

Application Lifecycle Management Software Research

Executive Summary - July 2008

Methodology

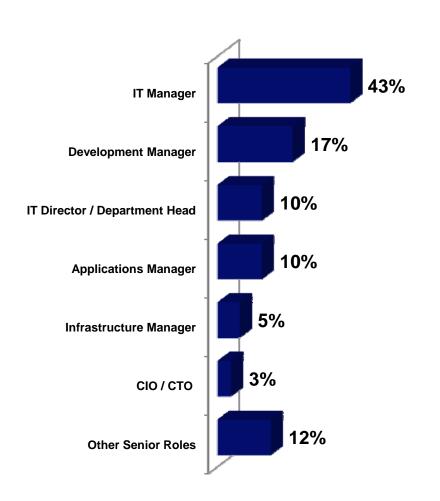

- A telephone methodology was used to complete this research quantitatively.
- Fieldwork was conducted between 27/02/2008 and 21/04/2008.
- Respondents were IT Managers or of equivalent responsibilities within the development departments of mid to large Australian organisations in Sydney, Melbourne, and Canberra.

Reader's note: Where "MR" is indicated on the bottom, right-hand corner of a slide, multiple responses are used in the tabulation of data on any particular page.

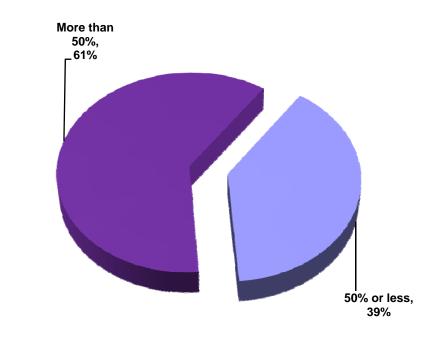

Respondent job title

(Prompted, n=163)

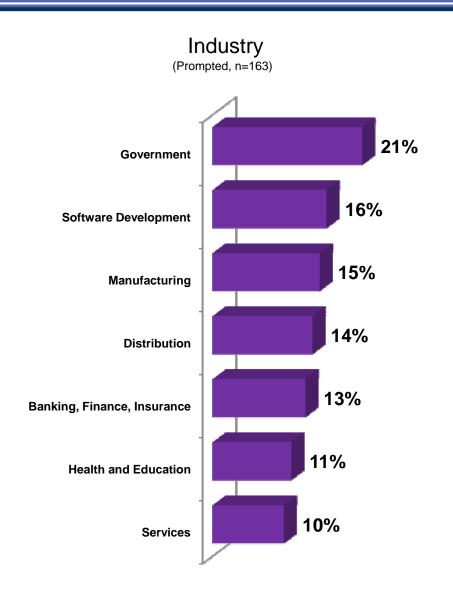

Percentage of in-house development

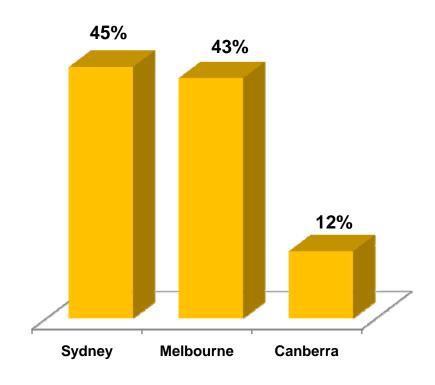

Percentage of development (N=163)	Mean % in-house	Mean % outsourced	
	63%	37%	

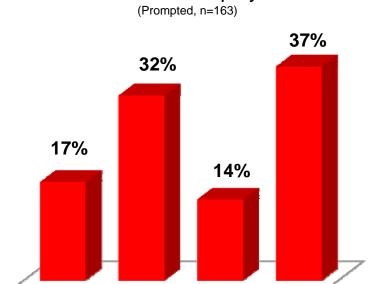

Number of Employees

Number of employees (N=163)	Mean Median	
	2690	450

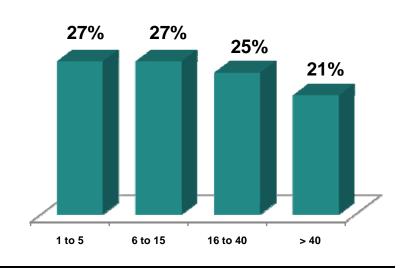

500-999

100-499

<100

1000+

Number of Developers

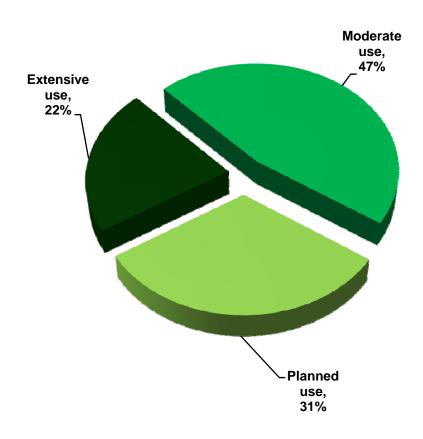

Number of developers (N=163)	Mean	Median	
	42	15	

Employee size vs. number of developers	Number of employees			
	<100	100-499	500-999	1000+
N=163	28	53	22	60
1 to 5 developers	43%	43%	18%	8%
6 to 15 developers	32%	28%	27%	23%
16 to 40 developers	14%	19%	15%	28%
> 40 developers	11%	9%	9%	40%

Usage of application lifecycle management software (ALMS)

(Prompted, n=163)

Extensive use

Deployed throughout the application development cycle.

