

# XDE Domain

## Introduction

The XDE domain lets you incorporate objects from Rational XDE models in your reporting.

Among the objects that you can extract are packages, classes, uses cases, and diagrams.

# AbstractCollaboration

## XDE Domain

An abstract common parent class for Collaboration and CollaborationInstance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>AbstractCollaboration

### SubClasses of AbstractCollaboration

- Collaboration
- CollaborationInstance

### Properties Specific to AbstractCollaboration

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to AbstractCollaboration

This class has no relationships.

# Abstraction

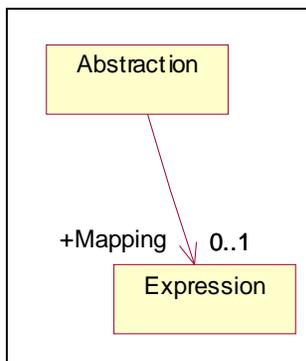

## XDE Domain

Implies a semantic mapping between elements that represent the same concept.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Abstraction

### SubClasses of Abstraction

This class has no subclasses.

### Properties Specific to Abstraction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Abstraction

Name	Kind	Class
Mapping	0..1	Expression

## Access

### XDE Domain

Access is a dependency between two namespaces, denoting that the public contents of the target namespace are accessible to the namespace of the source Package.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Permission>Access

#### SubClasses of Access

This class has no subclasses.

#### Properties Specific to Access

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Access

This class has no relationships.

# Action

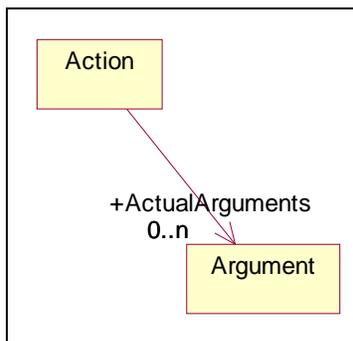

## XDE Domain

Action is an abstract interface for manipulating various types of UML actions. Actions result from a state or activity change.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action

### SubClasses of Action

- ActionSequence
- AssignmentAction
- CallAction
- CreateAction
- DestroyAction
- ForkAction
- JoinAction
- ReplyAction
- ReturnAction
- SendAction
- TerminateAction
- UninterpretedAction

### Properties Specific to Action

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	
ScriptString	
StereotypeName	ExtensibleElement

<b>Properties</b>	<b>Inherited From</b>
Target	
TypeName	Element

**Relationships Specific to Action**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
ActualArguments	0..n	Argument

# ActionSequence

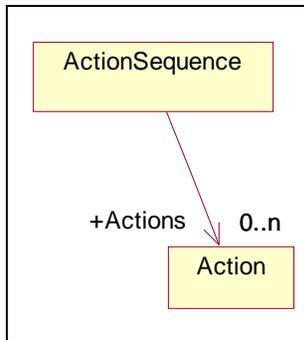

## XDE Domain

An ordered set of actions to be executed one after another.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>ActionSequence

### SubClasses of ActionSequence

This class has no subclasses.

### Properties Specific to ActionSequence

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to ActionSequence

Name	Kind	Class
Actions	0..n	Action

# Activity

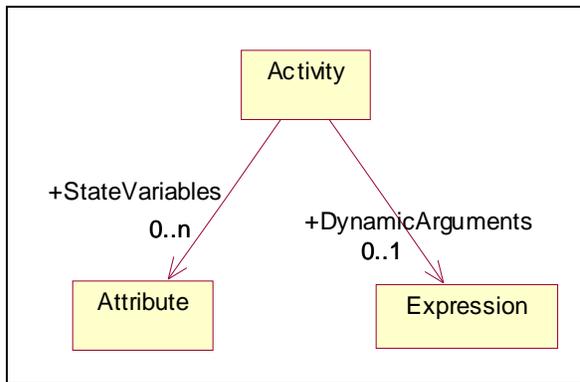

## XDE Domain

A unit of work a role may be asked to perform.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>State>CompositeState>Activity

### SubClasses of Activity

This class has no subclasses.

### Properties Specific to Activity

Properties	Inherited From
Description	NamedModelElement
DynamicMultiplicity	
FullyQualifiedName	NamedModelElement
GUID	Element
IsConcurrent	CompositeState
IsDynamic	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Activity

Name	Kind	Class
DynamicArguments	0..1	Expression
StateVariables	0..n	Attribute

# ActivityGraph

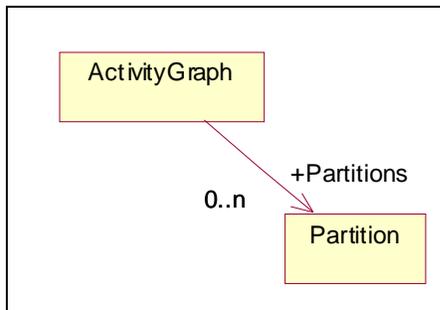

## XDE Domain

A special case of a StateMachine that is used to model processes involving one or more classifiers.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateMachine>ActivityGraph

### SubClasses of ActivityGraph

This class has no subclasses.

### Properties Specific to ActivityGraph

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ActivityGraph

Name	Kind	Class
Partitions	0..n	Partition

# Actor

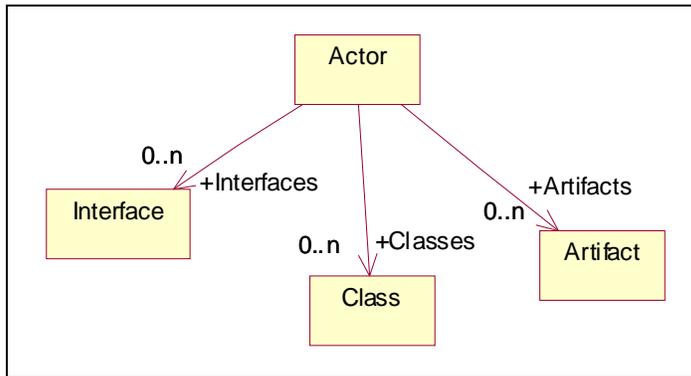

## XDE Domain

Actors define a coherent set of roles that users of an entity can play when interacting with the entity. An actor may be considered to play a separate role with regard to each UseCase with which it communicates.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>Actor

### SubClasses of Actor

This class has no subclasses.

### Properties Specific to Actor

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Actor

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Artifacts	0..n	Artifact
Classes	0..n	Class
Interfaces	0..n	Interface

# Argument

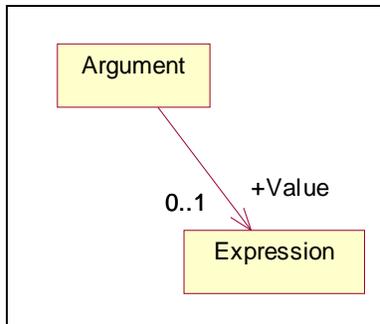

## XDE Domain

A data element or value included as a parameter in an Action.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Argument

### SubClasses of Argument

This class has no subclasses.

### Properties Specific to Argument

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Argument

Name	Kind	Class
Value	0..1	Expression

## Artifact

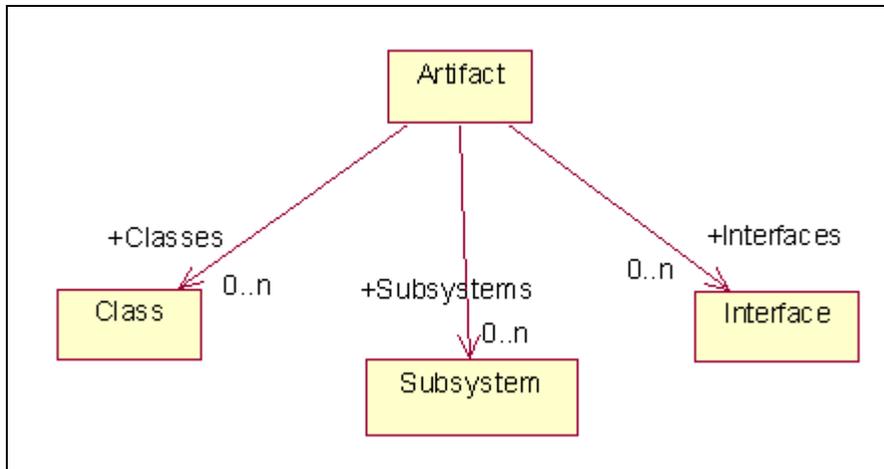

### XDE Domain

Implements a component or is a physical entity realized from a classifier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>Artifact

#### SubClasses of Artifact

This class has no subclasses.

#### Properties Specific to Artifact

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Artifact

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Classes	0..n	Class
Interfaces	0..n	Interface
Subsystems	0..n	Subsystem

# AssignmentAction

## XDE Domain

An action that assigns an instance to an attribute link or a link.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>AssignmentAction

### SubClasses of AssignmentAction

This class has no subclasses.

### Properties Specific to AssignmentAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to AssignmentAction

This class has no relationships.

# AssociatedClass

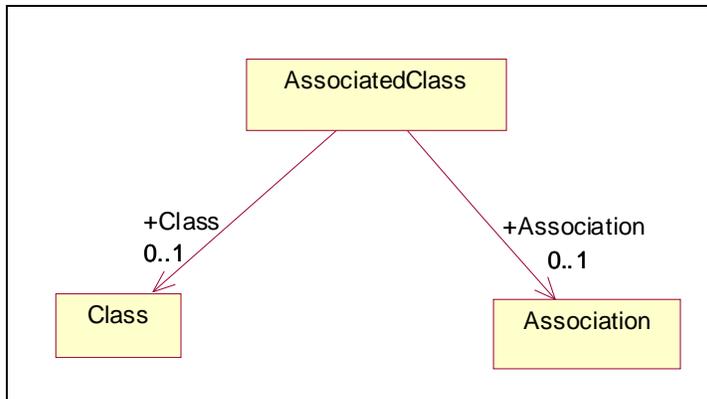

## XDE Domain

A model element that has both association and class properties.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>AssociatedClass

### SubClasses of AssociatedClass

This class has no subclasses.

### Properties Specific to AssociatedClass

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to AssociatedClass

Name	Kind	Class
Association	0..1	Association
Class	0..1	Class

# Association

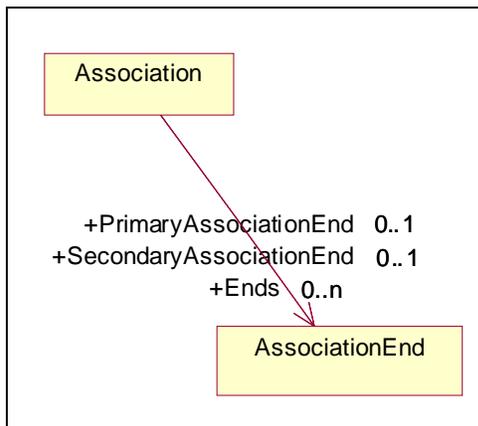

## XDE Domain

Associations define semantic relationships between Classifiers. Associations own AssociationEnds that specify a relationship between a supplier Classifier and a consumer Classifier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>Association

### SubClasses of Association

This class has no subclasses.

### Properties Specific to Association

Properties	Inherited From
Description	NamedModelElement
End1Aggregation	
End1Changeability	
End1InitialValueExpression	
End1IsNavigable	
End1Multiplicity	
End1Name	
End1OwnerScope	
End1Stereotype	
End1SupplierName	
End1TypeExpression	
End1Visibility	
End2Aggregation	
End2Changeability	
End2InitialValueExpression	
End2IsNavigable	
End2Multiplicity	
End2Name	

<b>Properties</b>	<b>Inherited From</b>
End2OwnerScope	
End2Stereotype	
End2SupplierName	
End2TypeExpression	
End2Visibility	
FullyQualifiedName	NamedModelElement
GUID	Element
IsBinary	
IsDerived	
IsDirected	
IsSpecification	NamedModelElement
Kind

PrimaryEndSupplierName	
PrimaryEndTypeExpression	
PrimaryEndVisibility	
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Association

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Ends	0..n	AssociationEnd
PrimaryAssociationEnd	0..1	AssociationEnd
SecondaryAssociationEnd	0..1	AssociationEnd

# AssociationEnd

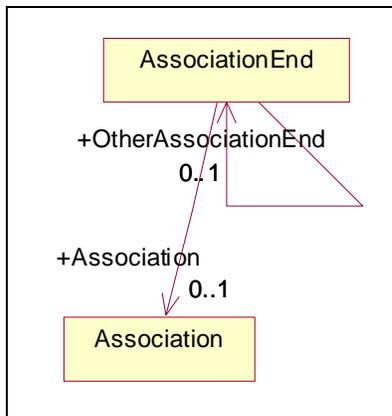

## XDE Domain

An AssociationEnd is an endpoint of an Association that connects the Association to a Classifier. AssociationEnds have names and define sets of properties of the connection. AssociationEnd information is shown on both sides of an Association. An AssociationEnd can have an AssociationEndRole.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>TypeUsage>StructuralFeature>AssociationEnd

### SubClasses of AssociationEnd

This class has no subclasses.

### Properties Specific to AssociationEnd

Properties	Inherited From
Aggregation	
CanonicalMultiplicity	StructuralFeature
Changeability	StructuralFeature
DefaultValueExpression	TypeUsage
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsByValueIfComposite	StructuralFeature
IsDerived	StructuralFeature
IsNavigable	StructuralFeature
IsSpecification	NamedModelElement
Label	Element
Multiplicity	StructuralFeature
Name	NamedModelElement
Ordering	StructuralFeature
OwnerScope	StructuralFeature

<b>Properties</b>	<b>Inherited From</b>
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TargetScope	StructuralFeature
TypeExpression	TypeUsage
TypeName	Element
Visibility	StructuralFeature

### Relationships Specific to AssociationEnd

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Association	0..1	Association
OtherAssociationEnd		AssociationEnd

# AssociationEndRole

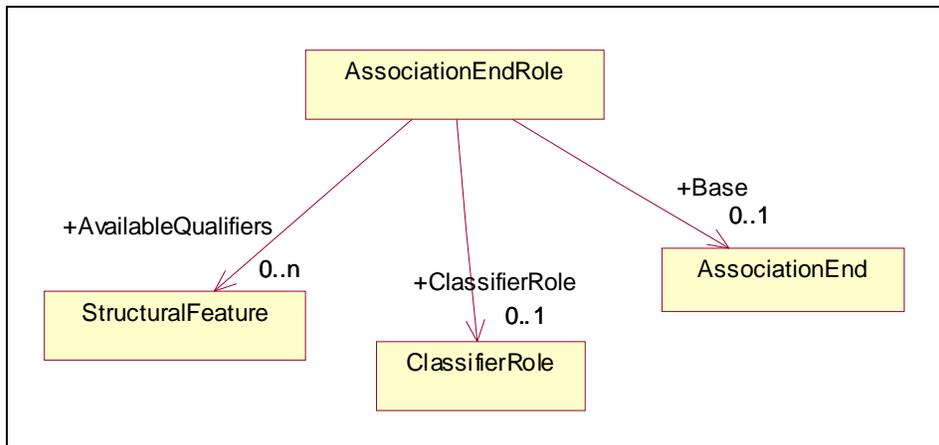

## XDE Domain

An AssociationEndRole specifies the role of an AssociationEnd of an association used in a collaboration. It specifies the connection of an AssociationRole to a ClassifierRole.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>AssociationEndRole

### SubClasses of AssociationEndRole

This class has no subclasses.

### Properties Specific to AssociationEndRole

Properties	Inherited From
CollaborationMultiplicity	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsNavigable	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to AssociationEndRole

Name	Kind	Class
AvailableQualifiers	0..n	StructuralFeature
Base	0..1	AssociationEnd
ClassifierRole	0..1	ClassifierRole

# AssociationRole

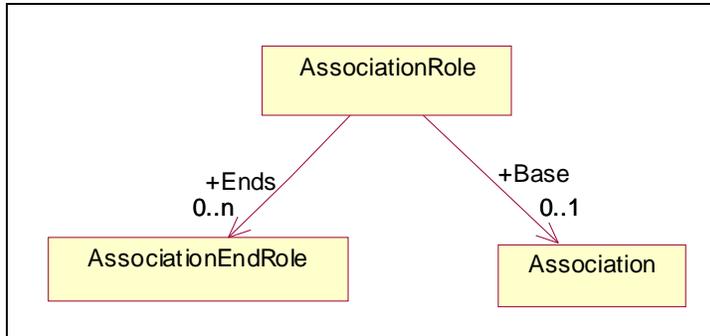

## XDE Domain

An AssociationRole is a specific usage of an association needed in a collaboration.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>AssociationRole

### SubClasses of AssociationRole

This class has no subclasses.

### Properties Specific to AssociationRole

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Multiplicity	
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to AssociationRole

Name	Kind	Class
Base	0..1	Association
Ends	0..n	AssociationEndRole

# Attribute

## XDE Domain

A feature within a Classifier that describes a range of values that instances of the Classifier may hold.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>TypeUsage>StructuralFeature>Attribute

### SubClasses of Attribute

This class has no subclasses.

