Karmaşayı azalmak

Sistemler hedef işyüküne göre tasarlanmış ve ayarlanmış

Daha çabuk değer katmak

Konu ile ilgili uzmanlık sistemlere uyarlanmış ve anında kullanılabilir

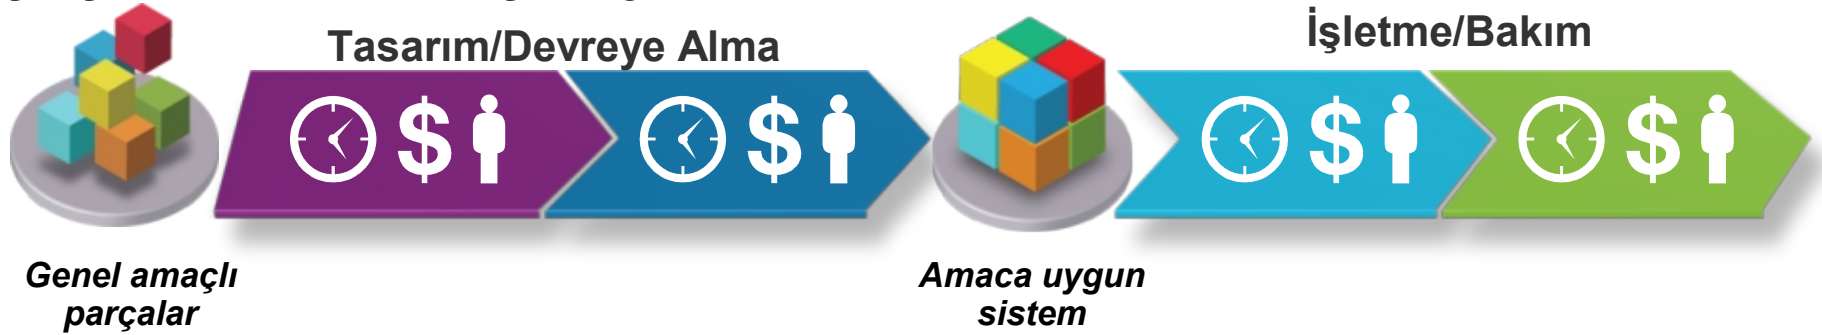

BT maliyetlerini iyileştirmek

Sistemin satınalmadan emekli etmeye kadar bütün hayatı basitleştirilmiş

... için daha akıllı yaklaşımlar gerekli

PureSystems daha az karmaşa, daha çok hız ve daha düşük maliyet sağlar

Günümüzün sorunu: Genel amaçlı parçaları bir araya getirmek ve ayarlamak için çok fazla zaman ve çaba gereklidir

PureSystems çözümü: Tüm BT proje döngüsünün basitleştirilmesi

Daha az zaman, maliyet ve risk

BT ekonomisinin ve deneyiminin iyileştirilmesi

PureFlex

Altyapı

Bütünleşik ve iyileştirilmiş altyapı

Seçiminize bağlı uygulamaları ve ara katmanları çalıştırma imkanı

- BT altyapı servislerinin sağlanması

PureApplication

Uygulama Platformu

Bütünleşik ve eniyileştirilmiş uygulama platformu

IBM arakatman yazılımları kullanarak seçiminize bağlı uygulamaların devreye alınmasının hızlandırılması

- Uygulama platform servislerinin sağlanması

PureData

Veri Platformu

Bütünleşik ve eniyileştirilmiş veri platformu

Analitik ve hareket bazlı uygulamalar için yüksek performanslı veri servislerinin sağlanması

- Veri işyükleri için iyileştirilmiş yeni PureSystem modelleri

Tasarım Aşamasında Entegrasyon IBM PureFlex System

Esnek, açık ve tam entegre sistem

Basitleştirilmiş Deneyim – Platform ve Sanallaştırma Yönetimi

Flex Systems

Kaynak havuzları ve kolaylaştırılmış devreye alma sayesinde Bulut Bilişime yönelik tasarım

Sistem kullanım oranının ve yönetim verimliliğinin artışı

- **Servisleri yönetin**
- **Sistem havuzları:** bir grup olarak değerlendirilebilecek kaynaklar
- **Tamamen sanal ortam**

