Please note:

IBM's statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's sole discretion.

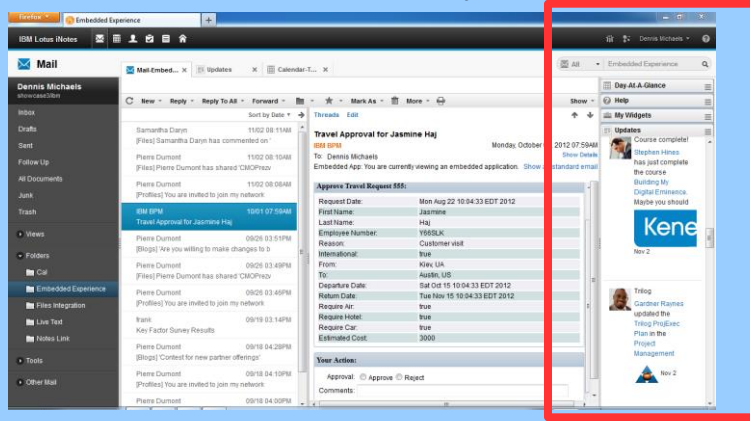

Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision.

The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

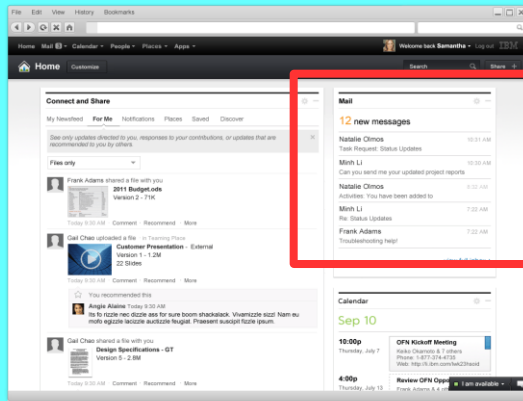

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

Enhanced Search

The screenshot displays the IBM Notes 9.0 Social Edition interface. On the left is a sidebar with a 'Shortcuts' callout pointing to the navigation pane. The main area is divided into three sections: an email list, a social feed, and a calendar. The email list has a 'Group By' and 'Show Beginning' callout pointing to the 'Month of November' and 'Older Messages' sections. The social feed shows a post from Pierre Dumont with an embedded app, and a callout points to the 'Embedded Experience' section. The calendar on the right shows events for December 13, 2012, with a callout pointing to the 'Embedded Experience' section. The top of the window shows a menu bar and a search bar.

iNotes 9.0 Social Edition – Embedded Experience/OpenSocial

The screenshot displays the IBM Lotus iNotes 9.0 Social Edition interface. The main window shows an email inbox with a list of messages. The selected email is titled "Approve Travel for Fernando Brion" and contains an embedded travel request form from Lombardi. The form includes fields for request date, name, employee number, reason, and various requirements (air, hotel, car), along with an estimated cost of 3000. Below the form is an "Approval" section with radio buttons for "Approve" and "Reject", and a "Comments" field. The interface also features a sidebar with a navigation pane on the left and a "My Widgets" section on the right, which includes various tools and services like Google Maps, UPS Tracker, and Wikipedia.

