

We appreciate your decision to use IBM Rational software products, the platform for governing software systems development in an on-demand world.

This document serves as an introduction to the IBM Rational License Key Center. The guide will show you how to log in and navigate your way through the process of generating license keys and how to move a generated key to another host.

In this guide, you will learn how to...

- ▶ [Log into the Rational License Key Center](#)
- ▶ [Generate license keys](#)
- ▶ [Move your license keys](#)
- ▶ [View your Sales Orders](#)
- ▶ [View your installed keys](#)
- ▶ [Add other members to your account](#)
- ▶ [Add yourself to other accounts](#)
- ▶ [Switch between accounts](#)

About this section

This section of the guide will discuss how to log into the License Key Center, where to find your password and describes your account ID.

How to log into the License Key Center

Log in using your email address and the License Key Center password. The first time you log into the License Key Center, you will be asked to change your system-generated password to a user-defined password.

About your password

Each user will be emailed a password when they are added to the License Key Center. The email is from "Rational License Key Center". When you book an order, the "Primary Site Contact" and the "Site Technical Contact" associated with the order are setup as default members of your account.

Log into License Key Center

ACTION - Log in using your email address and the License Key Center password

Not a member of an account?

If you do not have a password because you are not a member of the account you would like to access, select the "Don't have a password" link to self-register to your IBM account. The self registration process will ask you to enter your IBM site number and your order number. You will be emailed a password once you submit the registration.

The screenshot shows the Rational License Key Center login page in a Mozilla Firefox browser window. The address bar displays the URL: <https://licensing.subscribenet.com/control/ibmr/login?nextURL=%2Fcontrol%2Fib>. The page header includes the Rational software logo and the title "Rational License Key Center". The main content area features a large banner with the text "Rational License Key Center" and a "Please log in" prompt. Below the banner, there are two input fields: "Email address" (containing "myemailaddress@company.com") and "License Key Center Password" (masked with asterisks). A checkbox labeled "Remember my password until I logout" is present, along with a "Login" button. At the bottom, there are three links: "Forgot your password?", "Don't have a password?", and "Need other assistance?". The browser's status bar at the bottom shows "Done" and the address "licensing.subscribenet.com".

Select account

If you are a member of multiple accounts the License Key Center will ask you to select the account you wish to log into. This page will not be displayed if you are a member of only one account.

About your account ID

For orders placed with IBM since October, 2003, your License Key Center account ID will be your IBM Site ID. Each time you place an order against the same site ID, the license keys for that order will flow into the corresponding License Key Center account. You can find your IBM Site ID on the IBM Proof of Entitlement Certificate sent to you when you placed your order.

For orders placed with Rational prior to October, 2003, your License Key Center account ID will be the Rational account number given to you on the Rational License Key Certificate shipped with your order.

Select Account

ACTION - Select the account you wish to access. You will not see this page if you are a member of only one account.

Rational License Key Center : Select account - Microsoft Internet Explorer

Address: <https://licensinguat.subscribenet.com/control/ibmr/switchaccount?nextURL=%2Fcontrol%2Fibmr%2Findex>

Select account

You are a member of multiple License Key Center accounts. Please select the account you wish to use for the current session. You can switch accounts after signing in by using the "Switch Account" link on the left hand navigation bar.

About Account IDs...

IBM Passport Advantage entitlements - Account IDs listed in the format of a ten digit number (e.g. 0001234567) will show your entitlements that fall within the IBM Passport Advantage program. The account ID is the IBM Site Number.

Legacy Rational entitlements - Accounts with alpha-numeric IDs (e.g. 12345US-0-123) are for purchases made prior to October, 2003. The account ID is the legacy Rational account number you used to get your license keys through AccountLink. It is likely that you migrated these purchases to active entitlements under the IBM Passport Advantage program and you do not need license keys for them, however, they are shown here for to help you keep track of your historical purchases.

Account ID	Company Name	Name
0098827711	Test Company	Dan Kenney
0063440082	Test Company	Dan Kenney
M827733-0-US1	Test Company	Dan Kenney

About this section

Most IBM Rational software products require license keys in order to run them. This section will discuss how to generate your license keys. During this process, the License Key Center will ask you to enter some information about the machine, or "host", on which you will install the license keys. There are two types of license keys: Floating and Authorized User license keys. The term Authorized User replaces the term Nodelocked. [Read more about the different license types](#)

Floating license keys

To use floating licenses with most Rational products, you must obtain floating license keys and install them on a IBM Rational License Server. The server responds to end-user requests for access to the license keys. To generate a floating license key, you will enter the quantity of keys you want and the host information of the license server machine. Floating keys have a quantity of keys associated with them so the server can count concurrent license key usage.

