Owners of Rose XDE Developer for Java Who Use XDE Developer for Java

(This guidance also pertains to former owners of Rose XDE Developer for Java whose entitlements have already been converted to Rose Developer for Java)

Summary: if you use Rose XDE Developer for Java your replacement product will be Rational Systems Developer. (Optionally, you could pay to trade up to Rational Software Architect)
Rational Systems Developer is already available to you via Anticipatory Access and you may begin to adopt it at any time. You do not have to worry about migrating any of your Rose XDE Developer for Java or Rose Developer for Java entitlements because over time, the entitlement issues will resolve themselves as part of the maintenance renewals process.

Timeframe	Option 1	Option 2 (preferred)	Option 3
<ul style="list-style-type: none"> Before XDE End of Service on September 30, 2007 (maintenance renewals will quote Rose Developer or Java) 	<ul style="list-style-type: none"> Accept default migration to Rose Developer for Java Continue to use XDE Developer for Java Prepare to adopt Rational Systems Developer no later than September 30, 2007 	<ul style="list-style-type: none"> Accept default migration to Rose Developer for Java Adopt Rational Systems Developer ASAP based on Anticipatory Access 	<ul style="list-style-type: none"> Request migration of entitlement to Rational Systems Developer Adopt Rational Systems Developer
<ul style="list-style-type: none"> After XDE End of Service (by then, all entitlements will have been migrated to either Rose Developer for Java or Rational Systems Developer) Until market withdrawal of Rose Developer for Java (see Rose Expected Lifetime below) 	<ul style="list-style-type: none"> Same as Option 2 	<ul style="list-style-type: none"> Continue to accept default renewals on Rose Developer for Java Continue to use Rational Systems Developer based on Anticipatory Access 	
<ul style="list-style-type: none"> After market withdrawal of Rose Developer for Java (all maintenance renewals will begin to quote Rational Systems Developer) 	<ul style="list-style-type: none"> Same as Option 2 	<ul style="list-style-type: none"> Accept default migration from Rose Developer for Java to Rational Systems Developer Continue to use Rational Systems Developer
