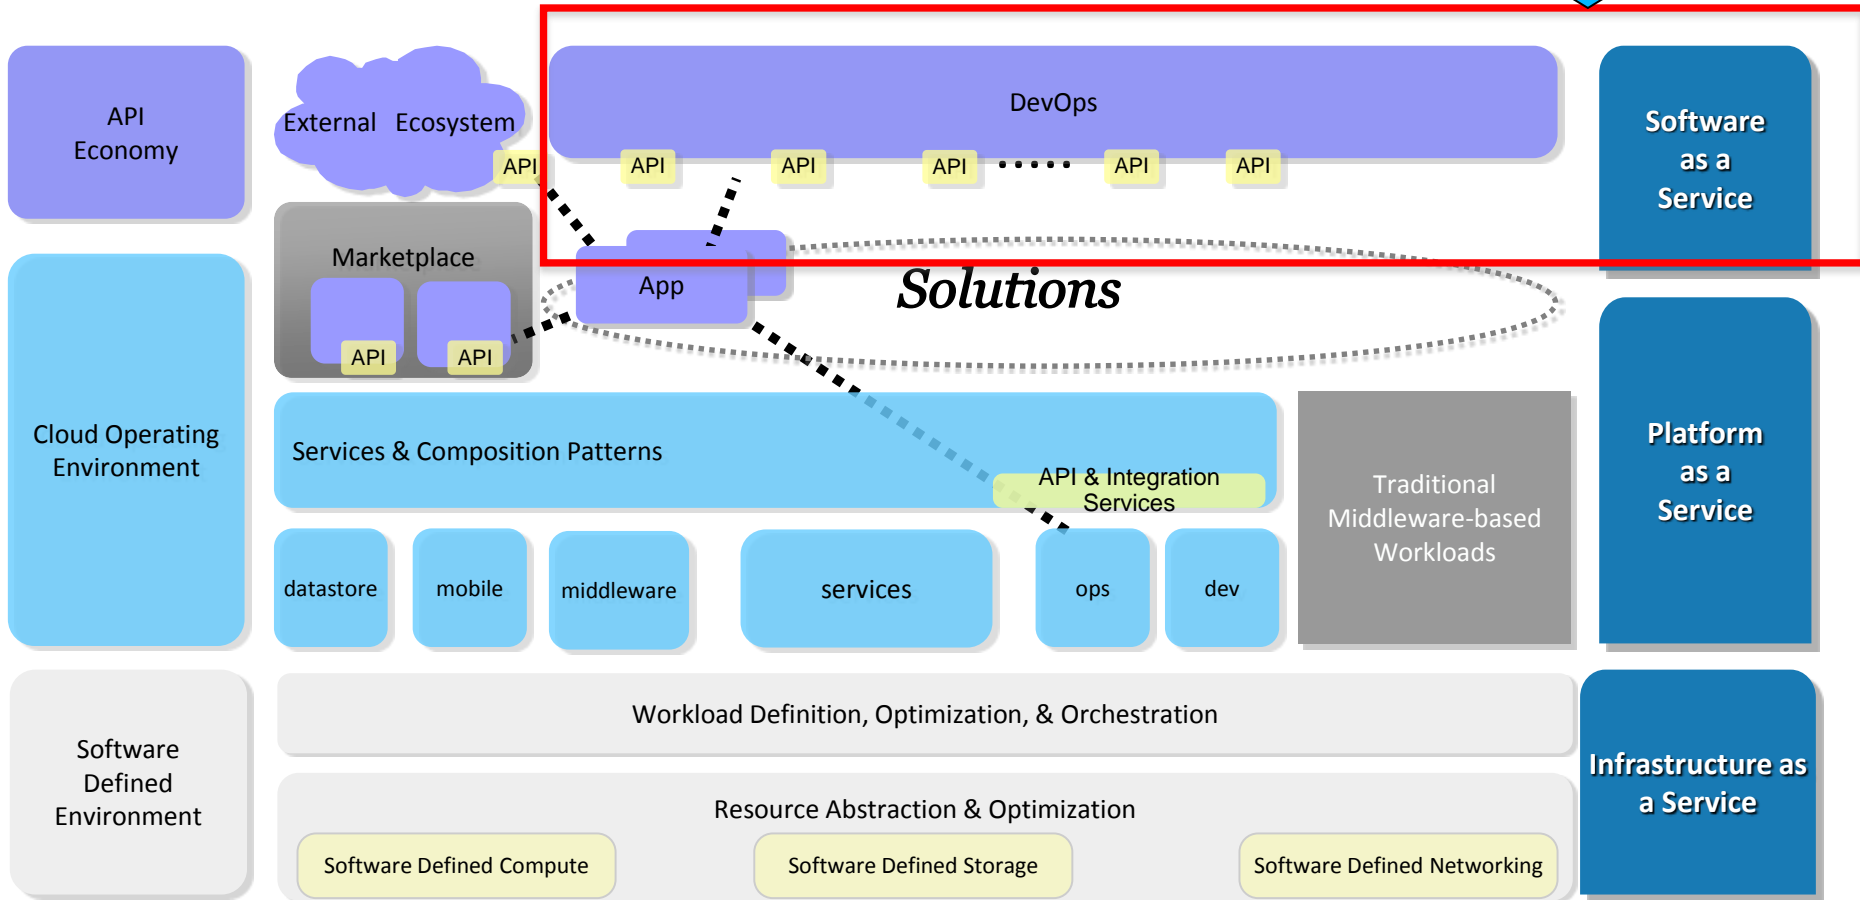

### Consulting and implementation

Move to cloud confidently with IBM expert consultants and proven services.

