Resolved Defects / Issues

1. 6.0.0.1 Build

The following Defects and Issues have been resolved since build 6117.

Type	Version	Build	Name/Description	SC-Ref #
Defect	6.0.0.1	1119	Multiple check boxes are appearing for certain security rights in "Default security/ settings" tab of application administration view when toggling between views.	108551
Defect	6.0.0.1	1119	The charge code will disappear from the Budget to Date pivot after the estimate of this baseline'd charge code is removed.	109193
Defect	6.0.0.1	1119	A problem in the Gantt chart (regarding dependencies).	109630
Defect	6.0.0.1	1119	Inconsistency in schedule dates portlet. Question mark "?" appears in proposed duration field when user enters a 0 and hits enter. When you check in, the zero is replaced with a 2.	108799
Defect	6.0.0.1	1119	Drag and drop feature for RTF portlets not working properly.	104887
Defect	6.0.0.1	1119	Employee status and working status are not displayed correctly in Resource Utilization Pivot.	109122
Defect	6.0.0.1	1119	Problem regarding converting an effort based project into a duration based project after it was already created. If you immediately navigate to the staffing view of a project right after you converted it to duration based, the staffing view will still recognize the project as duration based until you close all windows and refresh the application.	108618
Defect	6.0.0.1	1119	Problems when 'Baseline(Unlimited)' security right is unchecked.	108634
Defect	6.0.0.1	1119	RTF fields are empty in pivot when running a CRI pivot after moving CRIs from one project to another.	108560
Defect	6.0.0.1	1119	'Working Status' field in the 'Resource Utilization' pivot displays '312'. This does not seem to be correct.	108662
Defect	6.0.0.1	1119	Problem of setting-name input object in 'settings' dialog.	108633
Defect	6.0.0.1	1119	When you create an Investment Map and right click on a bubble, then click on scope elements, then view the flyovers: Issues, e.g., you see critical, major, and minor counts. The critical count is correct, however the major and minor are always zero even when there are many such issues in the project.	108657
Defect	6.0.0.1	1120	Discrepancy in "Total slack" field between WBS view and portfolio view. Total slack shown in WBS view is showing 0, but when accessed through pivots in portfolio view (In this case "OLAP Pivots/Work	108612

Type	Version	Build	Name / Description	RPM - Ref #
			Management/Task Analyses") the total slack is showing up as -100d.	
Defect	6.0.0.1	1120	Archived sub-projects are still displayed in the 'Portfolio Configuration' window. This is not correct.	108568
Defect	6.0.0.1	1120	Portfolio Configurator not working correctly. When selecting a subset of portfolios, not all projects within the portfolios are displayed.	108611
Defect	6.0.0.1	1120	Error -811 and 100 when changing resource's role on exception tasks	108888

Defect	6.0.0.1	1120	This issue raises 2 concerns:
			    - Duration based project calculation algorithm
			    - Rounding problem
			The current release fixes the rounding issue. The second part of the problem is under design review.
				109854

Defect	6.0.0.1	1120	Email notifications and workflow requests Problem. Messages are not sent thru SMTP.	109390
