

Optimizing the World's Infrastructure

Erik Elzerman
Director - IBM Tivoli® Software – Asia Pacific

Business without **LIMITS 2012**

[13th September 2012, Mumbai]

In this new world everything is changing....

INSTRUMENTED

INTERCONNECTED

INTELLIGENT

80%

*CEOs anticipate
turbulent change and
bold moves ahead.*

Technology will play a critical role...

Factors impacting organizations:

1. Technology factors
2. People skills
3. Market factors
4. Macro-economic factors
5. Regulatory concerns
6. Globalization
7. Socio-economic factors
8. Environmental issues
9. Geopolitical factors

Faster Delivery

90% 

view cloud as critical to their plans

Improved Reach

1 Billion 

Smart phones and 1.2 billion mobile employees by 2014

Responsive Operations

20B+ 

Intelligent business assets

New Insights

2.7ZB 

of digital content in 2012, a 50% increase from 2011

Success is driven through a holistic approach to delivering and managing services that adapts to changing business priorities...

VISIBILITY

*See and understand
your business
in real time*

CONTROL

*Transform and
adapt while
limiting risks*

AUTOMATION

*Standardize best
practices and achieve
greater efficiency*

VISIBILITY

Bharti Infratel

Monitor 32,000 cell towers, savings in diesel & electricity. ROI of months. Reducing ~ 4.4M kgs of CO2 emissions pa. Improved service levels.

CONTROL

Schiphol Airport

Handling – 70M pieces of luggage/year, up 40% or 20M

80% increase in hourly peak capacity to 9000 bags

Error rate down 80%

AUTOMATION

China Great Wall Computer Shenzhen

Cloud based Data Centre: Save US\$8.6M pa in energy usage
Shortened provision & configuration times by 99%
Increased HW virtualization by 79%, and reducing server usage by 30%.

IBM is helping organizations embrace bold strategies to **Rethink IT**, and **Reinvent Business** services, processes, & relationships...

Optimize with Cloud

Speeding service delivery from 45 days to 20 minutes

Extend to Mobile Devices

Increasing sales with new promotions from 15% to 75%

Deploy Smarter Physical Infrastructures

Recognizing & repairing over 50% of issues before operations impact

Protect & Manage Data

Reducing the time it takes to backup critical data by 80%

Optimize with Cloud

Nearly **90%** of CIOs view cloud computing as critical

- **Resilient** to the velocity of changing business needs
- Enables **choice & flexibility** in hybrid environments
- Provides **enterprise-class**, workload-aware services
- Built-in **analytics** for improved insight and decision making

4,000 successful cloud projects
200M+ daily cloud transactions
1M+ managed virtual machines

- Speed infrastructure delivery from 45 days to 20 minutes
- Improve server to administrator ratio from 10:1 to 100:1

Optimize with Cloud

Value delivered

- Design and release applications →
- Test provisioning →
- Change management →
- Install database →
- Install of operating system →
- Service provisioning →

From traditional

- Months →
- Weeks →
- Months →
- 1 day →
- 1 day →
- Weeks/Days →

To cloud

- Weeks/Days →
- 20 minutes →
- Days or hours →
- 12 minutes →
- 30-60 minutes →
- Hours/Minutes →

ROI analysis example – Banking

Payback Period (months)	4.85
Total Initial Investment for Test Cloud	\$1,313,985.33
Net Present Value (NPV)	\$6,172,325.64
Estimated ROI over 3 years	469.74%
Estimated avg. annual ROI	156.58%