# IBM's Cloud Delivery Model

Leveraging IBM JazzHub for Development & testing on the Cloud

# The Cloud Delivery Model – Public and OnPremise

- Fundamentals :

- IaaS - SoftLayer

- PaaS – Smart Cloud Application Services (SCAS) , Cloud OE /BlueMix (future)

- SaaS – Smarter Commerce SaaS, JazzHub

- Delivery Models :

- Public Cloud :**

- Single Tenant/ Shared Resources (eg : CLMS)

- Single Tenant / Dedicated Resources

- Multi Tenant (eg : JazzHub)

- On Premise :**

- A Cloud on premise

# IBM's Premier Solution for the new development reality

*Resources tools and community to help developers build applications for mobile, cloud, big data*

## The New DeveloperWorks

**Network** : Expansion of developerWorks into a federation of interconnected web resources

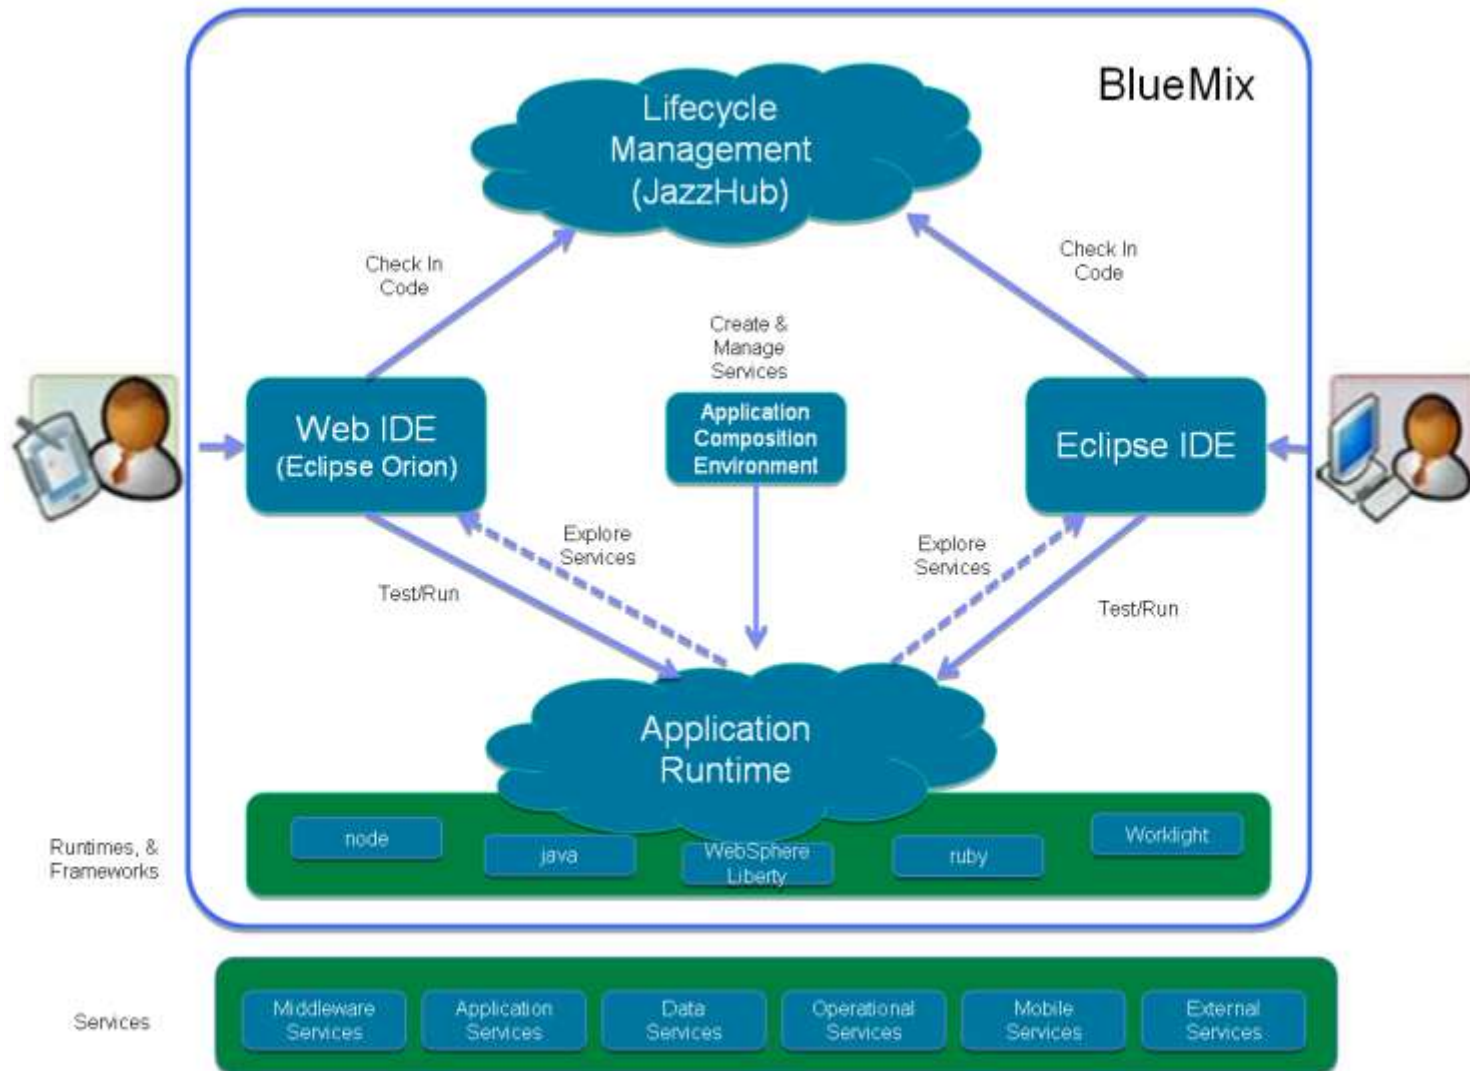

–Enable developers to “connect”, “learn”, and actually develop through the developerWorks site

**BlueMix** : PaaS technology stack and website that enables developers to rapidly build, deploy, and manage applications – preview coming soon.

