

**TOC****INDEX****VIEW****O17 iSeries: Windows 2000/2003 Server Integration with IXA/IXS****Overview by Bob Schuster**

This session will discuss the implementation of Microsoft Windows 2000 and 2003 on the iSeries using the Integrated xSeries Server and Integrated xSeries Adapter. It will discuss hardware/software requirements, installation, backup/restore and planning as well as a, demonstrations of administration functions provided by iSeries Navigator. If you have an iSeries and would like to consolidate Windows Intel servers on your iSeries, this session is a must. V5R3 changes/enhancements will be discussed as well.