### Properties Specific to Attribute

Properties	Inherited From
Aggregation	
CanonicalMultiplicity	StructuralFeature
Changeability	StructuralFeature
DefaultValueExpression	TypeUsage
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsByValueIfComposite	StructuralFeature
IsDerived	StructuralFeature
IsNavigable	StructuralFeature
IsSpecification	NamedModelElement
Label	Element
Multiplicity	StructuralFeature
Name	NamedModelElement
Ordering	StructuralFeature
OwnerScope	StructuralFeature
Persistence	
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TargetScope	StructuralFeature
TypeExpression	TypeUsage
TypeName	Element
Visibility	StructuralFeature

### Relationships Specific to Attribute

This class has no relationships.

# AttributeLink

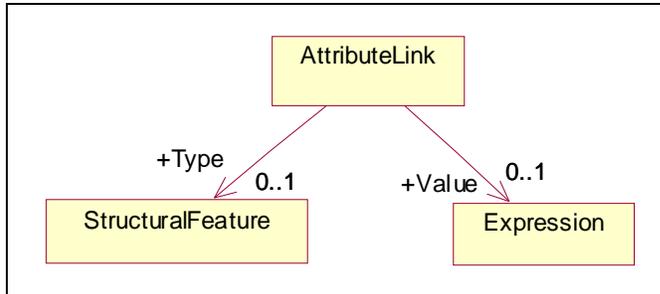

## XDE Domain

A piece of the state of an Instance and holds the value of an Attribute.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Instance>StructuralFeatureLink>AttributeLink

### SubClasses of AttributeLink

This class has no subclasses.

### Properties Specific to AttributeLink

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to AttributeLink

Name	Kind	Class
Type	0..1	StructuralFeature
Value	0..1	Expression

## AxItem

### XDE Domain

Represents an ActiveX object inserted into the model.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>AxItem

#### SubClasses of AxItem

This class has no subclasses.

#### Properties Specific to AxItem

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
ProgID	
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to AxItem

This class has no relationships.

## AxView

### XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>PositionalGeneralView>AxView

#### SubClasses of AxView

This class has no subclasses.

#### Properties Specific to AxView

Properties	Inherited From
BottomMargin	ContainerView
ExtentX	PositionalGeneralView
ExtentY	PositionalGeneralView
FactoryHint	View
GUID	Element
HideAllCompartmentItems	PositionalGeneralView
IsVisible	View
Label	Element
LayoutType	ContainerView
LeftMargin	ContainerView
MarginsAreAbsolute	ContainerView
PositionX	PositionalGeneralView
PositionY	PositionalGeneralView
RightMargin	ContainerView
StereotypeName	ExtensibleElement
TopMargin	ContainerView
TypeName	Element

#### Relationships Specific to AxView

This class has no relationships.

# Binding

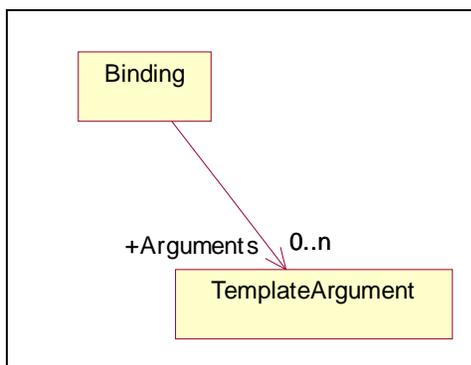

## XDE Domain

The creation of a model element from a template by supplying arguments for the parameters of the template. A dependency where the supplier is the template and the client is the instantiation of the template that performs the substitution of parameters of a template.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Binding

### SubClasses of Binding

This class has no subclasses.

### Properties Specific to Binding

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Binding

Name	Kind	Class
Arguments	0..n	TemplateArgument

# BooleanValue

## XDE Domain

The True or False result of a logical condition that provides the value for an instance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>SimpleValue>BooleanValue

### SubClasses of BooleanValue

This class has no subclasses.

### Properties Specific to BooleanValue

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Value	
ValueAsString	SimpleValue

### Relationships Specific to BooleanValue

This class has no relationships.

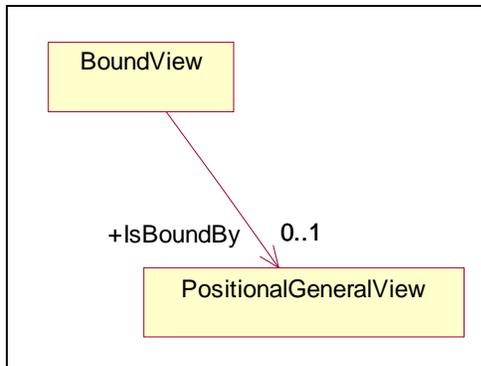

# BoundView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>PositionalGeneralView>BoundView

### SubClasses of BoundView

This class has no subclasses.

### Properties Specific to BoundView

Properties	Inherited From
BottomMargin	ContainerView
ExtentX	PositionalGeneralView
ExtentY	PositionalGeneralView
FactoryHint	View
FromEdge	
GUID	Element
HideAllCompartmentItems	PositionalGeneralView
IsPercentage	
IsVisible	View
Label	Element
LayoutType	ContainerView
LeftMargin	ContainerView
MarginsAreAbsolute	ContainerView
PositionX	PositionalGeneralView
PositionY	PositionalGeneralView
RightMargin	ContainerView
StereotypeName	ExtensibleElement
TopMargin	ContainerView
TypeName	Element

**Relationships Specific to BindView**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
IsBoundBy	0..1	PositionalGeneralView

## Call

### XDE Domain

A Usage dependency whose source is an operation and whose target is an operation. Specifies that the source operation or an operation in the source class invokes the target operation or an operation in the target class.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Usage>Call

#### SubClasses of Call

This class has no subclasses.

#### Properties Specific to Call

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Call

This class has no relationships.

# CallAction

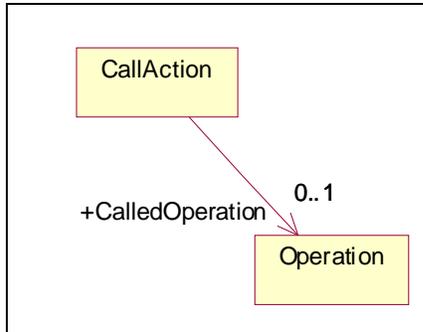

## XDE Domain

A call to an operation on an object. An action state that invokes an operation on a classifier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>CallAction

### SubClasses of CallAction

This class has no subclasses.

### Properties Specific to CallAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to CallAction

Name	Kind	Class
CalledOperation	0..1	Operation

# CallEvent

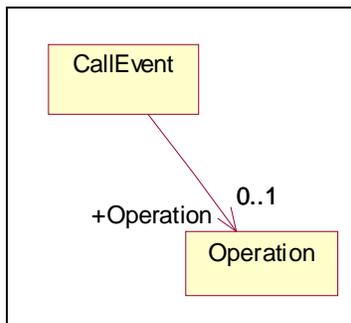

## XDE Domain

Represents the reception of a request to synchronously invoke a specific operation. The expected result is the execution of a sequence of actions which characterize the operation behavior at a particular state.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Event>CallEvent

### SubClasses of CallEvent

This class has no subclasses.

### Properties Specific to CallEvent

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to CallEvent

Name	Kind	Class
Operation	0..1	Operation

# ChangeEvent

## XDE Domain

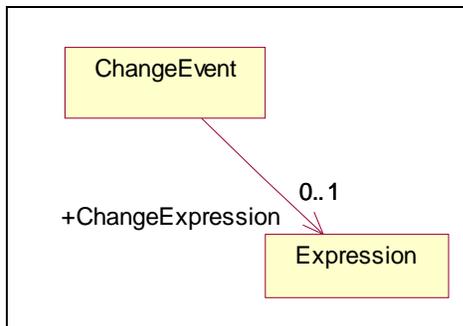

A change event models an event that occurs when an explicit boolean expression becomes true as a result of a change in value of one or more attributes or associations. A change event is raised implicitly and is not the result of some explicit change event action.

The event that is generated remains until it is consumed even if the boolean expression changes to false after that.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Event>ChangeEvent

### SubClasses of ChangeEvent

This class has no subclasses.

### Properties Specific to ChangeEvent

Properties	Inherited From
ChangeString	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ChangeEvent

Name	Kind	Class
ChangeExpression	0..1	Expression

# Class

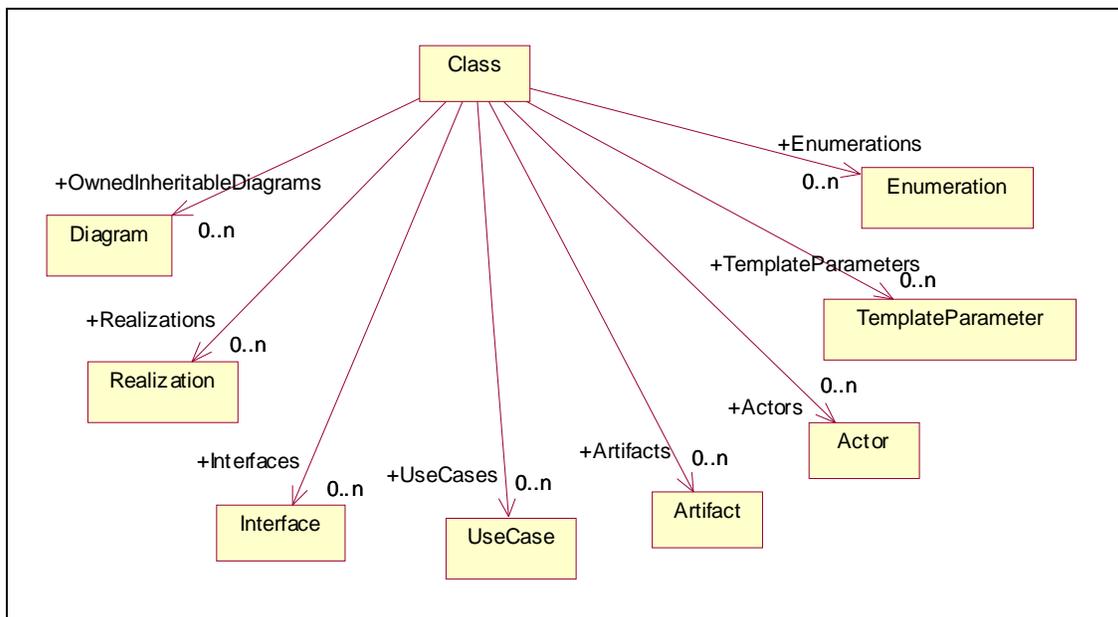

## XDE Domain

Classes are descriptions of sets of Objects that share the same Attributes, Operations, Methods, Relationships and semantics, and realize the same set of Interfaces.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>Class

### SubClasses of Class

This class has no subclasses.

### Properties Specific to Class

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
InheritStateMachines	
IsAbstract	Classifier
IsActive	
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement

<b>Properties</b>	<b>Inherited From</b>
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Class

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Actors	0..n	Actor
Artifacts	0..n	Artifact
Enumerations	0..n	Enumeration
Interfaces	0..n	Interface
OwnedInheritableDiagrams	0..n	Diagram
Realizations	0..n	Realization
TemplateParameters	0..n	TemplateParameter
UseCases	0..n	UseCase

# Classifier

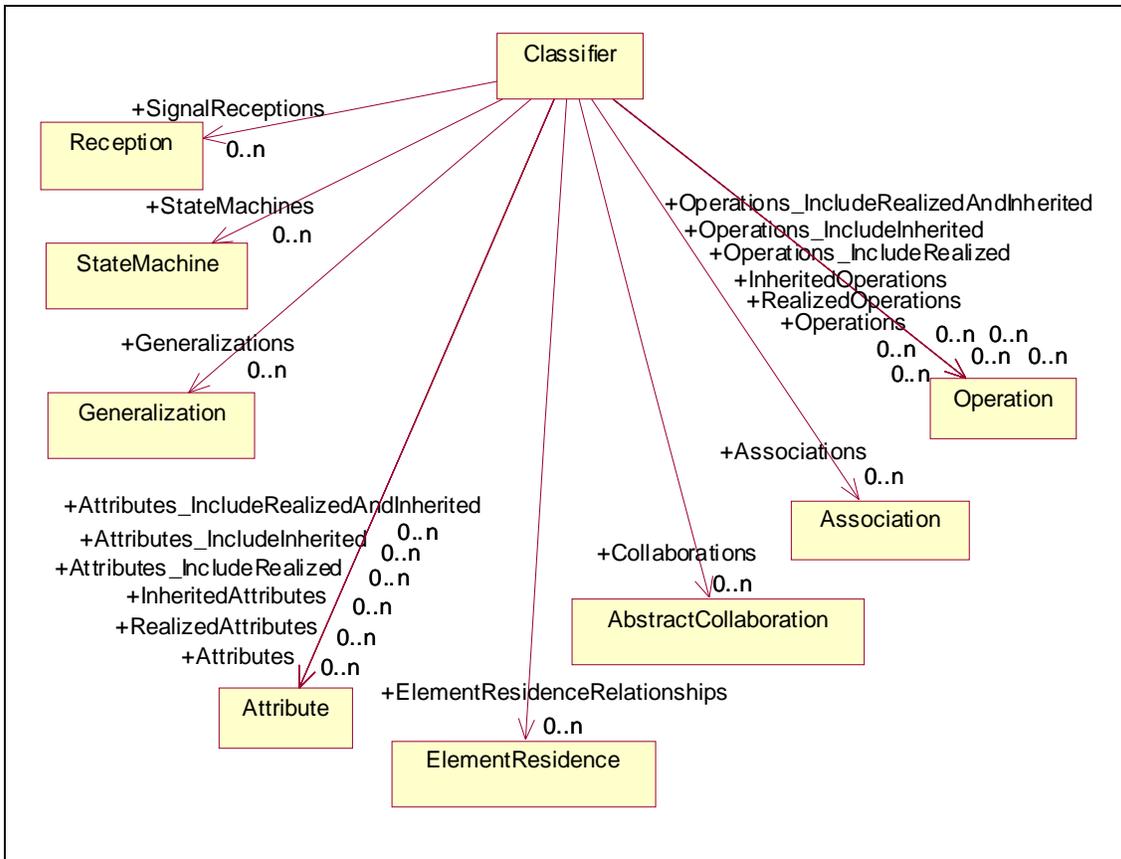

## XDE Domain

Classifier is an abstract type representing behavioral and structural elements, such as Classes, Interfaces, UseCases, Actors, Components. Classifiers may be generalized and may contain nested Classifiers.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier

### SubClasses of Classifier

- Actor
- Artifact
- Class
- Component
- DataType
- Interface
- Node
- Signal
- Subsystem
- UseCase

**Properties Specific to Classifier**

<b>Properties</b>	<b>Inherited From</b>
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	
IsLeaf	
IsRoot	
IsSpecification	NamedModelElement
Label	Element
Multiplicity	
Name	NamedModelElement
Persistence	
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	

**Relationships Specific to Classifier**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Associations	0..n	Association
Attributes	0..n	Attribute
Attributes_IncludeInherited	0..n	Attribute
Attributes_IncludeRealized	0..n	Attribute
Attributes_IncludeRealizedAndInherited	0..n	Attribute
Collaborations	0..n	AbstractCollaboration
ElementResidenceRelationships	0..n	ElementResidence
Generalizations	0..n	Generalization
InheritedAttributes	0..n	Attribute
InheritedOperations	0..n	Operation
Operations	0..n	Operation
Operations_IncludeInherited	0..n	Operation
Operations_IncludeRealized	0..n	Operation
Operations_IncludeRealizedAndInherited	0..n	Operation
RealizedAttributes	0..n	Attribute
RealizedOperations	0..n	Operation
SignalReceptions	0..n	Reception
StateMachines	0..n	StateMachine

# ClassifierRole

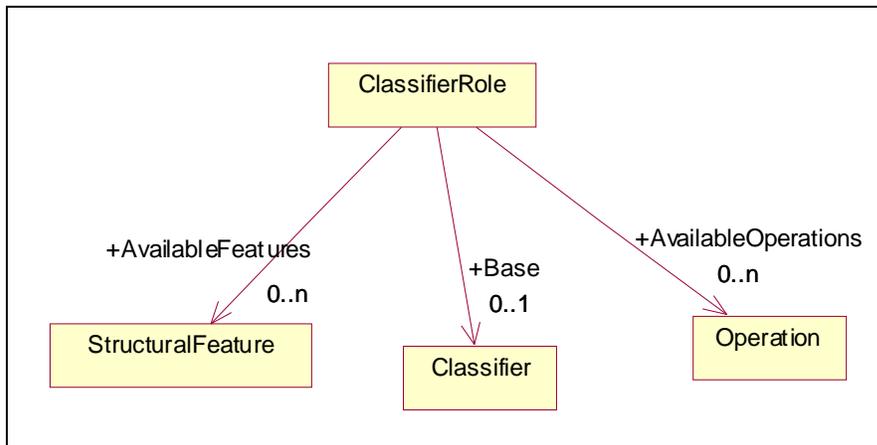

## XDE Domain

A ClassifierRole is a specific role played by a participant in a collaboration. It specifies a restricted view of a classifier, defined by what is required in the collaboration.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>ClassifierRole

### SubClasses of ClassifierRole

This class has no subclasses.