**JazzHub**: JazzHub is a fully hosted, cloud based CLM installation tailored to enable quicker startup and time to value –

# IBM JazzHub and BlueMix:

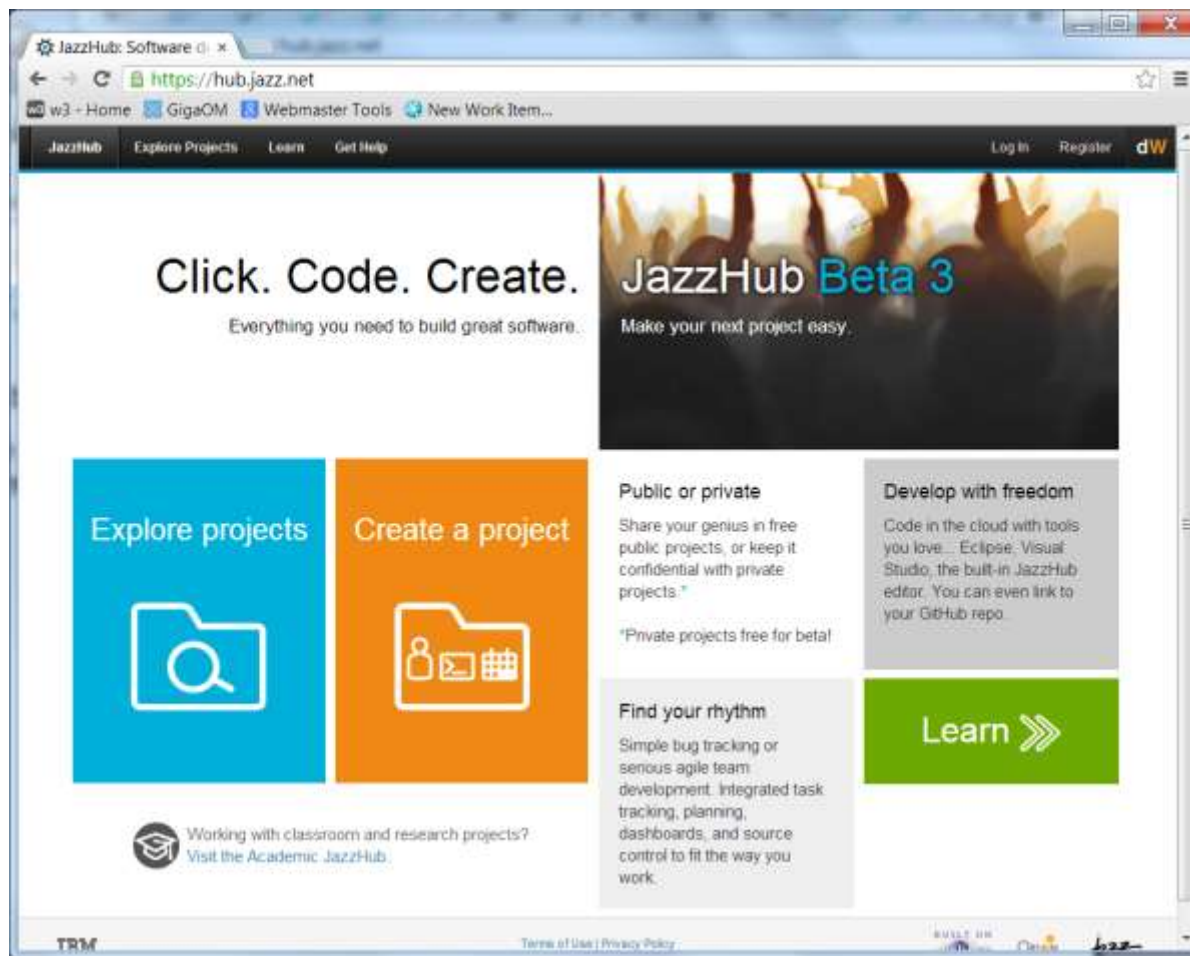

Software as a Service

# HOW TO DEVELOP IN THE CLOUD USING JAZZHUB CAPABILITIES

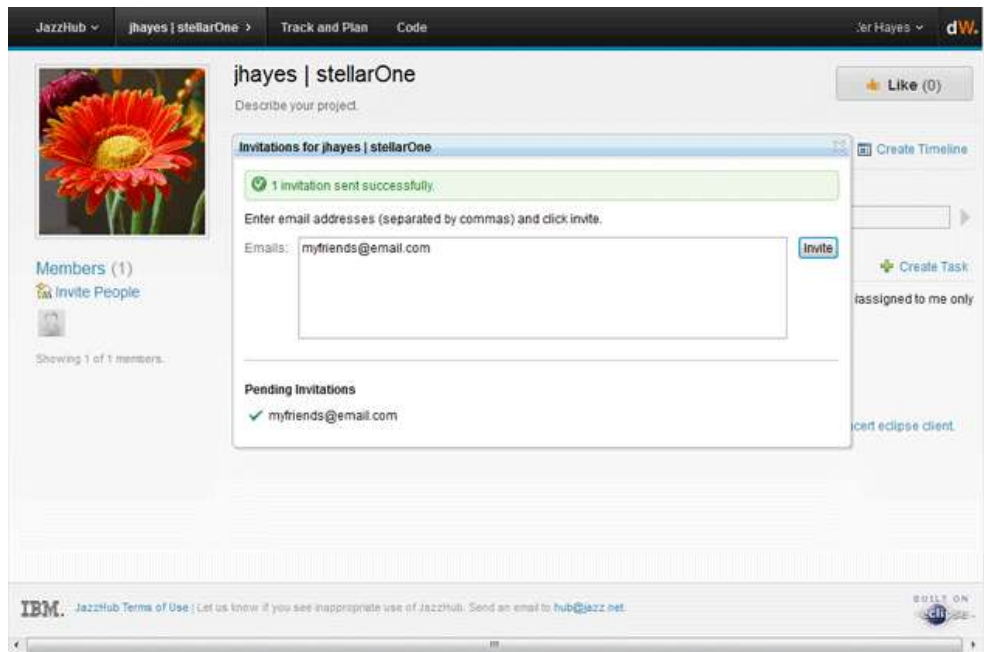

# JazzHub's cloud deployment makes getting started simple and fast.

- We take care of the cloud so you can take care of the code. With no servers to install, configure or maintain, you have more time (and money) for the fun stuff.