IBM Notes Browser Plug-in

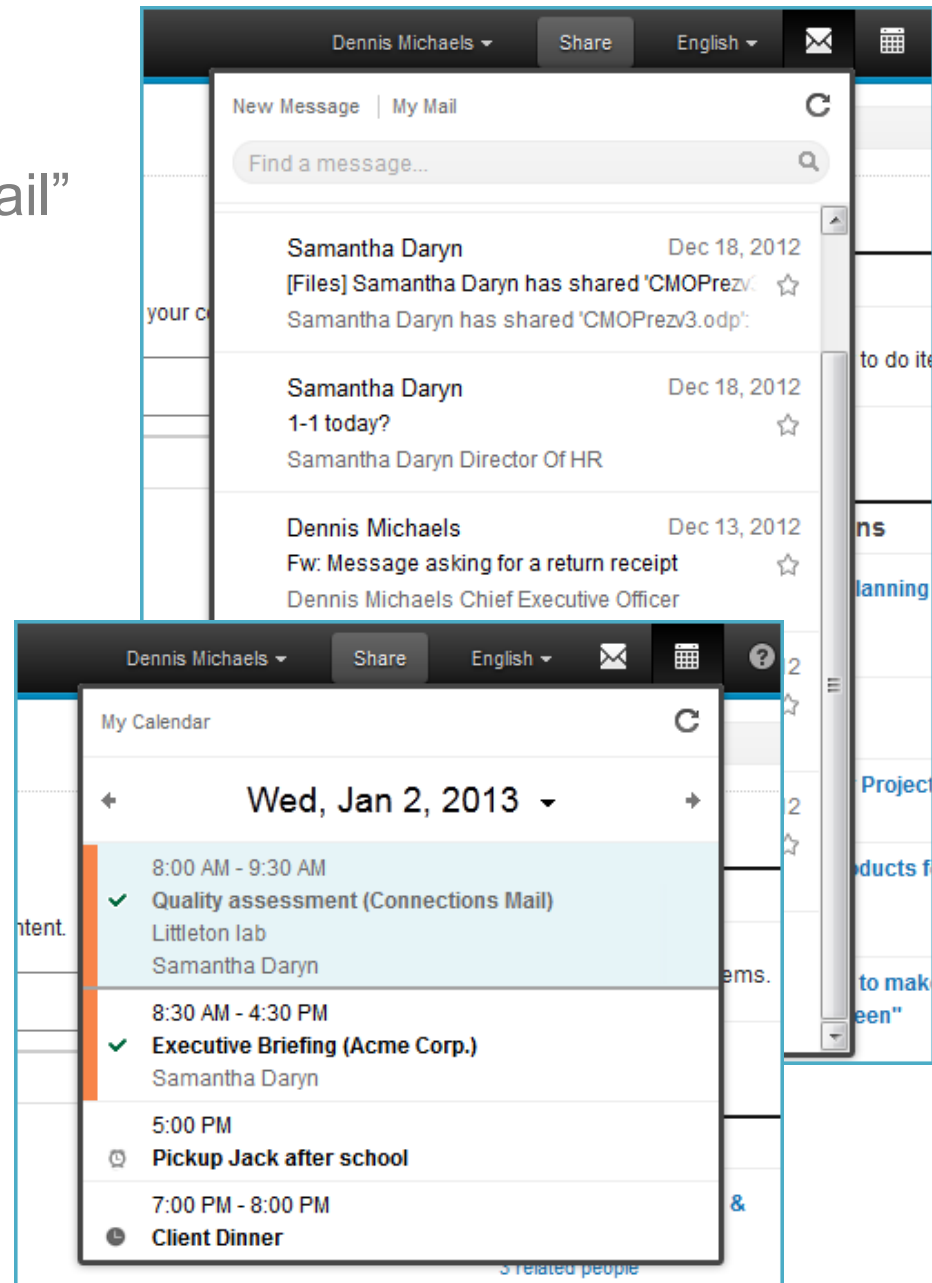

- Designed to easily extend applications previously available only to Notes users out to web browser users, as well
- Provides a powerful compliment to existing XPages capabilities
- Allows applications to run in a browser with no modification!
- Lightweight install, similar to other plug-ins in size, deployment time and configuration requirements

- Minimal limitations:
 - Windows only (for now, at least!)
 - Not designed to support mail template, rather, to work in conjunction with iNotes
 - Firefox and Internet Explorer along with Citrix, in first release