Moderate use

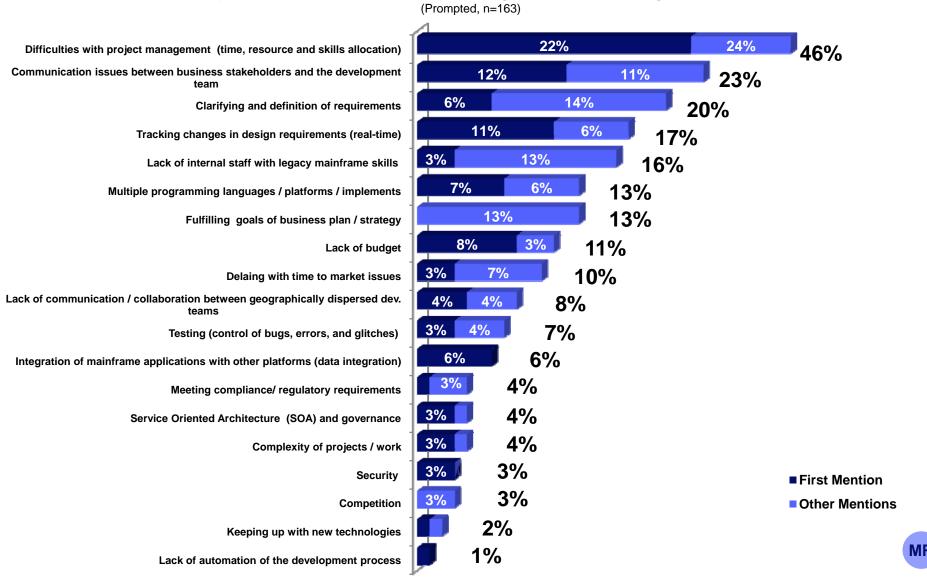

Used in some stages of the application development cycle.

Planned use

Not currently in use, but usage is planned in the future.