# Collaborate seamlessly on public or private projects

- Inviting team members to a project is easy, all you need is an email address
- No matter where you are in the world, what time zone... all you need is your web browser to access all that JazzHub has to offer
- JazzHub “projects” are built for collaboration. Team members can chat, add comments, and subscribe each other to stay aware of what other project members are doing.
- With public and private projects, you can easily choose who sees your project and how you engage broader communities

# With powerful task tracking, planning, and source code management, JazzHub has everything you need to build great software.

- Track and plan in context. Plans and code are smartly linked, so things stay in sync with development team progress.
- Create stories, tasks, and defects to describe and track project work.
- With a built in process template for agile development, immediately start using agile planning tools for the product backlog, releases, and sprints.
- Choose how you code:
  - Easily edit any text file or script from within your browser. If your project contains JavaScript, HTML, CSS, Ruby or PHP code, the JazzHub editor is likely all you need to make changes.
  - Eclipse and .NET developers -- connect your projects to source code in Rational Team Concert client for Eclipse or Visual Studio.

# JazzHub Features and Capabilities

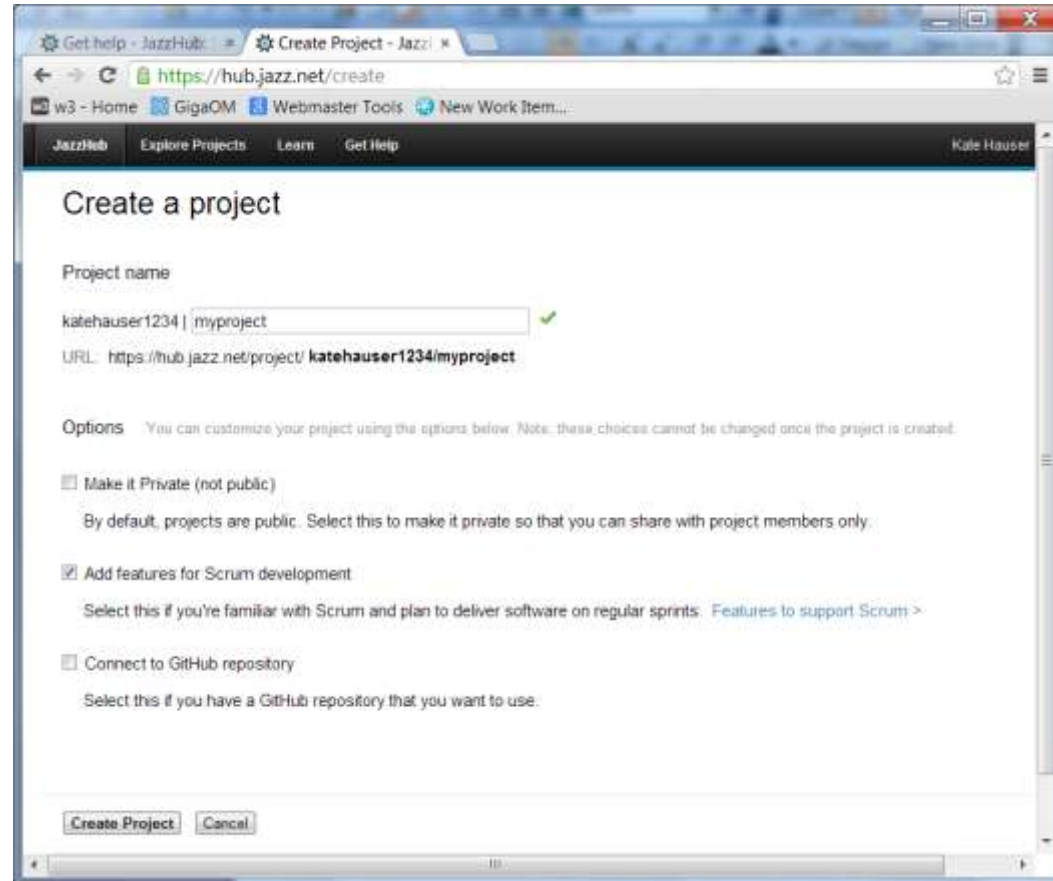

Feature	Value and explanation
Hosted on the cloud	Instant access, no need to worry about downloading software or managing upgrades– we take care of the cloud so you can take care of the code.
Collaborative, project-based software development	Built-in capabilities that make collaboration easier. Teammates can chat, add comments, and subscribe each other to stay aware of what other project members are doing.
Flexible coding and source code management	Use our built-in browser-based IDE or the Rational team concert client to connect to eclipse or visual studio.
Enterprise-quality planning and tracking	Based on the enterprise-quality capabilities of Rational Team Concert, you can customize your timelines and tasks to
Agile process support	Choose our agile process template to help your team practice agile development.
GitHub integration	Already working on code in GitHub? Use our GitHub integration to manage your code in JazzHub
Harness community power	Search for projects that are of interest to you, and likewise tag your public project to make it easier for the broader community to find your project.
Organization and individual accounts	Use our individual account to work on personal projects and/or create a presence for your organization on JazzHub and use our tailored Organization account to see and manage all of your company's projects in one place.

Coming soon

# Register and create a project in minutes

- Just make a couple decisions first:
  - Do you want your project to be public or private?
  - Do you want to do agile software development?
- And you're done!

The screenshot shows a web browser window with the URL <https://hub.jazz.net/create>. The page title is "Create a project". The form includes a "Project name" field with the value "myproject" and a green checkmark. Below it, the "URL" is displayed as <https://hub.jazz.net/project/katehauser1234/myproject>. The "Options" section contains three checkboxes: "Make it Private (not public)" (unchecked), "Add features for Scrum development" (checked), and "Connect to GitHub repository" (unchecked). At the bottom, there are "Create Project" and "Cancel" buttons.

What is JazzHub?

What's in a project?

How much does it cost?

