# Item Synchronization for Suppliers Release Notes

**Note:** This version of the Item Synchronization for Suppliers process solution runs on IBM® CrossWorlds® 4.1 only.

This document covers release information for the IBM CrossWorlds Collaboration for UCCnet Item Synchronization, the main component of the Item Synchronization for Suppliers process solution. It contains the following sections:

- “Features”
- “Installing the software”
- “Known issues” on page 2
- “Documentation” on page 2

**Note:** Important information about this release may have become available since these Release Notes were published. This information exists in Technical Support Bulletins, which can be accessed online through the IBM software support Web site. To access these bulletins, do the following:

1. Access the IBM software support Web site. In the lower right panel, click **CrossWorlds Exchange**.
2. From the IBM CrossWorlds Exchange Overview Web site, in the left panel, click **Login**. You are prompted to enter your IBM CrossWorlds Exchange user ID and password.
3. Provide your user name and password, then click **Log In**.
4. In the left panel, click **Support**, then **Tech Support Knowledgebase**.
5. In the **Advanced Find** section of the **Support** window, type tsb in the **Keywords** field and click **Search** to obtain a list of all of the Technical Support Bulletins for your site. You can also refine your search by entering more keywords.

---

## Features

The IBM CrossWorlds Collaboration for UCCnet Item Synchronization is made up of several collaborations designed to synchronize item information in compliance with UCCnet standards. The collaborations are used to maintain the consistency of the supplier’s item information in UCCnet, and to ensure that the information is kept current with the most recent data in the supplier’s application.

The IBM CrossWorlds Collaboration for UCCnet Item Synchronization is certified by UCCnet for interoperability with UCCnet Foundation Services version 2.1.

---

## Installing the software

Before following this installation procedure, make sure you have downloaded the software you want to install from the IBM Passport Advantage Web site. Refer to your Passport Advantage information for downloading instructions. To install the software, do the following:

1. Navigate to the folder on your system into which you downloaded the software. The default location is C:\crossworlds\_upgrade\_files.
2. Run the executable file. The following folders are created:

C:\crossworlds\_upgrade\_files\collaborations  
C:\crossworlds\_upgrade\_files\repository

3. Copy the folders to the appropriate areas in the IBM CrossWorlds installation.

**Note:** This procedure does not load the collaboration template or business object definitions into the repository; it only extracts all required collaboration and object files to the appropriate directories. To complete the installation, refer to the *IBM CrossWorlds System Installation Guide for Windows*. For collaboration configuration information, refer to the *IBM CrossWorlds Collaboration for UCCnet Item Synchronization* document.

---

## Known issues

The following issues exist in this release of the product:

*Table 1. Known issues*

CR Number	Issue
13901	In the XML data handler, recursive elements are not properly read when converting an XML string to a business object.
13906	Setting the IgnoreUndefinedElements property to false or leaving it blank causes the data handler to return an error when an undefined element is encountered in the XML input stream.

---

## Documentation

Additional sample documentation for this product can be found on the IBM CrossWorlds Exchange Web site.

### Notices

IBM may not offer the products, services, or features discussed in this document in all countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing  
IBM Corporation  
North Castle Drive  
Armonk, NY 10504-1785  
U.S.A.

The following paragraph does not apply to the United Kingdom or any other country where such provisions are inconsistent with local law:

INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or program(s) described in this publication at any time without notice.

Any references in this information to non-IBM Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this IBM product and use of those Web sites is at your own risk.

IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Licensees of this program who wish to have information about it for the purpose of enabling: (i) the exchange of information between independently created

programs and other programs (including this one) and (ii) the mutual use of the information which has been exchanged, should contact:

IBM CrossWorlds Lab Director  
IBM RTP Laboratory  
3039 Cornwallis Road  
P.O. BOX 12195  
Raleigh, NC 27709-2195  
U.S.A

Such information may be available, subject to appropriate terms and conditions, including in some cases, payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement, or any equivalent agreement between us.

Any performance data contained herein was determined in a controlled environment. Therefore, the results obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurement may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not necessarily tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

This information may contain examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples may include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.

All statements regarding IBM's future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

**COPYRIGHT LICENSE** This information may contain sample application programs in source language, which illustrates programming techniques on various operating platforms. You may copy, modify, and distribute these sample programs in any form without payment to IBM, for the purposes of developing, using, marketing or distributing application programs conforming to the application programming interface for the operating platform for which the sample programs are written. These examples have not been thoroughly tested under all conditions. IBM, therefore, cannot guarantee or imply reliability, serviceability, or function of these programs.

## **Programming interface information**

Programming interface information, if provided, is intended to help you create application software using this program.

General-use programming interfaces allow you to write application software that obtain the services of this program's tools.

However, this information may also contain diagnosis, modification, and tuning information. Diagnosis, modification and tuning information is provided to help you debug your application software.

**Warning:** Do not use this diagnosis, modification, and tuning information as a programming interface because it is subject to change.