### Properties Specific to ClassifierRole

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Multiplicity	
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ClassifierRole

Name	Kind	Class
AvailableFeatures	0..n	StructuralFeature
AvailableOperations	0..n	Operation
Base	0..1	Classifier

# Collaboration

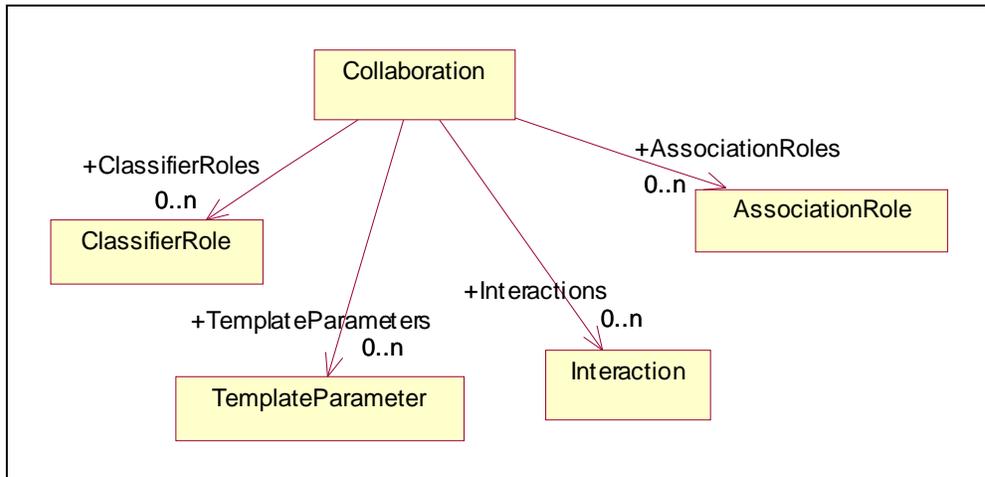

## XDE Domain

A Collaboration describes how an operation or a classifier is realized by a set of classifiers and associations used in a specific way. The collaboration defines an Interaction.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>AbstractCollaboration>Collaboration

### SubClasses of Collaboration

This class has no subclasses.

### Properties Specific to Collaboration

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Collaboration

Name	Kind	Class
AssociationRoles	0..n	AssociationRole
ClassifierRoles	0..n	ClassifierRole
Interactions	0..n	Interaction
TemplateParameters	0..n	TemplateParameter

# CollaborationInstance

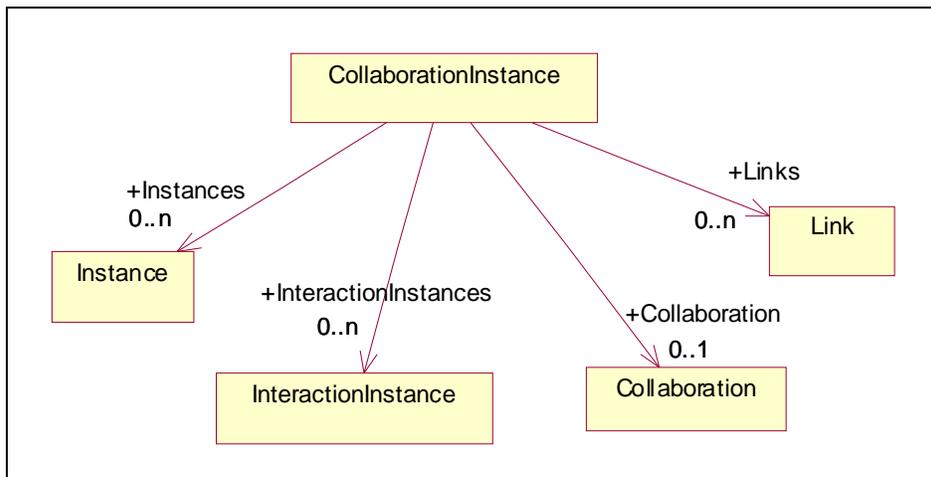

## XDE Domain

An instance of a Collaboration. A CollaborationInstance uses instances and links, not the roles of a collaboration.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>AbstractCollaboration>CollaborationInstance

### SubClasses of CollaborationInstance

This class has no subclasses.

### Properties Specific to CollaborationInstance

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to CollaborationInstance

Name	Kind	Class
Collaboration	0..1	Collaboration
Instances	0..n	Instance
InteractionInstances	0..n	InteractionInstance
Links	0..n	Link

# Communication

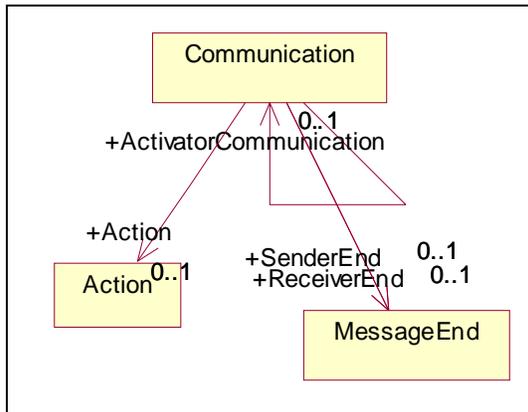

## XDE Domain

An abstract class that captures the commonality between Message and Stimulus.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Communication

### SubClasses of Communication

Message  
Stimulus

### Properties Specific to Communication

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Communication

Name	Kind	Class
Action	0..1	Action
ActivatorCommunication		Communication
ReceiverEnd	0..1	MessageEnd
SenderEnd	0..1	MessageEnd

# Component

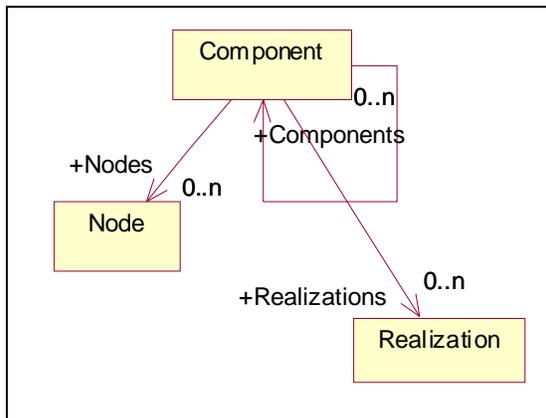

## XDE Domain

Components are physical, replaceable parts of a system that package implementation and provide Realization of a set of Interfaces. A component is a Classifier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>Component

### SubClasses of Component

This class has no subclasses.

### Properties Specific to Component

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Component

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Components		Component
Nodes	0..n	Node
Realizations	0..n	Realization

# ComponentInstance

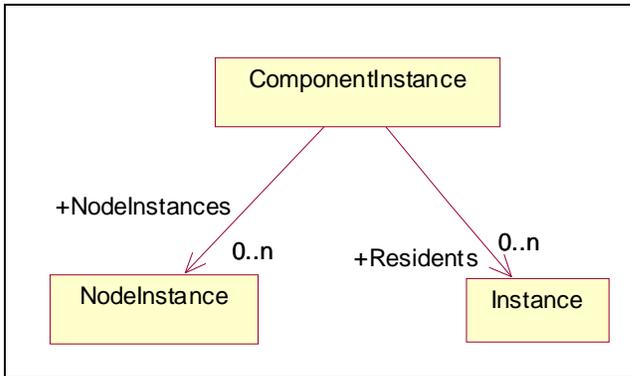

## XDE Domain

An Instance that originates from a Component. It may be associated with a set of Instances, and may reside on a NodeInstance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Instance>ComponentInstance

### SubClasses of ComponentInstance

This class has no subclasses.

### Properties Specific to ComponentInstance

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsActive	Instance
IsMultiInstanced	Instance
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Instance
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ComponentInstance

Name	Kind	Class
NodeInstances	0..n	NodeInstance
Residents	0..n	Instance

# CompositeState

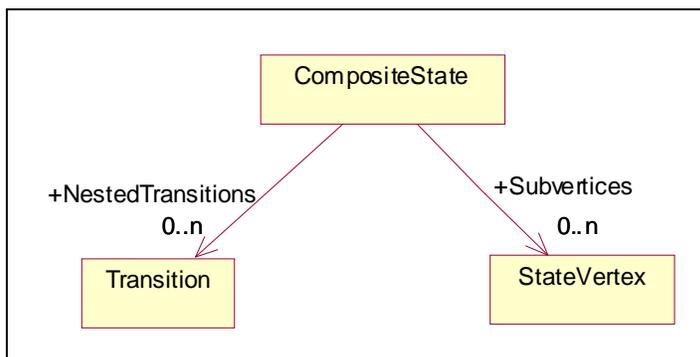

## XDE Domain

A state that consists of either concurrent substates or sequential substates. Any state enclosed within a composite state is called a substate of that composite state.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>State>CompositeState

### SubClasses of CompositeState

Activity

### Properties Specific to CompositeState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsConcurrent	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to CompositeState

Name	Kind	Class
NestedTransitions	0..n	Transition
Subvertices	0..n	StateVertex

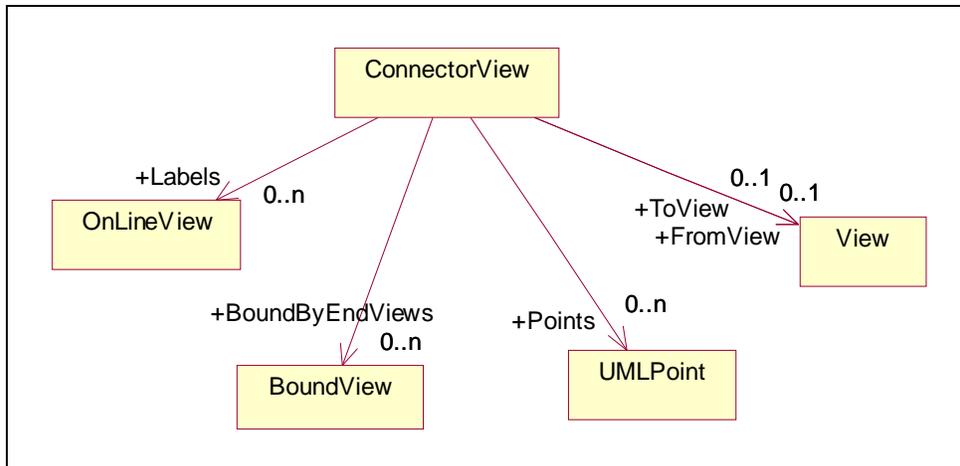

# ConnectorView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ConnectorView

### SubClasses of ConnectorView

This class has no subclasses.

### Properties Specific to ConnectorView

Properties	Inherited From
BendpointCount	
FactoryHint	View
GUID	Element
IsVisible	View
Label	Element
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ConnectorView

BoundByEndViews	0..n	BoundView
FromView	0..1	View
Labels	0..n	OnLineView
Points	0..n	UMLPoint
ToView	0..1	View

# Constrain

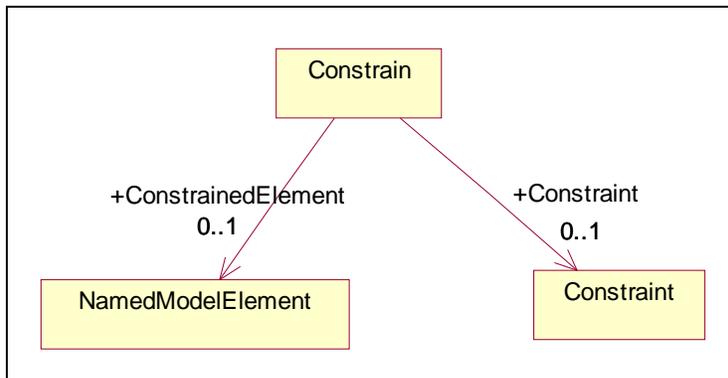

## XDE Domain

A relationship associated with a Constraint. A dependency connection is made from a ModelElement to its constraints.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>Constrain

### SubClasses of Constrain

This class has no subclasses.

### Properties Specific to Constrain

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Constrain

Name	Kind	Class
ConstrainedElement	0..1	NamedModelElement
Constraint	0..1	Constraint

# Constraint

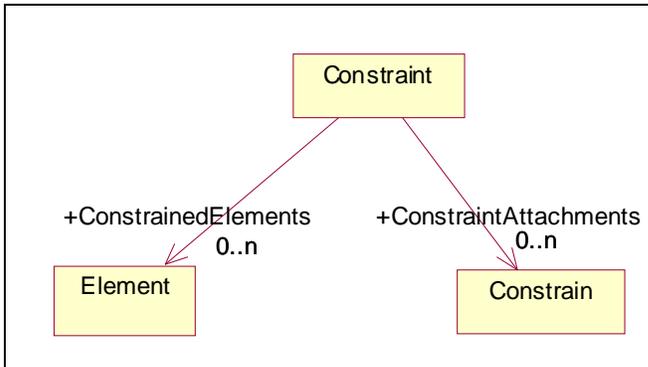

## XDE Domain

A semantic condition or restriction. A dependency connection is made from a ModelElement to its constraints.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Constraint

### SubClasses of Constraint

This class has no subclasses.

### Properties Specific to Constraint

Properties	Inherited From
Body	
BodyLanguage	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement

StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Constraint

Name	Kind	Class
ConstrainedElements	0..n	Element
ConstraintAttachments	0..n	Constrain

# ConsumerSupplierRelationship

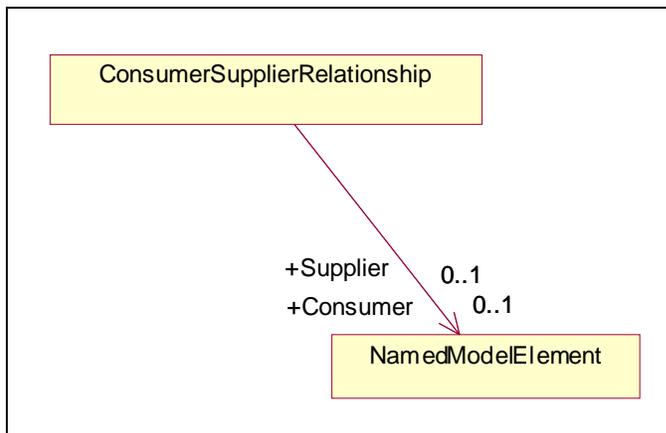

## XDE Domain

An abstract class for relationship subtypes between two NamedModelElements where one is the consumer and the other is the supplier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship

### SubClasses of ConsumerSupplierRelationship

- Dependency
- ElementResidence
- Generalization
- Realization
- TypeUsage

### Properties Specific to ConsumerSupplierRelationship

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

**Relationships Specific to ConsumerSupplierRelationship**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Consumer	0..1	NamedModelElement
Supplier	0..1	NamedModelElement

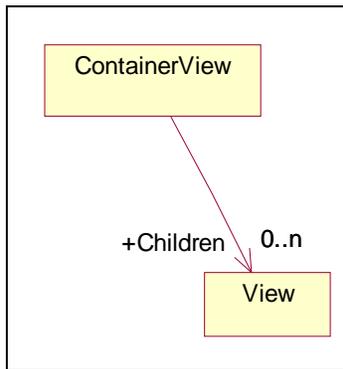

# ContainerView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView

### SubClasses of ContainerView

OnLineView  
 PositionalGeneralView  
 SubShapeView

### Properties Specific to ContainerView

Properties	Inherited From
BottomMargin	
FactoryHint	View
GUID	Element
IsVisible	View
Label	Element
LayoutType	
LeftMargin	
MarginsAreAbsolute	
RightMargin	
StereotypeName	ExtensibleElement
TopMargin	
TypeName	Element

### Relationships Specific to ContainerView

Name	Kind	Class
Children	0..n	View

# Coregion

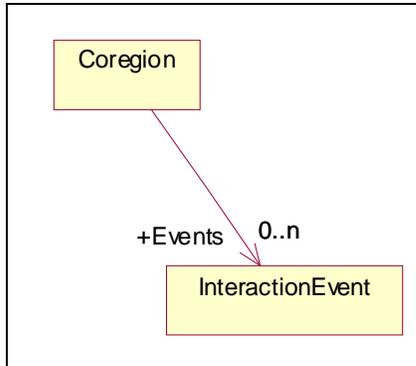

## XDE Domain

Specifies a collection of events on a lifeline that may occur in any order.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionEvent>Coregion

### SubClasses of Coregion

This class has no subclasses.

### Properties Specific to Coregion

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Coregion

Name	Kind	Class
Events	0..n	InteractionEvent

## Create

### XDE Domain

A Usage dependency denoting that the client classifier creates instances of the supplier classifier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Usage>Create

#### SubClasses of Create

This class has no subclasses.

#### Properties Specific to Create

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Create

This class has no relationships.

# CreateAction

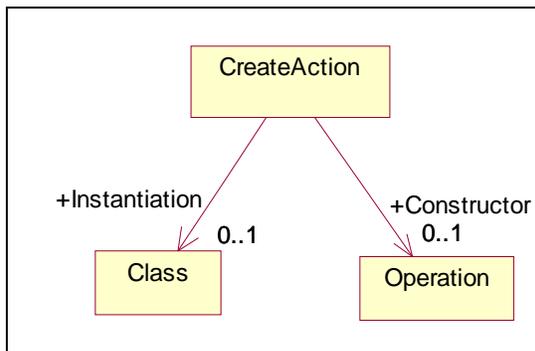

## XDE Domain

The instantiation and initialization of an object. An action in which an instance is created based on the definitions of the specified set of classifiers. CreateAction has a reference to a class and an optional class-scope operation with an argument list.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>CreateAction

### SubClasses of CreateAction

This class has no subclasses.

