

The future runs on System z

Enterprise Modernization

*Lowering the cost of multi-platform
application development and delivery*

*Hayden Lindsey
Vice President & Distinguished Engineer
IBM Rational Enterprise Tools & Compilers*

Change is the new norm

There are **1 billion** camera phones in use today

IBM Sequoia Super Computer...
It would take the **entire population of the earth**, about six billion, each of us working a handheld calculator at the rate of one second per calculation, **more than 320 years to do what Sequoia can do in one day.**

“8 of 10 CEOs see significant change ahead”
- 2008 IBM CEO Survey

The **internet of people** is over one billion strong. The **internet of things** is almost one trillion.

By 2010, there will be **30 billion RFID tags** in circulation

Soon there will be over **2 billion people** on the web

China sends more text message in **a week** than the U.S. does in **1 year**

Change can be ~~very disruptive~~ an opportunity

IT skills shortage reaches highest level in 10 years

All software systems crashed due to software bug when F-22 flew over international dateline

50% of outsourced projects are expected to under perform

“The gap between expected change and the ability to manage it has almost tripled since 2006.”
 – 2008 IBM CEO study

COBOL thwarts California's "Governator"

North Carolina Jobless Claims Crash State's Web Site

Ohio election web site shut down after being hacked

View fashion shows and collections on your iPhone

Malta is building smart grid to link the power and water systems

Mobile phone provider "3" launches new handset to allow users to make free calls via Skype

For example, a smarter planet requires lots of software

- For businesses and institutions everywhere, there have never been so many *new possibilities*
- Imagine the amount of *software* necessary to:
 - ▶ Deliver a green world
 - ▶ Take advantage of information base explosion
 - ▶ Communicate with a trillion devices
 - ▶ Drive on-going product differentiation
 - ▶ To seize new global market opportunities
- Leaders everywhere are deploying *increasingly intelligent* software, systems and products
- Accelerating innovation and enabling effective change is highly dependent on our ability to *manage effective software delivery*

