Preface

This document describes how to install the Rational Unified Process® or RUP® product using the Rational Software Setup wizard, which is used to install all of the Rational Software Windows tools.

This release of RUP includes RUP Builder, which allows process managers to customize their RUP processes by using previously built plug-ins, including Microsoft and IBM, and by creating their own configurations, comprised of a base process and a selection of plug-ins.

Audience

This guide is intended for all readers, including managers, project leaders, analysts, developers, testers, and system administrators who will be installing this product.

Other Resources

For more information on training opportunities, see the Rational University Web site: <http://www.rational.com/university>.

For more information on RUP Builder, see the manual titled *Rational Unified Process Builder Process Manager's Guide*, part #800-025091-000.

The book titled *The Rational Unified Process, An Introduction, Second Edition*¹ quickly introduces you to the concepts, structure, content, and motivation of the RUP.

Contacting Rational Technical Publications

To send feedback about documentation for Rational products, please send e-mail to our technical publications department at techpubs@rational.com.

1. This second edition is written by Philippe Kruchten and is published by Addison Wesley Longman.

Contacting Rational Technical Support

If you have questions about installing, using, or maintaining this product, contact Rational Technical Support as follows:

Your Location	Telephone	Facsimile	E-mail
North America	(800) 433-5444 (toll free) (408) 863-4000 Cupertino, CA	(781) 676-2460 Lexington, MA	support@rational.com
Europe, Middle East, Africa	+31 (0) 20 4546 200 Netherlands	+31 (0) 20 4546 202 Netherlands	support@europe.rational.com
Asia Pacific	+61 2 9419 0111 Australia	+61 2 9419 0123 Australia	support@apac.rational.com
World Wide Web	www.rational.com		

Note: When you contact Rational Technical Support, please be prepared to supply the following information:

- Your name, telephone number, and company name
- Your computer's make and model
- Your operating system and version number
- Product release number and serial number
- Your case ID number (if you are following up on a previously-reported problem)

Installing the Rational Unified Process

1

Hardware and Software Requirements

System Requirements

Any Pentium-based PC-compatible computer system with:

- SVGA-compatible display
- Any pointing device with at least two buttons
- Microsoft Windows 98 SE, ME, 2000 (SP 1, 2), XP, or NT 4.0 (SP6a)
- 32 MB RAM
- 225 MB disk space

Required Supporting Software

Either of the following supporting software is required:

- Microsoft Internet Explorer 5.01 with SP2 or later
- Netscape Navigator version 4.72 or later.

Note: RUP does not support Netscape version 6.x at this time.

Installing the Rational Unified Process

When you install RUP, you install the RUP Builder, the Process Repository, and the default Classic RUP¹ on the file system. The Process Repository includes the RUP content library, the base process, the Rational process plug-ins, and a set of predefined process configurations. RUP Builder lets you select a particular process configuration or create a new one from the plug-ins provided. A process configuration can then be published as a Web site.

1. Classic RUP includes the base RUP process model, and business modeling and real-time plug-ins.

RUP Builder can also be installed as part of the Rational® Suite install. That installation procedure is not described here. For information on this topic, please see the *Rational® Suite Installation Guide*.

- 1 Insert the installation CD into your system's CD drive.
- 2 The Rational Software Setup wizard will guide you through the software installation. Click **Next** to proceed to the next screen in steps **3** through **7**.
- 3 On the first screen, click **Next** to continue.
- 4 On the screen titled Choose Product, click **Rational Unified Process**.
- 5 On the screen titled License Agreement, click **Yes, I accept the agreement**.
- 6 On the screen titled Select Configuration, click **Typical**.
- 7 On the screen titled Upgrade Compatibility, click **Next**.
Note: This screen only appears if you've previously installed a Rational product.
- 8 On the screen titled Confirmation, click **Next** to start the file copying process.
The system installs the RUP Builder, the Process Repository, and the default Classic RUP on the file system.
- 9 On the screen titled Restart Windows, select **Restart** and click **Finish**.
- 10 When the system restarts, you must use the same administrator identity to log in.
The system adds the Rational program group section to the **Start** menu and links to the RUP Builder and the default Classic RUP.
- 11 On the screen titled Installation Complete, click **Finish**.

Uninstalling the RUP

Due to limitations of the Installer, some manual steps are required to uninstall the RUP:

- 1 From the Windows Control Panel, click **Add/Remove Programs**.
- 2 On the tab labelled **Install/Uninstall**, locate and click **Rational Unified Process**.
- 3 Click **Add/Remove** and follow the prompts. (Errors are expected.)
- 4 On the screen titled Confirmation, click **Next**.
- 5 On the screen titled Restart Windows, select **Restart** and click **Finish**.
- 6 When the system restarts, you must use the same administrator identity to log in.

- 7 Start Windows Explorer.
- 8 Browse to the location where you installed the RUP.

The default location is `C:\Program Files\Rational\RationalUnifiedProcess`.

If a folder titled `RationalUnifiedProcess` still resides in the `Rational` directory, delete the entire folder.

There are two ways you can access the RUP release notes:

- View the file `relnotes.htm`, stored on the installation CD in the RationalUnifiedProcess directory.
- Alternatively, after installation you can open the Windows **Start** menu, and select **Programs > Rational Unified Process > Release Notes**.