### Properties Specific to CreateAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to CreateAction

Name	Kind	Class
Constructor	0..1	Operation
Instantiation	0..1	Class

## Data Type

### XDE Domain

Defines a special kind of Classifier in which Operations are all pure functions (that is, they can return DataValues but they cannot change DataValues, because they have no identity). For example, an “add” operation on a number with another number as an argument yields a third number as a result; the target and argument are unchanged.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>DataType

### SubClasses of DataType

Enumeration

### Properties Specific to DataType

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to DataType

This class has no relationships.

# DataValue

## XDE Domain

DataValue is a child of Instance that cannot change its state (that is, all Operations that are applicable to it are pure functions or queries). DataValues are typically used as attribute values.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Instance>DataValue

### SubClasses of DataValue

This class has no subclasses.

### Properties Specific to DataValue

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsActive	Instance
IsMultiInstanced	Instance
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Instance
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to DataValue

This class has no relationships.

## Decision

### XDE Domain

A decision represents a specific location on an activity diagram or statechart diagram where the workflow may branch based upon guard conditions.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>Decision

#### SubClasses of Decision

This class has no subclasses.

#### Properties Specific to Decision

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Decision

This class has no relationships.

# Dependency

## XDE Domain

A dependency is a relationship between two NamedModelElements in which a change to one (the supplier) may affect the other (the client).

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency

### SubClasses of Dependency

- Abstraction
- Binding
- Permission
- Usage

### Properties Specific to Dependency

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Dependency

This class has no relationships.

## Deploy

### XDE Domain

A component deployed by a single node instance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>ElementResidence>Deploy

#### SubClasses of Deploy

This class has no subclasses.

#### Properties Specific to Deploy

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	ElementResidence

#### Relationships Specific to Deploy

This class has no relationships.

# DestroyAction

## XDE Domain

The destruction of a target object, together with all links involving it and all composite parts of it.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>DestroyAction

### SubClasses of DestroyAction

This class has no subclasses.

### Properties Specific to DestroyAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to DestroyAction

This class has no relationships.

# Diagram

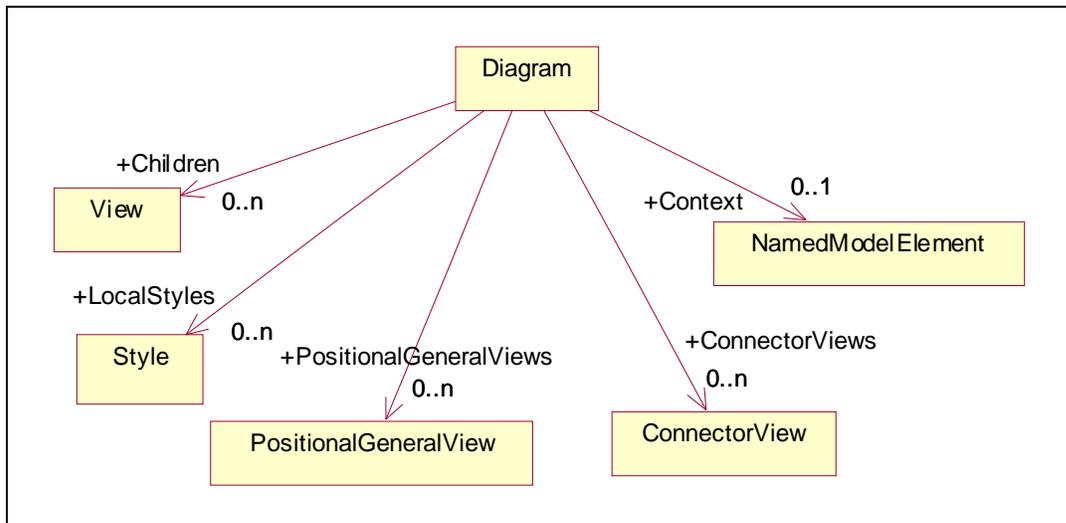

## XDE Domain

A graphical depiction of all or part of a model. A graphical presentation of a collection of model elements.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Diagram

### SubClasses of Diagram

This class has no subclasses.

### Properties Specific to Diagram

Properties	Inherited From
Description	NamedModelElement
ExtentX	
ExtentY	
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
OriginX	
OriginY	
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
Type	
TypeName	Element

**Relationships Specific to Diagram**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Children	0..n	View
ConnectorViews	0..n	ConnectorView

### Relationships Specific to DiagramView

This class has no relationships.

# DirectedRelationship

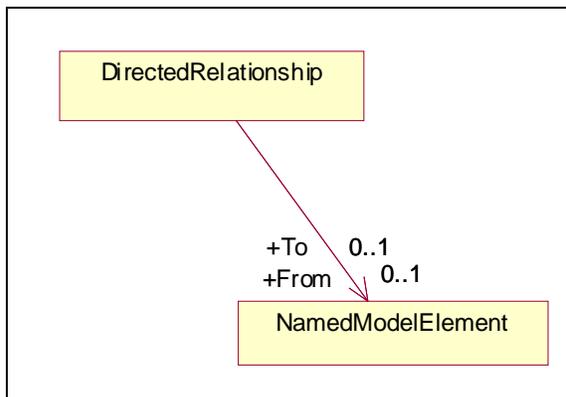

## XDE Domain

DirectedRelationship is an abstract type representing a Relationship from an owning consumer to a supplier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship

### SubClasses of DirectedRelationship

- ConsumerSupplierRelationship
- Extend
- Flow
- GeneralRelationship
- Include

### Properties Specific to DirectedRelationship

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to DirectedRelationship

Name	Kind	Class
From	0..1	NamedModelElement
To	0..1	NamedModelElement

# Element

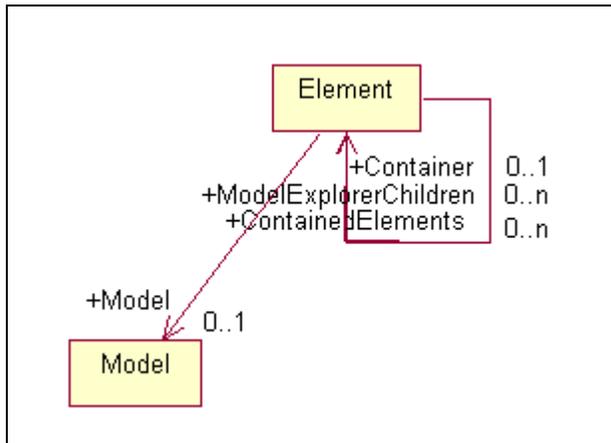

## XDE Domain

This top-level abstract interface in the modeling language hierarchy represents all model artifact types. Classes, TaggedValues, Stereotypes, Views, etc. are all Elements.

**Class Hierarchy:** Element

### SubClasses of Element

- Expression
- ExtensibleElement
- Profile
- TagDefinition
- TaggedValue
- TaggedValueLiteral
- TaggedValueSet
- Workspace

### Properties Specific to Element

Properties	Inherited From
GUID	
Label	
TypeName	

### Relationships Specific to Element

Name	Kind	Class
ContainedElements		Element
Container	0..1	Element
Model	0..1	Model
ModelExplorerChildren		Element

# ElementExport

## XDE Domain

ElementExport defines the visibility of a NamedModelElement contained in a Package outside that Package.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Permission>ElementExport

### SubClasses of ElementExport

This class has no subclasses.

### Properties Specific to ElementExport

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ElementExport

This class has no relationships.

# ElementImport

## XDE Domain

Implies access. Defines the visibility and alias of a model element included in the namespace within a package, as a result of the package importing another package. Import means that the elements don't have to be referred to by their fully qualified name, unless there is a name conflict. Can also be used for aliasing or renaming.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Permission>ElementImport

### SubClasses of ElementImport

This class has no subclasses.

### Properties Specific to ElementImport

Properties	Inherited From
Alias	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	

### Relationships Specific to ElementImport

This class has no relationships.

# ElementResidence

## XDE Domain

ElementResidence shows that the owning Component supports the Supplier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>ElementResidence

### SubClasses of ElementResidence

- Deploy
- Support

### Properties Specific to ElementResidence

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	

### Relationships Specific to ElementResidence

This class has no relationships.

# Enumeration

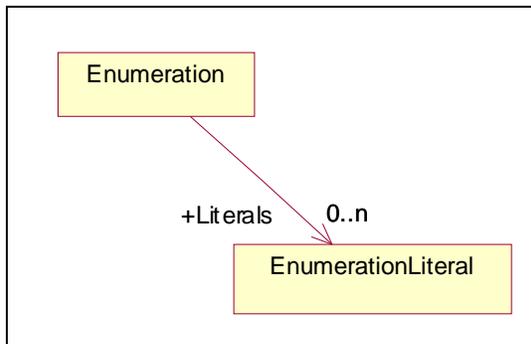

## XDE Domain

Defines a kind of DataType whose range is a list of predefined values, called enumeration literals.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>DataType>Enumeration

### SubClasses of Enumeration

This class has no subclasses.

### Properties Specific to Enumeration

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Enumeration

Name	Kind	Class
Literals	0..n	EnumerationLiteral

# EnumerationLiteral

## XDE Domain

An EnumerationLiteral defines an element of the run-time extension of an Enumeration data type. Enumeration literals can be copied, stored as values, and passed as arguments. The enumeration literals of a particular Enumeration datatype are ordered.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>EnumerationLiteral

### SubClasses of EnumerationLiteral

This class has no subclasses.

### Properties Specific to EnumerationLiteral

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Value	

### Relationships Specific to EnumerationLiteral

This class has no relationships.

# Event

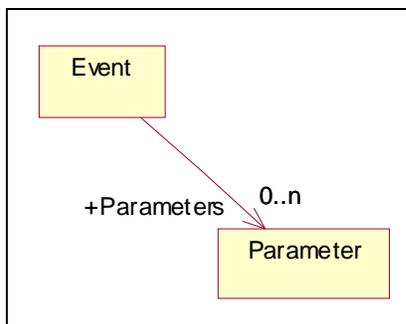

## XDE Domain

An abstract class for event subtypes. An event is an occurrence in a StateDiagram that can trigger a Transition.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Event

### SubClasses of Event

CallEvent  
 ChangeEvent  
 SignalEvent  
 TimeEvent

### Properties Specific to Event

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Event

Name	Kind	Class
Parameters	0..n	Parameter

# Expression

## XDE Domain

A string that evaluates to a value of a particular type.

**Class Hierarchy:** Element>Expression

### SubClasses of Expression

TypeExpression  
URL

### Properties Specific to Expression

Properties	Inherited From
ExpandedValue	
GUID	Element
Label	Element
RawExpression	
TypeName	Element

### Relationships Specific to Expression

This class has no relationships.

## Extend

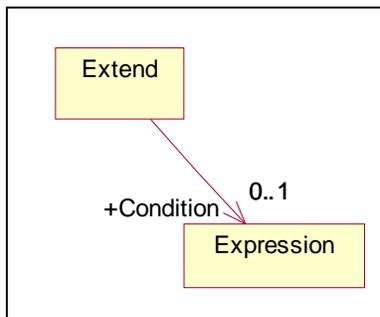

### XDE Domain

A relationship from an extension use case to a base use case, specifying how the behavior defined for the extension use case can be inserted into the behavior defined for the base use case.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>Extend

#### SubClasses of Extend

This class has no subclasses.

#### Properties Specific to Extend

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Extend

Name	Kind	Class
Condition	0..1	Expression

# ExtensibleElement

## XDE Domain

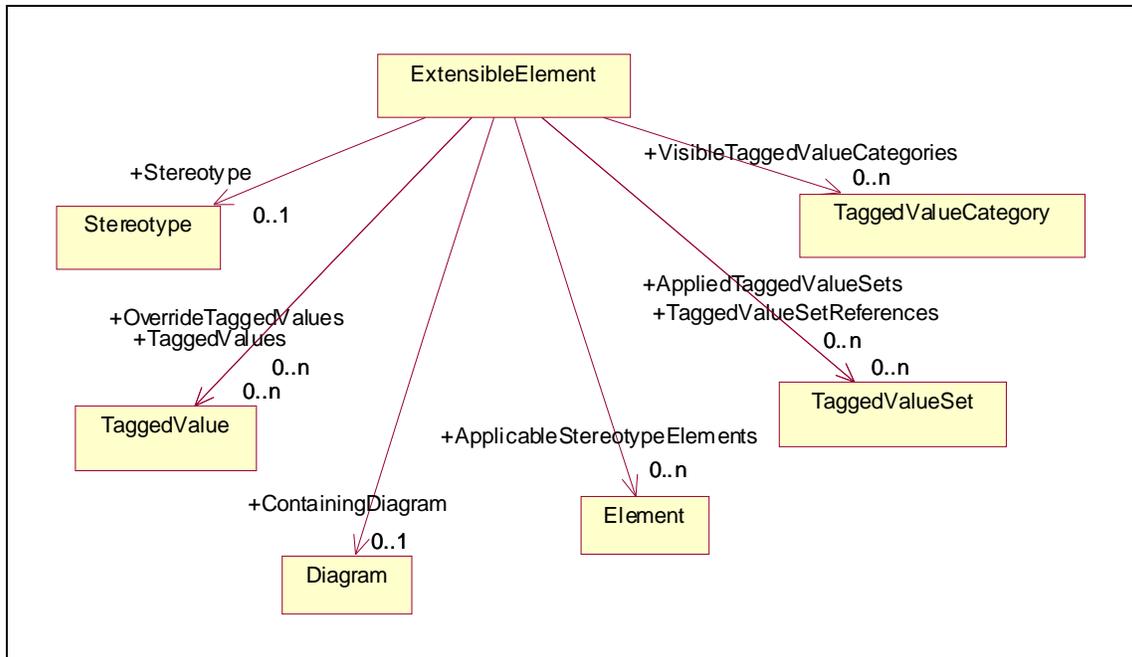

An abstract type subsuming all ModelElements and all Views. ExtensibleElements provides functionality for UML extensions, such as Stereotypes, TaggedValues and Styles.

Provides base level shared functionality and type values for model elements, views, profiles, styles, and stereotypes. The major classes that implement this abstract interface are ModelElement, View, and NameModelElement.

**Class Hierarchy:** Element>ExtensibleElement

### SubClasses of ExtensibleElement

- ModelElement
- View

### Properties Specific to ExtensibleElement

Properties	Inherited From
GUID	Element
Label	Element
StereotypeName	
TypeName	Element

**Relationships Specific to ExtensibleElement**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
ApplicableStereotypeElements	0..n	Element
AppliedTaggedValueSets	0..n	TaggedValueSet
ContainingDiagram	0..1	Diagram
OverrideTaggedValues	0..n	TaggedValue
Stereotype	0..1	Stereotype
TaggedValues	0..n	TaggedValue
TaggedValueSetReferences	0..n	TaggedValueSet
VisibleTaggedValueCategories	0..n	TaggedValueCategory

# FinalState

## XDE Domain

A special kind of state signifying that the enclosing composite state is completed. If the enclosing state is the top state, then it means that the entire state machine has completed. A final state cannot have any outgoing transitions.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>State>FinalState

### SubClasses of FinalState

This class has no subclasses.

### Properties Specific to FinalState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to FinalState

This class has no relationships.

# Flow

## XDE Domain

A Flow is a directed relationship from a source or sources to a target or targets.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>Flow

### SubClasses of Flow

This class has no subclasses.

### Properties Specific to Flow

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsConsumerSource	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Flow

This class has no relationships.

# ForkAction

## XDE Domain

Splits an incoming transition into several concurrent outgoing transitions. All of the transitions fire together.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>ForkAction

### SubClasses of ForkAction

This class has no subclasses.

### Properties Specific to ForkAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to ForkAction

This class has no relationships.

# FriendPermission

## XDE Domain

FriendPermission is a permission dependency that grants the target access to the source regardless of the declared visibility.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Permission>FriendPermission

### SubClasses of FriendPermission

This class has no subclasses.

### Properties Specific to FriendPermission

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to FriendPermission

This class has no relationships.

# FriendUsage

## XDE Domain

FriendUsage is a usage dependency that declares that the source is using the target without regard to its declared visibility.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Usage>FriendUsage

### SubClasses of FriendUsage

This class has no subclasses.

### Properties Specific to FriendUsage

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to FriendUsage

This class has no relationships.

# Generalization

## XDE Domain

An inheritance relationship between a more general element and a more specific element.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Generalization

### SubClasses of Generalization

This class has no subclasses.

### Properties Specific to Generalization

Properties	Inherited From
Description	NamedModelElement
Discriminator	
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	

### Relationships Specific to Generalization

This class has no relationships.

# GeneralRelationship

## XDE Domain

A general relationship is a non-UML relationship that is denoted on a diagram by a general connector. Typically at least one of the elements it relates is non-UML.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>GeneralRelationship

### SubClasses of GeneralRelationship

This class has no subclasses.

### Properties Specific to GeneralRelationship

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to GeneralRelationship

This class has no relationships.

# GroupView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>PositionalGeneralView>GroupView

### SubClasses of GroupView

This class has no subclasses.

