

Vivocha.com

speeds solution deployments by 90%
with DevOps and the Cloud

vivocha
meet your customers online

Developers have fun creating sales-generating retail tools with IBM Bluemix platform

To register for the 30-day free trial, visit bluemix.net

"We needed a cloud-based platform that provided a scalable, resource-rich DevOps environment to support our high-volume data analytics and testing needs"

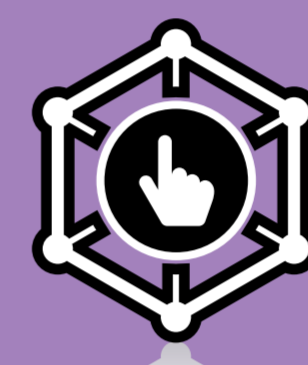

Federico Pinna,
chief technology officer (CTO),
and cofounder of Vivocha.com

IBM Bluemix™ platform was the perfect solution

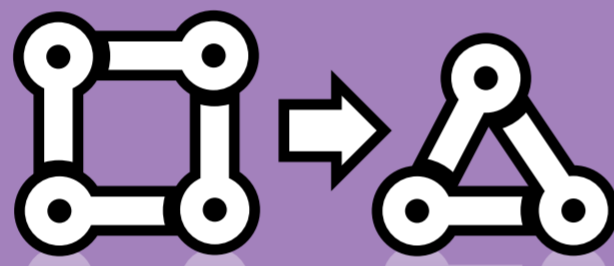

The cloud- and open-standards-based platform provides Vivocha with a scalable development and solution delivery environment

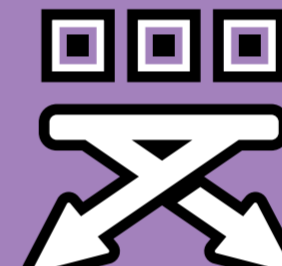

Runs apps in any language and integrates with systems and mobile devices

Open source compatibility

Simplifies integration with existing systems

Ability to continually test and analyze new solutions

"We use the analytics capabilities of Bluemix to examine the previous performance of agents and forecast the right way to approach the customers depending on previous performance"

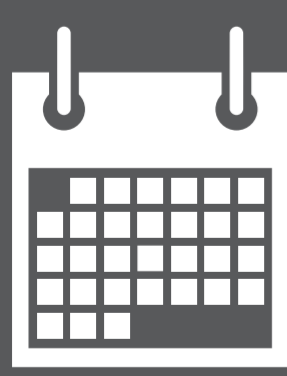

Federico Pinna,
chief technology officer (CTO),
and cofounder of Vivocha.com