Bulutlu veya sistem kaynak havuzlarını tek bir sistem gibi kolayca yönetin

Buluta kolay geiş

PureFlex

Altyapı

Platform as a Service

- Uygulamaların hızlı devreye alınması
- Esnek ölçeklenebilirlik
- Arakatman servisleri

Infrastructure as a Service

- Self-servis BT kaynakları
- Tamamen sanal ortam
- Bütünleşik yönetim

PureApplication

Uygulama Platformu

Platform servislerinin sağlanması

Accelerating Cloud deployment

PureFlex

Infrastructure

Delivering Infrastructure Services

PureApplication

Application Platform

Delivering Platform Services

Platform as a Service

- Rapid application provisioning
- Elastic scalability
- Middleware services

Infrastructure as a Service

- Self-service IT resources
- Fully virtualized, multi-tenant
- Integrated management

PureApplication System

Adds Deep Workload-Aware Value to its PureFlex Foundation

Application patterns
from IBM and partners

Patterns of Expertise

- 100+ ISV business applications
- Business intelligence
- Business process management
- Web experience (Portal)

Integrates an
application platform
optimized for
enterprise applications

Application Platform

- Application Optimization
- System wide Management
- Automation & Scaling
- Caching & Elasticity
- Application Centric Provisioning
- Usage Metering
- Security
- Monitoring
- App Lifecycle Management
- License Management
- Self-service
- Data management

Inherits the
capabilities of
PureFlex System

System Infrastructure

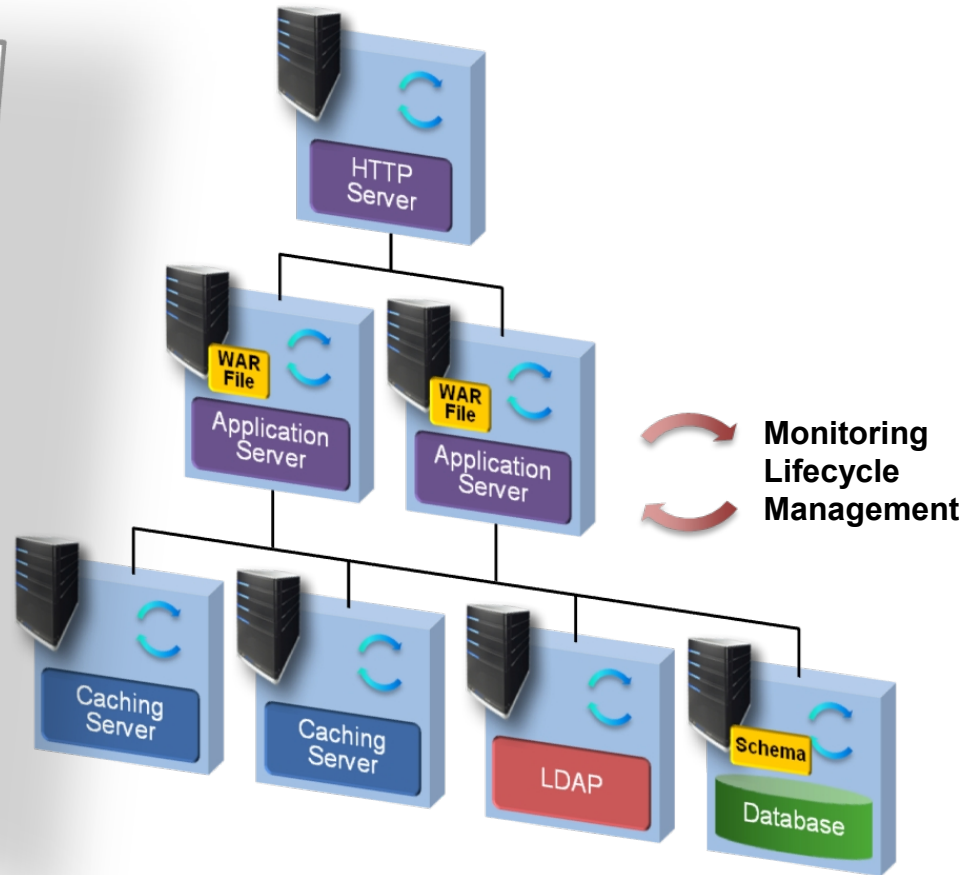

- Integrated Server, Storage, Network
- Power Management
- Storage & VM Optimization
- Virtualization
- Integrated System Management
- Provisioning
- Security
- Monitoring
- IT Lifecycle Management
- System design

What the business wants...