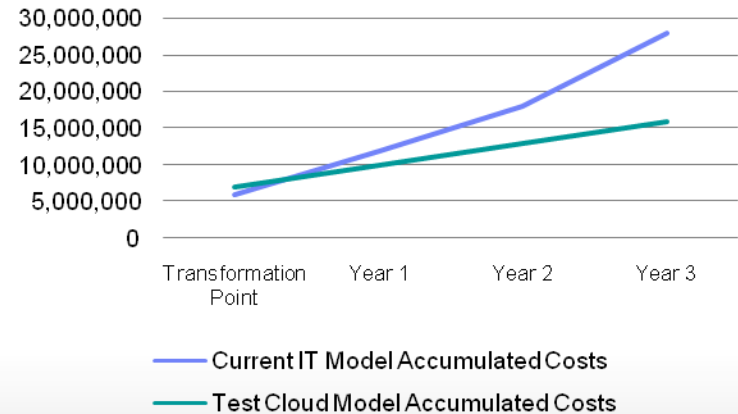

Year 1 Savings by Category

Service Management driven sales

- Testing Productivity
- Provisioning Cost
- Sys. Admin Cost
- Software
- Hardware

Cumulative Cost Comparison – With and without Cloud

Optimize with Cloud

New capabilities help organizations move beyond virtualization to on-demand, cost-effective service delivery...

New

IBM SmartCloud Foundation

What's new:

- SmartCloud Control Desk
- SmartCloud Monitoring
- SmartCloud Provisioning
- SmartCloud Application Performance Manager
- SmartCloud Continuous Delivery
- SmartCloud Virtual Storage Center
- Service Management extensions for Hybrid Cloud

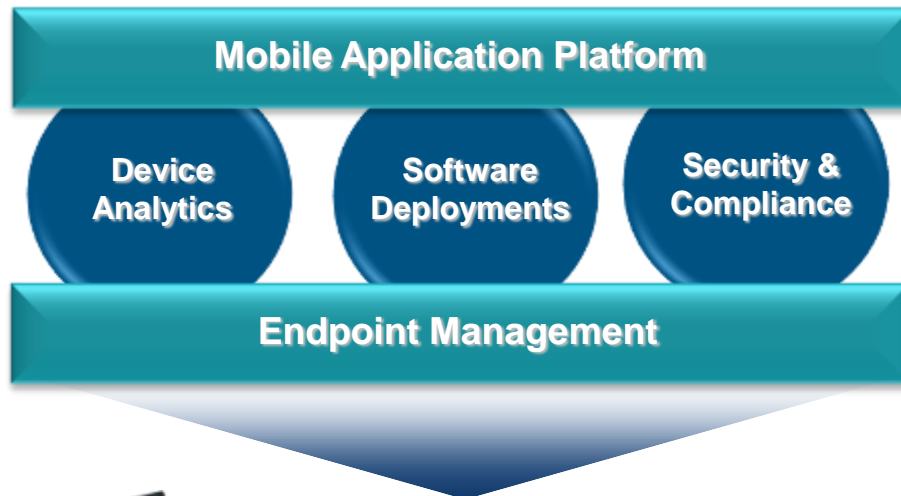

Extend to Mobile Devices

Nearly $\frac{1}{2}$ of devices accessing applications will be mobile

- Build applications **optimized** for mobile
- Deploy software apps **worldwide** in days.
- Find **all assets** on your network – NOW!
- **Patch** anywhere, anytime over any network.
- Continuously **enforce security** for mobile and off-network devices.

Desktops / laptops / servers

Mobile endpoints

Purpose-specific endpoints

- Search for store
- Order and pay while walking
- Collect & consume

Extend to Mobile Devices – IBM Endpoint Manager

Extending Enterprise endpoint management to Mobile

New

- Mobile Lifecycle Management
- Security threat detection and automated remediation
- Advanced management for iOS, Android, Symbian, Windows Phone

Extends IBM's existing
550,000 endpoint deployment

Enterprise Servers, Desktop and *now Mobile*

Extend to Mobile Devices - Focus: Platform & Usage Model

Planned mobile development platforms (n=2920)

Focus areas for mobile computing adoption (n=3885)

Extend to Mobile Devices

IBM Endpoint Manager delivers a unified systems and security management solution for all enterprise devices

Unix / Linux Servers

Android / iOS / Symbian /
Windows Phone devices

Windows & Mac
Desktops/Laptops

Windows Mobile / Kiosks /
POS devices

Supporting more devices...

