- Lotus Quickr and Enterprise Content
- Looking ahead to the future
- Questions

Business Imperatives in Today's Connected World

I NEED TO CUT COSTS

Use existing resources, applications and content more effectively to enhance productivity across my organization

SMART WORK

I NEED MORE INSIGHT

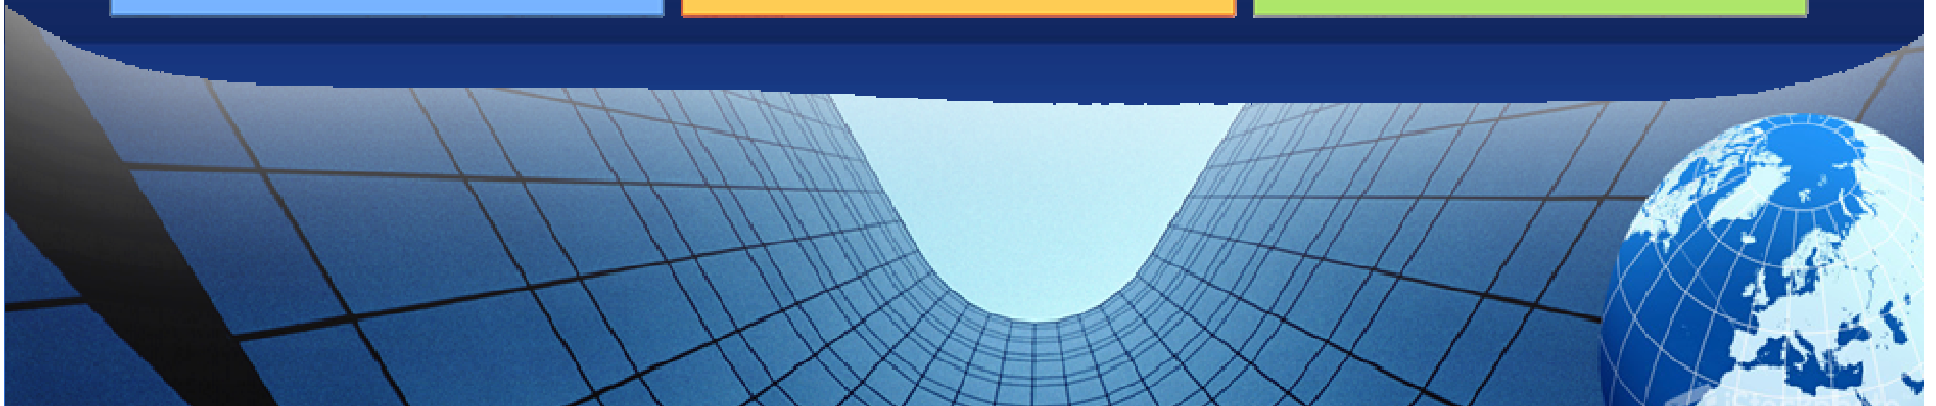

Help employees find the right information at the right time to make better and more informed business decisions.

GREATER AGILITY

I NEED AN ADVANTAGE

Leverage innovation from across the value chain and create stronger relationships to achieve sustainable competitive advantage

INNOVATION

I must work smarter, be more agile, and innovate in the context of a smaller, smarter planet

- Global integration
- Virtual teams spanning the globe
- Collaboration with my partners and customers
- Rapid change

And I need to do it all with a changing workforce...

In the year 2000, there were more people **receiving pensions** in Italy than **people working** (22 versus 21 million)

Within the next seven years, **33 million people** in Japan (26%) will be **over 65 years old**

19% of the entire American workforce holding **executive, administrative and managerial positions will retire in the next five years**

By 2016, people **aged 60-64** in Australia is expected to almost **double**

2008 IBM CEO Study: Defining the “Enterprise of the Future”

Collaboration is the #1 Concern and Priority

Let's talk about Lotus Quickr and Collaboration 2.0

Agenda

- Business Imperatives for Success
- **Lotus Quickr and Collaboration 2.0**
- Lotus Quickr and Enterprise Content
- Looking ahead to the future
- Questions

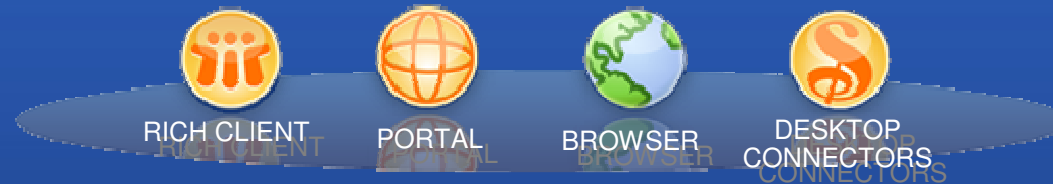

Lotus Quickr is

- Web 2.0-based team collaboration software.
- Designed to transform the way everyday business content such as documents and rich media can be shared.
- A tool to enable more effective team collaboration within and across organizational boundaries.