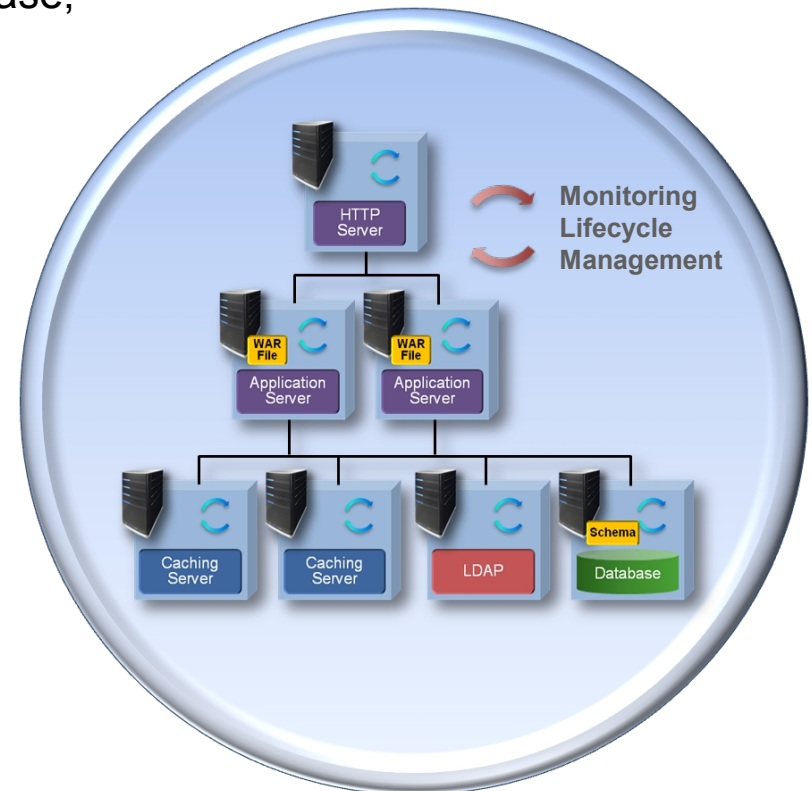

What's required...

Patterns of Expertise: Proven best practices and expertise for complex tasks learned from decades of client and partner engagements that are captured, lab tested and optimized *into a deployable form*

What is a Pattern?

- The ***pre-defined architecture of an application***
- For each component of the application (i.e. database, web server, etc)
 - Pre-installation on an operating system
 - Pre-integration across components
 - Pre-configured & tuned
 - Pre-configured Monitoring
 - Pre-configured Security
 - Lifecycle Management
- In a **deployable form**, resulting in **repeatable deployment with full lifecycle management**
- **Delivering superior results:**
 - **Agility:** Faster time-to-value
 - **Efficiency:** Reduced costs and resources
 - **Simplicity:** Simpler skills requirements
 - **Control:** Lower risk and errors

Multiple Pattern Types to Enable Open Ecosystem

Virtual Appliances

- Standard software installation and configuration on OS
- Images created through extend/capture
- Traditional administration and management model
- Infrastructure driven elasticity

Virtual Appliances

Standard TCO
existing applications

Virtual System Patterns

- Automated deployment of middleware topologies
- Traditional administration and management model
- Application and infrastructure driven elasticity

Virtual System Patterns

Improved TCO
virtualized applications

Virtual Application Patterns

- Highly automated deployments using expert patterns
- Business policy driven elasticity
- Built for the cloud environment
- Leverages elastic workload management services