\$0

## Public projects

Simply said, public projects are free – create as many as you like. Likewise, contribute to any project you're invited to, at no cost. We may introduce practical limits, such as on storage, as part of future JazzHub price plans.

\$0 during beta

## Private projects

We anticipate monthly fees for private projects in the future. We're not ready to share price plans yet, but we promise to give you advance notice and to help you understand your options before the pricing takes effect.

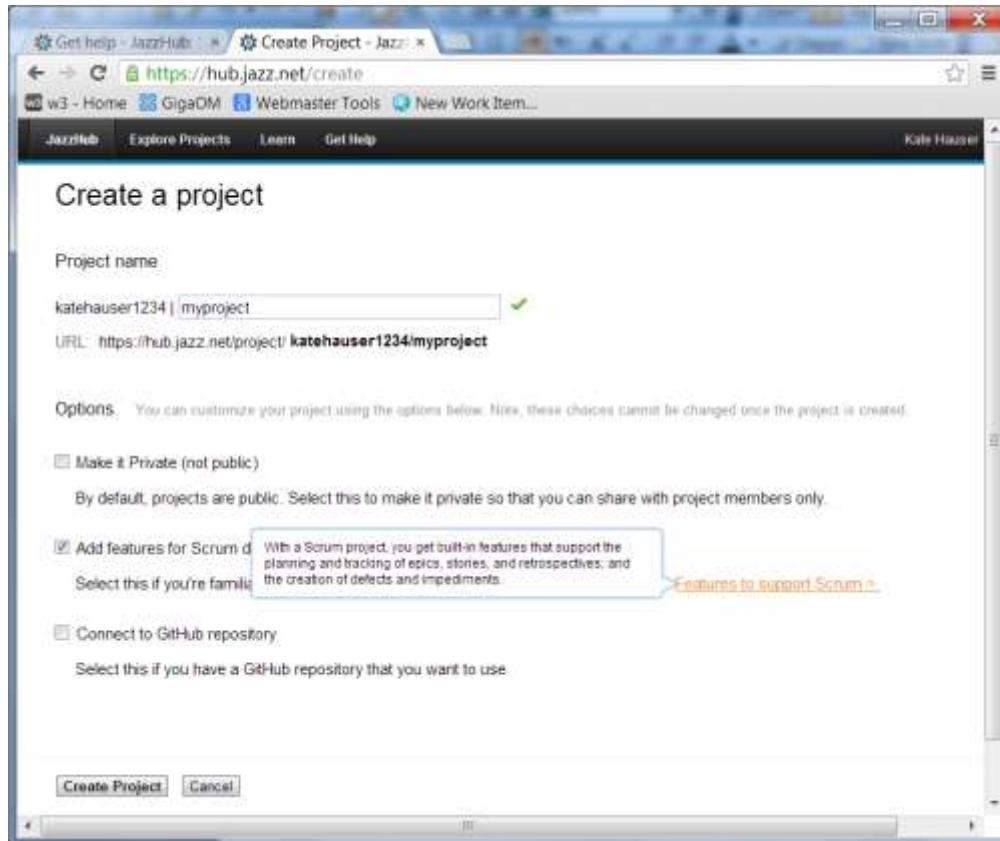

Try for free!

Explore projects

Create a project

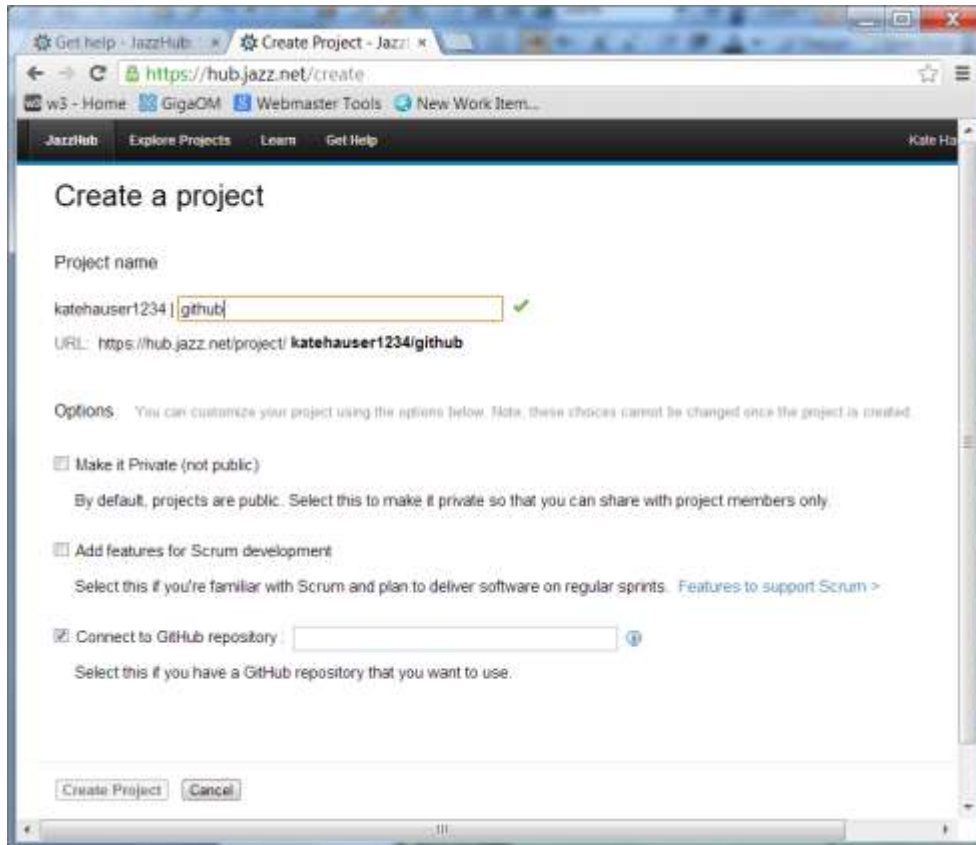

# Get started with a simple project, or use our Scrum template to practice agile development

- With a Scrum project, you get built-in features that support the planning and tracking of epics, stories, and retrospectives; and the creation of defects and impediments.