Let's build a smarter planet

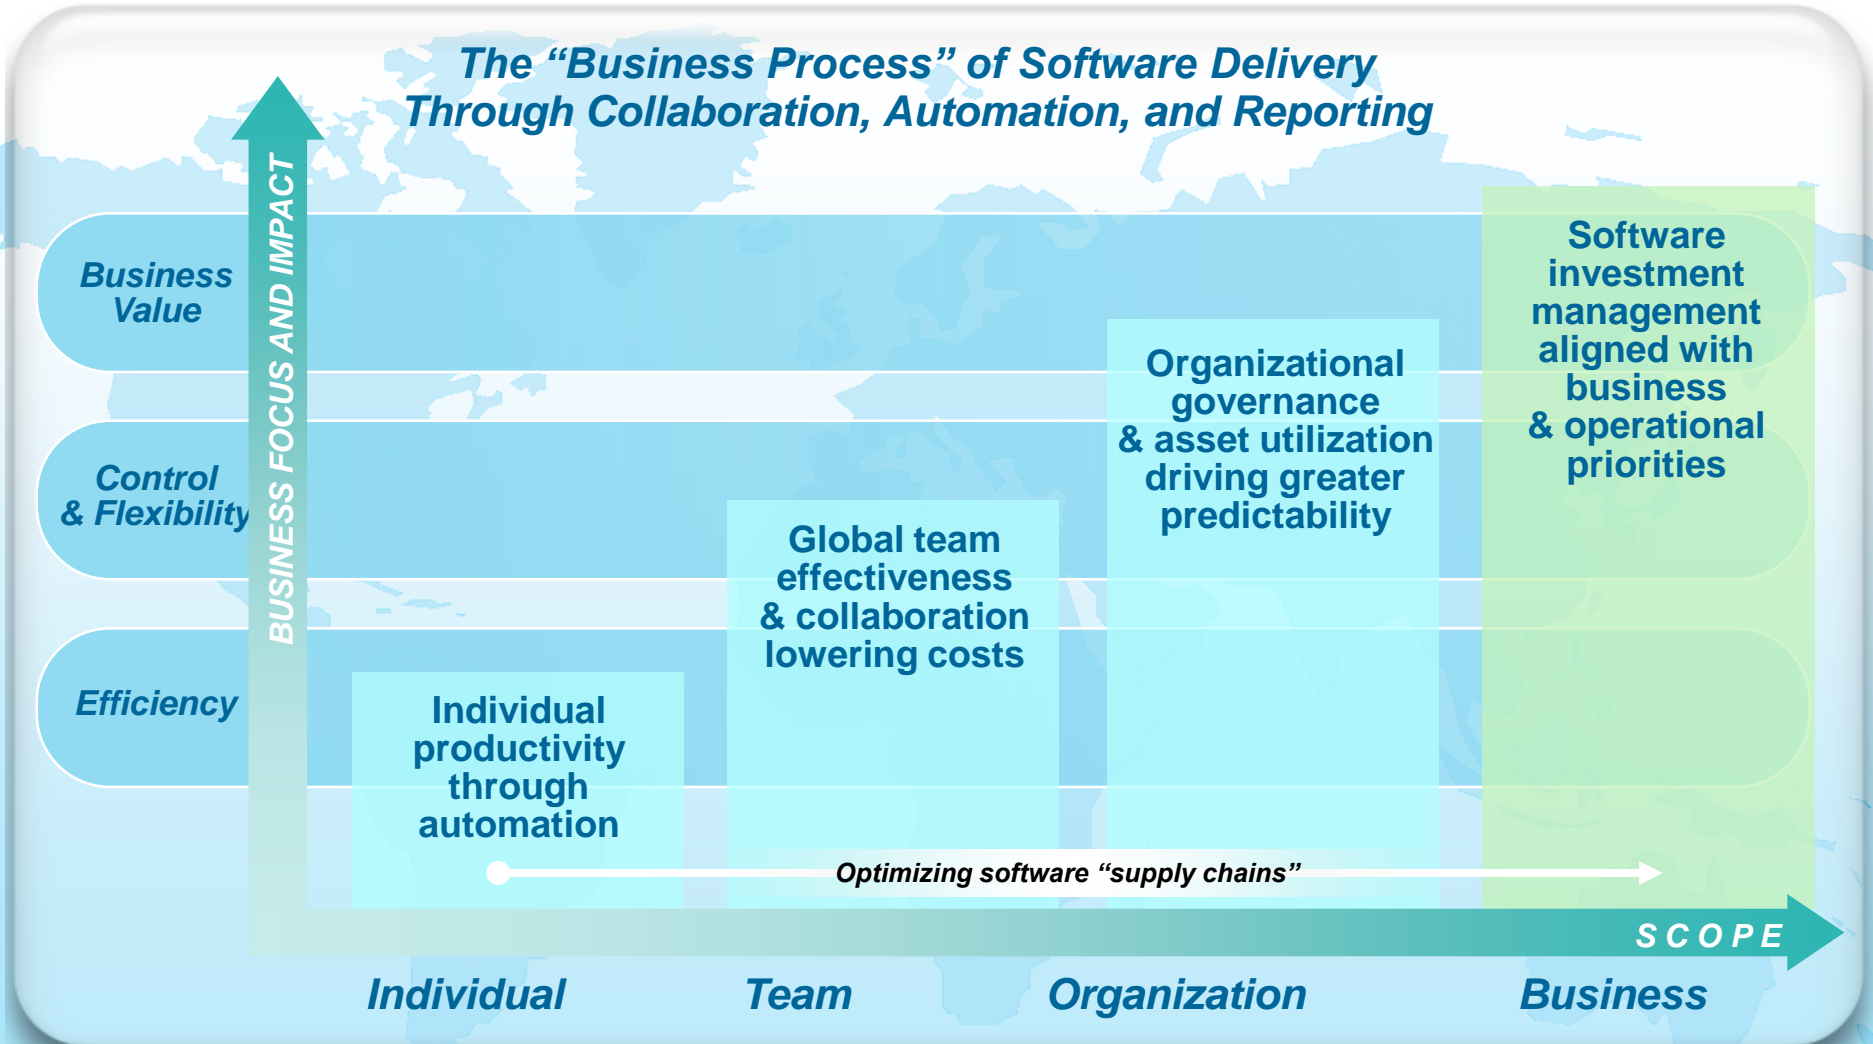

Is your IT infrastructure flexible enough?