...and more capabilities.

Device Inventory Endpoint Protection S/W Use Analysis

Deploy Smarter Physical Infrastructures

Over **20B** machine-centric intelligent devices

- **Predictively** manage the asset lifecycle
- Monitor the **health** of smart infrastructures
- Understand the **impact** of problems on service
- Optimize **workflow** across business & IT operations
- Track key **performance** indicators

- Operational excellence & performance at 100 plants world wide
- Visibility into inventory & demand across sites = huge cost savings

Deploy Smarter Physical Infrastructures

New and
Enhanced

IBM Maximo®

Innovating to reach new heights of infrastructure performance and reliability

- Health, Safety and Environment Management
 - Improve employee and public safety, reduce risk to the environment and manage regulatory compliance
- Supply Chain Management
 - Greater control over critical procurement to improve operations and optimize enterprise inventory
- Comprehensive Industry Solutions
 - Transportation, Nuclear, Oil and Gas

Deploy Smarter Physical Infrastructures

IBM Smarter Buildings

Tririga® enables a complete solution for facilities optimization

New and Enhanced

Energy Operations Optimization

Energy & Environmental Management

Space Management

Service Management

Facility Maintenance

Capital Project Management

Real Estate Portfolio Management

Protect & Manage Data

2.7ZB of digital content, a 50% increase from 2011

- **Data Protection** reducing the amount of data at risk between backups by 90%
- **Unified Recovery Management** to configure, monitor and execute all backup/recovery operations
- **Storage Virtualization** to improve storage utilization by 30% or more
- **Advanced Storage Resource Management** to effectively monitor, manage and troubleshoot
- **Integrated reporting and monitoring** to provide visibility, control and automation

- Perform nightly and full image backups within 8 hours
- Resolve environmental issues
- Increases backup success by 9%

Protect & Manage Data

IBM SmartCloud Virtual Storage Center & Tivoli Storage Management Suite

Intelligently controls and optimizes Cloud Storage with pay as you go pricing

New

Tivoli Storage Management Suite

- Data reduction for recovery and retention
- Always on recovery service
- Instant recovery for virtual environments and applications

Early Experience Program

SmartCloud Virtual Storage Center

- Virtualize physical storage resources
- Flexible management of heterogeneous storage
- Central management of virtual storage

IBM Netcool Network Analytics (NNA)