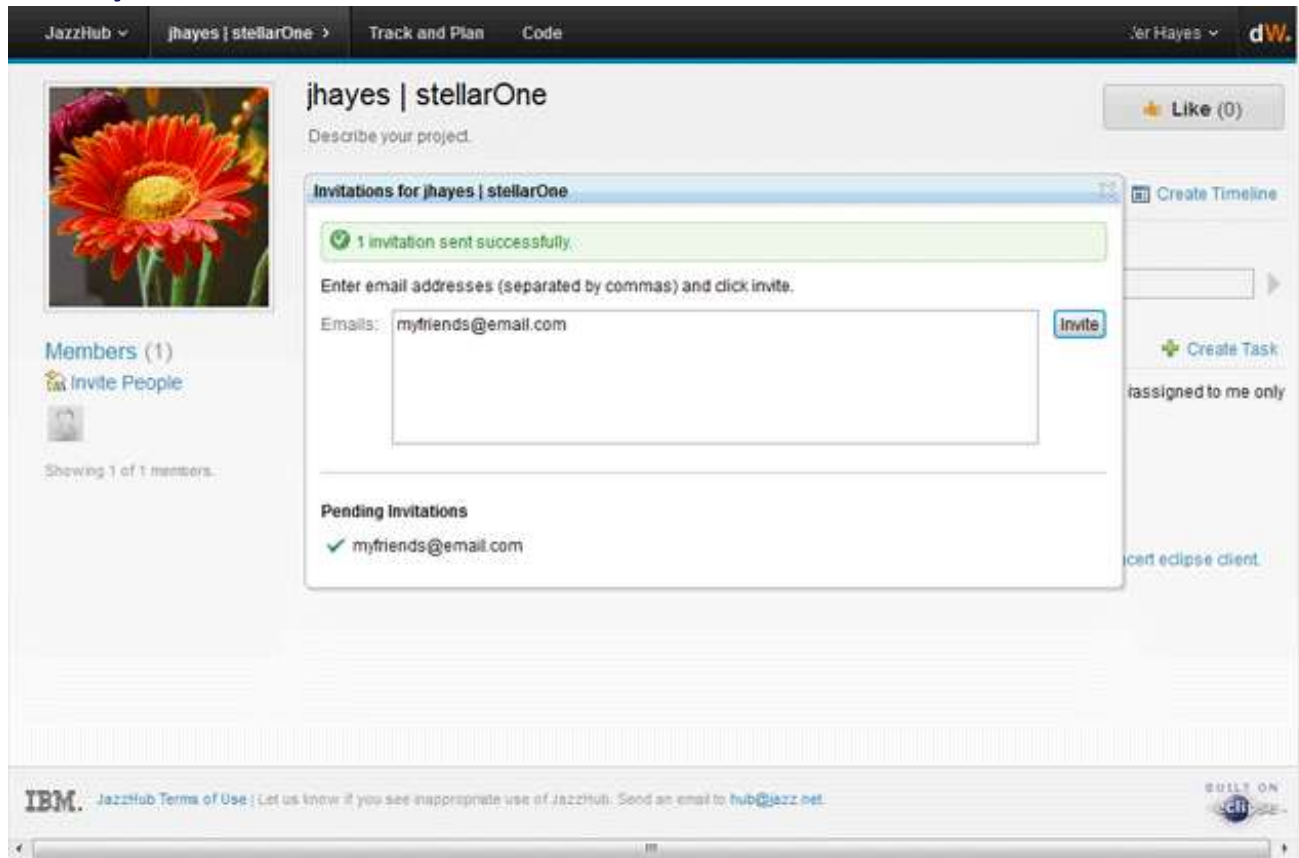

# Got GitHub? Use our GitHub integration to track and plan with

- With our GitHub integration you can track and plan with JazzHub using the code you've stored in your GitHub repository
- You can even edit the code stored in your GitHub repository using the JazzHub web editor

# Easily invite team members to your project

- All you need is an email address!

The screenshot displays the JazzHub interface for a project named "stellarOne". The top navigation bar includes "JazzHub", "jhayes | stellarOne", "Track and Plan", "Code", and user information "er Hayes" and "dW.". On the left, there is a profile picture of a red flower, a "Members (1)" section with an "Invite People" button, and a "Showing 1 of 1 members" indicator. The main content area is titled "Invitations for jhayes | stellarOne" and features a green notification bar stating "1 invitation sent successfully". Below this, there is a text input field with the instruction "Enter email addresses (separated by commas) and click invite." and the email address "myfriends@email.com" entered. An "Invite" button is positioned to the right of the input field. A "Pending Invitations" section below shows a list with a checkmark and the email "myfriends@email.com". On the right side, there are buttons for "Like (0)", "Create Timeline", "Create Task", and a filter for "Assigned to me only". The bottom of the interface includes the IBM logo, "JazzHub Terms of Use", and a "BUILT ON Eclipse" logo.

