

**Rational.** software

## IBM Rational Integration Tester, Rational Performance Test Server and Rational Test Virtualization Server QuickStart

*Start gaining the benefits of the full solution to automated integration testing and service virtualization*

---

### Highlights

---

- Enables you to rapidly start creating virtual services (stubs) to remove environmental dependencies
- Provides validation of your full integration testing deployment through a controlled pilot
- Includes skills enablement for up to ten users to enable self-sufficiency

Rational Test Workbench offers professional test automation for functional, integration and performance testing. The automated integration testing component, **Rational Integration Tester**, delivers earlier end-to-end continuous integration testing across hardware, software and cloud-based dependencies.

**Rational Performance Test Server** offers professional performance testing for integrated systems.

**IBM Rational Test Virtualization Server** helps you in modeling and simulating real system behavior to eliminate application test dependencies and reduce infrastructure costs.

With a scriptless wizard-driven authoring environment and 70+ technologies and protocols available it is uniquely positioned to accelerate test productivity and software delivery.

The IBM RIT, RPTS & RTVS QuickStart service is a combination of planning, implementation, training and mentoring activities designed to get your integration testing and service virtualization solution operational as quickly as possible.

| Agenda / Solution Overview   |  |   |  |   |   |
|--|--|---|--|---|---|
| <br>Day 1..5  | <br>Day 6..10 | <br>Day 11..13 | <br>Day 14..23 | <br>Day 24..28 | <br>Day 29..30 |
| Instructor led classes   | Planning workshop  | Installation and configuration  | Tests, stubs, domains  | Execution   | Conclusions & Recommendations   |
| <p>The following assumptions apply to this service:</p> <ul style="list-style-type: none"> <li>▪ Focuses on adoption by up to ten users</li> <li>▪ Availability and access to your system and administrators</li> <li>▪ Virtual Services and domains are to be limited to what can realistically be created and executed within the timeframe</li> </ul> |  |   |  |   |   |
| <p>Additional fees will apply if the following are required:</p> <ul style="list-style-type: none"> <li>▪ Deployment across multiple domains and environments</li> <li>▪ Integration of RIT to other applications</li> <li>▪ Extended scope of test and virtual service creation and execution (and/or extra users)</li> </ul>                           |  |   |  |   |   |

## QuickStart Service Activities

30 days

### Training

- Delivery of five days of instructor led training for your project team

### Discovery

- Facilitated workshop to define priorities and goals
- Planning the schedule for implementation

### Implementation

- Infrastructure design for solution hosting
- Installation and configuration of solution

### Creation of Assets

- Tests, stubs, domains and environments creation to support the pilot

### Pilot

- Running a pilot (test and performance test execution and validation of stubs)

### Closure

- QuickStart report including conclusions and recommendations