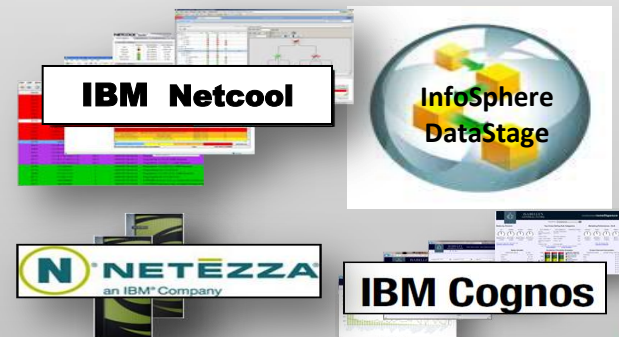

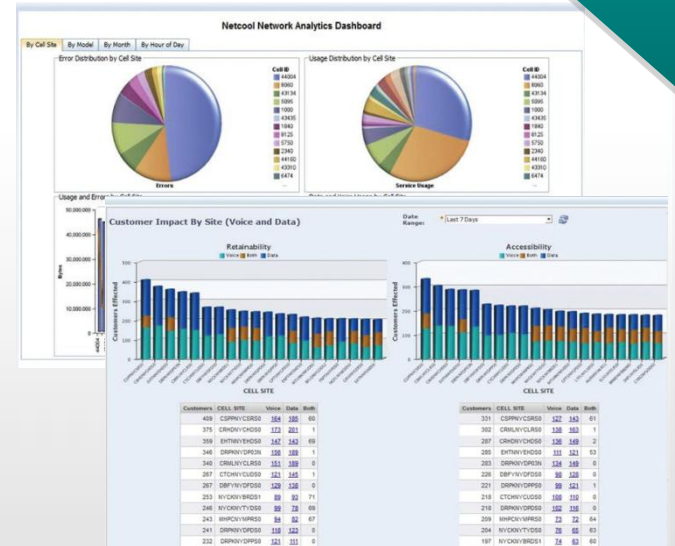

New

IBM Netcool Network Analytics:

- Is an all-IBM network analytics solution providing wireless CSPs intelligence to manage the network resources in combination with their customers' experience
- Provides end to end detailed/historical analytics that map customer to network to services to devices
- Delivers insights to key NOC and Customer Care Centers, breaking down organizational information silos, and enabling proactive business decisions based on real time data
- LOB business case – CMO
- Convert the NOC to SOC!

IBM Netcool Network Analytics is composed of industry leading technologies including:

- DataStage to collect and mediate the exploding number of data sources
- Netezza Data Mart to ingest and store Terabytes to Petabytes of data at the highest speeds possible
- IBM Netcool proven network domain and analytics experience
- Cognos visualization for dashboards and reporting

IBM provides the visibility, control and automation needed to respond to changing priorities and realize the potential of your business...

VISIBILITY

CONTROL

AUTOMATION

agility to
competitive
landscape**

**Execute with
reduced
risk & cost**

**Achieve
desired
business
outcomes**

Optimizing the World's Infrastructure

THANK YOU!

Business without **LIMITS** 2012

Rethink IT.

- Speed delivery
- Improve economics
- Drive innovation

Reinvent business.

- Improve operating dexterity
- Redesign client relationships
- Uncover new profit opportunities

IBM's integrated service delivery & management platform offers the proven capabilities and best practices needed for success.

Service Delivery & Management Capabilities

IBM has announced **NEW Capabilities** to help you meet change head on...

