BlackBerry® Storm™ Series
BlackBerry® Tour™ smartphone

*Check website for full details on system requirements.

**Certain features outlined in this document require a minimum version of BlackBerry Enterprise Server, BlackBerry® Desktop Software, and/or BlackBerry® Device Software. Application usage requires activation with a data plan. Check with your service provider for availability, costs, and restrictions.

Document Based Collaboration on BlackBerry smartphones

The BlackBerry Client for IBM Lotus Quickr delivers highly secure Library viewing, Folder creation and content sharing to BlackBerry smartphone users.

Navigate libraries and folders – View, sort and filter content to locate needed files, and mark frequently used libraries and folders as favorites for quick access.

Create and view content – Set up folders, and upload files. View details such as author, date modified and created, and preview documents before downloading.

Check out, edit, check-in – Version control keeps editing in sync even when users are out of the office.

Easy to use. Easy to share.

The BlackBerry Client for IBM Lotus Quickr encourages users to participate in document based collaboration.

Simplified and intuitive user experience

- Built as a BlackBerry application means faster access to information. There's no need to launch the browser and log in, and no time spent waiting for web pages to render.
- Tight integration with core BlackBerry smartphone features and applications such as Email, and Documents To Go®. For example, easily email colleagues links to files, contact document authors without leaving the Quickr application, and open downloaded documents with Documents To Go.

Rapid adoption with the "Tell A Friend" feature

- BlackBerry users can send a link, and invite team members and colleagues to download and install the BlackBerry Client for IBM Lotus Quickr.

Highly Secure and Manageable for IT

Organizations can leverage the existing BlackBerry® Enterprise Solution, plus gain additional reporting and data optimization with the BlackBerry® Social Networking Application Proxy.

Information protection

- Existing permissions for IBM Lotus Quickr are respected, and shared content is only available to those who have access.
- The advanced security features of the BlackBerry® Enterprise Server employ high encryption standards to help protect intellectual property.

Managed from the BlackBerry Enterprise Server

- IT can enable or disable the "Tell A Friend" feature, or wirelessly push the application to users.
- Implement IT policies and set application permissions.

BlackBerry Social Networking Application Proxy

- Designed to optimize the data sent from IBM Lotus Quickr to BlackBerry smartphones for improved performance.
- Tracks which BlackBerry smartphones have accessed IBM Lotus Quickr and displays the services used.