Authorized User license keys

Authorized User license keys do not require a license server like floating keys. You will need to generate a key for each host on which you will actually use the IBM Rational product. The key gets installed onto the host and read by the Rational product at run time. The exception to this is the PurifyPlus family of products for Linux or UNIX. Authorized User keys of those products use a license server like floating license keys.

Select license key to generate

(Step 1 of 4)

The main License Key Center screen shows you a list of license keys associated with the products in your account.

Attention ClearCase customers

Version 7.0 of IBM Rational ClearCase will give you the option of using Rational's FLEXlm-based license manager or the classic ClearCase license manager. The choice is yours. To allow for this selection, you will find both types of ClearCase keys available to you on this page. Please note that the FLEXlm-based ClearCase keys will only work with v7.0 of ClearCase. All versions of ClearCase prior to v7.0 use the classic ClearCase license manager.

Select the license key you want

ACTION - To generate a license key, start by clicking on the license key name.

Rational License Key Center

The items below represent license keys associated with your Rational software purchases. Select a product name to get the key. Go [here](#) to view the order details for your purchase.

License key name	Date Available
IBM Rational ClearCase Floating license key (Classic ClearCase license manager)	Jan 1, 2000
IBM Rational ClearCase Floating license key (FLEXlm-based)	Jan 1, 2000
IBM Rational ClearCase MultiSite floating license key (Classic ClearCase license manager)	Jan 1, 2000
IBM Rational ClearCase MultiSite floating license key (FLEXlm-based)	Jan 1, 2000
IBM Rational ClearQuest MultiSite floating license key	Jan 1, 2000
IBM Rational ClearQuest floating license key	Jan 1, 2000
IBM Rational PurifyPlus for UNIX floating license key	Jan 1, 2000
IBM Rational PurifyPlus for Windows floating license key	Jan 1, 2000
IBM Rational RequisitePro floating license key	Jan 1, 2000
IBM Rational Rose Professional Data Modeler Edition floating license key	Jan 1, 2000
IBM Rational Suite Enterprise floating license key	Jan 1, 2000

Select the Sales Order

(Step 2 of 4)

The Select License Keys page will show you each software order in your account that contains the license key you selected on the previous screen. This allows you to register license keys against specific purchases.

In this example, the customer bought 75 licenses of Rational Rose Data Modeler on one sales order and then purchased 9 additional licenses of Rose Data Modeler on a different sales order. Both sales orders are displayed on the page. The License Key Center asks the user to select the sales orders from which they wish to associate their keys.

Select the Sales Order

ACTION - Check the box next to the license key and sales order you desire. You may check multiple boxes and get license keys from multiple sales orders at one time. To the right of the license key name you will see the number of keys available for generation.

Enter your host information for Floating keys

(Step 3 of 4)

[Skip ahead to the next page in this guide if you are generating Authorized User keys](#)

The Quantities and Host Information page will ask you to enter the number of license keys you want to generate and will ask you to enter two pieces of information about your hardware.

Enter quantity of license keys (required field)

ACTION - Enter the number of keys you wish to obtain for each item in the top part of the screen. You number entered must be equal to or less than the number of license keys available.

Select existing host (optional)

ACTION - This pull-down will list any host that has a license key registered to it from a product associated with your account. Selecting an existing host will populate the Server Host ID, hostname, and host description

Enter Host ID (required field)

ACTION - For floating license keys, enter the host ID of the license server machine. Selecting the "Host ID" link will launch a popup with instructions on getting your host ID.

Enter Hostname (required field)

ACTION - For floating license keys enter the host name of the license server machine. Selecting the "Hostname" link will launch a popup with instructions on getting your hostname.

Host Description (optional)

ACTION - You can enter a description of the host to help you and others at your site identify the machine

Redundant servers (optional)

ACTION - Advanced users have the option of using redundant license servers. Leave this section blank if you do not wish to use this feature. See the FAQ for details.

Download and install your license key file

(Step 4 of 4)

READ BEFORE PROCEEDING

The license key file presented on this screen will only contain keys you generated through the License Key Center. It will not contain keys you got from Rational or through the legacy AccountLink tool before May of 2006.

Importing this license key file onto your host will **replace** your existing file. Make sure to create a backup copy of your legacy license key file and then go back through the License Key Center and generate all the keys you need on your host. Refer to the on-line FAQ for details on how to identify your existing license key files.

Download keys to your desktop

ACTION - Select the "download keys" button to save the license key file to your desktop. Follow the installation instructions on the screen to install the key.