Virtual Application Patterns

Best TCO
cloud applications

Three Ways To Get the Value Of Patterns

Add third-party application patterns of expertise

Use IBM patterns of expertise throughout the system

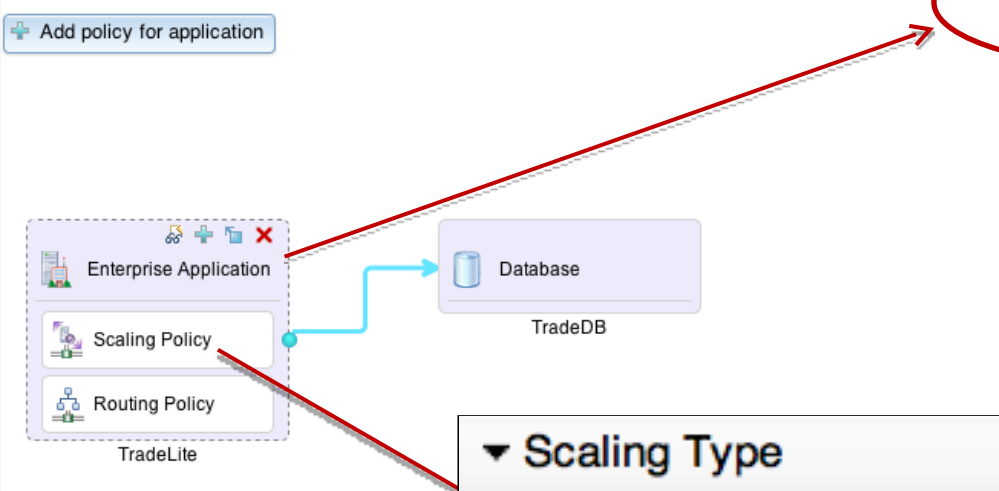

Capture your own expertise:

- Image Construction & Composition Tool allows you to create your own custom virtual images
- Pattern Development Kit allows you to create your own virtual application patterns.
- Capture existing expertise for operating system and middleware installation
- Dynamically combine pre-defined components to build new image packages
- Create a standard VM format in Open Virtual Format

Capture 80% of today's workloads

Data Platform

Delivering Data Services

Workload optimized performance

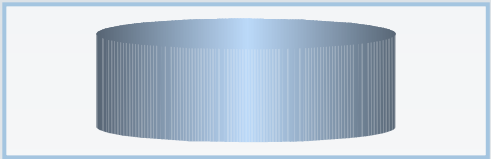

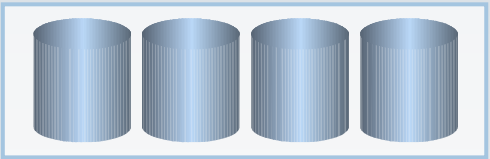

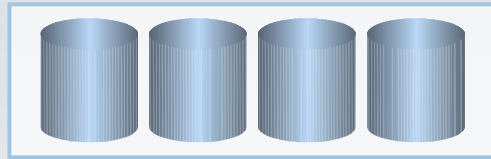

Data load ready in hours

Integrated management

Automated maintenance

Single point of support

Different types of workloads require different data services

 E-commerce	 Customer Analysis	 Real Time Fraud Detection
<p>Transaction Processing</p> <p>Random reads & random updates</p>  <p>Scalable Transactional Database</p>	<p>Reporting and Analytics</p> <p>Sequential reads & sequential data loads</p>  <p>Analytics Data Warehouse</p>	<p>Operational Analytics</p> <p>Random and sequential reads & data loads + continuous ingest</p>  <p>Operational Data Warehouse</p>
<p>Random reads & random updates</p> <hr/> <p>Many transactions with narrow data scope accessing the same database</p> <hr/> <p>Shared access to all data</p>	<p>Sequential reads & sequential data loads</p> <hr/> <p>Analytics with broad data scope, split into many parts across data partitions to run in parallel</p> <hr/> <p>Partitioned data access</p>	<p>Random and sequential reads & data loads + continuous ingest</p> <hr/> <p>Analytics split into many parts and narrow scope operations, all running in parallel</p> <hr/> <p>Partitioned data access</p>

IBM PureData System

Meeting Big Data Challenges – Fast and Easy!

PureData System for Transactions

- *Database deployment in minutes, not hours*
- *More than 100 databases on 1 system*

PureData System for Analytics Powered by Netezza Technology

- *10-100x faster than traditional systems*
- *20x greater concurrency and throughput for tactical queries than previous Netezza technology*

PureData System for Operational Analytics

- *Continuous ingest of operation data*
- *1000+ concurrent operational queries*
- *Up to 10x storage savings with adaptive compression*

IBM PureData System for Transactions highlights

Optimized exclusively for transactional data workloads

PureData System for Transactions

*Delivering data services
for transactions*

Speed

- Industry leading DB2 performance
- Database node recovery in seconds¹

Simplicity

- Database deployment in minutes, not hours¹
- Capable of running multiple database software versions
- Handles more than 100 databases on 1 system²
- No planned system downtime for firmware / OS upgrades¹

