Special Offer  
**RM43,282**

### **Web Portal – A Comprehensive Solution for Sharing Information and Improving Productivity**

*Web portals allow partners, employees and customers to choose their user experience, with personalized applications based on role, context, actions, location, preferences and team collaboration needs. IBM WebSphere Portal software provides a composite application or business mashup framework and the advanced tooling needed to build flexible, SOA-based solutions, as well as the unmatched scalability required by any size organization.*

*IBM's WebSphere Portal is recognized as "The Leading Portal Solution" in the marketplace today by many of the leading industry analyst firms, but, more importantly, by our existing customers. And IBM can help accelerate customer success with a variety of accelerators for WebSphere Portal and with a wide range of services - technical consulting, Education, and Premium Support services.*

- Consolidate all of the different content that employees, partners and customers need to see while still controlling its look, feel and who can access it
- Improve customer and partner relationships by providing them with the information they need at the right time
- Improve productivity of your employees with an interface that unifies many applications into a meaningful, consolidated web experience.

### **Value of a WebSphere Portal solution to its target audience:**

- **CEO:** Single Communication Platform to all employees, lines of business, stakeholders & customers
- **CFO:** Productivity platform to drive maximum efficiency in the organizations most value resource (employees)
- **COO:** Consistency of business process execution, reduction in process execution time, visibility to whole process
- **Marketing:** Global brand with LOB flexibility, self-service to key customers
- **Sales:** Single view of customer, "work where your customers are"
- **HR:** Real-time self-service to benefits, compensation, personnel, expense, etc
- **Logistics:** Supply chain visibility, Demand-to-Deliver view
- **Call Center:** Improved agent productivity, reduced call times, self service for simple transactions.

**IBM WebSphere Portal Express** integrates portal, document management, web content management, collaboration, integration, presence management and instant messaging capabilities in an easy to deploy solution designed to meet the needs of Small and Medium businesses. IBM WebSphere Portal Software is the recognized leader in portal software.