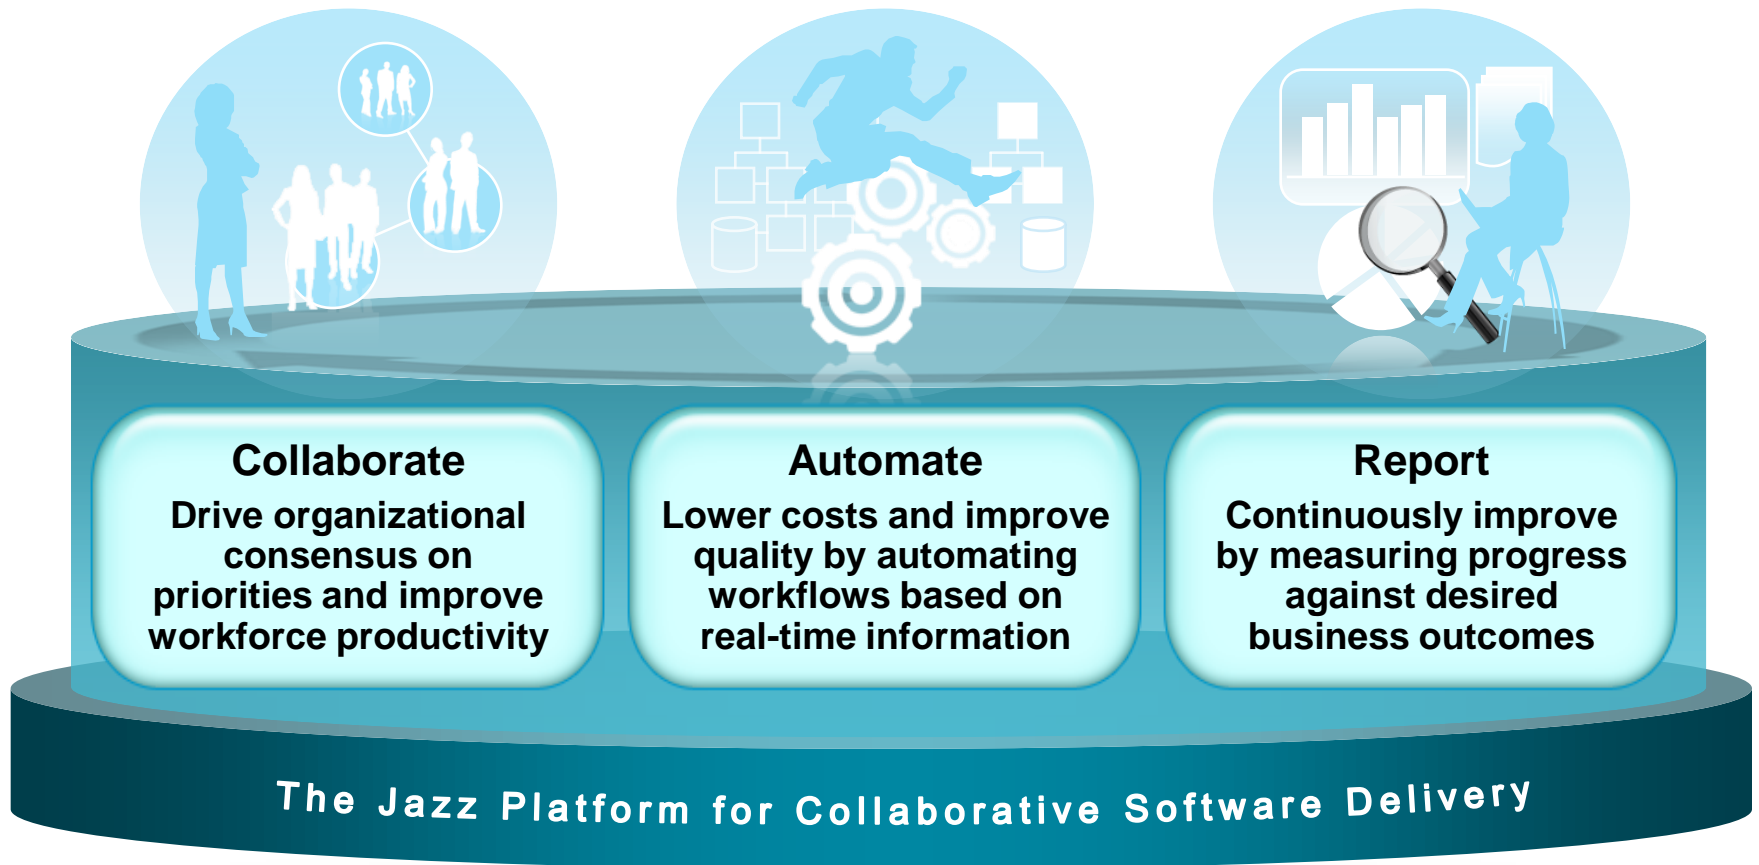

“The message for IT is clear; business needs and expects greater agility from IT. The current approaches to project prioritization, resourcing, agility and governance are clearly not satisfying customer needs. A new approach to IT delivery models and sourcing options is required that allows IT organizations to be more responsive to the needs of the business.”

– Gartner, October 14, 2008, “Changing the Cost Structure of IT Will Become a Business Imperative for Most CIOs”

Treat your software as a strategic business process

Align your evolving business priorities and stakeholder constituencies

Yet the wrong metrics can incent negative behavior

OUR GOAL IS TO WRITE
BUG-FREE SOFTWARE.
I'LL PAY A TEN-DOLLAR
BONUS FOR EVERY BUG
YOU FIND AND FIX.

NEW MINIVAN
THIS AFTER-
NOON!

You need a framework to improve software delivery

The Managed Capability Improvement Framework (MCIF)

- Drive business innovation and reduce costs through measured and continuous process improvement
- A phased approach that helps teams
 - ▶ Adopt an incremental, measured approach to transformation
 - ▶ Focus on the core practices that matter most
 - ▶ Accelerate adoption through out-of-the-box assets
 - ▶ Articulate capability improvements in terms of business value
 - ▶ Support any method
 - Optimized for Agile practices

MCIF helps software and systems delivery teams measure, manage and incrementally improve their software delivery capability.

Rational solutions can help in 3 domains

- **Enterprise Modernization** – harness the same power and flexibility for all types of applications, no matter what platform they are deployed on
- **IT Business Transformation** – align your IT infrastructure with your business strategy and vision to innovate new business strategies and meet long term objectives
- **Complex/Embedded Systems** – deliver innovative software for your products, while integrating across mechanical, electronic, and software domains

Key modernization challenges for IT organizations

"We don't understand the effort, risk and impact of modernizing our legacy software portfolio"

"Our skills gap just seems to keep growing. How do we stay current with all the language and technology changes?"

"Our architecture has evolved to be too complex and convoluted— we need to be flexible and agile."

"Our development teams working on different platforms are struggling to communicate. How do we collaborate in the context of our work?"

Application Challenges

- Lost application knowledge
- Architectural complexity
- Poor quality and performance
- Regulatory and compliance risks