Lotus Quickr: Enabling teams to work together effectively

Content

Lotus software

Two deployment options

* These platforms may require a separate purchase

Some Lotus Quickr capabilities

Libraries

Quickly manage documents, forms, images, or other media in content libraries that you can manage and share with others.

Team Discussions / Forums

Keep a journal or blog of your meetings or creating discussions on different topics effecting your team.

WIKIs (Shared Editable Pages)

A shared editing space that team members can use to create and manage content such as designs, presentations, or other group material.

Team Calendar

Manage a community view of important events and activities that effect your team.

RSS / ATOM Feeds

Quickr provides the ability to produce a feed into your favorite feed reader so you can keep up with changes to places.

About this Library

Name: Team Documents

Description: Lotus UX Team Documents

Role: Editor ?

Subscribe to this Library

Copy link to clipboard

Drag desktop files and folders here

Share files and documents virtually

Quickly set up libraries to store and share content securely

DOC LIBRARIES

- Securely share documents with colleagues, customers and partners
- Supports a wide range of content sharing – Enterprise library, Team library, and Personal library

The screenshot displays two overlapping windows from the Lotus Quickr application. The top window shows a 'Library' view for 'Green Hands > Library'. It includes a navigation pane on the left with options like Home, Discussion, Library, Calendar, Tasks, Go Green Wiki, Index, and Members. The main area shows a table of files with columns for Type, Title, Created On, Updated By, Modified On, and Download. The bottom window shows a 'Files' view for 'Heather Reeds'. It features an 'Upload a File' button, a 'Most Recent' section, and a list of files with details such as title, added date, and download count. The files listed include 'Energy Savings Data for the Go Green Program at Renovations', 'Go Green Program - Reduction Notes', 'Building a Culture of Sustainability at Your Company.doc', 'Green Economics Cost Savings.xls', 'Renovations Go Green Program Demo', 'Project Green Hands Environmental Research Study', 'Building Green: Practice and Theory.ppt', 'Tax Breaks and Funding Resources for Environmental Initiatives', 'Environmentally Friendly Lumber Suppliers', and 'Potential Enviro-Friendly Delivery Services'.

Blogs to Encourage Feedback and Sharing

- Supports both individual and group blogging
- Support discussions across silos, inside and outside your organization
- Allow customers and partners to provide their thoughts and feedback
- View highly rated entries and get notified of important issues

A screenshot of the Lotus Connections Blogs web application. The interface is clean and organized. At the top, there's a navigation bar with tabs for "Connections", "Home", "Profiles", "Communities", "Blogs", "Dogear", and "Activities". The "Blogs" tab is active. Below the navigation, there's a search bar and a "Search All" button. The main content area is titled "Blogs" and has sub-tabs for "Browse Blogs", "My Updates", and "My Blogs". The "Browse Blogs" sub-tab is selected. On the left, there's a sidebar with "Latest Blog Entries", "List of Blogs", and "My Favorites". Below that, there's a "Tags" section with a search box and a list of active tags like "innovation", "ideas", "travel", "blogging", "social", "studio", "creative", "solution", "web", "bookmarking", "design", "rss", "information", "insourcing", "pos", "sales", "bookers". The main content area displays "Latest Blog Entries" with a list of blog posts. Each post includes a title, author, and date. A "More Sort" dropdown menu is open over the list, showing options for "Comments", "Visits", "Title", and "Author". On the right, there are sections for "Featured Blog Entries", "Most Recommended", and "Most Comments". The "Most Recommended" section lists popular entries like "Design fundamentals" and "RSS - Really Simple...". The "Most Comments" section lists entries with high comment counts like "Game Development" and "An intro to Adobe...".

