

# IBM software On/Off Capacity on Demand for IBM @server zSeries, iSeries, and pSeries

## Overview

A key element of IBM's on demand strategy is to enable our IBM @server customers to dynamically change their available server capacity. IBM's server offering, known as On/Off Capacity on Demand (On/Off CoD), allows customers to dynamically increase and decrease server capacity based on changing workload demands. As previously announced, IBM's On/Off CoD hardware offering is available on IBM's latest eServers, including select zSeries®, pSeries™, and iSeries™.

IBM is now announcing software terms and conditions to complement our On/Off CoD server offering. These new software terms and conditions will enable customers to pay for select software products on a daily basis when they activate the On/Off CoD hardware offering for zSeries, pSeries, or iSeries.

Daily On/Off CoD software charges apply only to eligible software products. All eligible On/Off CoD software products are licensed under the International Program License Agreement (IPLA). IPLA generally describes a category of software products with a license fee at the time of purchase and an annual maintenance charge, known as Subscription and Support (S&S). The daily On/Off CoD charges packages both components, license fee, and S&S.

For additional information, refer to the **Description** section of this announcement.

## Key prerequisites

Activation of the On/Off CoD hardware offering for zSeries, iSeries, or pSeries

## At a glance

IBM now offers select zSeries, iSeries, and pSeries software on a daily price for customers activating IBM's On/Off CoD offerings on their IBM zSeries, iSeries, or pSeries servers.

## Planned availability date

September 12, 2003

*This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.*

---

## Description

---

IBM now offers daily On/Off CoD software charges for use in conjunction with the IBM On/Off CoD server offerings. The On/Off CoD server offering allows you to pay a fee to enable and use temporary server capacity. You now have the ability to pay for selected zSeries, iSeries, and pSeries software on a per-day basis to help you through your peak business periods.

Information pertaining to activation of On/Off CoD servers can be found in the following zSeries, iSeries, and pSeries announcements:

- Hardware Announcement 103-002, dated January 24, 2003, entitled IBM @server iSeries — Versatile, Multi-Environmental Servers for the Era of e-business on demand™
- Hardware Announcement 103-129, dated May 6, 2003, entitled New IBM @server pSeries 650 Enhancements Offer Greater Flexibility with Capacity Upgrade on Demand and Faster Performance Using RIO-2 Adapters
- Hardware Announcement 103-142, dated May 13, 2003, entitled IBM Introduces the IBM @server zSeries 990 Family of Servers

For iSeries and pSeries, daily On/Off CoD software charges are measured in processor-days. IBM established a per-processor-day price for each pSeries and iSeries software product which is eligible for daily On/Off CoD charges. On pSeries and iSeries, per-processor-day charges are applied based on the number of engines (processors) that are activated within the duration of the temporary enablement.

For example, on iSeries and pSeries: If the On/Off CoD server offering is activated on a pSeries or an iSeries server and one temporary engine enabled for one day, the processor-day charge per product is applied for each eligible software product on that particular server. Likewise, if two temporary engines are enabled for one day, the processor-day price per product is multiplied by two engines and applied for each eligible software product on that particular server.

For zSeries, daily On/Off CoD software charges are measured in Management Services Unit (MSU) days. IBM established a per-MSU-day price for each zSeries software product which is eligible for daily On/Off CoD charges. On zSeries, per-MSU-day charges are applied based on the number of engines (processors) that are activated, the size of those engines (processors), and the duration of the temporary enablement.

For example, on zSeries: If the On/Off CoD server offering is activated on a zSeries server and one temporary engine is enabled for one day, the MSU-day charge per product is multiplied times the number of MSUs of that engine and applied for each eligible software product on that particular server. Likewise, if two temporary engines are enabled for one day, the MSU-day price per product is multiplied by the number of MSUs of those engines and applied for each eligible software product on that particular server.

---

## Terms and conditions

---

To be eligible for On/Off Capacity on Demand pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contracts must be signed prior to use.