People Challenges

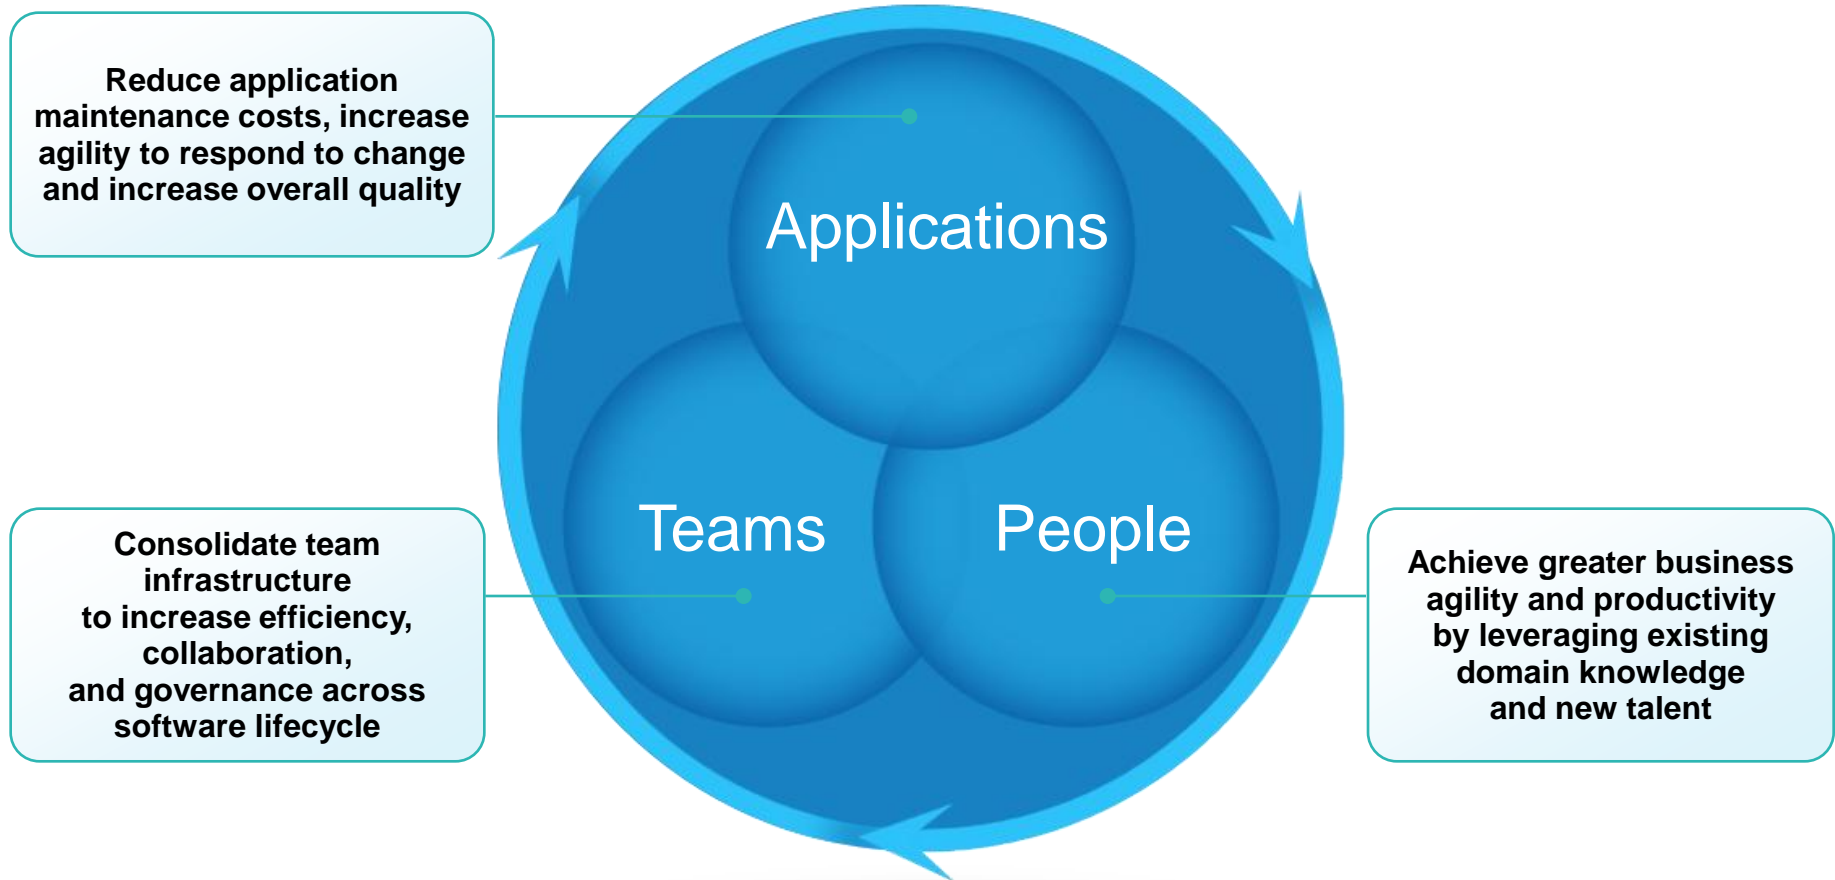

- Skills lock-in
- Plethora of new technologies
- Unattractive, low productivity IDEs
- Steep learning curve due to platform/language-unique tools

Team Challenges

- Poor communication
- Incompatible tools & processes across platforms
- Weak project oversight
- Lack of traceability across lifecycle

Enterprise Modernization solutions

A smarter way to maximize the value of your applications, people and teams

For more information, visit:
www.ibm.com/rational/modernization

Application challenges

CIO

"I need to reduce my annual IT budget by 10 percent. Which applications can I sunset?"

Architect

"Our architecture has evolved to be too complex and convoluted – Can SOA help us build apps that are flexible and agile?"

Development
Lead

"Our distributed applications increasingly rely on access to mainframe data and applications. How can we determine the impact of all the changes we need to make?"

Developer

"We're using XML to define shared data across multiple applications. Can I use XML with my older COBOL and PL/I applications?"

Tester

"Changes to applications have been patched together for so many years that we now have many challenges with the quality and performance of our legacy applications."

Manage the applications that run your business

- Restore lost application knowledge
 - ▶ Quickly determine full impact of proposed changes
 - ▶ Identify and eliminate dead code
 - ▶ See code complexity and opportunities for simplification

- Manage the evolution of your application portfolio
 - ▶ Understand entire application portfolio, any dependencies, and map them to your business processes
 - ▶ Speed the efficiency of decision-making with up to date dashboards
 - ▶ Understand your enterprise architecture - link applications, deployed systems, organizations, business processes
 - ▶ Make decisions to sunset applications based on business value

✓ Align IT investments with business goals

- ▶ Telelogic System Architect
- ▶ Telelogic Focal Point

✓ Discover, analyze and manage application portfolio

- ▶ Rational Asset Analyzer
- ▶ WebSphere Studio Asset Analyzer

Enterprise Application Knowledgebase

✓ Manage reusable assets, business rules and services

- ▶ Rational Asset Manager
- ▶ ILOG Business Rules Management Systems (BRMS)
- ▶ WebSphere Service Registry and Repository

Transform complexity into usable information

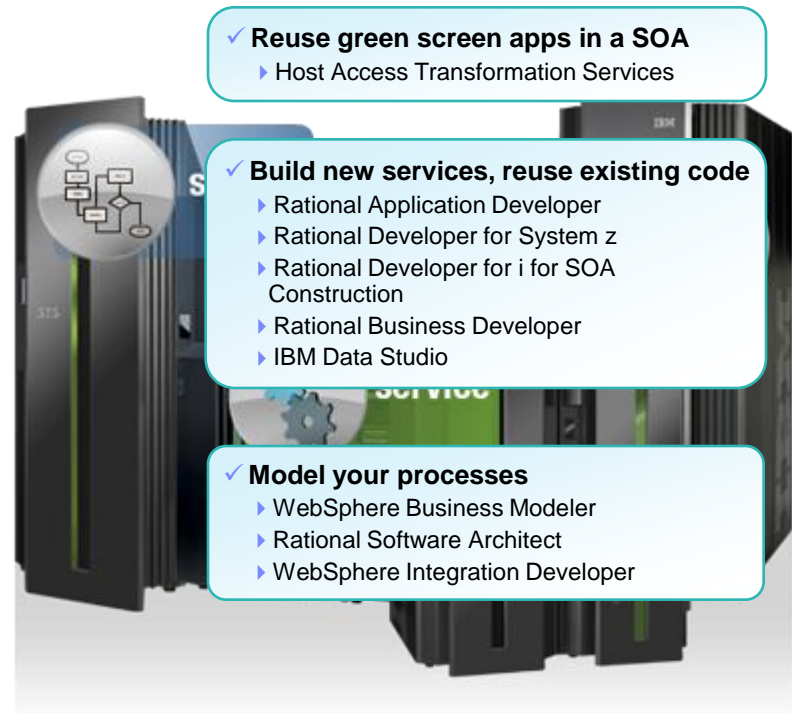

Auto manufacturer used WSAA and RTW to automate identifying changes required to permit ordering cars with more than 16 options. Used Rational solutions to create automated test environment charges. Saved \$12M on first project.

