Garanti Teknoloji and Rational BuildForge Practical and Efficient Synergy

# Çiğdem Yurdakul

Garanti Teknoloji, Change, Configuration, Release Management

# Kerim Çakmak

IBM Rational CEE Technical Sales Specialist November 2012

# Agenda

- Introduction to IBM Rational Build Forge
- Brief overview of Garanti Teknoloji
- <sup>1</sup> IBM Rational Buil Forge Implementation and Execution Environment in Garanti Teknoloji
- · Questions

2

# Who is Garanti Teknoloji (GT)?

- A wholly-owned subsidiary of Garanti Bank, the second largest private bank in Turkey owned by Doğuş Group Co. and Banco Bilbao Vizcaya Argentaria S.A. (BBVA), under the principle of equal partnership
- One of the largest IT service providers in Turkey
- Creates tightly integrated and fully in-house developed, custom-fit IT solutions
- Provides technology infrastructure, software development, internet applications, integration, system management, security management, project management and office applications services to companies which are working on banking and financial services

### **GT** in numbers

### People

- · 964 personnels
- · 33 average age
- · 4% average turnover rate
- · 6.1 average tenure

#### · Capacity

- · 34,342 MIPS Mainframe ( z196 ) capacity
- · 3 PB Disk
- · 2600 Server
  - 1100 Vmware
- · 900 Application Server
  - 730 Unix
  - 170 Windows
- 30000+ PC and Mobile Devices

#### Customers

- 48 firms
  - Garanti Bank, GarantiBank
     International, Garanti Leasing,
     Garanti Factoring, Garanti Emeklilik,
     Garanti Portföy, Garanti Yatırım....

#### **Transactions**

- Daily 300M
- Daily 700K Internet Login
- Monthly 30 M Internet Operations

#### Process

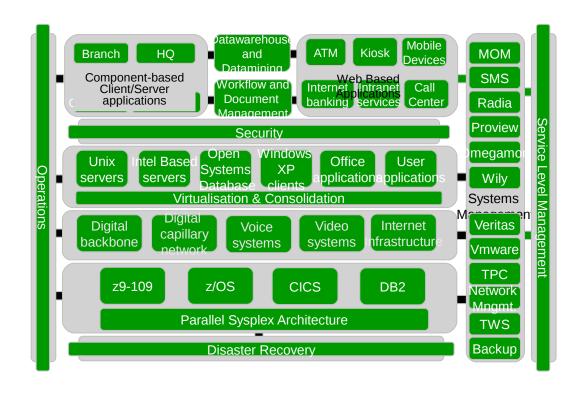

- 520000-Yearly Solved Problems
- · 250000-Yearly Performed Changes
- · 4700 Yearly Performed Projects

# **Technology Infrastructure**

# **Deployment Requirements**

#### Flexibility

Adaptable to different architectures

### Compliancy

- Compilant with COBIT
- Obeys regulatory rules

#### Efficiency

With less effort -coding,cost, maintanence- all platforms are supported

#### Performance

Deployment should end in a short time

#### Scalibility

When applications grow too fast, deployment tool still valid

## Availability

- Deployment is 7/24 process
- While deployment occurs, deployed application is up and running

