IBM Rational Programming Patterns
Version 9.0

IBM ®

Quick Start Guide

This guide is intended to get you started with a base installation of IBM Rational Programming Patterns.

National language version: To obtain the Quick Start Guide in other languages, access the PDF file on the Quick Start disk.

Product overview

With IBM® Rational® Programming Patterns, you can develop and maintain VisualAge® Pacbase V3.5 applications in a strategic, open environment based on Eclipse and Jazz™. It integrates with IBM Rational Developer for System z® or IBM Rational Developer for AIX® and Linux, according to your environment. It always requires an integration with IBM Rational Team Concert™.

1   Step 1: Access your software

If you download your product from Passport Advantage®, follow the instructions of the IBM Rational Programming Patterns Installation Guide (GC14-7413-03) available at:

http://www.elink.ibmlink.ibm.com/publications/servlet/pbi.wss?CTY=US&FNC=SRX&PBL=GC14-7413-03

This product offering includes:
  • IBM Rational Programming Patterns Quick Start Disk
  • IBM Rational Programming Patterns Client Installation Disk
  • IBM Rational Programming Patterns Server Installation Disk

2   Step 2: Access your documentation

The online help available from the product comes from the IBM Rational Programming Patterns Information Center, at

http://pic.dhe.ibm.com/infocenter/rpphelp/v9r0/index.jsp

The IBM Rational Programming Patterns installation guide is also available on the IBM Rational Programming Patterns Quick Start Disk.

The Program Directory, which explains how to install the IBM Rational Programming Patterns server on z/OS®, is available from the IBM Rational Programming Patterns Server Installation Disk.

3   Step 3: Evaluate your hardware and system configuration

The detailed system requirements of IBM Rational Programming Patterns are available at:

http://www-01.ibm.com/software/rational/products/programming/systemz/sysreq/

Before installing IBM Rational Programming Patterns, you must check the system requirements of the products it is integrated with and install these products.

To install the IBM Rational Programming Patterns client, you must install:
  1. One of the following client products, according to your environment:
      • IBM Rational Developer for System z V9.0 for a System z environment. You can refer to its Quick Start Guide (GI11-8300-07), available on the IBM Rational Developer for System z Quick Start Disk.
      • IBM Rational Developer for AIX and Linux V9.0 for a System p® environment. You can refer to its Quick Start Guide (CF3TWML), available on the IBM Rational Developer for AIX and Linux Quick Start Disk.
  2. IBM Rational Team Concert client version 4.0.3. Refer to its Quick Start Guide (CF3SGML), available on the IBM Rational Team Concert Quick Start Disk.

To install the IBM Rational Programming Patterns server, you must install the Jazz Team Server and CCM Application version 4.0.3. Refer to the IBM Rational Team Concert Quick Start Guide (CF3SGML), available on the IBM Rational Team Concert Quick Start Disk.

| **4** | **Step 4: Install the IBM Rational Programming Patterns client** |

You must install the IBM Rational Programming Patterns client where the other client products are already installed.

You can install the IBM Rational Programming Patterns client on Windows Vista, Windows XP Professional, or Windows 7, from an installation disk or an electronic image. Refer to the IBM Rational Programming Patterns Installation Guide (GC14-7413-03).

| **5** | **Step 5: Install the IBM Rational Programming Patterns server** |

You must install the IBM Rational Programming Patterns server where the Jazz Team Server is already installed.

You can install the IBM Rational Programming Patterns server on Windows 2008, UNIX, Linux, or zLinux from an installation disk or an electronic image. Refer to the IBM Rational Programming Patterns Installation Guide (GC14-7413-03).

You can also install the IBM Rational Programming Patterns server on z/OS, through SMP/E. Refer to the installation instructions found in the Rational Programming Patterns Program Directory (GI11-9155-03).

| **6** | **Step 6: Integrate with IBM Rational Team Concert** |

To integrate IBM Rational Programming Patterns with IBM Rational Team Concert, you must create language definitions that are specific to IBM Rational Programming Patterns. Refer to the IBM Rational Programming Patterns Installation Guide (GC14-7413-03).