### Properties Specific to GroupView

Properties	Inherited From
BottomMargin	ContainerView
ExtentX	PositionalGeneralView
ExtentY	PositionalGeneralView
FactoryHint	View
GUID	Element
HideAllCompartmentItems	PositionalGeneralView
IsVisible	View
Label	Element
LayoutType	ContainerView
LeftMargin	ContainerView
MarginsAreAbsolute	ContainerView
PositionX	PositionalGeneralView
PositionY	PositionalGeneralView
RightMargin	ContainerView
StereotypeName	ExtensibleElement
TopMargin	ContainerView
TypeName	Element

### Relationships Specific to GroupView

This class has no relationships.

# Import

## XDE Domain

Import is a permission dependency between two Packages denoting that the public contents of the target Package are added to the namespace of the source Package.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Permission>Import

### SubClasses of Import

This class has no subclasses.

### Properties Specific to Import

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Import

This class has no relationships.

## Include

### XDE Domain

Use-case include relationship

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>Include

#### SubClasses of Include

This class has no subclasses.

#### Properties Specific to Include

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Include

This class has no relationships.

# InitialState

## XDE Domain

The default target of a transition to the enclosing composite state.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>InitialState

### SubClasses of InitialState

This class has no subclasses.

### Properties Specific to InitialState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to InitialState

This class has no relationships.

# Instance

## XDE Domain

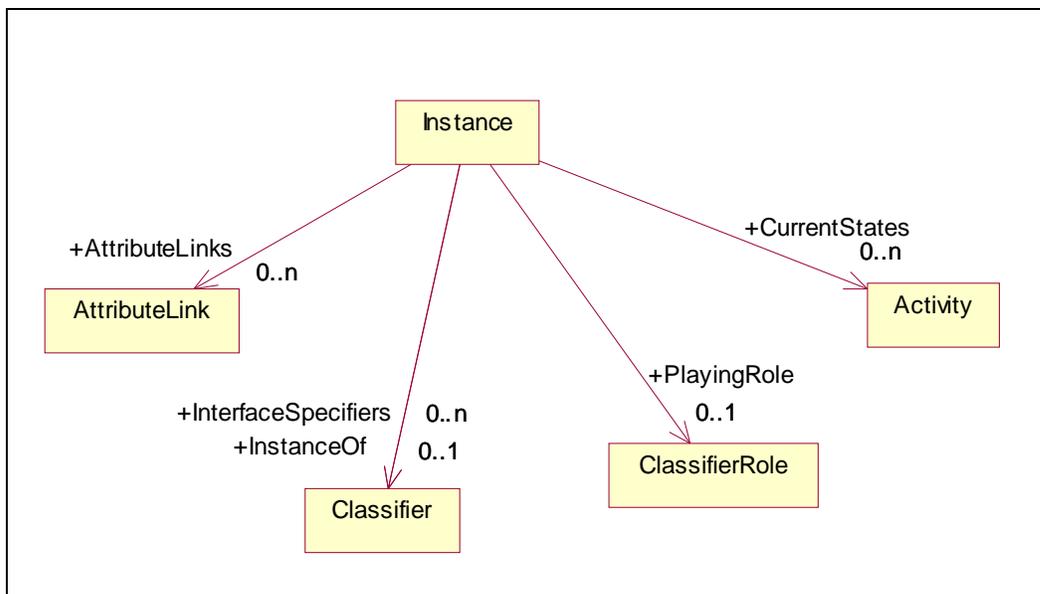

Defines an entity to which a set of operations can be applied and which has a state that stores the effects of the operations.

Instance is connected to at least one Classifier which declares its structure and behavior. It has a set of attribute values and is connected to a set of Links, both sets matching the definitions of its Classifiers. The two sets implement the current state of the Instance. An Instance may also own other Instances or Links.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Instance

### SubClasses of Instance

- ComponentInstance
- DataValue
- NodeInstance
- SubsystemInstance
- UMLObject

### Properties Specific to Instance

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsActive	
IsMultinstanted	
IsSpecification	NamedModelElement
Label	Element

<b>Properties</b>	<b>Inherited From</b>
Multiplicity	
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Instance

<b>Name</b>	<b>Kind</b>	<b>Class</b>
AttributeLinks	0..n	AttributeLink
CurrentStates	0..n	Activity
InstanceOf	0..1	Classifier
InterfaceSpecifiers	0..n	Classifier
PlayingRole	0..1	ClassifierRole

# Instantiate

## XDE Domain

A Usage dependency among classifiers indicating that operations on the client create instances of the supplier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Usage>Instantiate

### SubClasses of Instantiate

This class has no subclasses.

### Properties Specific to Instantiate

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Instantiate

This class has no relationships.

# IntegerValue

## XDE Domain

The integer value that provides the value for an instance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>SimpleValue>IntegerValue

### SubClasses of IntegerValue

This class has no subclasses.

### Properties Specific to IntegerValue

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Value	
ValueAsString	SimpleValue

### Relationships Specific to IntegerValue

This class has no relationships.

# Interaction

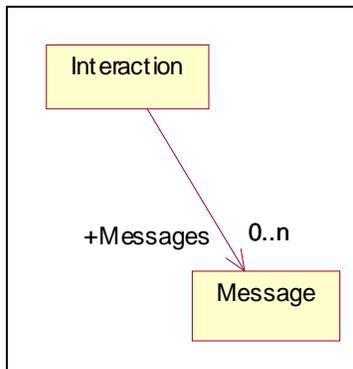

## XDE Domain

Specifies the communication between a set of instances conforming to the classifier roles of the owning collaboration.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionSpec>Interaction

### SubClasses of Interaction

This class has no subclasses.

### Properties Specific to Interaction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Interaction

Name	Kind	Class
Messages	0..n	Message

# InteractionEvent

## XDE Domain

An abstract class that serves as the common parent for the various types of events that can appear on a lifeline.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionEvent

### SubClasses of InteractionEvent

- Coregion
- LocalAction
- LocalState
- MessageEnd
- SingleLifelineEvent

### Properties Specific to InteractionEvent

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to InteractionEvent

This class has no relationships.

# InteractionInstance

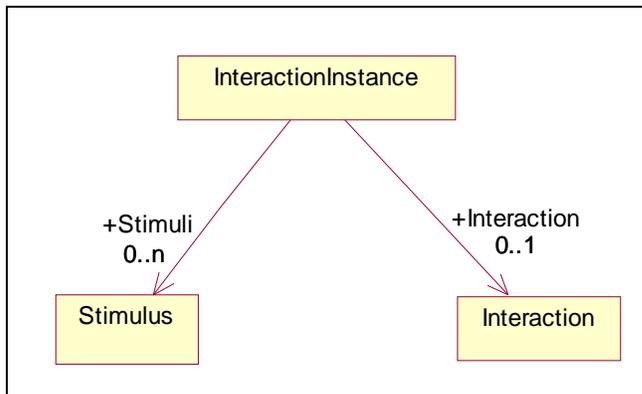

## XDE Domain

A InteractionInstance is an instance of an Interaction.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionSpec>InteractionInstance

### SubClasses of InteractionInstance

This class has no subclasses.

### Properties Specific to InteractionInstance

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to InteractionInstance

Name	Kind	Class
Interaction	0..1	Interaction
Stimuli	0..n	Stimulus

# InteractionSpec

## XDE Domain

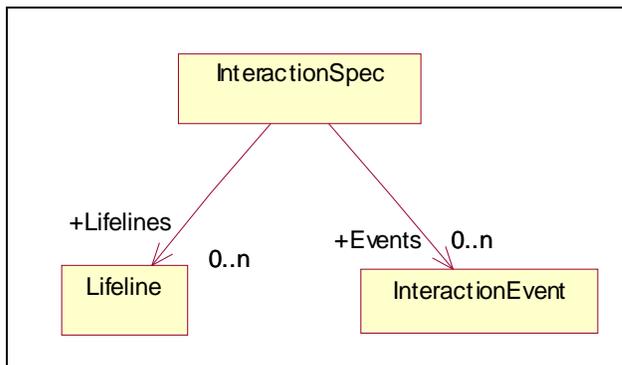

This abstract class captures the commonality between Interaction and InteractionInstance.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionSpec

### SubClasses of InteractionSpec

Interaction  
InteractionInstance

### Properties Specific to InteractionSpec

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to InteractionSpec

Name	Kind	Class
Events	0..n	InteractionEvent
Lifelines	0..n	Lifeline

# Interface

## XDE Domain

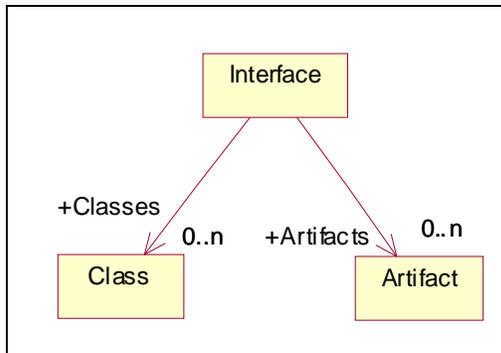

An Interface is a Classifier containing operations that characterize the behavior of an element.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>Interface

### SubClasses of Interface

This class has no subclasses.

### Properties Specific to Interface

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Interface

Name	Kind	Class
Artifacts	0..n	Artifact
Classes	0..n	Class

# JoinAction

## XDE Domain

Merges transitions from concurrent regions into a single outgoing transition. All the transitions fire together.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Action>JoinAction

### SubClasses of JoinAction

This class has no subclasses.

### Properties Specific to JoinAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to JoinAction

This class has no relationships.

# Lifeline

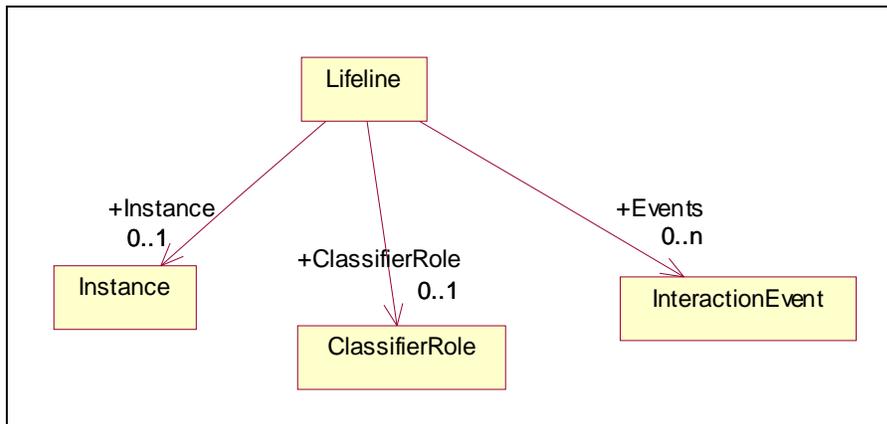

## XDE Domain

Represents a classifier role (or instance) in the containing collaboration (or collaboration instance). Is responsible for remembering the order of events on the Lifeline (i.e. the order or message sends, message receives, etc).

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Lifeline

### SubClasses of Lifeline

This class has no subclasses.

### Properties Specific to Lifeline

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Lifeline

Name	Kind	Class
ClassifierRole	0..1	ClassifierRole
Events	0..n	InteractionEvent
Instance	0..1	Instance

# Link

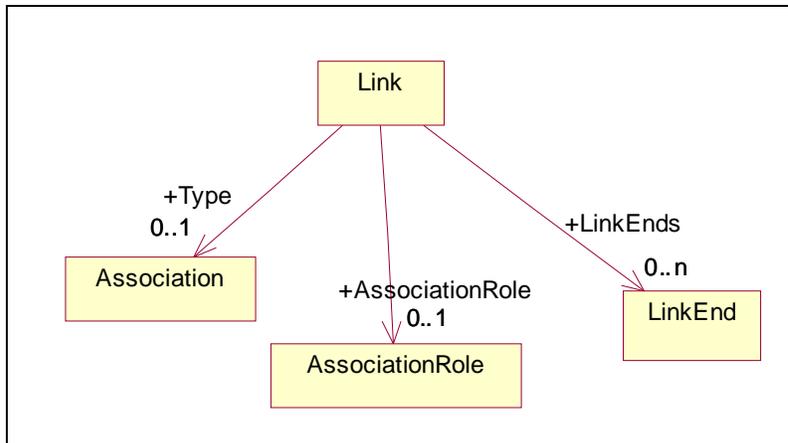

## XDE Domain

Objects interact through their links to other objects. A link is an instance of an association, in the same way that an object is an instance of a class.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Link

### SubClasses of Link

This class has no subclasses.

### Properties Specific to Link

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Link

Name	Kind	Class
AssociationRole	0..1	AssociationRole
LinkEnds	0..n	LinkEnd
Type	0..1	Association

## LinkEnd

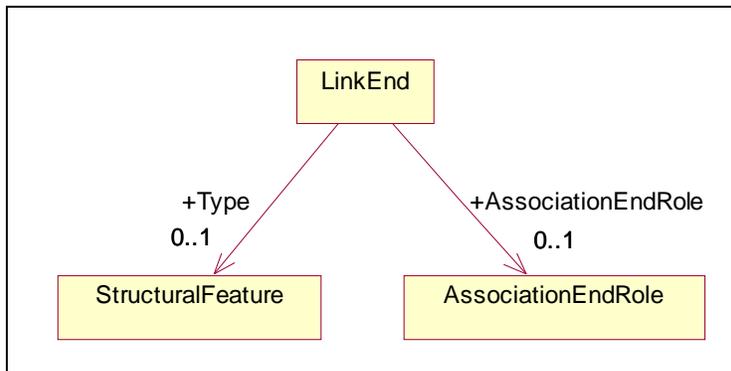

### XDE Domain

An end point of a link. Corresponds to an AssociationEnd of the Link's Association.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Instance>StructuralFeatureLink>LinkEnd

#### SubClasses of LinkEnd

This class has no subclasses.

#### Properties Specific to LinkEnd

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to LinkEnd

Name	Kind	Class
AssociationEndRole	0..1	AssociationEndRole
Type	0..1	StructuralFeature

# ListCompartmentView

## XDE Domain

A ListCompartmentView is used for either a classic compartment such as an attribute compartment or for a group of list items such as a group of attributes in an attribute compartment that share the same stereotype.

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>SubShapeView>ListCompartmentView

### SubClasses of ListCompartmentView

This class has no subclasses.

### Properties Specific to ListCompartmentView

Properties	Inherited From
BottomMargin	ContainerView
ColumnNo	SubShapeView
ExtentX	SubShapeView
ExtentY	SubShapeView
FactoryHint	View
Gravity	SubShapeView
GUID	Element
HeightRatio	
HorizontalFill	SubShapeView
IsVisible	View
Label	Element
LayoutType	ContainerView
LeftMargin	ContainerView
MarginsAreAbsolute	ContainerView
OverrideHeight	
RightMargin	ContainerView
RowNo	SubShapeView
StereotypeName	ExtensibleElement
TopMargin	ContainerView
TypeName	Element
VerticalFill	SubShapeView

### Relationships Specific to ListCompartmentView

This class has no relationships.

# ListElementView

XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ListElementView

## SubClasses of ListElementView

This class has no subclasses.

## Properties Specific to ListElementView

<b>Properties</b>	<b>Inherited From</b>
FactoryHint	View
GUID	Element
IsVisible	View
Label	Element
StereotypeName	ExtensibleElement
TypeName	Element

## Relationships Specific to ListElementView

This class has no relationships.

# LocalAction

## XDE Domain

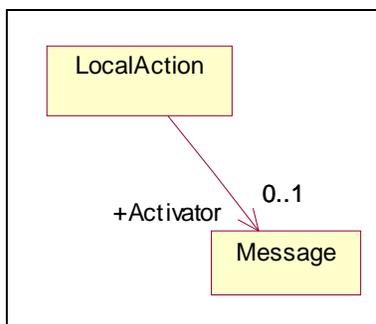

An event on a Lifeline that represents a non-message action. Typically, this is used to put a block of pseudo-code or real code on the Lifeline to indicate the detailed action or calculation that is done at this point.

The most common Action subclass to use as part of a LocalAction is UninterpretedAction (such as, a simple text holder).

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionEvent>LocalAction

### SubClasses of LocalAction

This class has no subclasses.

### Properties Specific to LocalAction

Properties	Inherited From
Action	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to LocalAction

Name	Kind	Class
Activator	0..1	Message

# LocalState

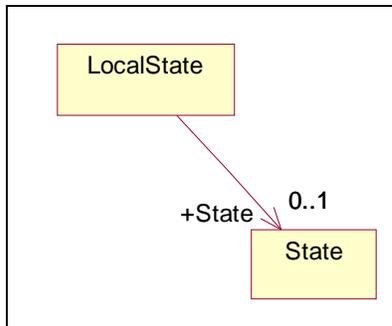

## XDE Domain

A LocalState is an event that represents the current state for the lifeline(s) it is attached to.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionEvent>LocalState

### SubClasses of LocalState

This class has no subclasses.

### Properties Specific to LocalState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to LocalState

Name	Kind	Class
State	0..1	State

# Message

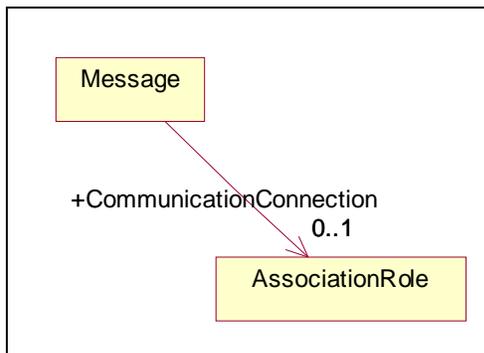

## XDE Domain

Defines the communication between instances in an interaction. A message defines a particular communication between instances conforming to the classifier roles that are specified in an interaction.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Communication>Message

### SubClasses of Message

This class has no subclasses.

