

**R12 xSeries Options Trends & Direction Roadmap
by Ben Hilmus and Chesley Greening**

This session will review the xSeries Options technology and portfolio and will dive into how we can help solve many of the major infrastructure issues facing our clients. In particular, we'll dive into new technologies in the rack/stack environment, KVM-over-IP, power and cooling, data backup and selected new storage technologies. This session is a technical marketing overview of the products and technologies we'll see in 2004 and into 2005.
