

IBM WebSphere Commerce V7 FEP8

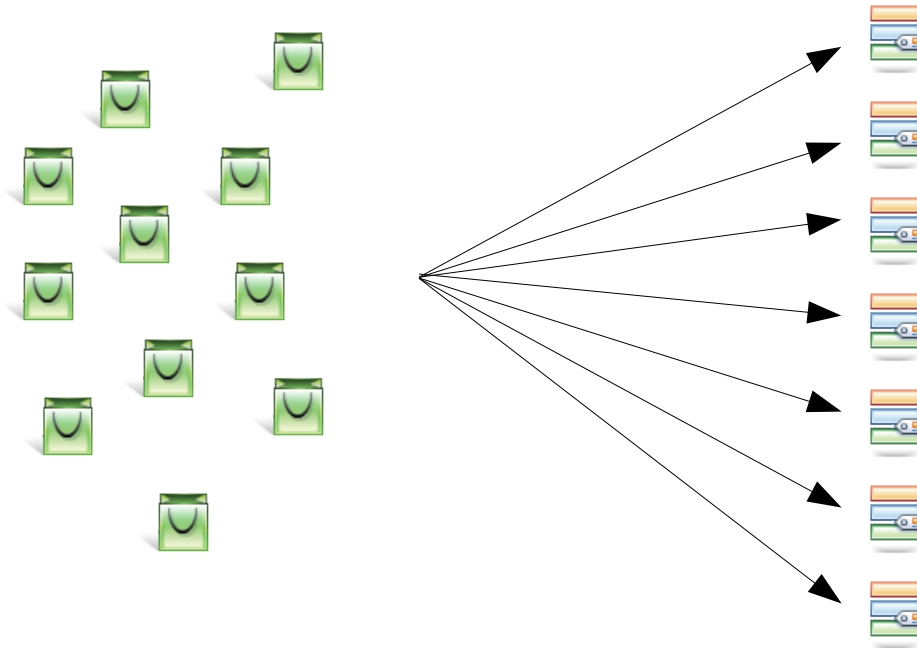

Catalog Entry Assignments Tool

Carlos Cavanna

Overview

- Allows business users to assign multiple products to multiple sales categories using CMC.

Design Assumptions

Catalog entry	Category	Assignment
Local Catalog Entry	Local Sales Category	Allowed 
Inherited Catalog Entry	Local Sales Category	Allowed 
Local Catalog Entry	Inherited Sales Category	Allowed 
Inherited Catalog Entry	Inherited Sales Category	Not allowed 

Design Assumptions

- Available for Product Manager and Category Manager roles.
- Tool is designed for assignment, not removal or updates.
- Will assign products (not SKUs) to Sales Categories (not Master Categories).
- Duplicate relationships will not be saved. Any sales categories with problems will show under active work folder.
- Tool makes multiple calls. No database schema changes.

Design Assumptions

- Performance is proportional to the number of service calls made:
One call per association being created.
- A warning message will display if the user attempts to create more than 1000 relationships.
- Consider removing catalog entries or categories to reduce the total assignments. If you select to ignore the warning, the save operation can take a long time to complete or may timeout.

References

- Adding catalog entries to multiple sales categories:
