

WebSphere software

IBM Project Discovery Workshop for WebSphere Dynamic Process Edition

Rapidly respond to change with truly dynamic business processes

Highlights

- ***Experience new capabilities for delivering business agility and outmaneuvering competitors***
- ***Foster collaboration between business and IT with increased process visibility, analysis and monitoring***
- ***IBM Software Services for WebSphere® has the hands-on experience, as well as the depth and breadth of knowledge with WebSphere software to enable your business to be innovative and high performing in a constantly changing environment***

Your Business Challenge

The frequency and level of change in business is accelerating at a rapid pace, driving companies to redefine and improve their existing business processes for greater agility. You need a platform that supports innovative business models and optimizes your operational capabilities in order to be more flexible and productive in any economic climate. IBM Software Services for WebSphere can help you reduce the risk and time to implement dynamic Business Process Management (BPM) solutions through standards-based components on an industrial strength platform—leading to overall reduced costs and the ability to be more responsive to change.

This Project Discovery Workshop helps you with insight into critical business scenarios, use-cases and project characteristics where the WebSphere Dynamic Process Edition

can demonstrate immediate results and provide a BPM foundation.

Service Solution

Our experts help you quickly get your service-enabled BPM project on the right track by leveraging WebSphere Dynamic Process Edition. Backed by years of proven Service Oriented Architecture (SOA) and BPM solution delivery experience, IBM Software Services for WebSphere is a team of highly skilled consultants with broad architectural knowledge, deep technical skills and recommended practices expertise. We provide worldwide support for WebSphere products to make it easy for clients and partners to design, build, test and deploy solutions—helping you to become an agile, service-enabled BPM environment.

Through the Project Discovery Workshop, we can help demystify the promise of dynamic BPM by highlighting tangible success patterns with WebSphere Dynamic Process Edition software. Our experts can facilitate greater agility for your business through service-enabled BPM solutions or through process-driven composite applications. As a result, you will become empowered to recognize new capabilities for outmaneuvering competitors and accelerating ROI.

Typical Activities

The Project Discovery Workshop agenda includes an interactive session with an IBM Software Services for WebSphere expert, but the specific activities may vary by customer. The session typically includes:

- Overview of Dynamic BPM and WebSphere Dynamic Process Edition
- Key Characteristics and Values of Dynamic BPM
- Three Pillars of BPM and typical implementation scenarios
- Candidate solution and use-case discovery, including
 - Current business objectives, drivers and commitments that could leverage WebSphere Dynamic Process Edition
 - Architectural context for the use of WebSphere Dynamic Process Edition
 - Assessment of SOA/BPM maturity
- High-level implementation plan review
- Wrap-up and next steps

Deliverables

Upon completion of the Project Delivery Workshop, the IBM Software Services for WebSphere expert will deliver a high-level document outlining your WebSphere Dynamic Process Edition requirements as they relate to the business and IT architecture. The expert will also deliver jointly defined use-case(s) and a roadmap of next steps.

Depending on the level of detail discussed, the document may also include estimated project duration, costs, high-level tasks and a skills training roadmap.

Education

IBM offers courses that enable you to get the most out of your WebSphere Dynamic Process Edition investment. For additional IBM course information, please visit the following URL:

ibm.com/websphere/education

Duration

The Project Delivery Workshop for WebSphere Dynamic Process Edition is two days in length.
