Rational TestManager: Last-Minute Updates

Version 2003.06.00
April 2003

This document explains late-breaking issues in Version 2003.06.00 of Rational TestManager.

Support for Crystal Reports

Rational TestManager Version 2003.06.00 supports Listing report formats authored with Crystal Reports 8.5. Crystal Reports is required to design, run, and view those reports. TestManager Version 2003.06.00 does not include copies of the Crystal Reports files nor the run-time libraries necessary to enable these capabilities.

For information about TestManager Listing reports, see the TestManager Help and the Rational TestManager User's Guide.

For instructions about how to license and install the appropriate Crystal Reports 8.5 software and the components necessary to create and run Listing reports in TestManager, contact Crystal Decisions directly. Any reference to Crystal Reports in the TestManager product documentation applies only to copies of Crystal software that you have rightfully licensed.

You can purchase licenses for Crystal Reports and obtain more information about licensing the run-time components required to run and view Listing reports in TestManager from the Crystal Decisions, Inc. Web site (www.crystaldecisions.com), or by contacting them by telephone:
