Announcing the pilot of RedWiki - Notes/Domino SmartUpgrade

An exciting new program is being piloted by the IBM Redbooks team to engage the broad customer and partner community in shared authoring and updating 'best practices' information. This will enable the very latest information and expertise from the field to be shared while recognizing the contributions of the authors. It also allows the content to be maintained as the Notes and Domino product versions evolve.

Wikis are a relatively new Web browser-based technology that allow remote collaboration to create and to maintain online documents. A key feature of Wikis is version control which allows old versions of a document to be viewed and if necessary (perhaps due to errors, unintentional or otherwise) replace an unsuitable new version.

The [RedWiki site](http://www.redbooks.ibm.com/redwiki), as they are calling it, is <http://www.redbooks.ibm.com/redwiki>. Go there now to see the content they have already created.

This pilot is an experiment to determine if Wikis are indeed a suitable tool to create and to deliver technical content of the caliber of Redbooks, but at the same time, making it easier to collaborate with a team that is located around the world. The realtime nature of the Wiki means that reviewers and editors are also an integral part of the team.

The pilot Lotus RedWiki project is on Notes SmartUpgrade. Information on how to participate in this RedWiki is listed [here](#).

Not Domino news, but this is still worth a post. It's a TV news interview about Notes 7.0.2 running on a USB device, featuring Notes chief architect Jeff Eisen.

[New solution to go mobile with your workspace](#)
(10/16/06 4:51 p.m.) Taking your work on the road is nothing new- IBM Lotus, is offering Lotus Notes, which stores documents, pictures and many other helpful items. Jeff Eisen of IBM Lotus has more on going mobile with your workspace.

Danie na duże przyjęcie – „szwedzki stół”

The screenshot shows a web browser window displaying the IBM On Demand Workplace search results for the name "Latos". The search was performed on the "BluePages" tab, with the search type set to "Name" and the location set to "All locations". The search results show four entries, with the first one, "Latos, Bogumil", highlighted. This entry is identified as an IBM employee, Regular, in the role of a Lotus Software Sales Specialist in Warsaw, Poland. The detailed profile for Bogumil Latos is shown, including his contact information (phone, ITN, mobile, email, and notes mail), his preferred contact method (mobile phone), and his location (Warsaw, Poland). The profile also includes a "Report to chain" section listing his manager as Grzegorz Zurowski and another contact as Latos, Bogumil. The search results table includes columns for "Name & employee information" and "Contact information". The detailed profile includes a "Jobs & contact info" section with sub-sections for Experience & qualifications, Skills, Projects & teams, Communities & interests, Reporting structure, and Summary.

Search results for Name: "Latos"

Employee type is displayed beneath each name. [Find out more.](#)
 The new IP Telephony Number (ITN) is displayed when available. [Find out more.](#)
 4 results found. Results 1-4 of 4 sorted by name.