### Properties Specific to Message

Properties	Inherited From
Delay	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Message

Name	Kind	Class
CommunicationConnection	0..1	AssociationRole

# MessageEnd

## XDE Domain

A MessageEnd is one end of a message in an interaction. A MessageEnd may be attached to either a Lifeline or an interaction reference.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionEvent>MessageEnd

### SubClasses of MessageEnd

This class has no subclasses.

### Properties Specific to MessageEnd

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to MessageEnd

This class has no relationships.

# Model

## XDE Domain

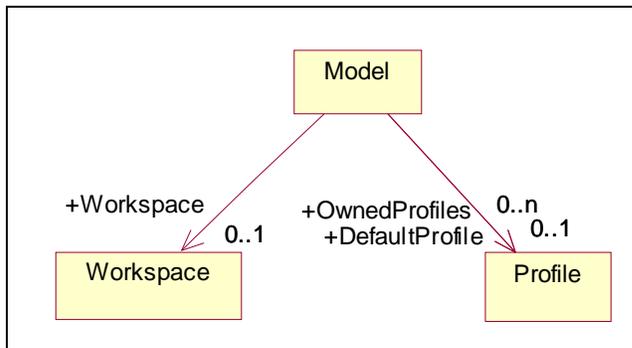

A model is a semantically complete abstraction of a system. It is also the topmost package in the hierarchy of packages. Captures a view of the physical system.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Package>Model

### SubClasses of Model

This class has no subclasses.

### Properties Specific to Model

Properties	Inherited From
AppliedProfiles	
AssociationPolicy	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
IsTopLevel	Package
Kind	
Label	Element
Name	NamedModelElement
Path	
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Model

Name	Kind	Class
DefaultProfile	0..1	Profile
OwnedProfiles	0..n	Profile
Workspace	0..1	Workspace

# ModelElement

## XDE Domain

An abstract type subsuming all NamedModelElements. Represents model elements as opposed to diagram views of model elements. Distinguishes model elements from view elements.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement

### SubClasses of ModelElement

NamedModelElement

TemplateArgument

### Properties Specific to ModelElement

<b>Properties</b>	<b>Inherited From</b>
GUID	Element
Label	Element
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ModelElement

This class has no relationships.

# NameCompartmentView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>SubShapeView>NameCompartmentView

### SubClasses of NameCompartmentView

This class has no subclasses.

### Properties Specific to NameCompartmentView

Properties	Inherited From
BottomMargin	ContainerView
ColumnNo	SubShapeView
ExtentX	SubShapeView
ExtentY	SubShapeView
FactoryHint	View
Gravity	SubShapeView
GUID	Element
HorizontalFill	SubShapeView
IsVisible	View

RowNo	SubShapeView
StereotypeName	ExtensibleElement
TopMargin	ContainerView
TypeName	Element
VerticalFill	SubShapeView

### Relationships Specific to NameCompartmentView

This class has no relationships.

# NamedModelElement

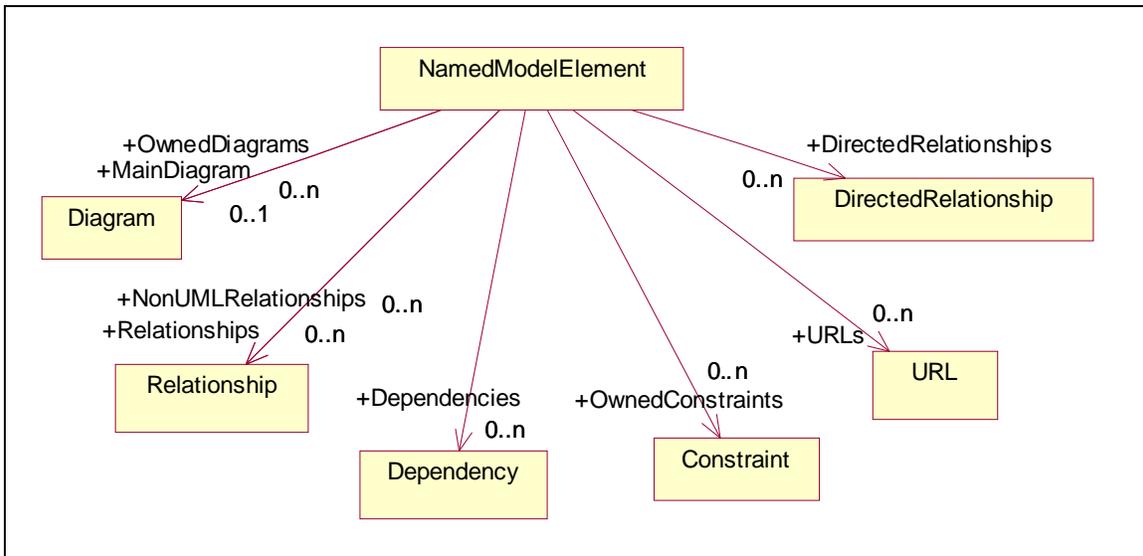

## XDE Domain

An abstract type that represents model elements with semantics as opposed to model elements that adorn and extend. NamedModelElements have a Name and a Description. They can also be involved in Relationships, although only certain Relationships between certain NamedModelElement subtypes are valid UML constructs.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement

### SubClasses of NamedModelElement

- AbstractCollaboration
- Action
- Argument
- AssociationEndRole
- AxItem
- ClassifierRole
- Communication
- Constraint

TypeName	Element

### Relationships Specific to OnLineView

This class has no relationships.

# Operation

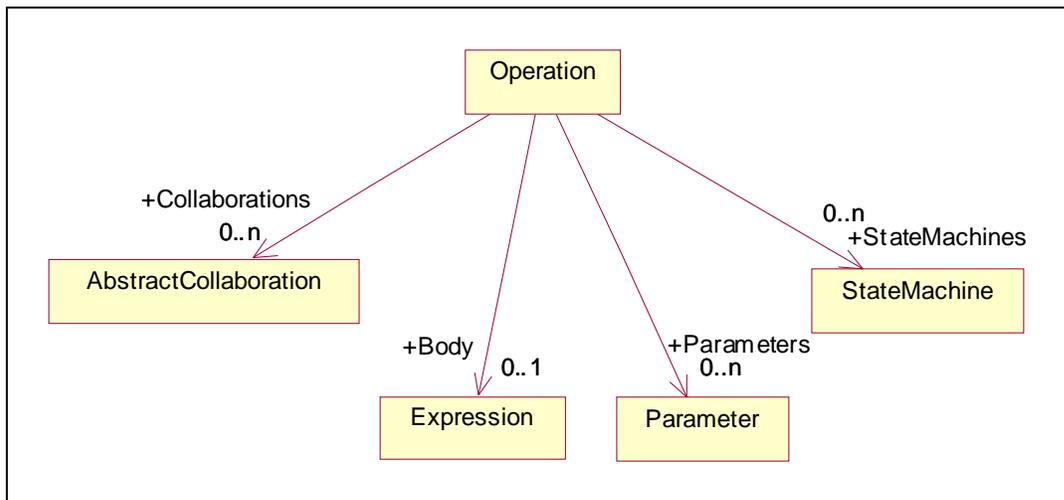

## XDE Domain

Operations are services that can be requested from an Object, affecting behavior. Operations have Signatures, which describe the actual Parameters that are possible (including possible return values).

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Operation

### SubClasses of Operation

This class has no subclasses.

### Properties Specific to Operation

Properties	Inherited From
Concurrency	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element

Subsystems	0..n	Subsystem
UseCases	0..n	UseCase

# Parameter

## XDE Domain

Parameters are unbound values that can be changed, passed or returned. A Parameter may include a name, type and direction of communication. Parameters are used in the specification of Operations, Messages, Events, and Templates.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>TypeUsage>Parameter

### SubClasses of Parameter

This class has no subclasses.

### Properties Specific to Parameter

Properties	Inherited From
DefaultValueExpression	TypeUsage
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Kind	
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeExpression	TypeUsage
TypeName	Element

### Relationships Specific to Parameter

This class has no relationships.

# Partition

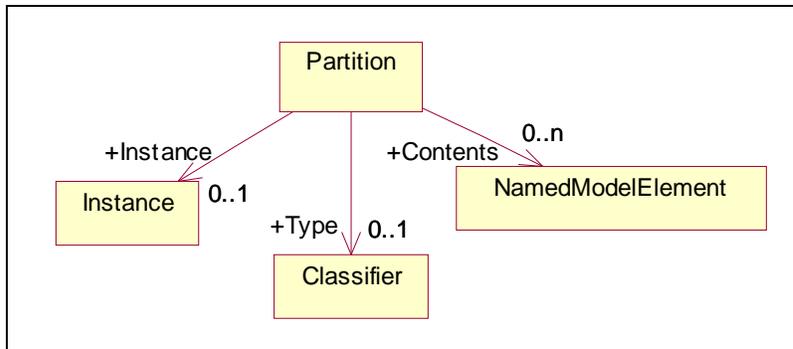

## XDE Domain

A mechanism for dividing the states of an activity graph into groups. Represents a vertical slice through an architecture, whereas a layer represents a horizontal slice.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Partition

### SubClasses of Partition

This class has no subclasses.

### Properties Specific to Partition

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Partition

Name	Kind	Class
Contents	0..n	NamedModelElement
Instance	0..1	Instance
Type	0..1	Classifier

# Permission

## XDE Domain

Access control; specification time. A dependency between a client ModelElement and a supplier ModelElement.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Permission

### SubClasses of Permission

- Access
- ElementExport
- ElementImport
- FriendPermission
- Import

### Properties Specific to Permission

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Permission

This class has no relationships.

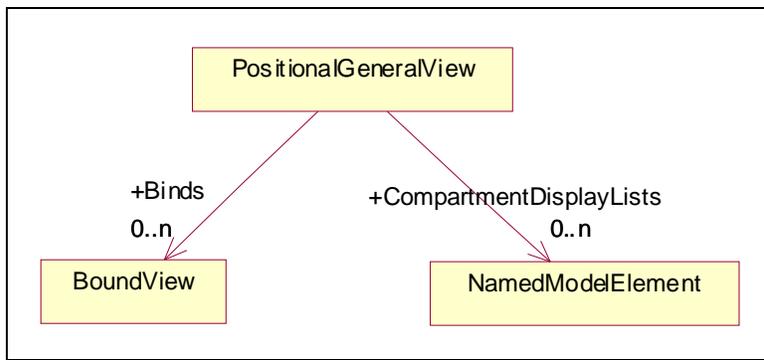

# PositionalGeneralView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>PositionalGeneralView

### SubClasses of PositionalGeneralView

AxView  
 BoundView  
 DiagramView  
 GroupView  
 SwimmingPoolView

### Properties Specific to PositionalGeneralView

Properties	Inherited From
BottomMargin	ContainerView
ExtentX	
ExtentY

**Relationships Specific to PositionalGeneralView**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Binds	0..n	BoundView
CompartmentDisplayLists	0..n	NamedModelElement

# Profile

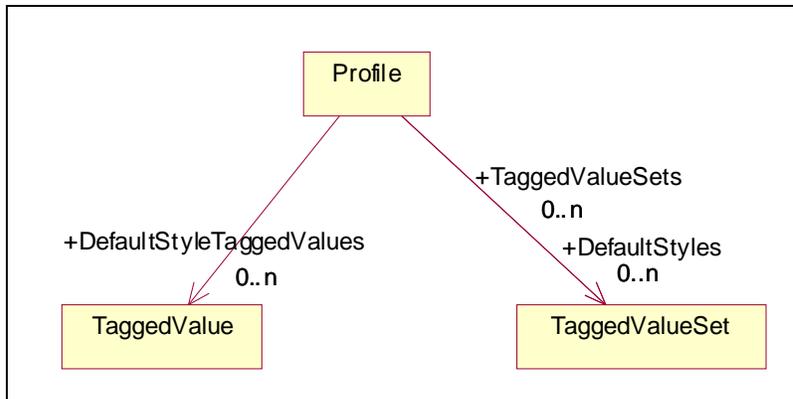

## XDE Domain

Provides information to a model about tagged value sets, stereotypes, and default styles. Models own profiles and can also import profiles from other models.

**Class Hierarchy:** Element>Profile

### SubClasses of Profile

This class has no subclasses.

### Properties Specific to Profile

Properties	Inherited From
Description	
GUID	Element
IsDefault	
IsUniversal	
Label	Element
Name	
ResourceFileName	
TypeName	Element

### Relationships Specific to Profile

Name	Kind	Class
DefaultStyles	0..n	TaggedValueSet
DefaultStyleTaggedValues	0..n	TaggedValue
TaggedValueSets	0..n	TaggedValueSet

# ProxyState

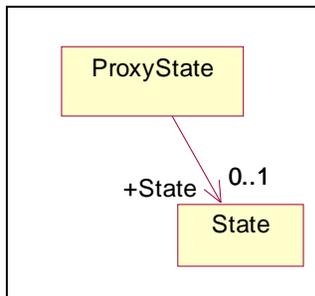

## XDE Domain

A reference to another model element in a different area of the model or within a different state machine or activity graph.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>ProxyState

### SubClasses of ProxyState

This class has no subclasses.

### Properties Specific to ProxyState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to ProxyState

Name	Kind	Class
State	0..1	State

# PseudoState

## XDE Domain

A pseudostate is an abstraction that encompasses different types of transient vertices in the state machine graph. They are used, typically, to connect multiple transitions into more complex state transitions paths. The kinds of PseudoStates are: initial, deepHistory, shallowHistory, join, fork, junction, and choice.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>PseudoState

### SubClasses of PseudoState

This class has no subclasses.

### Properties Specific to PseudoState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Kind	
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to PseudoState

This class has no relationships.

# Realization

## XDE Domain

Realizations are DirectedRelationships from one NamedModelElement to another, in which the consumer is the implementation of the specification inherent in the supplier. A realization specifies inheritance of behavior without the inheritance of structure.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Realization

### SubClasses of Realization

This class has no subclasses.

### Properties Specific to Realization

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Realization

This class has no relationships.

# RealValue

## XDE Domain

The real number that provides the value for an instance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>SimpleValue>RealValue

### SubClasses of RealValue

This class has no subclasses.

### Properties Specific to RealValue

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Value	
ValueAsString	SimpleValue

### Relationships Specific to RealValue

This class has no relationships.

# Reception

## XDE Domain

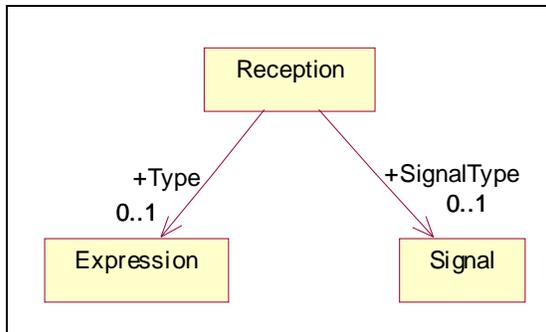

A declaration that a classifier is prepared to react to the receipt of a signal.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Reception

### SubClasses of Reception

This class has no subclasses.

### Properties Specific to Reception

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsPolymorphic	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Specification	
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Reception

Name	Kind	Class
SignalType	0..1	Signal
Type	0..1	Expression

# Relationship

## XDE Domain

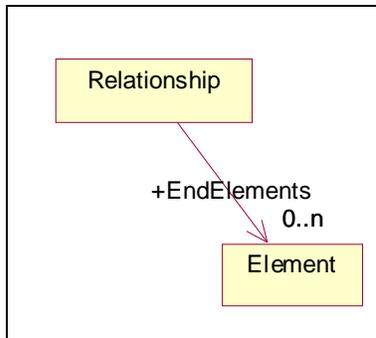

Relationship is an abstract type representing connections among NamedModelElements. Most Relationships are DirectedRelationships, while Associations consist of AssociationEnds, which are directed.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship

### SubClasses of Relationship

- Association
- AssociationRole
- SimpleRelationship
- Transition

### Properties Specific to Relationship

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Relationship

Name	Kind	Class
EndElements	0..n	Element

# ReplyAction

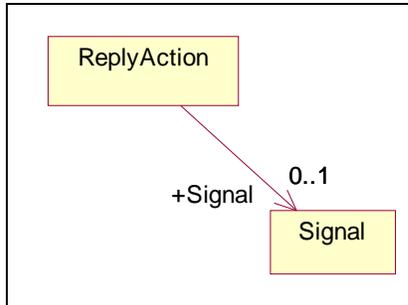

## XDE Domain

An Action that results in the replying of a signal from a receiver to a sender.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>ReplyAction

### SubClasses of ReplyAction

This class has no subclasses.

### Properties Specific to ReplyAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to ReplyAction

Name	Kind	Class
Signal	0..1	Signal

# ReturnAction

## XDE Domain

An Action which causes values to be passed back to the activator (the caller). The values are represented by the arguments inherited from Action. A ReturnAction has no explicit target.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>ReturnAction

### SubClasses of ReturnAction

This class has no subclasses.

### Properties Specific to ReturnAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to ReturnAction

This class has no relationships.