Build flexible applications with SOA and Web 2.0

- Reuse proven assets
 - Re-factor existing assets for reuse
 - Achieve fast ROI by enabling your green screen applications
 - Quickly create web services from existing EGL, C/C++, COBOL, PL/I, RPG and Java applications

- Accelerate deployment of new services, processes and user interfaces
 - Create new platform independent services
 - Quickly model, architect and assemble new business processes
 - Rapidly build modern Web 2.0 interfaces

“HVB IS adopted IBM Rational® Developer for System z software to accelerate mainframe development, improve the efficiency of its COBOL development teams, and move to a similar environment for mainframe and Web development.” - [Almut Geiger, Product Specialist at HVB IS](#)

Deliver high quality applications

- Coordinate end-to-end quality across all tools and platforms
 - Elicit, capture, elaborate, discuss, manage, and review requirements
 - Identify and resolve coding errors automatically, early in the development cycle
 - Consolidate and monitor test plans, test progress
- Automate your testing
 - Automate functional tests
 - Find performance bottlenecks
 - Expose vulnerabilities, privacy issues, and accessibility problems in web applications
 - Generate timely audit and compliance reports

✓ Quality begins with good requirements

- ▶ Rational Requirements Composer
- ▶ Rational RequisitePro
- ▶ Telelogic DOORS

✓ Manage quality throughout the lifecycle

- ▶ Rational Quality Manager
- ▶ Rational Test Lab Manager

✓ Inject quality during the coding phase

- ▶ Rational Software Analyzer
- ▶ Rational PurifyPlus
- ▶ z/OS Problem Determination Tools

✓ Automate testing to improve quality

- ▶ Rational Functional Tester
- ▶ Rational Performance Tester
- ▶ Rational Service Tester for SOA Quality

✓ Eliminate quality exposures for your web apps

- ▶ Rational AppScan

“AppScan has increased our team’s productivity by enabling us to automate very complex and time-consuming activities as well as help substantially increase our level of quality, security and regulatory assurance.”
 - Technical Security Officer

Improve application performance & scalability

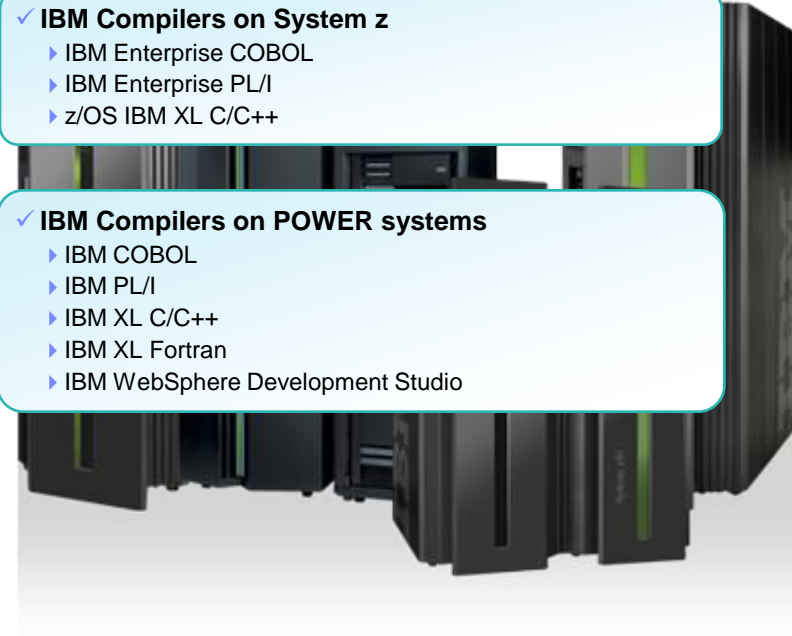

- Increase capacity and performance without hardware upgrades
 - Boost performance with new advanced optimization technology in C/C++, COBOL and PL/I compilers
 - Reduce cost of COBOL and PL/I XML parsing by offloading to zAAP specialty engine
- Maximize application performance on new z10 and Power6 servers
 - Exploit new hardware architectures without code change
- Modernize legacy applications
 - Leverage XML and Java interfaces in COBOL and PL/I applications

✓ IBM Compilers on System z

- ▶ IBM Enterprise COBOL
- ▶ IBM Enterprise PL/I
- ▶ z/OS IBM XL C/C++

✓ IBM Compilers on POWER systems

- ▶ IBM COBOL
- ▶ IBM PL/I
- ▶ IBM XL C/C++
- ▶ IBM XL Fortran
- ▶ IBM WebSphere Development Studio

“Metal C optimization levels are just incredible. We’re really impressed, there is no way that any of us assembler programmers can write code as efficient, keep it readable, and do it in a reasonable amount of time.”

- Gregg Willhoit, Senior Assembler Architect, DataDirect

People challenges

CIO

“My budgets keep getting reduced. How can we do more work with fewer people?”

IT Manager

“College graduates aren’t interested in my green screen development tools. Is there something more appealing I can offer them?”

Project Manager

“My host programmers don’t seem to communicate with my web developers when building multi-platform applications. It’s like they speak different languages.”

Architect

“How can I architect solutions that shield developers from technical interfaces of platform and middleware technologies?”

Developer

“How can I keep pace with technology changes and keep my skills relevant to the industry?”

Improve developer productivity with modern IDEs

- Use common Eclipse-based tooling across multiple platforms and languages
 - Achieve ~15% improvement in mainframe developer productivity¹
 - Reduce host CPU usage 50%-80%¹ with workstation syntax checking
 - Reduce training costs, more attractive IDE for younger developers
- Speed development with specialized editors and code generation wizards
 - Code assist for COBOL, PL/I, C/C++, Visual editors for BMS and MFS maps
 - Generate code from UML

System z and IBM i Green Screen Editors

COBOL in Rational Developer for i

- ✓ Produce code faster, save MIPS
 - ▶ Rational Developer for System z
 - ▶ Rational Developer for i
 - ▶ Rational Developer for i for SOA Construction
 - ▶ Rational Business Developer

Target Platform:
System z, IBM i, and distributed

¹ Aggregation of results from a productivity study conducted by IBM mainframe customers.