Scalability

- Scaling up to 30x³
- Designed to expand from small to medium & medium to large configuration with no planned system downtime required

Smart

- Supports Oracle Database apps with minimal change; supports DB2 applications unchanged
- Clients have experienced cases of 10x storage space savings via Adaptive Compression⁴

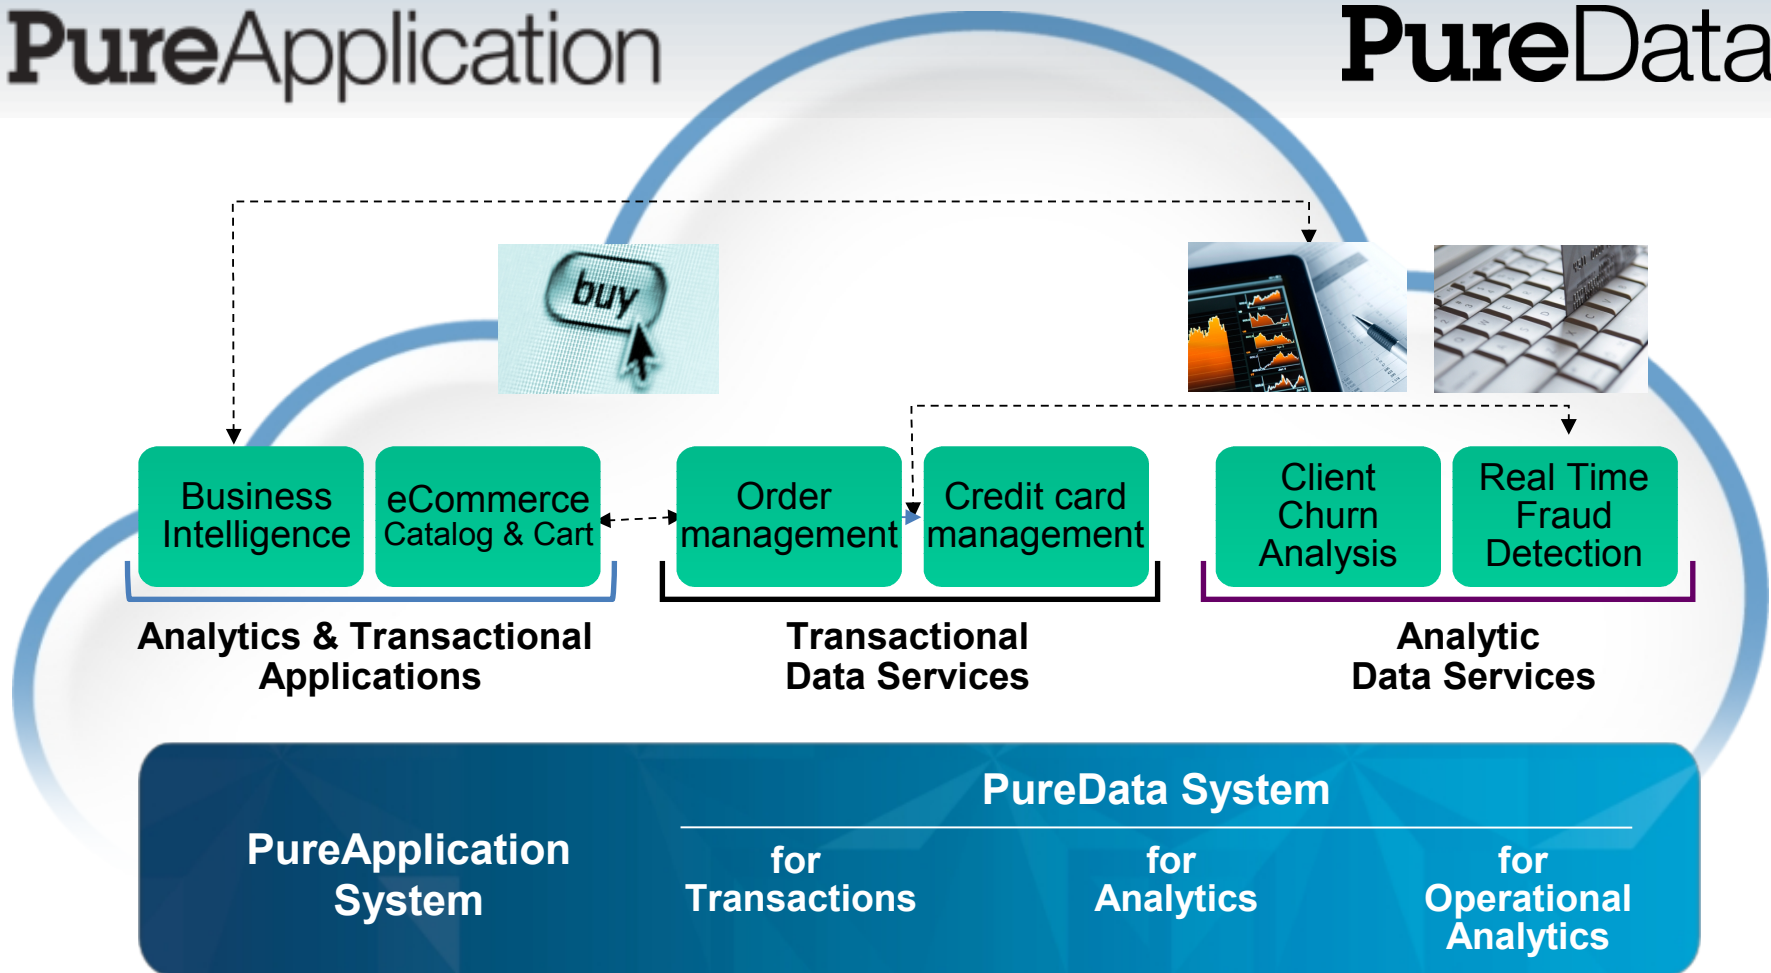

Footnotes:

1. Based on IBM internal tests and system design for normal operation under expected typical workload. Individual results may vary.
2. Based on one large configuration.
3. Based on the designed minimum and maximum processor and memory resources required for a single database.
4. Based on client testing in the DB2 10 Early Access Program.

