

IBM Quickstart Services for IBM MobileFirst Protect - MaaS360 (SaaS)

Maximize the Value of your IBM Security Solution

This offering helps MaaS360 SaaS customers maximize their return on investment by installing and configuring the necessary MaaS360 components.

- You need guidance on:
 - Architecture & design of an IBM MaaS360 SaaS solution
 - How IBM MaaS360 SaaS integrates with the IT environment
 - Definition of hardware and software prerequisites
 - Definition and implementation of changes to the network environment
- You need to:
 - Monitor, manage, secure and support a wide range of mobile devices
 - Separate user's personal and corporate data
 - Manage the connection of 'BYOD' devices with the environment
 - Maintain security and control of mobile device management data
 - Ensure that employees have the appropriate mobile apps available to them

Benefits

- A single portal to monitor and control smart phones and tablets
- Simplify MDM with rapid deployment, and comprehensive visibility and control that spans across mobile devices, applications, and documents
- Empower users by giving them access to business documents on mobile devices while providing total manageability and control in a secure, encrypted container
- Proactively secure mobile devices through continuous dynamic security and compliance features
- Simplify mobile application management by delivering an easy-to-use enterprise app catalog with full security and operational lifecycle management of apps across mobile device platforms
- Protect the organization by deploying and understanding how to leverage MaaS360 Secure Web Browser to block websites based on content categories, and allowing exceptions based on domain name
- Keep the workforce productive with a consistent user experience through MaaS360 Secure Mail

Deliverables

This quick start is comprised of 3 components (**Core, Integrated and Collaboration**) which can be purchased in combination or modularly. In combination they have an average effort of **6 days**. Details of the components and their deliverables are below:

1) Core (from 3 days)

- Base configurations of policy, compliance and reporting definition for IBM MaaS360 managed devices
 - ✓ Assistance with device enrolment during initial rollout
 - ✓ Configuration of up to 3 policies for managing devices or compliance rules
- Demonstration of:
 - ✓ Device registration
 - ✓ Policy creation
 - ✓ Automation of policy enforcement

2) Collaboration (additional 1.5 days)

- Deployment of up to 3 Cloud Extenders

3) Integrated (additional 1.5)

- Deployment of up to 1 Enterprise Gateway

Services delivered remotely, on site options available on request