IBM Connections Mail

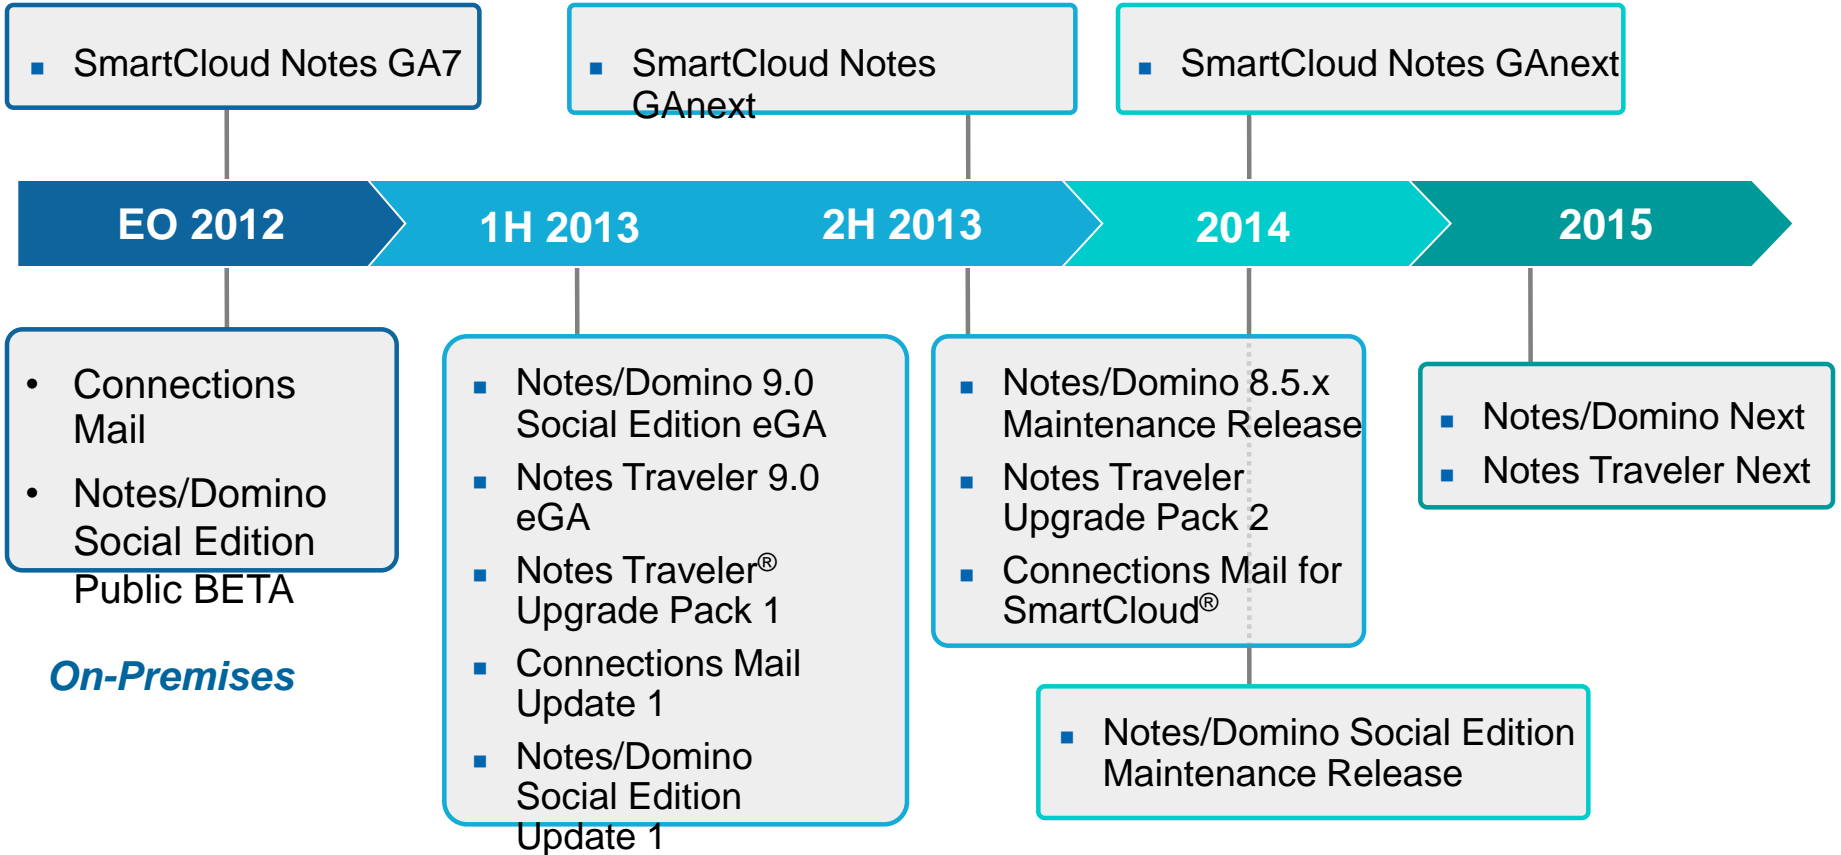

“Being in mail without being in mail”

- Lightweight social messaging tool
- Provides simple, elegant web mail and calendar experience allowing people to remain within IBM Connections
- Quickly manage incoming mail without leaving your social context
- Make informed decisions in real-time with a social approach that brings information and expertise into easy and immediate reach
- Delivered as a plug-in to IBM
