Retail Distribution

# Release Notes

*Version 4.1.1*

**Note!**

Before using this information and the product it supports, be sure to read the general information under “Notices and Trademarks” on page 3.

**First Edition (October 2002)**

This edition applies to Version 4, Release 1, Modification 1, of *IBM® CrossWorlds®* (5724-C12) and to all subsequent releases and modifications until otherwise indicated in new editions.

IBM welcomes your comments. You can send them to the following address:

IBM Canada Ltd. Laboratory  
Information Development  
8200 Warden Avenue  
Markham, Ontario, Canada L6G 1C7

Include the title and order number of this book, and the page number or topic related to your comment.

When you send information to IBM, you grant IBM a nonexclusive right to use or distribute the information in any way it believes appropriate without incurring any obligation to you.

## Release Notes

These Release Notes cover the Product Information Management for Retailers Solution, the newest addition to the IBM® WebSphere® Business Integration for Retail Distribution portfolio. They contain the following sections:

- “Features”
- “Installing the software”
- “Known issues” on page 2

---

## Features

The Product Information Management for Retailers Solution contains prebuilt business process templates (called collaborations) that can jump-start integration into the UCCnet registry, reduce operational costs and errors, increase sales by providing accurate, timely data, and increase market share by accelerating product-to-shelf times.

- **UCCnet Message Management collaboration.** Handles all dialog necessary for communication with UCCnet, providing a streamlined process for receiving XML data from the UCCnet standard product registry, for initiating processing of this data, and for sending responses back to UCCnet.
- **Merchandise Qualification collaboration.** Validates the item data, helps manage the item approval process, and routes the approved item information to other enterprise systems.
- **Data Storage collaboration.** Manages the processes used to temporarily store, update, retrieve, and delete data during the review and approval processes. As a result, required item information is available to the trading partner as long as an item is being processed, even if the approval process spans days, weeks, or even months.
- **Customized collaborations created specifically for the Solution.** Preconfigured collaboration templates for storage enable business objects, messages, or unique product identifiers to be stored, retrieved, updated, or deleted in or from databases. A notification collaboration can be used to extract email message text, subject text, and recipient(s) from configurable attributes in a triggering business object, and use those attribute values as input to the IBM CrossWorlds® sendEmail API. The attributes of the business object can contain the actual message text, subject text, or address(es), or point to filenames that contain those values.

---

## Installing the software

Before following the installation procedure, perform these steps:

- Download the generic, cross-industry, artifacts of the Product Information Management for Retailers Solution from Passport Advantage ([www.lotus.com/passportadvantage](http://www.lotus.com/passportadvantage)) and extract to the directory of your choice. Refer to Passport Advantage for downloading instructions.
- Download the solution-specific artifacts of the Product Information Management for Retailers Solution by doing the following:
  1. Go to the Web site  
[www.ibm.com/software/integration/cw/collaborations/support/](http://www.ibm.com/software/integration/cw/collaborations/support/).
  2. Search for the terms **Product Information Management**.

3. Select the link **Product Information Management for Retailers Solution**. You are prompted to log in.
4. Log in by using the same user ID and password you use to submit problems and obtain technical support. (This user ID and password might differ from those used to access Passport Advantage.)
5. Click on the executable download package for your platform to download the artifacts.
6. Extract to the directory of your choice.

To install the software, see the Installation Guide.

---

## Known issues

The following are known issues for this release of the product:

### On the AIX platform, the JIT compiler must be disabled

The JIT compiler must be disabled to prevent system performance problems. Disable the JIT compiler by performing the following steps:

1. Move to the directory `<install_path>/CrossWorlds/bin/`.
2. Open the file `ics_manager` in a text editor and update the following line as shown:  

```
exec $JAVA_ICS -Djava.compiler=NONE -classpath "${CWCLASSES}" \
ServerWrapper -s${SERVERNAME} ${var_options}
```
3. Save your changes and close the file.

---

## Notices and Trademarks

### Notices

IBM may not offer the products, services, or features discussed in this document in all countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing  
IBM Corporation  
North Castle Drive  
Armonk, NY 10504-1785  
U.S.A.

The following paragraph does not apply to the United Kingdom or any other country where such provisions are inconsistent with local law:

INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or program(s) described in this publication at any time without notice.

Any references in this information to non-IBM Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this IBM product and use of those Web sites is at your own risk.

IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Licensees of this program who wish to have information about it for the purpose of enabling: (i) the exchange of information between independently created

programs and other programs (including this one) and (ii) the mutual use of the information which has been exchanged, should contact:

IBM CrossWorlds Lab Director  
IBM RTP Laboratory  
3039 Cornwallis Road  
P.O. BOX 12195  
Raleigh, NC 27709-2195  
U.S.A

Such information may be available, subject to appropriate terms and conditions, including in some cases, payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement, or any equivalent agreement between us.

Any performance data contained herein was determined in a controlled environment. Therefore, the results obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurement may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not necessarily tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

This information may contain examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples may include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.

All statements regarding IBM's future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

**COPYRIGHT LICENSE** This information may contain sample application programs in source language, which illustrates programming techniques on various operating platforms. You may copy, modify, and distribute these sample programs in any form without payment to IBM, for the purposes of developing, using, marketing or distributing application programs conforming to the application programming interface for the operating platform for which the sample programs are written. These examples have not been thoroughly tested under all conditions. IBM, therefore, cannot guarantee or imply reliability, serviceability, or function of these programs.

## **Programming interface information**

Programming interface information, if provided, is intended to help you create application software using this program.

General-use programming interfaces allow you to write application software that obtain the services of this program's tools.

However, this information may also contain diagnosis, modification, and tuning information. Diagnosis, modification and tuning information is provided to help you debug your application software.

**Warning:** Do not use this diagnosis, modification, and tuning information as a programming interface because it is subject to change.