## iSeries and pSeries software

- Daily On/Off CoD software charges apply only to eligible software products as listed in this announcement letter. All eligible On/Off CoD software products are licensed under the International Program License Agreement (IPLA). When On/Off CoD charges are not offered for an one-time charge (OTC) product, standard OTC License charges will apply to the use of On/Off CoD processors. Customers running On/Off CoD processors/capacity must pay for On/Off CoD charges for all software installed on the machine where applicable.
- The customer must have all licensing on the base configuration of the On/Off CoD machine in compliance with their respective license agreements.
- The customer must also agree to keep IBM informed of what IPLA products are running on their hardware machines when On/Off CoD is used, and must utilize license management reporting tools, when available.
- Daily On/Off CoD software charges are directly tied to the number of temporary processors and the duration of the temporary processor use, as indicated by the customer and enabled through the terms of the On/Off CoD hardware offering.
- Daily On/Off CoD software charges are determined on a per-day basis where a day is defined as any period of time up to 24 contiguous hours. Daily On/Off CoD software charges do not participate in any other standard program offerings or licensing arrangements.
- Daily On/Off CoD software charges will be billed quarterly following the use of temporary On/Off CoD hardware capacity. No prepayments or other arrangements are permitted for daily On/Off CoD software charges.

Customers must sign contract Z125-6907, *Amendment or iSeries and pSeries Temporary Capacity On Demand — Software*. For software contract information, visit the Passport Advantage® Reseller Web site at:

<http://www-3.ibm.com/software/howtobuy/passportadvantage/>

Choose “Reseller site”. Once on the site, select “Program Information” and “Reference documents” from the left navigator. Then choose “Worldwide,” your language of preference, and “Capacity on Demand.”

## zSeries software

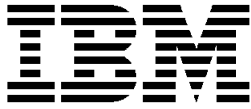

Contracting for zSeries software is contained within the hardware contract Z125-6611, *Attachment for Customer Initiated Upgrade and IBM @server On/Off Capacity on Demand*, which must be signed by the customer to enable On/Off CoD capability.

- Daily On/Off CoD software charges apply only to eligible software products as listed in this announcement letter. All eligible On/Off CoD software products are licensed under the IPLA. When On/Off CoD charges are not offered for an OTC product, standard OTC License charges will apply to the use of On/Off CoD processors. Customers running On/Off CoD processors/capacity must pay for On/Off CoD charges for all software installed on the machine where applicable.
- The customer must have all licensing on the base configuration of the On/Off CoD machine in compliance with their respective license agreements.

- Daily On/Off CoD software charges do not apply to software products with recurring monthly charges which are licensed under the IBM Customer Agreement (ICA).
- The customer must also agree to keep IBM informed of what IPLA products are running on their hardware machines when On/Off CoD is used, and must utilize license management reporting tools, when available.
- Daily On/Off CoD software charges are directly tied to the size of the temporary capacity and the duration of the temporary capacity use, as indicated by the customer and enabled through the terms of the On/Off CoD hardware offering.
- Daily On/Off CoD software charges are determined on a per-day basis where a day is defined as any period of time up to 24 contiguous hours. Daily On/Off CoD software charges do not participate in any other standard program offerings or licensing arrangements.
- Daily On/Off CoD software charges will be billed monthly following the use of temporary On/Off CoD hardware capacity. No prepayments or other arrangements are permitted for daily On/Off CoD software charges.

**Trademarks**

The e-business logo, iSeries, pSeries, and e-business on demand are trademarks of International Business Machines Corporation in the United States or other countries or both. zSeries and Passport Advantage are registered trademarks of International Business Machines Corporation in the United States or other countries or both. Other company, product, and service names may be trademarks or service marks of others.

***i and pSeries™ products***

Lotus® part number	Description	Price
ASPH6LL	LOTUS CONNECTOR FOR SAP W/MTA/WORKFLOW PER PROC DAY OOCoD TEMP USE CHR	\$ 316
ASPH7LL	Domino™ MESSAGING PER PROCESSOR DAY OOCoD TEMP USE CHR	21
ASPH8LL	DOMINO ENTERPRISE PER PROCESSOR DAY OOCoD TEMP USE CHR	54