“RDz offers a uniform, open programming environment for both J2EE and PL/I developers. RDz accelerates PL/I development with its local syntax checker and debugging tool.”

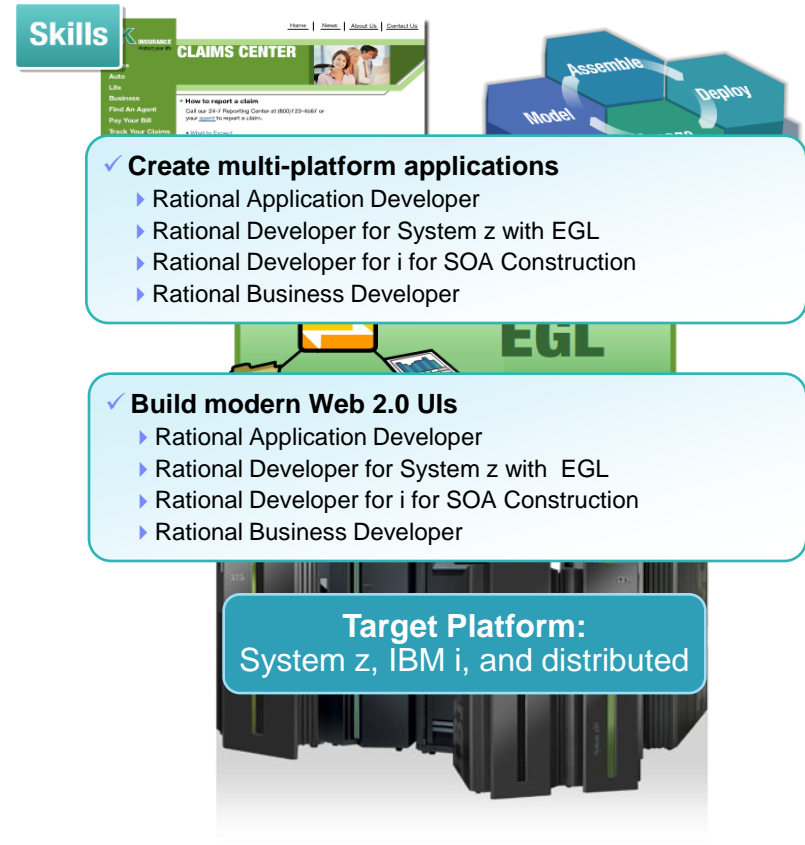

- [Dr. Axel Lömker, KfW Bankengruppe](#)

Build multiplatform apps with existing/new staff

- Deliver multiplatform solutions quickly
 - Leverage abstractions to hide middleware & platform complexity
 - Deploy to any platform, including J2EE™, System z and IBM i, Linux
- Build modern Web 2.0 user interfaces without being a technology expert
 - Empower existing developers to build Rich Internet Applications (RIA)
 - Eliminate need to have skills in JavaScript, Ajax, JSON, HTML and CSS, etc.

- ✓ **Create multi-platform applications**
 - ▶ Rational Application Developer
 - ▶ Rational Developer for System z with EGL
 - ▶ Rational Developer for i for SOA Construction
 - ▶ Rational Business Developer

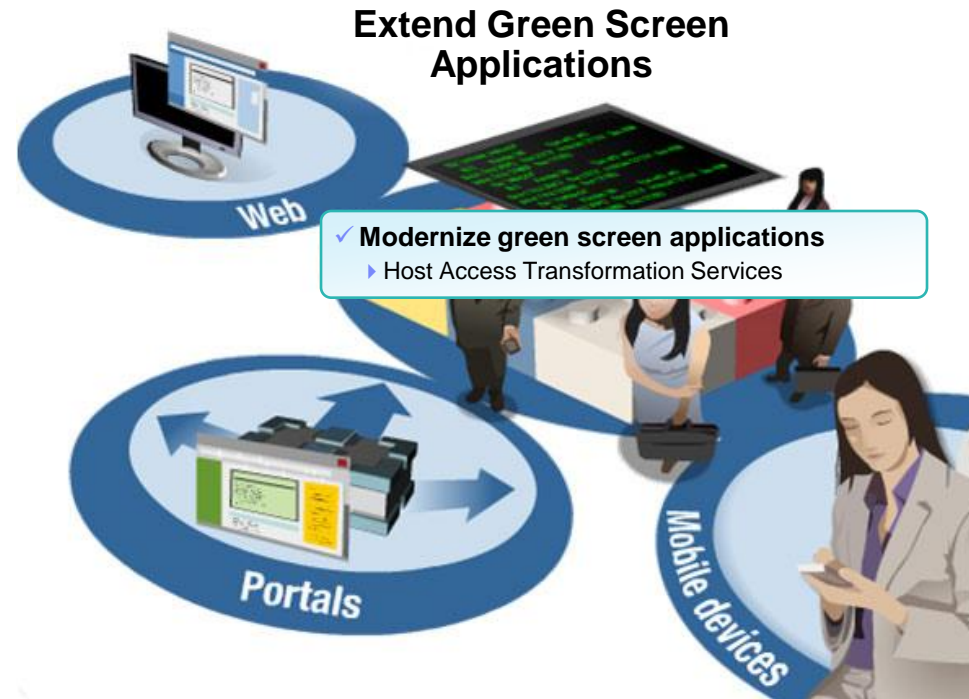

- ✓ **Build modern Web 2.0 UIs**
 - ▶ Rational Application Developer
 - ▶ Rational Developer for System z with EGL
 - ▶ Rational Developer for i for SOA Construction
 - ▶ Rational Business Developer

“Currently we have one set of developers for web applications, and another for batch systems. With EGL, the same developers can do both, and we can offer our clients a choice of deployment platforms.”
 - [Mauricio Alvarenga, IT Manager at Montreal Informática](#)

Extend green screen apps for new uses without web skills

- Use your existing staff to provide Web, portal, mobile or rich client UIs for your green-screen applications
 - Provide your end users with flexible, secure Web access to business applications
 - Dramatically reduce end user training and improve IT staff productivity
 - Deploy with no source code modification or application downtime
- Expose host business processes as Web Services

