

**TOC****INDEX****VIEW****T09 IBM TotalStorage Enterprise Storage Server (ESS) Update  
by Jim Tuckwell, IBM**

Typical large enterprise databases have grown one hundred fold in the past five years. The IBM TotalStorage Enterprise Storage Server (ESS) has been designed, specifically to address requirements for access to data 24X7 to support fast growing “on Demand” business requirements. Come learn for yourself how the latest enhancements to the ESS family can help you deliver the solutions your end users require for their information needs as cost effectively and efficiently as possible. Recent dramatic enhancements in price performance, and business continuity solutions will make this a “must see” session.