Clean 'n Green

About Matt, Marketing VP

- Launching new biodegradable cleaning product
- Needs to work closely with sales team to plan a strong launch event & get customers excited at upcoming supermarket demos
- Must align the right messages for the launch, their competitive differentiation, and build the buzz with customers and partners
- Needs to work closely with sales and product mgt to align all the content, messages, and to closely organize these events across the country

Challenges

- **Short runway**: limited time to get groups working together
- **Close coordination** for launch, supermarket events, documentation, and sales teams
- Teams in **multiple geographies** significant travel to sync up
- Needs a place for people to **come together** and review product information and launch material
- No way to **solicit partner feedback** and share content outside the organization

Clean 'n Green

Solution

- Lotus document services provides "free form" Web 2.0 capabilities such as blogs, wikis, etc. Everyone works together on content in structured and unstructured ways - which will help get the product to market sooner
- Matt can track progress closely with workflow; approvals are sent to team members as he finalizes content
- Lotus Notes is integrated with document services, so the teams can capture email & IM discussions directly into the project repository, which speeds up time to delivery
- Sales reps take content offline and synchronize when reconnected. Events and tasks are posted to their calendars & email so that they can properly coordinate on the events
- Authors work together in real-time, reducing travel costs and speeding the product release
- Document services are extended through the company's extranet, for partners

Benefits

- ✓ **Seamless Content Authoring:** structured and unstructured content with workflow for approvals and proper assignments
- ✓ **Efficient Task/Issue Tracking:** team is focused; easier to foresee roadblocks
- ✓ Collaborative discussions are an **open feedback** mechanism for the team to work on document drafts
- ✓ **Solid Security**

What makes this Collaboration 2.0?

- ✓ Enabling people to work the way they naturally work (via the Quickr connectors)
- ✓ Making it easy to get started and keep going (out-of-the-box templates and customization without programming)
- ✓ An engaging and interactive user experience (Web 2.0)
- ✓ Meeting the needs of both individuals and teams
- ✓ Self-service and viral adoption
- ✓ Integration with social and real-time collaboration software

Agenda

- Business Imperatives for Success
- Lotus Quickr and Collaboration 2.0
- **Lotus Quickr and Enterprise Content**

Lotus Quickr integration with ECM

- **Direct access** to content in Lotus Quickr and ECM repositories via Quickr connectors
 - Easy to create, share and collaborate using Lotus Quickr connectors
 - Access from your familiar desktop applications
 - Move content from Lotus Quickr into ECM (and vice versa)
 - A “federated” desktop view of content from multiple repositories

Quickr Connectors

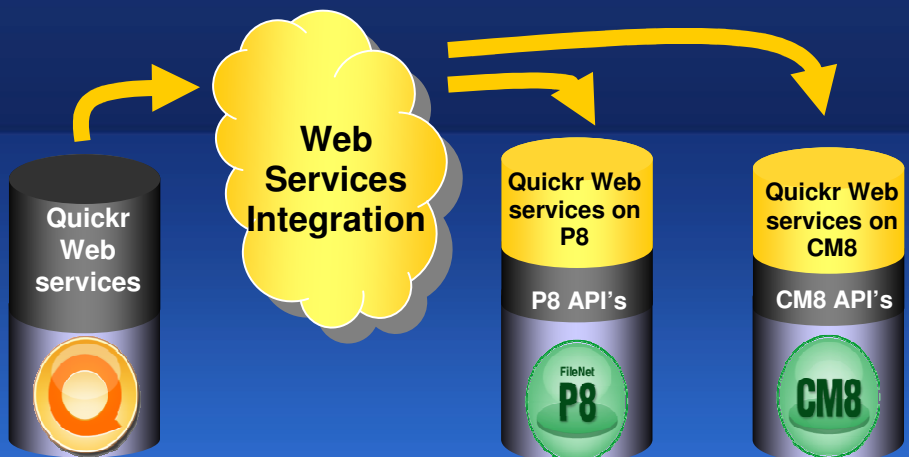

Lotus Quickr integration with ECM

- From a browser, user accesses Lotus Quickr server to see and interacts with ECM content
 - User initiated document move, move with link, or copy into ECM
 - Create links to existing ECM content within Quickr
 - Display contents of ECM folders within Quickr easily using feeds
 - Search ECM content from within Lotus Quickr