“Rational Host Access Transformation Services (HATS) makes legacy modernization a relatively easy and fast process. I estimate that HATS cut 75% of the man-hour requirements from other approaches we have used”
 - [Alan Jack, Director of Technology, Oxford International](#)

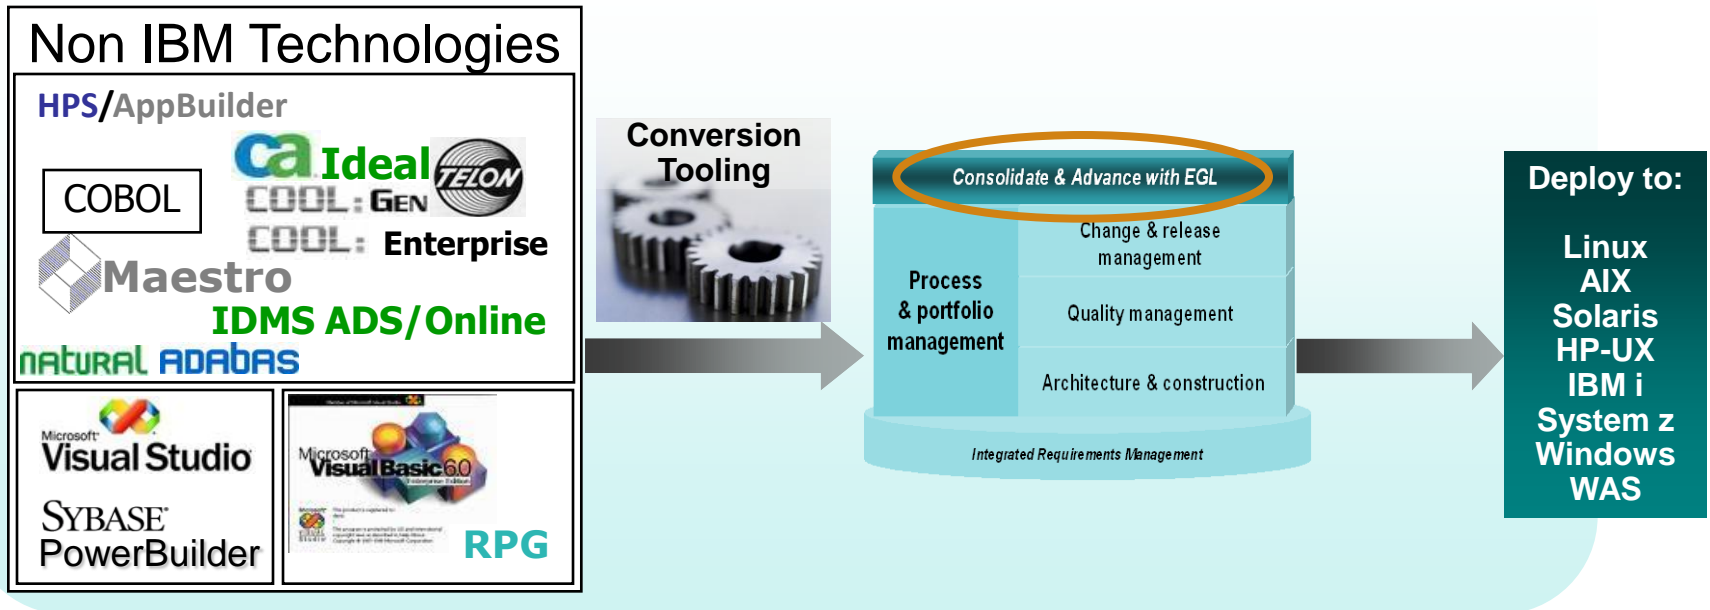

Move to a modern development platform

- Get huge savings by migrating from old, stagnant languages to modern development platforms, languages & tools
 - Solutions for Natural/ADABAS and Cool:Gen

✓ **Migrate from old languages**
 ▶ Rational Migration Extension for Natural

Get the enterprise skills you need

- Hire university students with System z, IBM i, and Rational skills
- Leverage a growing community of business partners, customers, and IBM employees on our community cafés
- Take advantage of free education sessions , product demos, tutorials, white papers, and case studies
- Play in the System z and IBM i sandboxes
 - “Try online” hosted System z and IBM i environments
 - See best practices, hands-on exercises using full version software trials

- ✓ **Partner with universities worldwide**
 - ▶ 537 schools, over 50000 students educated on System z
 - ▶ Schools in 41 countries teaching POWER systems
 - ▶ 2400 universities teaching IBM technologies
- ✓ **Stop by a Community Café**
 - ▶ C/C++ Café
 - ▶ EGL Café
 - ▶ RPG Café
 - ▶ COBOL Café
- ✓ **Take a class**
 - ▶ Modern Application Architecture for COBOL Developers – build composite COBOL apps with CICS and WebSphere
 - ▶ EGL Distance Learning – 8 days of free lectures, labs, electronic support

Elizabeth Bell, Georgian College

Team challenges

CIO

“Our global software teams working on different platforms are struggling to communicate. How do we collaborate in the context of our work?”

IT Manager

“My line of business needs better access to information about the ongoing projects.”

Project Manager

“I need a dashboard that lets me easily see if my project is on track and identify any bottlenecks.”

Team Leader

“Why are some developers not following the agreed upon processes?”

Developer

“Why and when was this changed? Is this the latest version that I should be using?”