#### Reliability

Frequently used, critical process running for critical applications

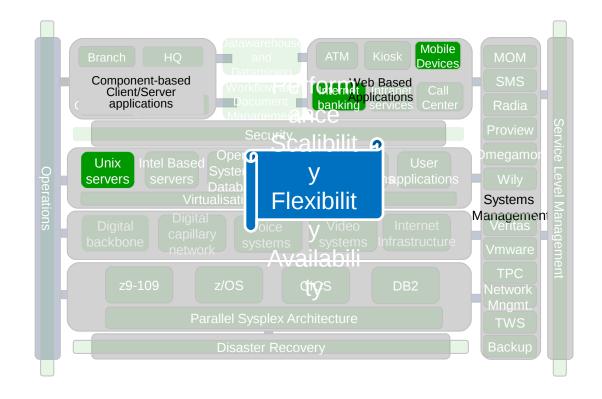

\_

# **Technology Infrastructure - Java / Unix**

# **BuildForge in GT at a glance**

- Used as a deployment tool
  - Used as a middleware deployment tool
    - User licence is for only administrators of the tools
- Applicable to critical java applications running on WAS
  - Internet branch application
  - Social media application
- Integrated with process management system
  - Change Management
  - Configuration Management
  - Release Management
- Integrated with build process which is done another tool (Hudson)
- Frequent process
- High volume transferred to more than 10 servers

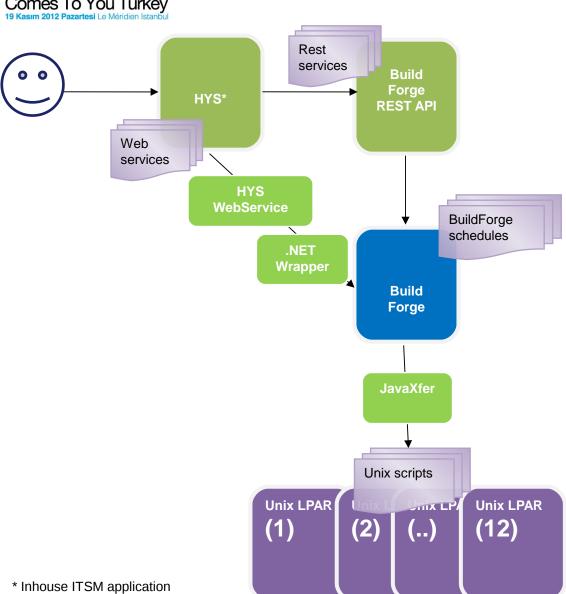

\_

#### **Solution**

#### Benefits

- · Seamless
- Server count is scalable
- · Traceable
- Logging
- · Restartable

# · Figures

- · 120 MB \* 12 servers
- Annual count 350
- End-to-end process duration 46 minutes instead of 150 min

# · Integrations

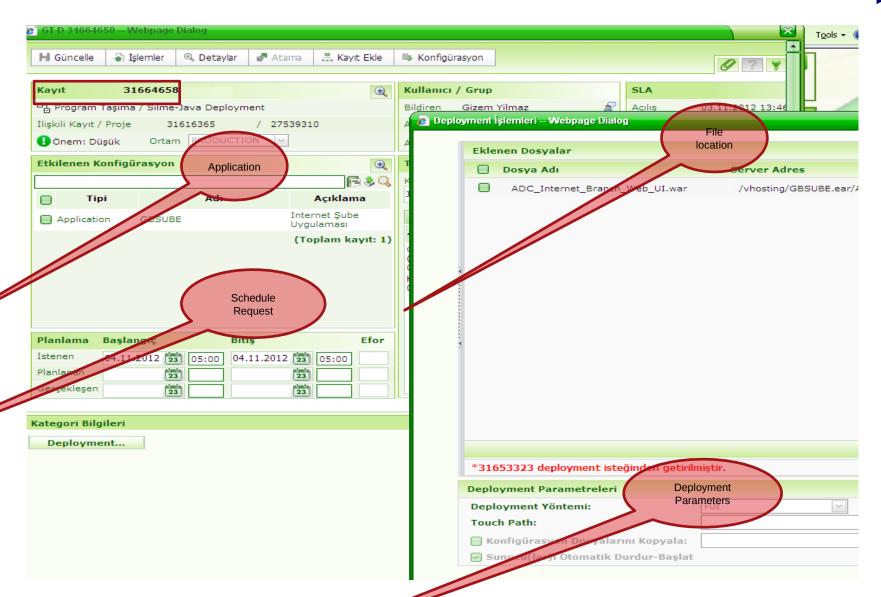

- · CMDB
- · HYS Process
- GT Deployment API

.