Make changes

You can select the "Make Changes" button if you need to make changes after you generate the license keys. This will bring you back to step 2 where you can make adjustments and then proceed through steps 3 and 4 again.

**About this section**

The license keys you have generated are for your specific hosts. We understand that you will have the need to move your keys from host to host as your hardware changes. Therefore, License Key Center allows you to move keys between hosts.

Moving your license keys from one host to another is a three-step process:

1. The first step is to identify the previously generated key you want to move and "return" the key to your License Key Center available pool. This tells IBM Rational that you will no longer be using the key.
2. The next step is to update the original host that had the license key on it and remove the actual license key.
3. The last step is to generate a new key for the host to which you want to move the key.

This section of the guide will show you an example of how to move license keys to a new host.

Identify the key you want to return

(Step 1 of 3)

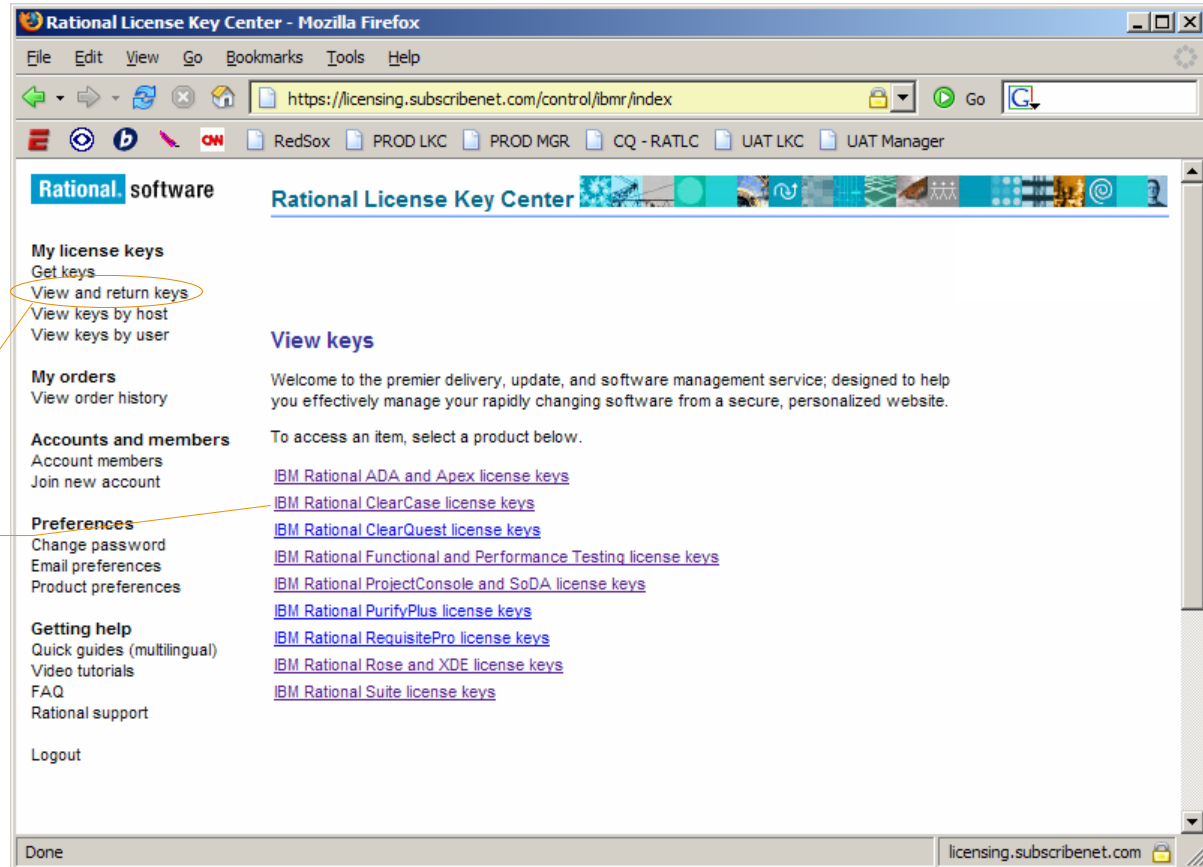

The first step is to identify the previously generated key you want to move and “return” the key to your License Key Center available pool. This tells IBM Rational that you will no longer be using the license key.

Select “View and return keys”

ACTION – Select “View and return keys” from the “My license keys” section of the left hand menu.

Select product category

ACTION - Select the product category of the key you wish to move.