Unify disparate IT infrastructures across teams

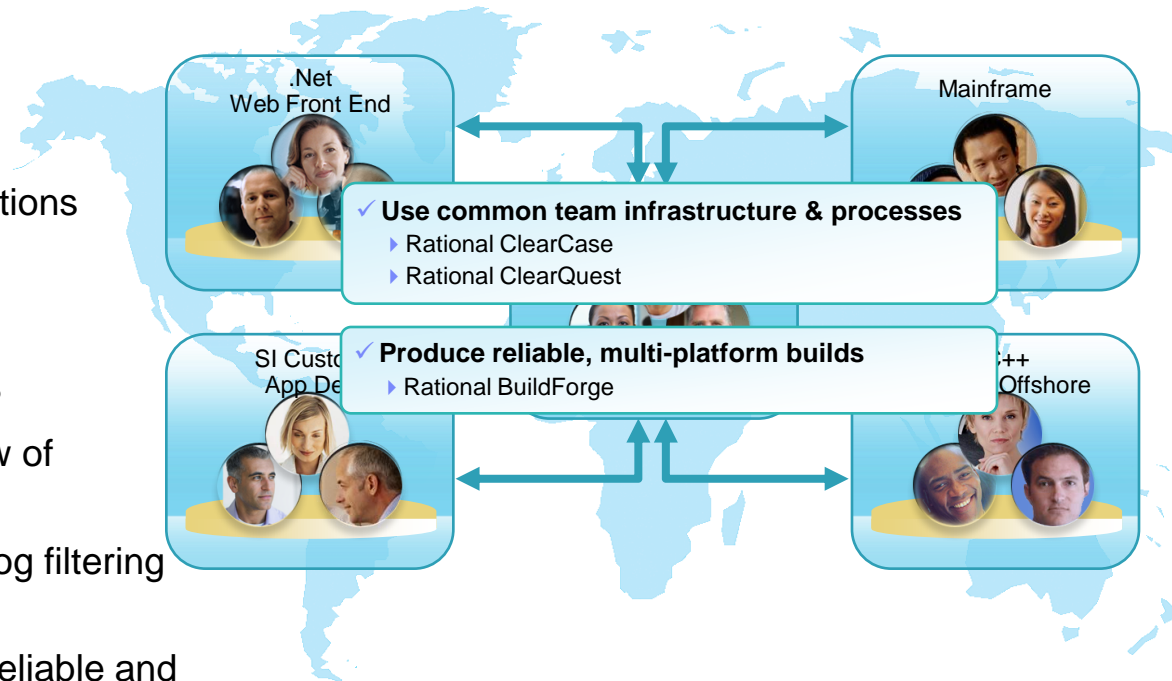

■ Consolidate your team infrastructure

- Eliminate redundant and duplicate tools and processes
- Unify change management for all platforms, languages, roles, and locations
- Ensure accurate global software delivery with a single point of control

■ Automate multi-platform builds

- Access a consolidated, real-time view of software assembly processes
- Detect and resolve errors with error log filtering and automated email notifications
- Reproduce problems quicker with a reliable and automated 'Bill of Records'

“By providing our development teams with a common platform from which to analyze, design, develop, and test, IBM Rational solutions have created opportunities to improve the quality of our software as well as our organization”

Improve cross-team collaboration

- Collaborate in context across all platforms and geographies
 - Make software development more automated, transparent and predictable
 - Think and work in unison with integrated source control, work item and build management
- Assess real-time project health
 - Capture data automatically and unobtrusively
 - Use the web for a global view of project status
- Automate best practices
 - Accelerate team workflow with dynamic processes
 - Leverage out-of-the-box or customized processes

The Rational Software Delivery Platform

Accelerating software innovation for the entire enterprise

- ✓ Difficult times present opportunities to companies that can adapt quickly
- ✓ IT frequently inhibits flexibility due to fragile and poorly understood applications, limited staff productivity, poor collaboration and traceability across teams
- ✓ Rational Enterprise Modernization solutions deliver flexibility by:
 - ▶ Improving how you build, maintain, and manage your Applications
 - ▶ Helping your People be more productive
 - ▶ Consolidating Teams across locations, roles, and platforms
- ✓ Get started today. We can help!

Learn more at: www.ibm.com/rational/modernization

Leverage IBM Services to get started today

Executive Services

- ▶ Schedule an *Enterprise Modernization Executive Planning Session* to define modernization strategies

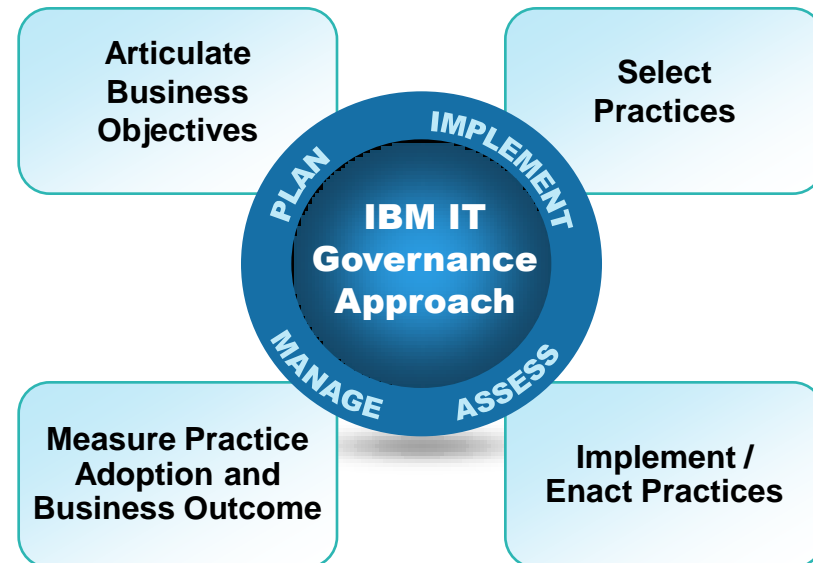

Application Modernization Services

- ▶ Application Assessments to:
 - ▶ Develop Modernization roadmaps to resolve specific business issues
 - ▶ Improve Application Quality & Performance
 - ▶ Identify opportunities for business software delivery improvements

People and Team Modernization Services

- ▶ Provide Implementation Services for Rational Enterprise Modernization tools
- ▶ Provide SCM migration assistance
- ▶ SDLC Assessments to:
 - ▶ Improve Software Delivery performance
 - ▶ Implement Software Delivery Metrics to more effectively manage the software development environment

Rational Professional Services

Rational Software Conference Series 2009

Helping our clients achieve the optimal **business outcomes** from their investments in software & systems, especially in today's fast-paced economic environment.

As **REAL** As It Gets!

Highlights

- Over **500** sessions across 20 tracks including Executive & Business Partner forums
- New** embedded systems / PLM track integrating the  **Innovation 2009**
TELELOGIC USER GROUP CONFERENCE
- New** application security & compliance track
- New** enterprise architecture and SOA rich content
- New** IBM Innovation Center (ICC) satellite events
- 1st Ever** - Software Reality TV show ...

Real Customers,
Real Challenges
Real Solutions in
Real Time!