## Send

### XDE Domain

A Usage dependency whose source is an operation and whose target is a signal, specifying that the source sends the target signal.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Usage>Send

#### SubClasses of Send

This class has no subclasses.

#### Properties Specific to Send

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Send

This class has no relationships.

# SendAction

## XDE Domain

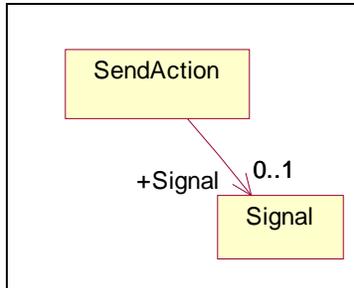

An Action that results in the sending of a signal from a sender to a receiver.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Action>SendAction

### SubClasses of SendAction

This class has no subclasses.

### Properties Specific to SendAction

Properties	Inherited From
Description	NamedModelElement

ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to SendAction

Name	Kind	Class
Signal	0..1	Signal

# Signal

## XDE Domain

Specifies an asynchronous stimulus communicated between instances.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>Signal

### SubClasses of Signal

This class has no subclasses.

### Properties Specific to Signal

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Visibility	Classifier

### Relationships Specific to Signal

This class has no relationships.

# SignalEvent

## XDE Domain

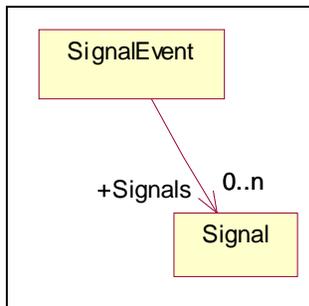

Represents the reception of a particular (asynchronous) signal. A send action generates a signal event.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Event>SignalEvent

### SubClasses of SignalEvent

This class has no subclasses.

### Properties Specific to SignalEvent

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to SignalEvent

Name	Kind	Class
Signals	0..n	Signal

# SimpleRelationship

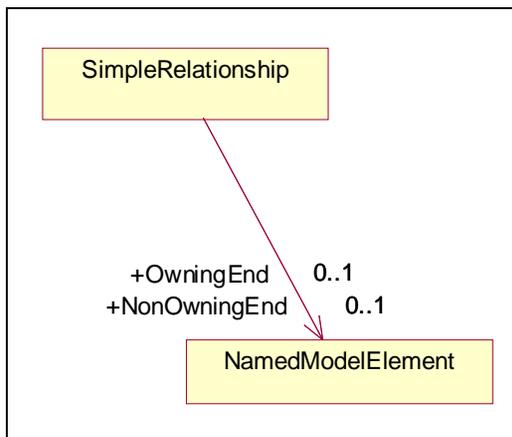

## XDE Domain

An abstract relationship class.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship

### SubClasses of SimpleRelationship

AssociatedClass  
 Constrain  
 DirectedRelationship  
 NoteAttachment

### Properties Specific to SimpleRelationship

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to SimpleRelationship

Name	Kind	Class
NonOwningEnd	0..1	NamedModelElement
OwningEnd	0..1	NamedModelElement

# SimpleValue

## XDE Domain

An abstract type for value subtypes.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>SimpleValue

### SubClasses of SimpleValue

- BooleanValue
- IntegerValue
- RealValue
- StringValue

### Properties Specific to SimpleValue

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
ValueAsString	

### Relationships Specific to SimpleValue

This class has no relationships.

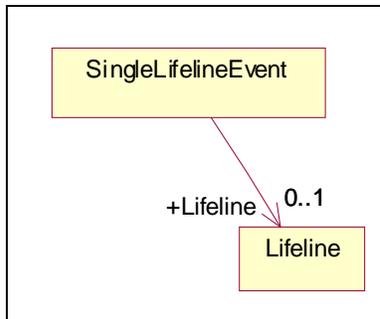

# SingleLifelineEvent

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>InteractionEvent>SingleLifelineEvent

### SubClasses of SingleLifelineEvent

This class has no subclasses.

### Properties Specific to SingleLifelineEvent

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to SingleLifelineEvent

Name	Kind	Class
Lifeline	0..1	Lifeline

## State

### XDE Domain

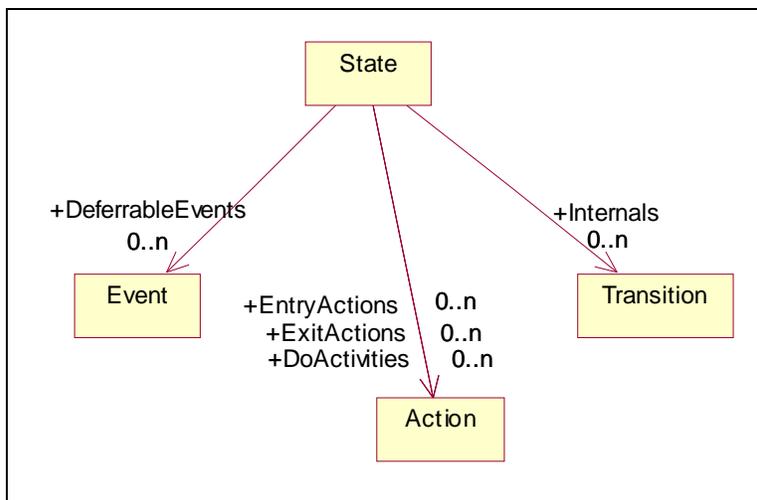

An abstract type for state subtypes. A state is a condition or situation during the life of an object during which it satisfies some condition, performs some activity, or waits for some event.

#### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>State

#### SubClasses of State

- CompositeState
- FinalState
- ObjectFlowState
- SubmachineState

#### Properties Specific to State

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

**Relationships Specific to State**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
DeferrableEvents	0..n	Event
DoActivities	0..n	Action
EntryActions	0..n	Action
ExitActions	0..n	Action
Internals	0..n	Transition

# StateMachine

## XDE Domain

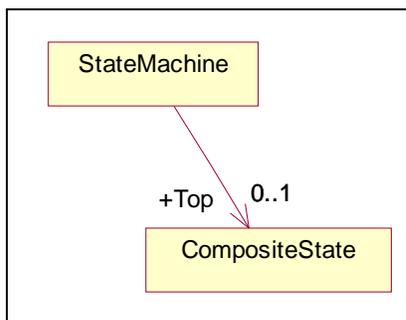

A specification that describes all possible behaviors of some dynamic model element. Specifies the sequence of states that an object or interaction goes through during its life in response to events, together with its responses and actions.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>StateMachine

### SubClasses of StateMachine

ActivityGraph

### Properties Specific to StateMachine

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to StateMachine

Name	Kind	Class
Top	0..1	CompositeState

# StateVertex

## XDE Domain

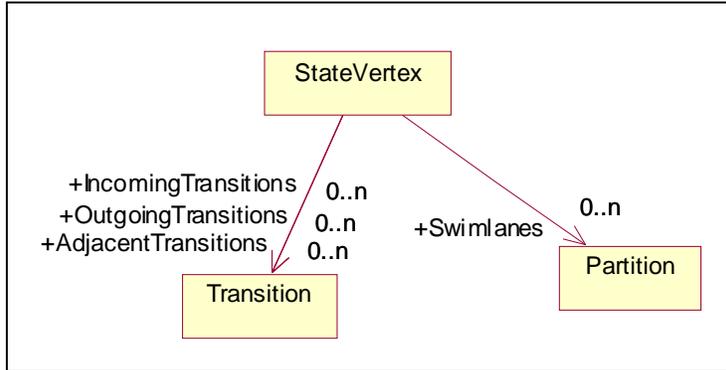

This abstract class represents a source or a target for a transition in a state machine.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex

### SubClasses of StateVertex

- Decision
- InitialState
- ProxyState
- PseudoState
- State
- StubState
- Synchronization
- SynchState

### Properties Specific to StateVertex

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

**Relationships Specific to StateVertex**

<b>Name</b>	<b>Kind</b>	<b>Class</b>
AdjacentTransitions	0..n	Transition
IncomingTransitions	0..n	Transition
OutgoingTransitions	0..n	Transition
Swimlanes	0..n	Partition

# Stereotype

## XDE Domain

Provides a means of extending UML to provide custom model elements. Stereotypes are TaggedValueSets. ModelElements reference 0..1 stereotypes (See ExtensibleElement).

**Class Hierarchy:** Element>TaggedValueSet>Stereotype

### SubClasses of Stereotype

This class has no subclasses.

### Properties Specific to Stereotype

Properties	Inherited From
Description	TaggedValueSet
DescriptionResourceID	TaggedValueSet
DisplayName	TaggedValueSet
ElementKind	TaggedValueSet
GUID	Element
IsAppliedAutomatically	TaggedValueSet
Label	Element
Name	TaggedValueSet
NameResourceID	TaggedValueSet
TypeName	Element
UICategoryName	TaggedValueSet
UIHideValues	TaggedValueSet

### Relationships Specific to Stereotype

This class has no relationships.

# Stimulus

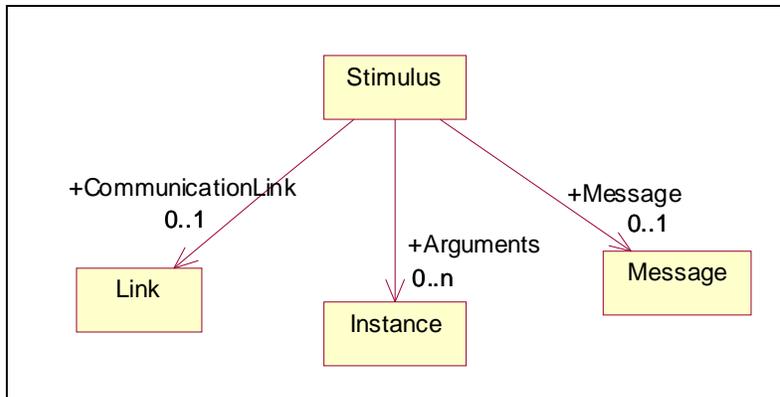

## XDE Domain

The passing of information from one instance to another.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Communication>Stimulus

### SubClasses of Stimulus

This class has no subclasses.

### Properties Specific to Stimulus

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Stimulus

Name	Kind	Class
Arguments	0..n	Instance
CommunicationLink	0..1	Link
Message	0..1	Message

# StringValue

## XDE Domain

The string that provides the value for an instance.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>SimpleValue>StringValue

### SubClasses of StringValue

This class has no subclasses.

### Properties Specific to StringValue

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
Value	
ValueAsString	SimpleValue

### Relationships Specific to StringValue

This class has no relationships.

# StructuralFeature

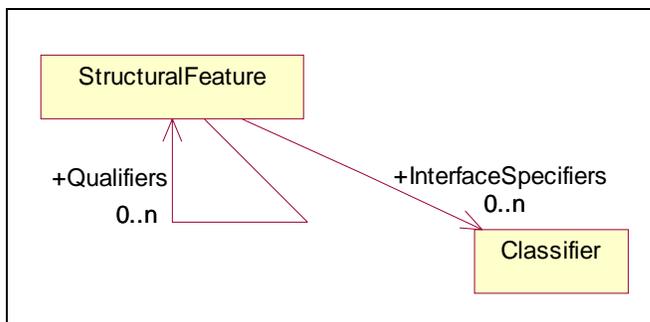

## XDE Domain

An abstract type that subsumes static features of a model element such as an Attribute. Structural features represent structural aspects of an Instance of a Classifier.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>TypeUsage>StructuralFeature

### SubClasses of StructuralFeature

AssociationEnd  
Attribute

### Properties Specific to StructuralFeature

Properties	Inherited From
CanonicalMultiplicity	
Changeability	
DefaultValueExpression	TypeUsage
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element

Visibility	

#### Relationships Specific to StructuralFeature

<b>Name</b>	<b>Kind</b>	<b>Class</b>
InterfaceSpecifiers	0..n	Classifier
Qualifiers		StructuralFeature

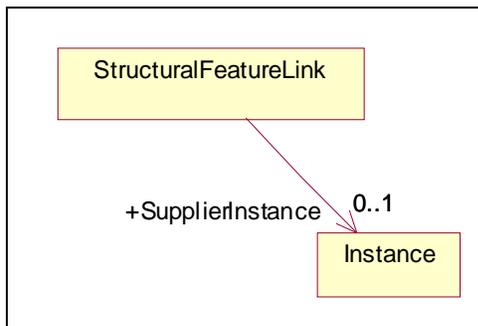

# StructuralFeatureLink

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StructuralFeatureLink

### SubClasses of StructuralFeatureLink

AttributeLink  
LinkEnd

### Properties Specific to StructuralFeatureLink

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to StructuralFeatureLink

Name	Kind	Class
SupplierInstance	0..1	Instance

# StubState

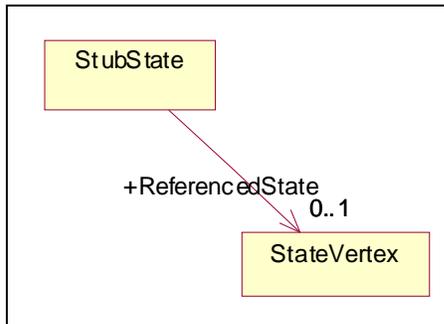

## XDE Domain

Represents an actual subvertex contained within the referenced state machine. It can serve as a source or destination of transitions that connect a state vertex in the containing state machine with a subvertex in the referenced state machine.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>StubState

### SubClasses of StubState

This class has no subclasses.

### Properties Specific to StubState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to StubState

Name	Kind	Class
ReferencedState	0..1	StateVertex

# Style

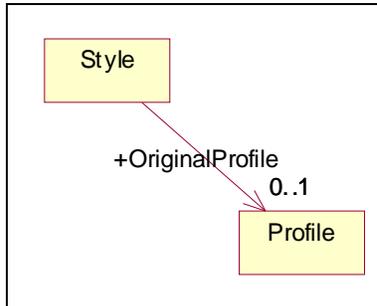

## XDE Domain

Provides formatting information for View objects.

**Class Hierarchy:** Element>TaggedValueSet>Style

### SubClasses of Style

This class has no subclasses.

### Properties Specific to Style

Properties	Inherited From
Description	TaggedValueSet
DescriptionResourceID	TaggedValueSet
DisplayName	TaggedValueSet
ElementKind	TaggedValueSet
GUID	Element
IsAppliedAutomatically	TaggedValueSet
Label	Element
Name	TaggedValueSet
NameResourceID	TaggedValueSet
Signature	
SignaturePattern	
Type	
TypeName	Element
UICategoryName	TaggedValueSet
UIHideValues	TaggedValueSet

### Relationships Specific to Style

Name	Kind	Class
OriginalProfile	0..1	Profile

# SubactivityState

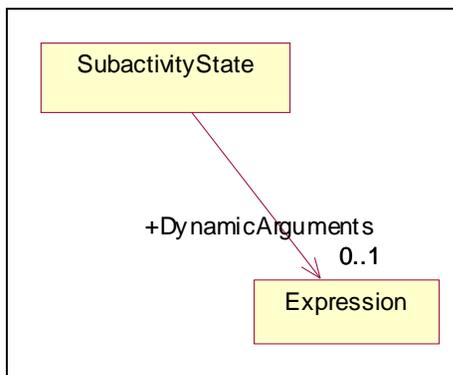

## XDE Domain

A state in an activity graph that represents the execution of a non-atomic sequence of steps that has some duration.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>State>CompositeState>SubmachineState>SubactivityState

### SubClasses of SubactivityState

This class has no subclasses.

### Properties Specific to SubactivityState

Properties	Inherited From
Description	NamedModelElement
DynamicMultiplicity	
FullyQualifiedName	NamedModelElement
GUID	Element
IsDynamic	
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to SubactivityState

Name	Kind	Class
DynamicArguments	0..1	Expression

# SubmachineState

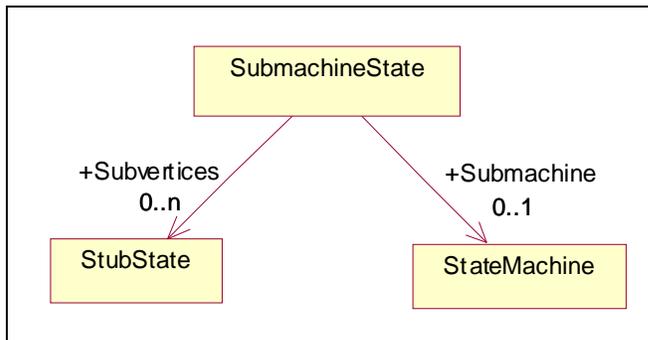

## XDE Domain

A state in a state machine that is equivalent to a composite state but its contents are described by another state machine.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>State>SubmachineState

### SubClasses of SubmachineState

SubactivityState

### Properties Specific to SubmachineState

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to SubmachineState

Name	Kind	Class
Submachine	0..1	StateMachine
Subvertices	0..n	StubState

# SubShapeView

## XDE Domain

**Class Hierarchy:** Element>ExtensibleElement>View>ContainerView>SubShapeView

### SubClasses of SubShapeView

ListCompartmentView  
NameCompartmentView

### Properties Specific to SubShapeView

Properties	Inherited From
BottomMargin	ContainerView
ColumnNo	
ExtentX	
ExtentY	
FactoryHint	View
Gravity	
GUID	Element
HorizontalFill	
IsVisible	View
Label	Element

PositionY	PositionalGeneralView
RightMargin	ContainerView
StereotypeName	ExtensibleElement
TopMargin	ContainerView
TypeName	Element

### Relationships Specific to SwimmingPoolView

This class has no relationships.