Quickr Connectors

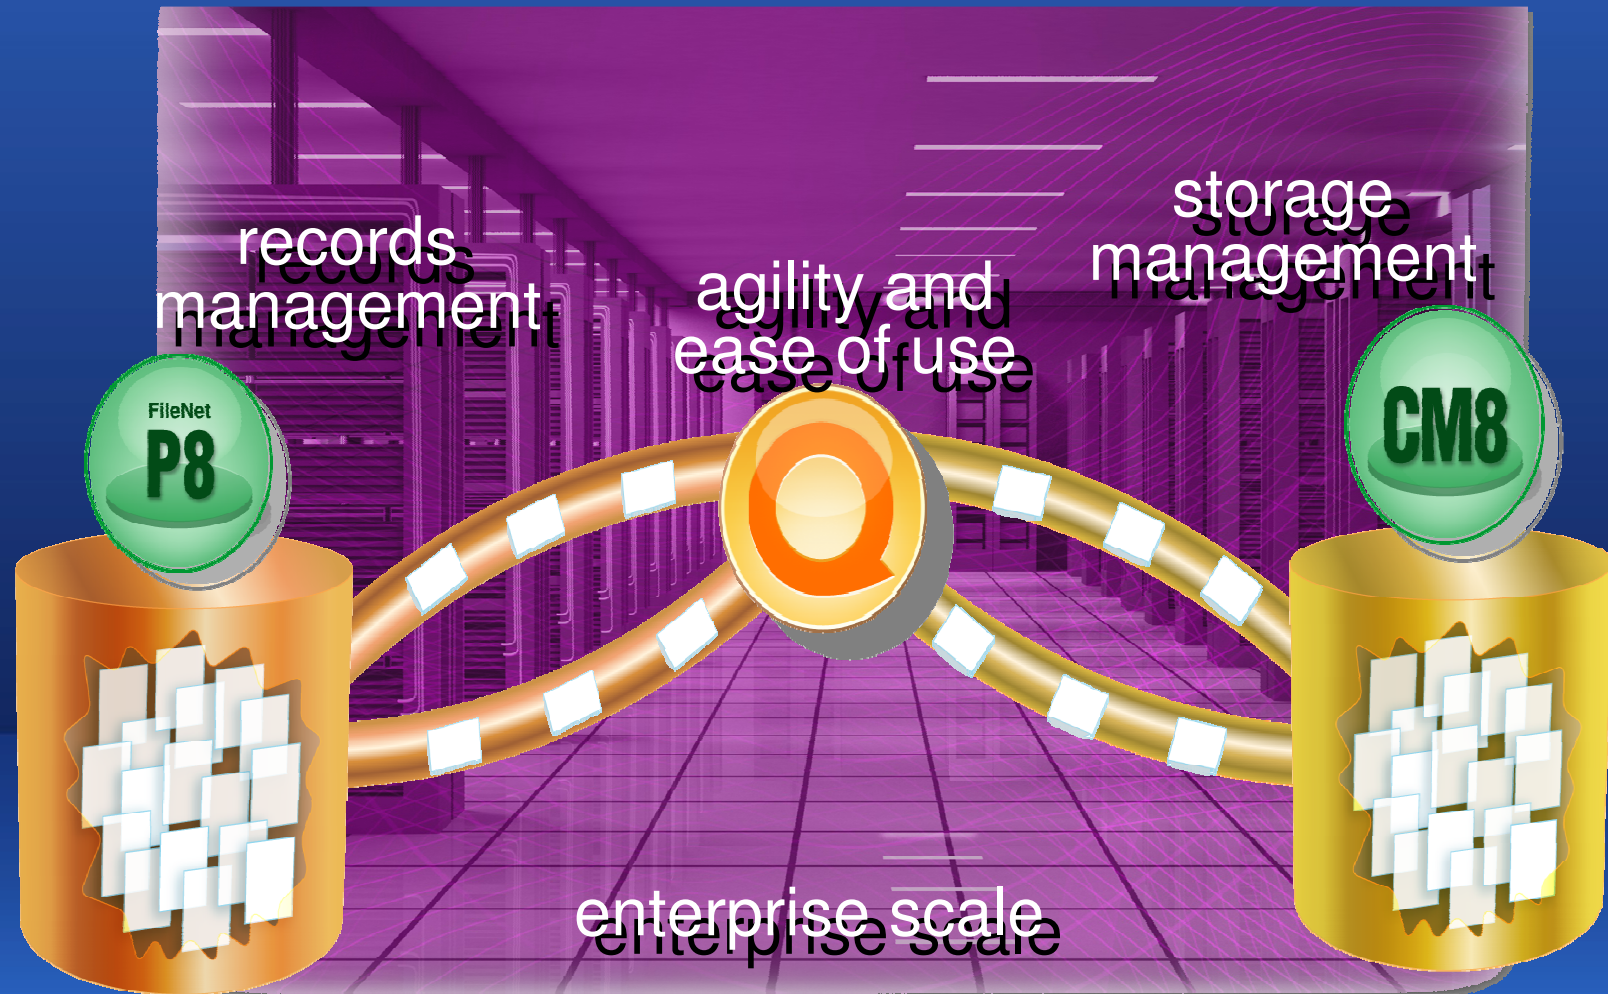

Quickr web UI

Uniting Best-of-Breed Collaboration and Industry-Leading ECM