Lotus part number	Description	Price
ASPH9LL	DOMINO UTILITY PER PROCESSOR DAY OOCoD TEMP USE CHRG	\$ 275
ASPI0LL	Lotus Workflow™ PROCESSOR DAY OOCoD TEMP USE CHRG	929
ASPI1LL	DOM UNIFIED COMM SERVICES FOR AVAYA PROCESSOR DAY OOCoD TEMP USE CHRG	28
ASPI2LL	DOM UNIFIED COMM SERVICES FOR CAPTARIS PROC DAY OOCoD TEMP USE CHRG	28
ASPI3LL	DOM UNIFIED COMM SERVICES FOR CISCO PROCESSOR DAY OOCoD TEMP USE CHRG	28
ASPI4LL	DISCOVERY SERVER PROCESSOR DAY OOCoD TEMP USE CHRG	2,258
ASPI5LL	LOTUS LearningSpace™ -VIRTUAL CLASSROOM PROC DAY OOCoD TEMP USE CHRG	1,392
ASPI6LL	QuickPlace™ EXTRANET PROCESSOR DAY OOCoD TEMP USE CHRG	233
ASPI7LL	Sametime® EXTRANET PROCESSOR DAY OOCoD TEMP USE CHRG	581
ASPI8LL	SAMETIME ENTERPRISE MEETING SERVER PROCESSOR DAY OOCoD TEMP USE CHRG	531
ASQG1LL	APPLICATION WORKLOAD MODELER PROC DAY OOCoD TEMP USE CHRG	354
ASQ65LL	CICS UNIVERSAL CLIENT PROCESSOR DAY OOCoD TEMP USE CHRG	2
ASQ68LL	CICS TRANSACTION GATEWAY PROCESSOR DAY OOCoD TEMP USE CHRG	153
ASQ71LL	CICS TRANSACTION SERVER PER PROCESSOR DAY OOCoD TEMP USE CHRG	314
ASQ74LL	DB2 DATA LINKS MANAGER PROCESSOR DAY OOCoD TEMP USE CHRG	186
ASQ77LL	DB2 TABLE EDITOR FOR MULTI PROCESSOR DAY OOCoD TEMP USE CHRG	79
ASQ80LL	DB2 HIGH PERFORMANCE UNLOAD FOR MULTI PROC DAY OOCoD TEMP USE CHRG	79
ASQ83LL	DB2 KnowledgeX® WORKGROUP EDITION PROCESSOR DAY OOCoD TEMP USE CHRG	456
ASQ86LL	DB2 NET SEARCH EXTENDER PROCESSOR DAY OOCoD TEMP USE CHRG	121
ASQ89LL	DB2 PERFORMANCE EXPERT FOR MULTIPLATFORMS PROC DAY OOCoD TEMP USE CHRG	181
ASQ92LL	DB2 QMF™ FOR WINDOWS PROCESSOR DAY OOCoD TEMP USE CHRG	57
ASQ95LL	QMF FOR WINDOWS ADDITIONAL PROCESSOR DAY OOCoD TEMP USE CHRG	49
ASQ98LL	DB2 QUERY PATROLLER PROCESSOR DAY OOCoD TEMP USE CHRG	171
ASQA1LL	DB2 WEB QUERY FOR MULTIPLATFORMS PROCESSOR DAY OOCoD TEMP USE CHRG	79
ASQA4LL	DB2 RECOVERY EXPERT FOR MULTIPLATFORMS PROC DAY OOCoD TEMP USE CHRG	181
ASQA7LL	DB2 SPATIAL EXTENDER PROCESSOR DAY OOCoD TEMP USE CHRG	169
ASQB0LL	DB2 WAREHOUSE MANAGER PROCESSOR DAY OOCoD TEMP USE CHRG	342
ASQB3LL	DB2 WAREHOUSE MANAGER iSeries™ PROCESSOR DAY OOCoD TEMP USE CHRG	241
ASQB6LL	DB2 Connect® APPLICATION SERVER EDITION PROC DAY OOCoD TEMP USE CHRG	362
ASQB9LL	DataJoiner® ADDITIONAL PROCESSOR DAY OOCoD TEMP USE CHRG	456
ASQC2LL	DATAJOINER SPATIAL EXTENDER PROCESSOR DAY OOCoD TEMP USE CHRG	186
ASQC5LL	DM GOLD BUSINESS INTELLIGENCE OFFERING PROC DAY OOCoD TEMP USE CHRG	1,094
ASQC8LL	DB2 UDB ENTERPRISE SERVER EDITION PROCESSOR DAY OOCoD TEMP USE CHRG	604
ASQD1LL	DB2 UDB ENTP SVR ED DBSE PARTITIONING FTR PRO DAY OOCoD TEMP USE CHRG	182