Smart consolidation of application and data services

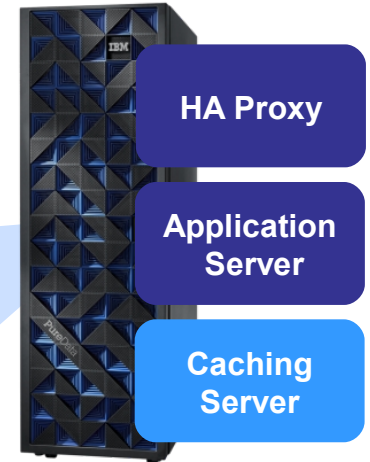

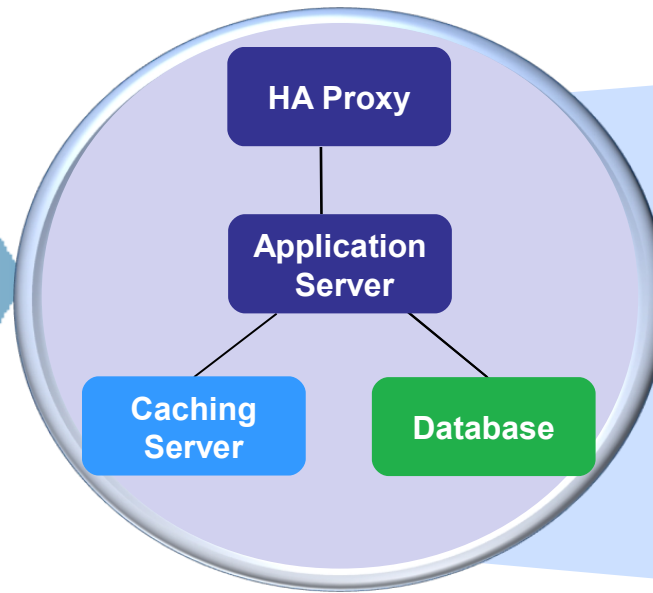

PureApplication

PureData

Pattern Based Deployment Across Systems

PureApplication

PureData

Our PureExperience invitation to you

Let us prove it *at no charge*:

1. On-site installation of PureData or PureApp System and guided demonstration of business value
2. No charge execution of a 10 day *PureStart* on-site service engagement
3. Continued use of the PureData or PureApp System for 30 days, inclusive of *PureStart*
4. Access to a lab advocate for usage questions and advice
5. Single line of IBM support and maintenance