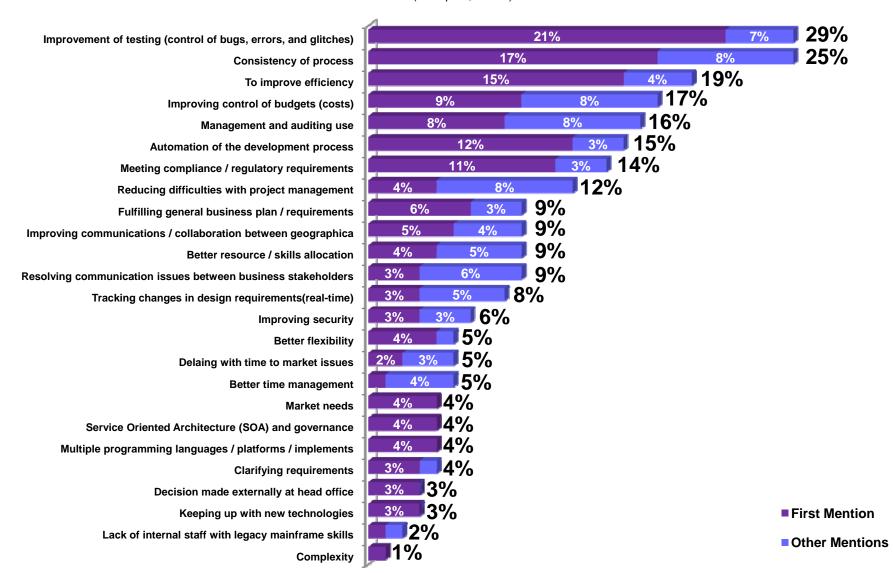

Key business issues and challenges in developing software

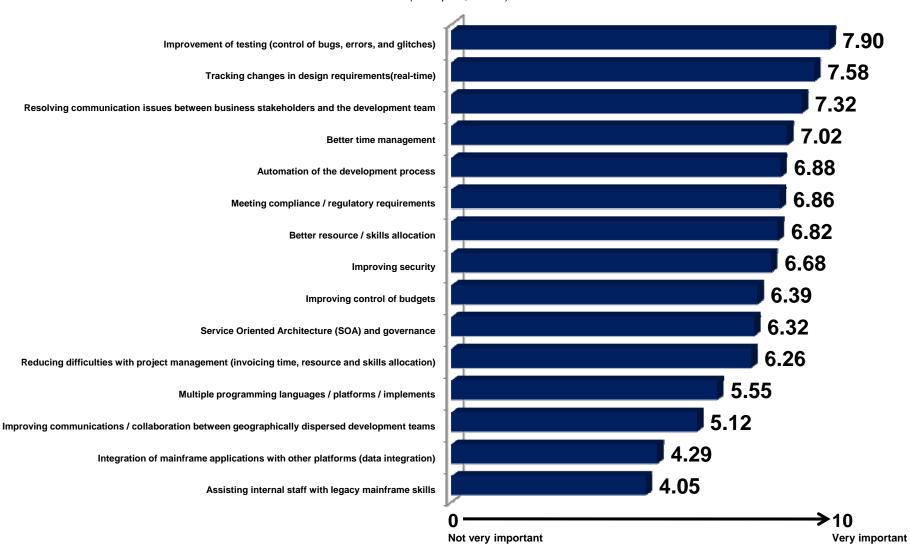

MR

Drivers for deployment of ALMS

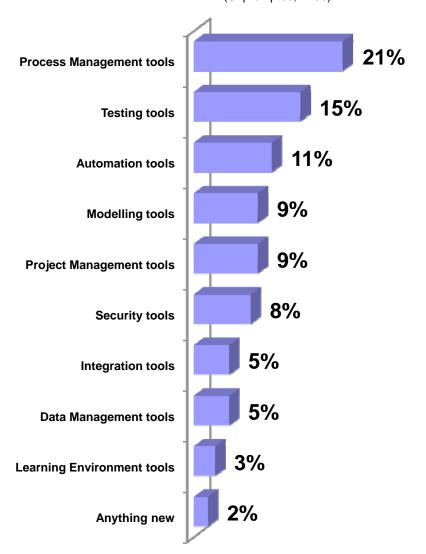

Importance of ALMS attributes

Type of ALMS tools under consideration for purchase in 2008

Main reason for choice of primary vendor of ALMS

(Prompted, n=111)

Other reasons (at 3% or less):

3%

Process was best fit with our development culture Meets our business requirements Based on project management performance Product is made by an industry leader Open source basis / foundation of product Recommendation from business partners / community

2%

Vendor understands our needs well Being vendors, we trust our vendor Based on security performance Scalability of the product Easy to obtain / source

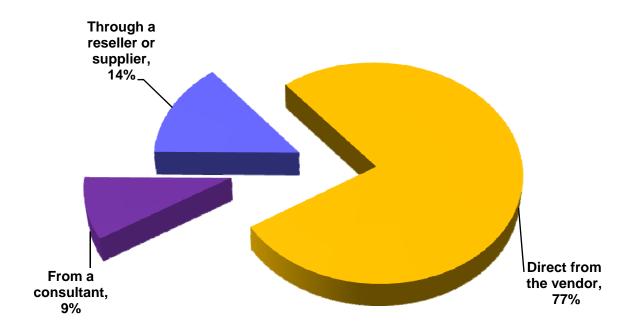

1%

Best features at time of purchase
Based on data handling performance
Low cost of support
Based on requirements handling performance
Quality of reporting outputs
Change and configuration management performance
Testing performance
Australian made product
Best value for money
Investment in skills already made at organisation

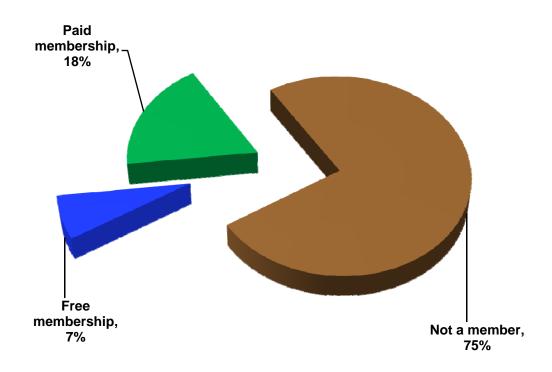

Typical source for ALMS

(Prompted, n=111)

Membership in developer programmes

Rational software

The Software Development Leader

Application Development Software

Clear leader for the seventh consecutive year

Gartner, May 2008

Software Configuration Management
Widened lead: twice the market share of nearest competitor

IDC, July 2007

Web Application Security

Market leader with Rational AppScan

IDC, February 2008

Save the date for Australia's first Rational Software Development Conference!

WHERE TEAMS ARE

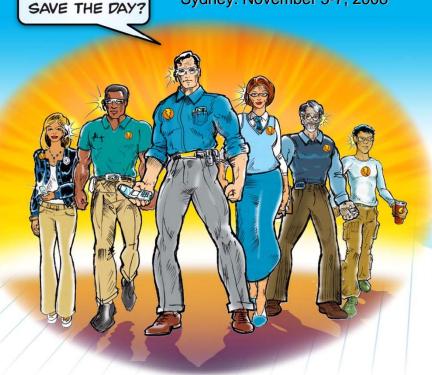

Executive Lunches:

October 28-30, 2008 Sydney, Melbourne, Canberra

RU READY TO

Technical Streams:

Sydney: November 5-7, 2008

Conference highlights include:

- Executive Luncheons across Sydney, Melbourne and Canberra
- Showcasing 'Jazz' The future of collaborative software development
- Australia's best SW delivery training and education
- 45 Technical Sessions across 4 Tracks
- Hands-On Workshops
- Access to IBM Technical Specialists
- Networking with leading executives and IT practitioners

For more information on the Rational Development Conference please contact: Michael Fidler (mfidler@au1.ibm.com)