Lotus part number	Description	Price
ASQD4LL	DB2 ENTERPRISE SERVER EDITION PROCESSOR FOR LINUX DAY OOCoD TEMP USE CHR	\$ 461
ASQD7LL	DB2 WAREHOUSE MANAGER STANDARD EDITION PROCESSOR DAY OOCoD TEMP USE CHR	171
ASQE0LL	DB2 INFORMATION INTEGRATOR FOR CONTENT PROCESSOR DAY OOCoD TEMP USE CHR	1,185
ASQE3LL	DB2 Everyplace™ ENTERPRISE EDITION PROCESSOR DAY OOCoD TEMP USE CHR	483
ASQE6LL	FINANCE FOUND CAP MKTS REAL TIME LOADER ED PROC DAY OOCoD TEMP USE CHR	1,880
ASQE9LL	WEBSPHERE HOST PUBLISHER PROCESSOR DAY OOCoD TEMP USE CHR	1,570
ASQF2LL	Informix™ EXTENDED PARALLEL SERVER (XPS) PROC DAY OOCoD TEMP USE CHR	1,025
ASQF5LL	IBM DB2 INFORMATION INTEGRATOR REPLICATION ED DAY OOCoD TEMP USE CHR	114
ASPL5LL	IBM DB2 INFORMATION INTEGRATOR STD ED PROC DAY OOCoD TEMP USE CHR	456
ASPL8LL	DB2 Intelligent Miner™ FOR DATA PROCESSOR DAY OOCoD TEMP USE CHR	1,366
ASPM1LL	DB2 INTELLIGENT MINER SCORING PROCESSOR DAY OOCoD TEMP USE CHR	342
ASPM4LL	INFORMIX 4GL COMPILER RUNTIME PROCESSOR DAY OOCoD TEMP USE CHR	205
ASPM7LL	4GL COMPILER RUNTIME PROCESSOR DAY OOCoD TEMP USE CHR	205
ASPN0LL	INFORMIX 4GL RDS RUNTIME PROCESSOR DAY OOCoD TEMP USE CHR	205
ASPN3LL	4GL RAPID DEVELOPMENT SYSTEM RT PROCESSOR DAY OOCoD TEMP USE CHR	205
ASPN7LL	INFORMIX C-ISAM DataBlade™ MODULE PROCESSOR DAY OOCoD TEMP USE CHR	87
ASPS2LL	INFORMIX DYNAMIC SERVER 7 ENTRPRS ED UNL PROC DAY OOCoD TEMP USE CHR	912
ASPS9LL	INFORMIX DYNAMIC SERVER ENTERPRISE ED. UNLIMITED PROC DAY OOCoD TEMP USE CHR	912
ASR06LL	INFORMIX EXCALIBUR TXTSRCH DATABLADE MOD PROC DAY OOCoD TEMP USE CHR	137
ASPU2LL	INFORMIX GEODETIC DATABLADE MODULE PROCESSOR DAY OOCoD TEMP USE CHR	912
ASPU8LL	INFORMIX IMAGE FOUND DATABLADE MODULE PROC DAY OOCoD TEMP USE CHR	228
ASPV2LL	INFORMIX I-SPY PROCESSOR DAY OOCoD TEMP USE CHR	183
ASPV5LL	INFORMIX MetaCube™ ROLAP OPTION AGENTS PROCESSOR DAY OOCoD TEMP USE CHR	570
ASPV8LL	INFORMIX NAG FINANCE DATABLADE MODULE PROC DAY OOCoD TEMP USE CHR	1,025
ASPW1LL	IBM OFFICE CONNECT ENT WEB EDITION PROCESSOR DAY OOCoD TEMP USE CHR	211
ASPW4LL	IBM Red Brick™ ENTERPRISE EDITION PROCESSOR DAY OOCoD TEMP USE CHR	912
ASPW7LL	IBM RED BRICK WORKGROUP EDITION PROCESSOR DAY OOCoD TEMP USE CHR	456
ASPX0LL	INFORMIX SQL RUNTIME PROCESSOR DAY OOCoD TEMP USE CHR	123