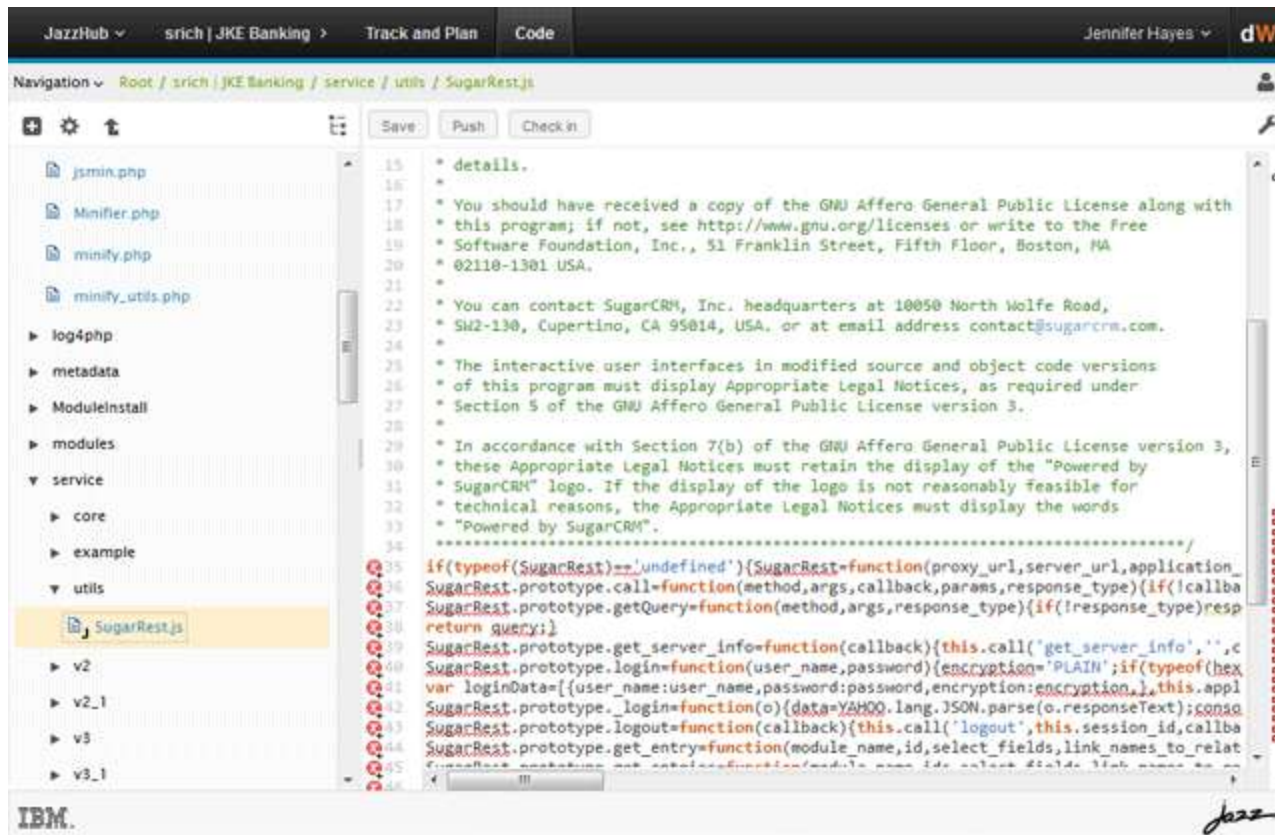

# Start creating tasks and planning out work that needs to be done

The screenshot displays the JazzHub web interface for creating a new task. The top navigation bar includes 'JazzHub', 'srich | JKE Banking', 'Track and Plan', and 'Code'. The user 'Jennifer Hayes' is logged in. The main content area is titled 'Task 505' and features a 'Summary' field with the text 'Define a new build'. Below this are tabs for 'Overview', 'Links', 'Approvals', and 'History'. The 'Details' section contains various fields: 'Type' (Task), 'Priority' (Unassigned), 'Filed Against' (srich | JKE Banking), 'Planned For' (Backlog), 'Project Area' (srich | JKE Banking), 'Team Area' (srich | JKE Banking), 'Creation Date' (May 9, 2013 6:45 PM), 'Created By' (jazzhub\_user), 'Owned By' (jazzhub\_user), and 'Due Date'. A 'Quick Information' box on the right shows 'Subscribers (1): j' and 'Mentions (2): 1, 2'. The 'Description' section at the bottom contains the text 'Define a new build' and 'To define a new build for your team: 1. Open the Team Artifacts view and expand the node corresponding to your connected project area.'

# Get coding! With our built-in browser based source code manager, you can get started immediately, or use an alternative downloadable client and link to our Jazz SCM

# Using Eclipse Client to Develop & Test with JazzHub

## 1. Explore a Project and go the Project's Landing Page

### sltrunzo | PSWhiteboard

Try out this Worklight-based whiteboard free in the Apple App Store: <http://pswhiteboard.com> Because design is integral to everything we do at PointSource, we need the ability to sketch our ideas and concepts while on the go or from anywhere, sitting in an airport, huddled around a shared desk, or over a cup of coffee. The PS Whiteboard app allows you to capture your ideas elegantly in a free solution without the nuisance of ads getting in your way. Import or capture a photo or document and sketch on top of that to mockup drawings or wireframes and designs. PS Whiteboard allows you to write in 6 different colors and 5 different marker sizes, and you can erase without removing the background image. After you have captured your ideas and simple collaborations, you can save and share them for continued collaboration. The PS Whiteboard app was created using IBM Worklight.

### Timeline

## 2. Under the Code Section, follow set up instructions for Eclipse :

**Eclipse user?** Connect to this project locally using Rational Team Concert. [Here's how to get setup.](#)

1. Download the Rational Team Concert Eclipse client.
2. In your client, click **File > Accept Team Invitation.**
3. Paste the text below into the Accept Invitation text field:

```
teamRepository=https://hub.jazz.net/com01
userId=srajagop
userName=Sreenivasan Rajagopal
projectAreaName=sltrunzo | PSWhiteboard
```

# All Set, Get Coding: Dev & Test with JazzHub

Leverage the power of public projects. With JazzHub, you can easily share the work you're doing with a broader audience.

The screenshot shows the JazzHub website interface. At the top, there is a navigation bar with 'JazzHub', 'Explore Projects', 'Learn', and 'Get Help'. A user profile 'Jennifer Hayes' and a 'dW.' logo are visible in the top right. Below the navigation bar, the main heading is 'Projects', with a 'Create a Project' button on the right. Underneath, there are tabs for 'My Projects', 'Projects I Like', and 'Public Projects', along with 'INVITATIONS' and 'REQUESTS' links. A search bar is present with the placeholder text 'Type to search projects'. The main content area is divided into three columns: 'Trending', 'Most Active', and 'JazzHub Activity'. The 'Trending' section lists three projects: 'shilpat | Forest fires' (0 activities), 'mdelder | CloudyTweeter' (8 activities), and 'smokeybear | forest fires' (3 activities). The 'Most Active' section lists three projects: 'srich | JKE Banking' (95 activities), 'bobb | scrum2' (11 activities), and 'srich | JazzHub' (10 activities). The 'JazzHub Activity' section shows a list of recent actions, including 'Adam Archer liked agarcher11 | Demo Project' (5 hours ago), 'Adam Archer (test) created a new project called agarcher11 | Demo Project' (5 hours ago), 'Ram Vennam created a new project called rvennam | acmeLauren2' (1 day ago), and 'Sreenivasan Rajagopal created a new project called srajagop | Jazz It' (1 day ago).

