For help with the Adobe Acrobat Reader application, see the Adobe Acrobat Reader Guide. To open it, choose 'Reader Guide' from the Help menu.

For help with searching Adobe Acrobat PDF files, see the section on 'Searching Catalog Indexes' in the Adobe Acrobat Reader Guide.

This package contains two kinds of searchable index:

- One complete MQSeries for HP-UX Library index
- 15 Individual book indexes

The complete library index is attached by default. If you want to attach another index file, you can either:

- Open the book you want to search
- Attach the index file manually by opening the 'Index Selection' box and clicking on 'Add...'

Adobe Acrobat index files have the file extension, '.pdx'.

More hints and tips on searching this collection of PDF files are contained in the 'Search' panel.
