

# RAdmin Domain

The RAdmin domain lets you extract information from Rational Administrator.

# RAProject

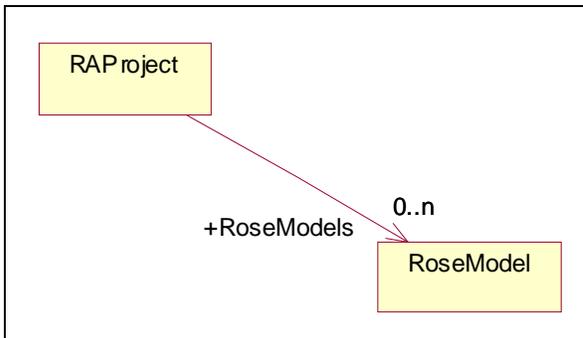

## RAdmin Domain

A project stores software testing and development information.

**Class Hierarchy:** RAProject

### SubClasses of RAProject

This class has no subclasses.

### Properties Specific to RAProject

Properties	Inherited From	Description
ClearQuestConnectionName		Name of the database connection for the ClearQuest Database that is associated with a Rational project.
ClearQuestDatabaseName		The ClearQuestDatabase (CQDatabase object) name associated with the RAProject.
Location		Location of the RAProject.
Name		Name of the RAProject.
Path		The file path of the RAProject.
RequirementsCMManaged		This property returns a Boolean value indicating whether the Requirements associated with the RA Project may be placed under CM.
RequisiteDatastorePath		The path of RequisitePro datastore that contains the CMManaged Requirements.
TestAssetsCMManaged		This property returns a Boolean value indicating whether the Test Manager Test Assets associated with the RA Project may be placed under CM.

<b>Properties</b>	<b>Inherited From</b>	<b>Description</b>
TestDatastorePath		The path of the Test Manager datastore that contains the CMManaged TestAssets.
UCMEnabled		TRUE if use case management is enabled.

**Relationships Specific to RAProject**

<b>Name</b>	<b>Kind</b>	<b>Class</b>	<b>Description</b>
RoseModels	0..n	RoseModel	List all Rose models used in the project.

# RAServer

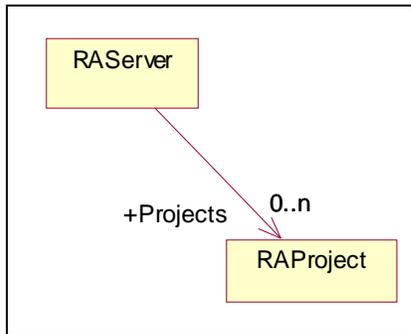

## RAdmin Domain

Provides access to all the other interfaces which provide access to the list of registered projects (RAProjects), the list of registered SQLAnywhere servers (RASQLAnywhereServers) and the ability to start various Rational tools (RationalTools).

**Class Hierarchy:** RAServer

### SubClasses of RAServer

This class has no subclasses.

### Properties Specific to RAServer

This class has no properties.

### Relationships Specific to RAServer

Name	Kind	Class	Description
Projects	0..n	RAProject	Associated RAProjects.

## RoseModel

### RAdmin Domain

Rose Models associated with an RAdmin Project.

**Class Hierarchy:** RoseModel

#### SubClasses of RoseModel

This class has no subclasses.

#### Properties Specific to RoseModel

Properties	Inherited From	Description
Name		Model name.
Path		Model path.

#### Relationships Specific to RoseModel

This class has no relationships.