Cloud Computing
drive service innovation

Smarter Physical Infrastructure
enable new business models

Mobile
expand client reach

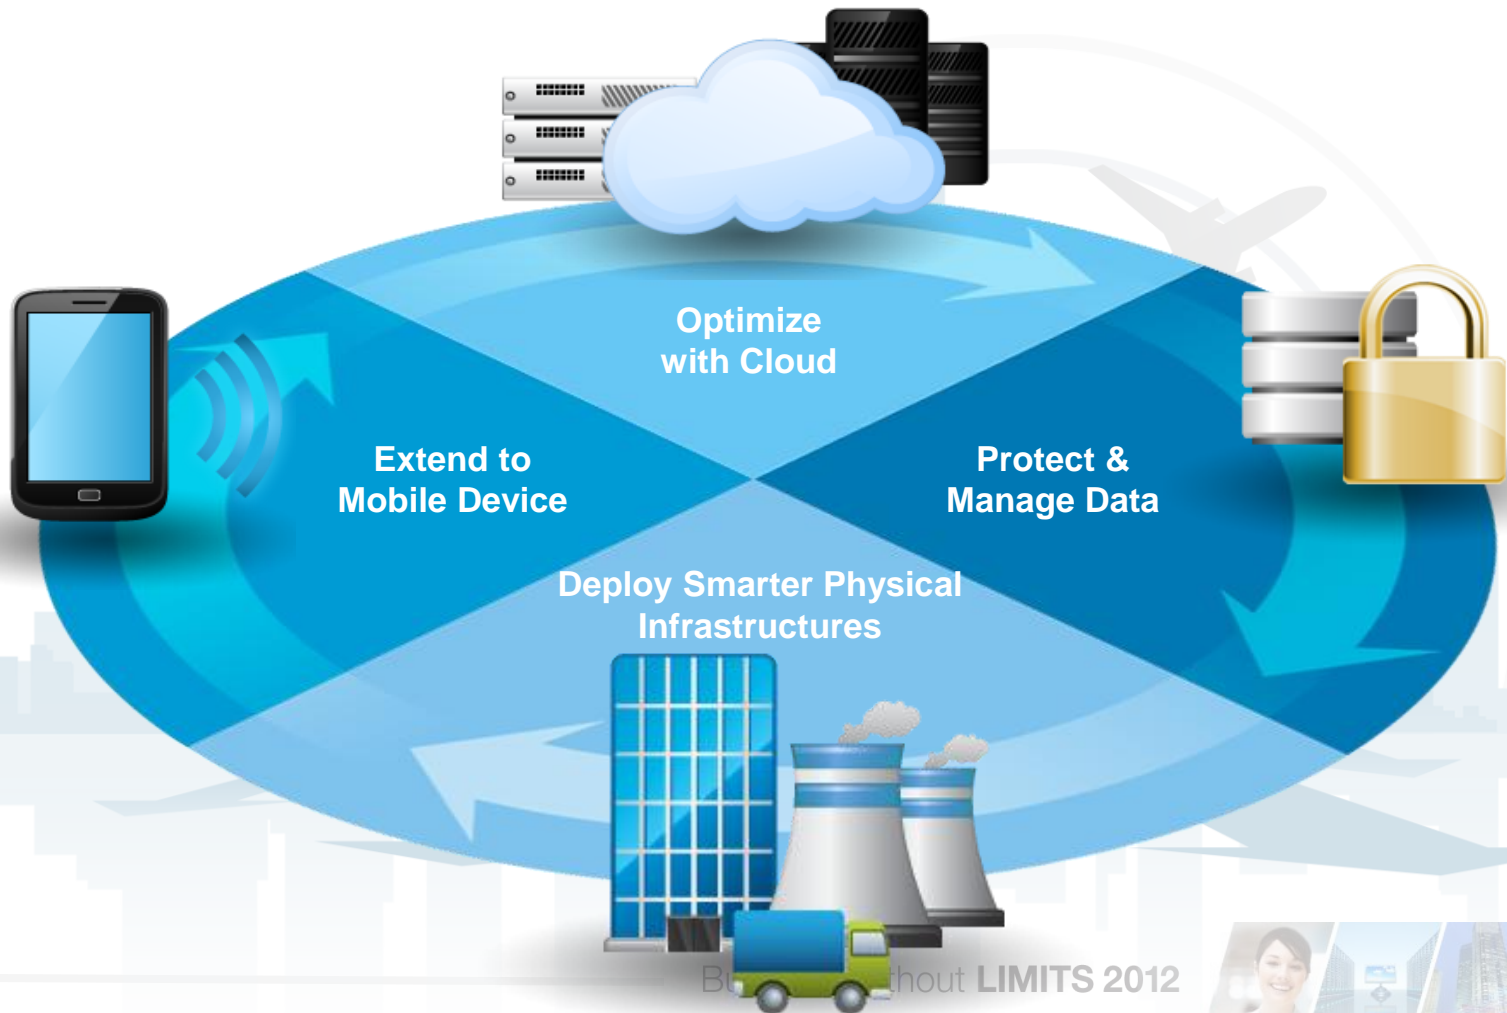

Data Protection & Storage
assure data for insight

Only IBM brings these capabilities together to enable integrated delivery of business services across complex, interconnected infrastructures...