Software as a Service

# A QUICK CASE STUDY

# Point Source uses JazHub to develop & test solutions in the cloud

## Point Source – A Key IBM Business Partner

# Point Source : WHY Develop in the Cloud?

- **Speed of time to market critical in mobility**

- Get projects running in hours, not weeks

- **IT budgets often overspent, or mobile strategy owned by non-IT org (CMO office for example)**

- Direct cost savings over traditional local systems

- Indirect cost savings to us and client through better project management, lifecycle support

- **Supporting the full development lifecycle often not a priority... until it is**

- SaaS tools enable us to deliver higher quality, and better ongoing support environments

- **Consulting/services with clients requires collaboration and hand-offs**

- Collaboration improves when technology is frictionless

- Solve distributed connectivity issues

- Runs efficiently multi-tenant for different businesses or business units

- Onboarding and handing off solutions far more efficient

# Point Source : Why we Love JazzHub

- Transparent development and planning
- Up and running in 5 minutes
- Immediate collaboration
- Enable example code; point customers to see value
- Simple on-ramp to get clients started with development tools

## PointSource projects in JazzHub:

- PS Whiteboard
- Major retail B2C storefront
- Major insurance sales center B2B
- Internal development and design work
- PS.SDK

JazzHub partner for mobile  
development lifecycle

[www.PSWhiteboard.com](http://www.PSWhiteboard.com)

# PS Whiteboard

## Capabilities:

- Capture your ideas **elegantly in a free solution**
- Import or capture a photo or document and sketch on top of that to mockup drawings or wireframes and designs
- Save and share for continued collaboration

## Industry applications:

- Insurance claims adjusters may take photos of damage and take notes about the damage
- Doctors can make notes on x-rays
- Product engineers can quickly sketch on existing schematics
- Kids can even draw funny faces on their pets, or they can let their imagination go wild with freeform drawing

## Worklight:

- Created to aid in our own creative processes by a **small team of our talent using IBM Worklight**
- **Within 2 weeks from PoC we had a production-ready, cross device solution**
- Built in Worklight using jQuery, Backbone, and Bootstrap. Apache Cordova was used to integrate with the native device camera and photo album

Software as a Service

# JAZZHUB-CALL TO ACTION

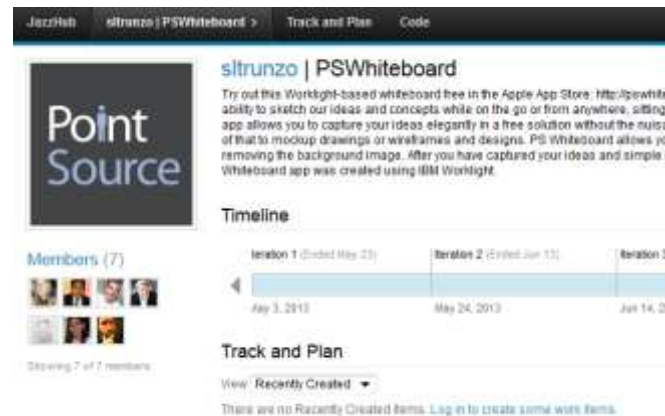

# Come, Build Great Software!

- Register at <https://hub.jazz.net/>
- Start creating **meaningful** projects to collaborate on personal or work projects. Add a picture to your project, create a detailed description, and collaborate with others.
  - Examples of projects on JazzHub:

The screenshot shows the JazzHub project page for 'ClearConcert for JazzHub' by user 'mbrowneClearblade'. The page includes a project description, a 'Track and Plan' section with a table of tasks, and a 'Code' section. The 'Track and Plan' table has the following data:

Type	ID	Summary
Task	107	Update to switch between CCM and CCMET in repository URL.
Task	108	Both detail entries and actual data entries should be signed with

The screenshot shows the JazzHub project page for 'PSWhiteboard' by user 'sltrunzo'. The page includes a project description, a 'Timeline' section with a Gantt chart, and a 'Track and Plan' section. The 'Timeline' section shows three iterations:

Iteration	Start Date	End Date
Iteration 1	May 23	Completed
Iteration 2	May 24, 2013	Completed
Iteration 3	Jun 14, 2013	Completed

- Invite friends, coworkers, and clients!

# JazzHub FAQ's

## •What is JazzHub?

JazzHub is a hosted software development tool that makes is simple and easy for users to get started on their software development projects. JazzHub currently includes tracking, planning, and source control management (Jazz SCM, GitHub integration, or browser-based Orion).

## •How is JazzHub different from our other offerings?

JazzHub is not a replacement for on-premise CLM. It has a more focused set of capabilities that uniquely position it within the context of this new development framework (i.e. cloud applications, mobile, devops). The public JazzHub has a shared multi-tenant cloud configuration and essentially no process or role customization.

## •What offerings do we have planned?

Our public cloud JazzHub is currently in Beta at <https://hub.jazz.net/>, and we plan on monetizing it in 2014 via ecommerce. We're also working on an **on-premise** and private cloud **version** of JazzHub that we expect to have ready for Summer of 2014.

## •Who are these offerings targeted towards?

Developers working on Systems of Engagement style applications! More specifically, we see the public JazzHub offering appealing to developers in small businesses, startups, nonprofits, and academia. Our on-premise JazzHub will appeal to teams working on SoE and Sol style application development within our existing enterprise customers.

## •What can you do?

Familiarize yourself with JazzHub public and be part of our movement to engage practitioners with IBM tools. With the public JazzHub, we aim to increase mindshare and capture whitespace in order to solidify existing business and sell future versions of JazzHub.