The most complete single-vendor collaboration and content solution available

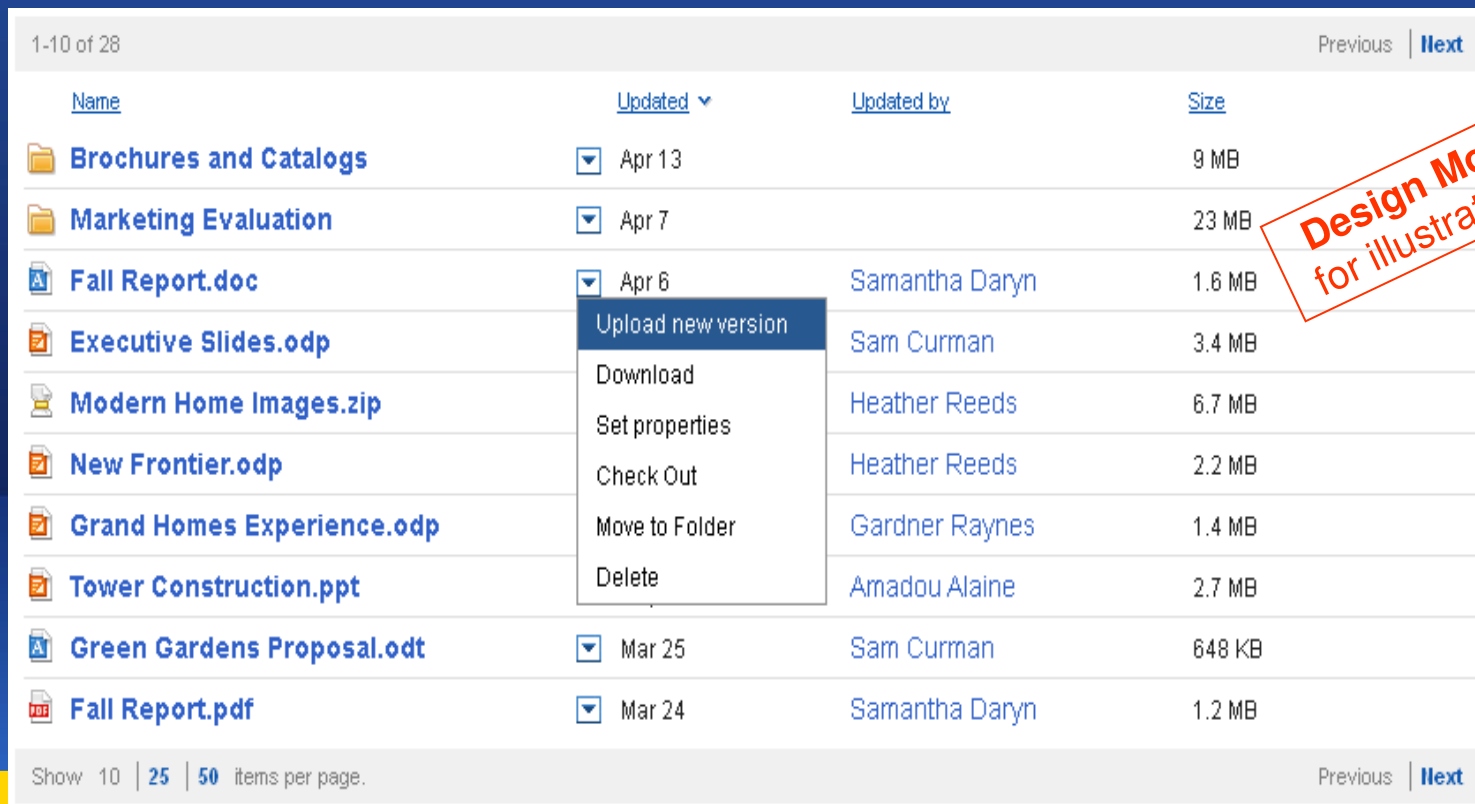

Agenda
