

Foster Innovative Teams and Communities.

Drive growth with vibrant business communities and empowered participation across teams.

Collaboration solutions for today and tomorrow

With an eye towards the future, you want to choose technology with the flexibility to meet tomorrow's challenges. As your organization adapts to new priorities, you'll want solutions with the security-rich features, scalability, choice of delivery model, and built-in capabilities to adjust to your changing needs - while still bringing people together and enabling them to perform their best.

Nurture collaboration across boundaries

Communities and teams are most effective when they're not blocked by time zones, geography, or organization charts. When people can discover information, tap knowledge networks, and share ideas, innovation blooms and business practices flourish. IBM social computing helps you discover experts, expand personal networks, and make it a snap to share - so teams can function better and outmaneuver your competition.

Lotus Social and Real-time Collaboration combines the strengths of 3 leading Lotus software products

Special Offer RM25,615

50 users with IBM System
x3650 M3 server

IBM Lotus Connections empowers business professionals to develop, nurture and remain in contact with a network of their colleagues; respond quickly to business opportunities by calling upon the expertise in their network; and discuss and refine new creative ideas with communities of coworkers, partners, and customers. Capabilities include dynamic profiles, wikis, blogs, shared bookmarks and files, communities and activities.