Identify the key you want to return

(Step 1 of 3)

The first step is to identify the previously generated key you want to move and “return” the key to your License Key Center available pool. This tells IBM Rational that you will no longer be using the license key.

Select license key

ACTION - Select the license key you wish to return back to your License Key Center account.

My License Keys

The items below represent license keys associated with your Rational software purchases. Select a product name to get the key. Go [here](#) to view the order history for your purchase.

License key name
IBM Rational ClearQuest Authorized User License Key
IBM Rational ClearQuest Floating License Key
IBM Rational ClearQuest MultiSite Authorized User License Key
IBM Rational ClearQuest MultiSite Floating License Key

Return license key

(Step 1 of 3)

This page will show you the license keys generated against your sales orders for the product you selected.

In this example, the customer purchased 90 licenses of IBM Rational ClearQuest and currently has 87 keys available. The white boxes show that the 3 keys previously generated are on two different hosts.

To move the 1 key generated for host "ddimillot41p" to another host, select the "Return" button associated with ddimillot41p. This will make the key available again. The License Key Center would then show 88 keys available.

Return license key

ACTION - Select the "Return" button next to the key you wish to return back to your account.

Adding members to your account

The Account members page will show a list of users who are members of your account along with each member's email address, title and privileges. The same user may be a member of multiple accounts with differing privileges across accounts.

Passwords for new members

When you add a new member to the IBM Rational License Key Center, the user will automatically receive a welcome email containing their password for logging in.

Account members

ACTION – Select “Account members” from the left-hand menu.

Add new member

ACTION – Select “Go to New Member Form” to add a member to your account. You must have Administrator privileges to do this.

Account administrators

Members with administrator privileges can add or remove members from the account and control member privileges.

Account members

To add a new member: Choose an address from the drop down list and select "Go to New Member Form".

A new address

Go to New Member Form

To delete a member or edit member privileges: Check or uncheck the corresponding boxes and select "Update Member Privileges".

Indicates Administrator

Name	Title	Administrator Privileges	Download Privileges	Delete
Mark Hurley	Project Manager	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Delete
Stitch Lisky		<input type="checkbox"/>	<input checked="" type="checkbox"/>	Delete
Tricia Woods		<input type="checkbox"/>	<input checked="" type="checkbox"/>	Delete
John Johnson		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Delete
Srinivas Patel		<input type="checkbox"/>	<input checked="" type="checkbox"/>	Delete
Hugh DiMillo		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Delete

Adding yourself to a new account

It is possible that your company has multiple License Key Center accounts that you need to access. To do this, you have two options: the account administrator of the account you want to access can add you as a member (see previous page in this guide), or you can add yourself to the new account using the instructions below.

To add yourself as a member of a new account, enter your contact information along with the IBM Site number or legacy Rational account number as well as your sales order number. You will be added as a member of the account that matches the order information entered.

Join new account

ACTION – Select “Join new account” from the left hand menu and enter your contact information.

IBM Site Number

ACTION – Enter the account ID of the account you want to join. Selecting the hyperlink will launch a popup that will tell you where to find this information.

Sales Order Number

ACTION – Enter any Sales Order Number associated with the account you wish to join. Selecting the hyperlink will launch a popup that will tell you where to find your Sales Order Number

Switching between accounts

If you are a member of multiple IBM Rational License Key Center accounts, you will see the "Switch account" menu selection in the left-hand menu. You will not see this item if you are a member of only one account. This feature will show you a list of the accounts that you are a member of and allows you to select the account you wish to access.

Switch account

ACTION – Select "Switch account" to see a list of accounts that include you. If you are a member of only one account you will not see this item.

Select Account

ACTION - Select the account you wish to access.

Rational License Key Center

Select account
You are a member of multiple License Key Center accounts. Please select the account you wish to use for this session. You can switch accounts after signing in by using the "Switch Account" link on the left hand navigation menu.

About Account IDs...

IBM Passport Advantage entitlements - Account IDs listed in the format of a ten digit number (e.g. 00012345) your entitlements that fall within the IBM Passport Advantage program. The account ID is the IBM Site Number.

Legacy Rational entitlements - Accounts with alpha-numeric IDs (e.g. 12345US-0-123) are for purchases October, 2003. The account ID is the legacy Rational account number you used to get your license keys through AccountLink. It is likely that you migrated these purchases to active entitlements under the IBM Passport Advantage and you do not need license keys for them, however, they are shown here for to help you keep track of your purchases.

Account ID	Company Name	Name
0098827711	Test Company	Dan Kenney
0063440082	Test Company	Dan Kenney
M827733-0-US1	Test Company	Dan Kenney