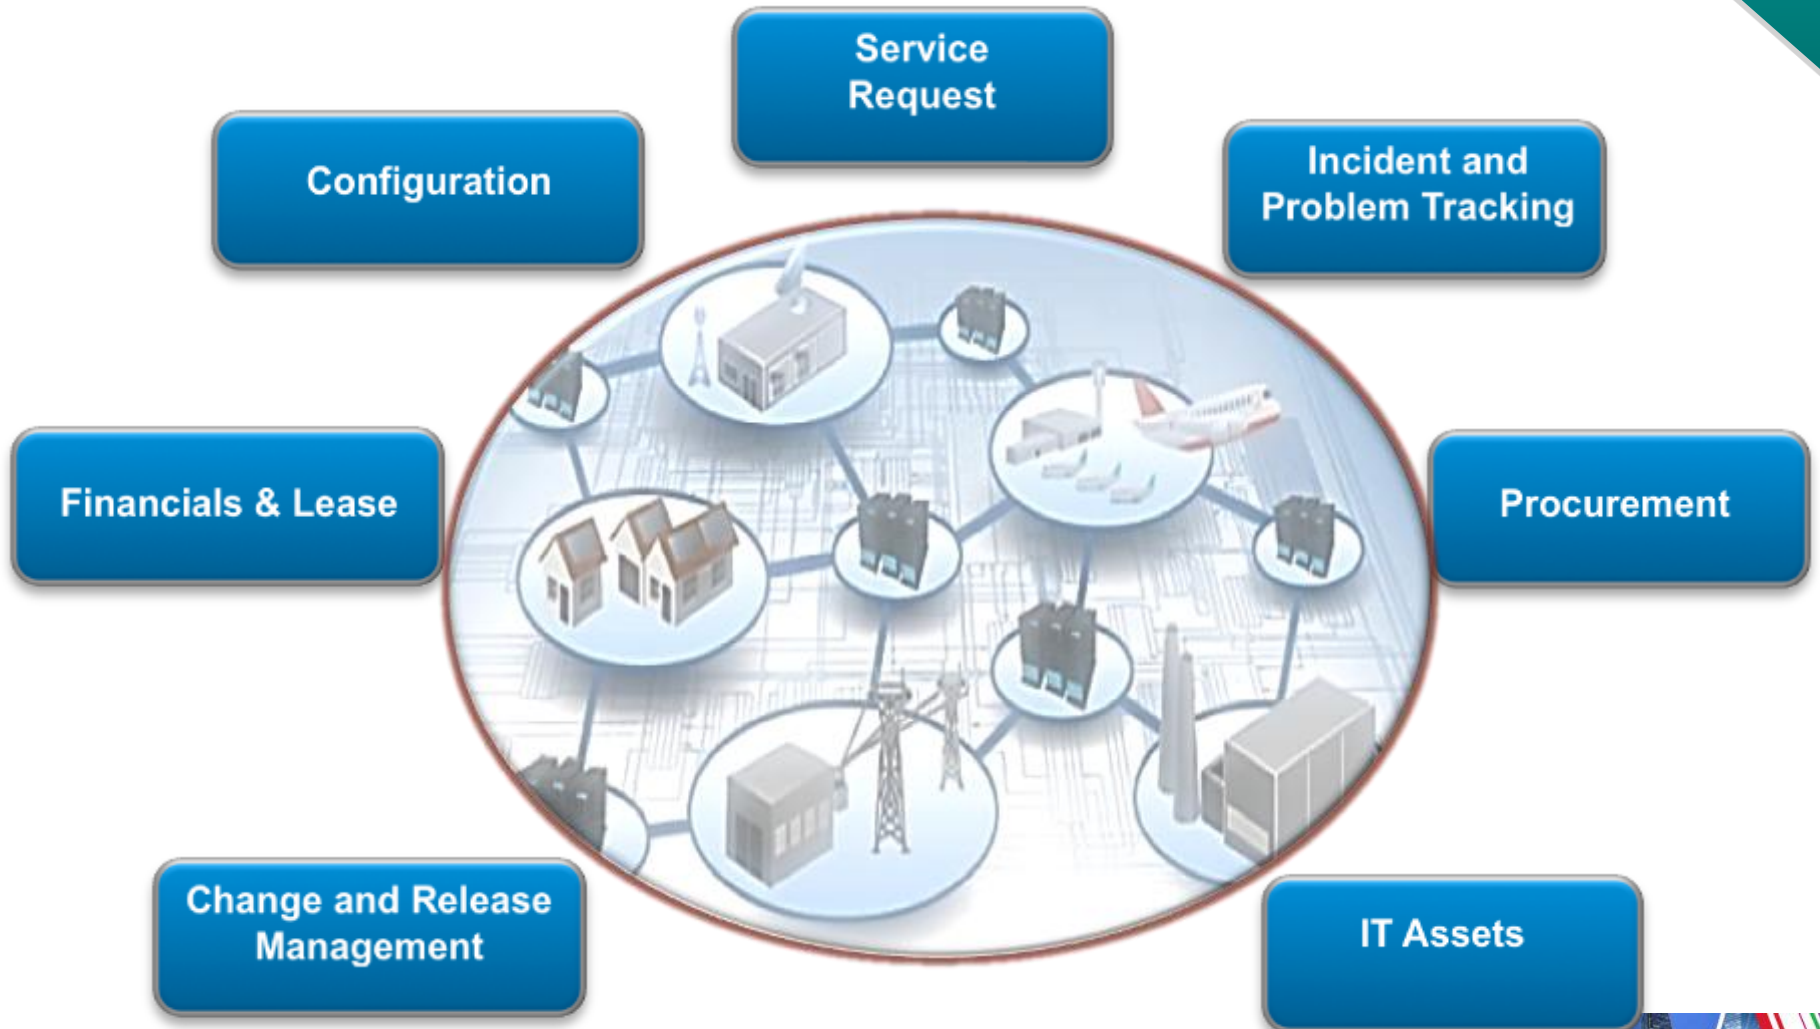

Service Delivery & Management Capabilities

IBM SmartCloud Control Desk

Holistically controls complex service management processes

New

IBM SmartCloud Monitoring & Provisioning

Visibility and Control of Optimized IT Infrastructures and workloads

*New and
Enhanced*

IBMSmartCloud Monitoring

- End-to-end element visibility
- Proactive problem analysis
- Intelligent workload placement
- License optimization
- Capacity planning

IBMSmartCloud Provisioning

- Highly resilient cloud manager
- Hypervisor agnostic platform
- Advanced image management
- Image lifecycle composition

- Start small and scale up
- Real-time capacity on-demand
- Analytics based optimization

New

IBM SmartCloud Continuous Delivery

A simple approach to lifecycle agility

- Accelerate delivery
- Self-service
- Reduce risk
- Improve quality
- Manage change
- Optimize Workload Patterns

IBM SmartCloud Application Performance Manager

Optimize end user performance and prevent outages

New

See Value Quickly

NEW! Out-of-the-box **dashboards** provide at-a-glance KPI readouts from anywhere

NEW! Get SmartCloud APM up and running quickly in your environment with new **agentless** transaction tracking technology

Comprehensive Coverage

NEW! Supports the latest IBM and non-IBM middleware. Updated support for **DataPower, DB2, WAS, SAP and more**

NEW! Monitor both traditional and cloud-based applications.

Leverage IBM Expertise

NEW! Built-in **IBM expert advice** guides operators to possible root causes and recommended actions.

NEW! **Impact analysis** dashboards allow you to easily pinpoint which parts of your user base are being

Service Management Extensions for Hybrid Cloud

Integrate clouds with centralized monitoring, security and automation

New

- Visibility across all resources
- Control system and security management
- Automate workload flows across clouds

Only IBM brings these capabilities together to enable **integrated delivery of business services** across complex, interconnected infrastructures...

- Transformed supply chain across **5k stores & 54 countries**
- Reduced backorders **85%**

- Increased water leak detection **eightfold** for participating citizens
- Decreased water utilization during pilot **6.6 percent**

- Handling **70 million** pieces of luggage/year
- Increased capacity by **20 million**