# Synchronization

## XDE Domain

Visually defines forks and joins representing parallel workflow.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>Synchronization

### SubClasses of Synchronization

This class has no subclasses.

### Properties Specific to Synchronization

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Kind	
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Synchronization

This class has no relationships.

# SynchState

## XDE Domain

A vertex in a state machine used for synchronizing the concurrent regions of a state machine.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>StateVertex>SynchState

### SubClasses of SynchState

This class has no subclasses.

### Properties Specific to SynchState

Properties	Inherited From
Bound	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to SynchState

This class has no relationships.

# TagDefinition

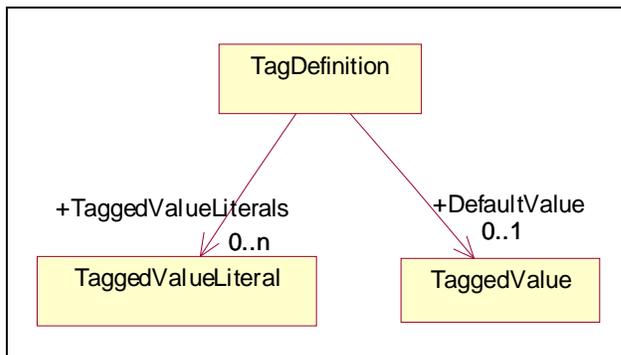

## XDE Domain

Provides methods and properties to create a tagged value, and to get or set the tagged value's attributes. Each TagDefinition has an associated default TaggedValue. These values can be stored in Profiles. You must first create a TagDefinition before creating a TaggedValue. TaggedValueSets own TagDefinitions.

**Class Hierarchy:** Element>TagDefinition

### SubClasses of TagDefinition

This class has no subclasses.

### Properties Specific to TagDefinition

Properties	Inherited From
DisplayName	
GUID	Element
IsRefinable	
Label	Element
Name	
ResourceID	
TagKind	
TypeName	Element
UIHideValue	
UINameOverride	
UIPropertyPageProgId	
UIReadOnly	
UITypeOverride	

### Relationships Specific to TagDefinition

Name	Kind	Class
DefaultValue	0..1	TaggedValue
TaggedValueLiterals	0..n	TaggedValueLiteral

# TaggedValue

## XDE Domain

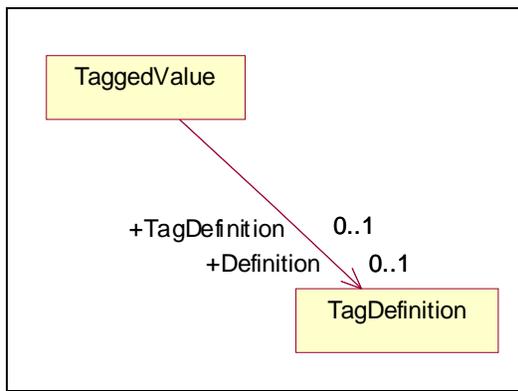

An abstract class for types of tagged values. Associates a tag name with a value, and uses the resulting object to store arbitrary information about an element. You must first create a TagDefinition before creating a TaggedValue.

TaggedValues add process-specific information such as version numbers, language information for automated tools, and other data that UML does not model. A tagged value can be attached to any individual element, including ExtensibleElements, ModelElements and View elements.

**Class Hierarchy:** Element>TaggedValue

### SubClasses of TaggedValue

This class has no subclasses.

### Properties Specific to TaggedValue

Properties	Inherited From
DisplayName	
GUID	Element
IsADefault	
Label	Element
Name	
TypeName	Element
ValueAsString	

### Relationships Specific to TaggedValue

Name	Kind	Class
Definition	0..1	TagDefinition
TagDefinition	0..1	TagDefinition

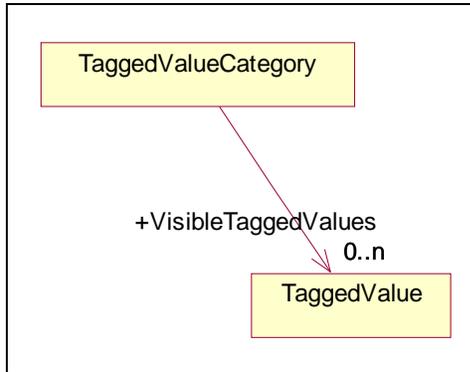

# TaggedValueCategory

## XDE Domain

**Class Hierarchy:** None

### SubClasses of TaggedValueCategory

This class has no subclasses.

### Properties Specific to TaggedValueCategory

Properties	Inherited From
Name	

### Relationships Specific to TaggedValueCategory

Name	Kind	Class
VisibleTaggedValues	0..n	TaggedValue

# TaggedValueLiteral

## XDE Domain

Creates an association between a Name and a Number, and uses the resulting object to provide a value for an EnumTaggedValue or a MaskTaggedValue object.

**Class Hierarchy:** Element>TaggedValueLiteral

### SubClasses of TaggedValueLiteral

This class has no subclasses.

### Properties Specific to TaggedValueLiteral

Properties	Inherited From
DisplayName	
GUID	Element
Label	Element
Name	
Number	
TypeName	Element

### Relationships Specific to TaggedValueLiteral

This class has no relationships.

# TaggedValueSet

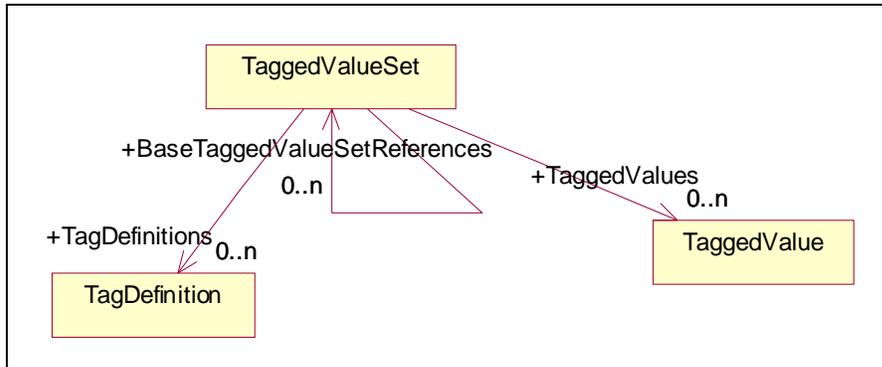

## XDE Domain

A collection of TagDefinition and TaggedValue sets. Profiles own TaggedValueSets.

**Class Hierarchy:** Element>TaggedValueSet

### SubClasses of TaggedValueSet

Stereotype  
Style

### Properties Specific to TaggedValueSet

Properties	Inherited From
Description

UIHideValues	

### Relationships Specific to TaggedValueSet

Name	Kind	Class
BaseTaggedValueSetReferences		TaggedValueSet
TagDefinitions	0..n	TagDefinition
TaggedValues	0..n	TaggedValue

# TemplateArgument

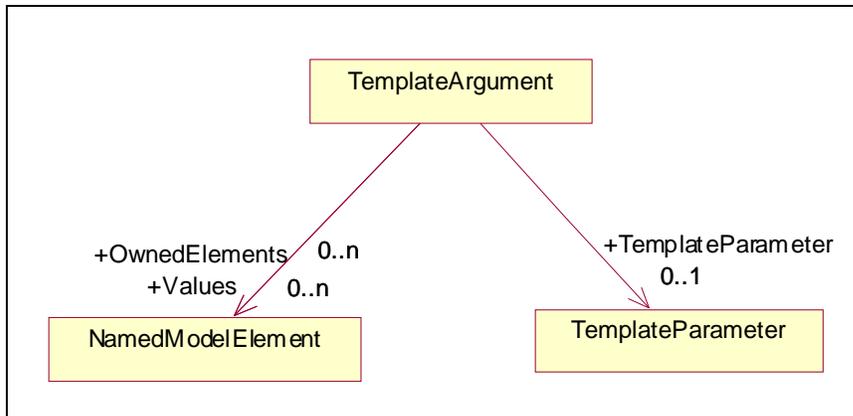

## XDE Domain

A TemplateArgument references the collection of values for a specific TemplateParameter in this binding of the template.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>TemplateArgument

### SubClasses of TemplateArgument

This class has no subclasses.

### Properties Specific to TemplateArgument

Properties	Inherited From
GUID	Element
Label	Element
PseudoCollections	
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to TemplateArgument

Name	Kind	Class
OwnedElements	0..n	NamedModelElement
TemplateParameter	0..1	TemplateParameter
Values	0..n	NamedModelElement

# TemplateParameter

## XDE Domain

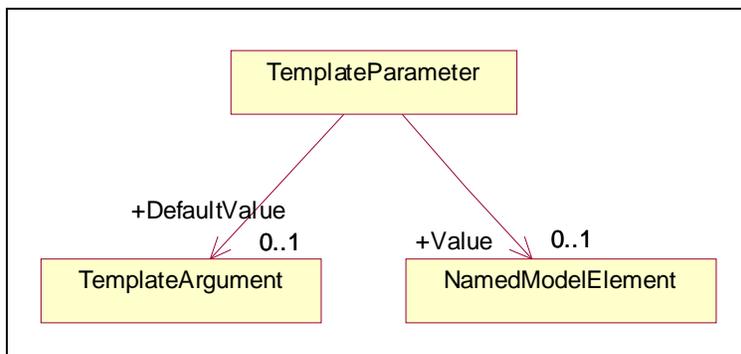

Defines a relationship between a Template (a ModelElement) and its Parameter (a ModelElement).

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>TemplateParameter

### SubClasses of TemplateParameter

This class has no subclasses.

### Properties Specific to TemplateParameter

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Multiplicity	
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to TemplateParameter

Name	Kind	Class
DefaultValue	0..1	TemplateArgument
Value	0..1	NamedModelElement

# TerminateAction

## XDE Domain

A terminate action results in self-destruction of an object. The target of a TerminateAction is implicitly the Instance executing the action, so there is no explicit target.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>TerminateAction

### SubClasses of TerminateAction

This class has no subclasses.

### Properties Specific to TerminateAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to TerminateAction

This class has no relationships.

## Text

### XDE Domain

Texts are free-form holders of text and other attributes that may be used for comments. They are visually distinct from Notes.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Text

#### SubClasses of Text

This class has no subclasses.

#### Properties Specific to Text

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Text

This class has no relationships.

# TimeEvent

## XDE Domain

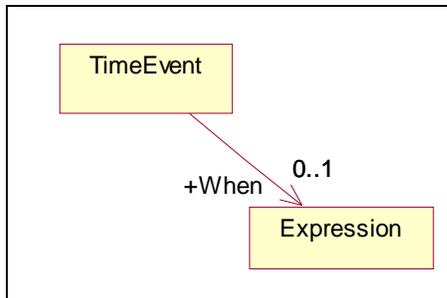

An event that denotes the time elapsed since the current state was entered.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Event>TimeEvent

### SubClasses of TimeEvent

This class has no subclasses.

### Properties Specific to TimeEvent

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element
WhenString	

### Relationships Specific to TimeEvent

Name	Kind	Class
When	0..1	Expression

# Transition

## XDE Domain

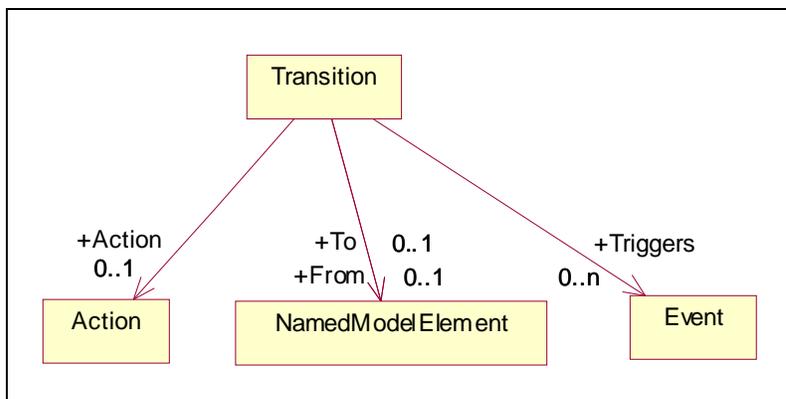

A relationship between two states indicating that an object in the first state will perform certain specified actions and enter the second state when a specified event occurs and specified conditions are satisfied. On such a change of state, the transition is said to fire.

Transitions are relationships from a source StateVertex to a target StateVertex. Transitions represent the change of an entity from one State to another.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>Transition

### SubClasses of Transition

This class has no subclasses.

### Properties Specific to Transition

Properties	Inherited From
ActionString	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GuardCondition	
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

### Relationships Specific to Transition

<b>Name</b>	<b>Kind</b>	<b>Class</b>
Action	0..1	Action
From	0..1	NamedModelElement
To	0..1	NamedModelElement
Triggers	0..n	Event

# TypeExpression

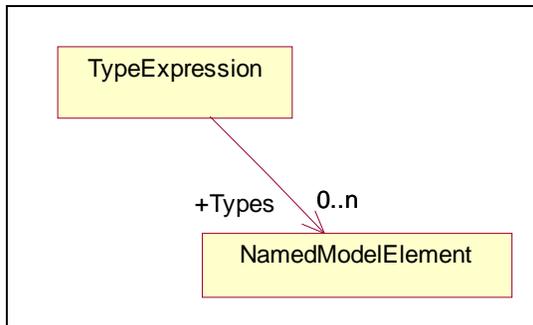

## XDE Domain

An expression that evaluates to a reference to one or more NamedModelElement types.

**Class Hierarchy:** Element>Expression>TypeExpression

### SubClasses of TypeExpression

This class has no subclasses.

### Properties Specific to TypeExpression

Properties	Inherited From
ExpandedValue	Expression
GUID	Element
Label	Element
RawExpression	Expression
TypeName	Element

### Relationships Specific to TypeExpression

Name	Kind	Class
Types	0..n	NamedModelElement

# TypeUsage

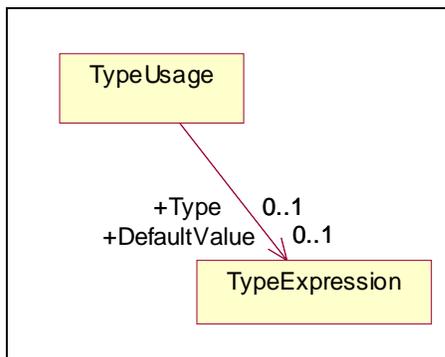

## XDE Domain

An abstract class for parameters and structural features.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>TypeUsage

### SubClasses of TypeUsage

Parameter  
StructuralFeature

### Properties Specific to TypeUsage

Properties	Inherited From
DefaultValueExpression	
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeExpression	
TypeName	Element

### Relationships Specific to TypeUsage

Name	Kind	Class
DefaultValue	0..1	TypeExpression
Type	0..1	TypeExpression

## UMLObject

### XDE Domain

Represents the Object class. Objects encapsulate state and behavior.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Instance>UMLObject

#### SubClasses of UMLObject

This class has no subclasses.

#### Properties Specific to UMLObject

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsActive	Instance
IsMultiInstanced	Instance
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Instance
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to UMLObject

This class has no relationships.

# UMLPoint

## XDE Domain

**Class Hierarchy:** None

### SubClasses of UMLPoint

This class has no subclasses.

### Properties Specific to UMLPoint

Properties	Inherited From
x	
y	

### Relationships Specific to UMLPoint

This class has no relationships.

# UninterpretedAction

## XDE Domain

An uninterpreted action represents an action that has no interpretation in UML. Uninterpreted actions can be used to model language-specific actions that are neither call actions nor send actions, and are not easily categorized under the other types of actions.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Action>UninterpretedAction

### SubClasses of UninterpretedAction

This class has no subclasses.

### Properties Specific to UninterpretedAction

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAsynchronous	Action
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
Recurrence	Action
ScriptString	Action
StereotypeName	ExtensibleElement
Target	Action
TypeName	Element

### Relationships Specific to UninterpretedAction

This class has no relationships.

## URL

### XDE Domain

A locator to a NamedModelElement.

**Class Hierarchy:** Element>Expression>URL

#### SubClasses of URL

This class has no subclasses.

#### Properties Specific to URL

<b>Properties</b>	<b>Inherited From</b>
ExpandedValue	Expression
GUID	Element
Label	Element
RawExpression	Expression
Title	
TypeName	Element

#### Relationships Specific to URL

This class has no relationships.

## Usage

### XDE Domain

An execution dependency in which one element (consumer) requires the presence of another element (supplier) for its correct functioning or implementation.

**Class Hierarchy:** Element>ExtensibleElement>ModelElement>NamedModelElement>Relationship>SimpleRelationship>DirectedRelationship>ConsumerSupplierRelationship>Dependency>Usage

#### SubClasses of Usage

- Call
- Create
- FriendUsage
- Instantiate
- Send

#### Properties Specific to Usage

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsSpecification	NamedModelElement
Label	Element
Name	NamedModelElement
PseudoCollections	NamedModelElement
StereotypeName	ExtensibleElement
TypeName	Element

#### Relationships Specific to Usage

This class has no relationships.

# UseCase

## XDE Domain

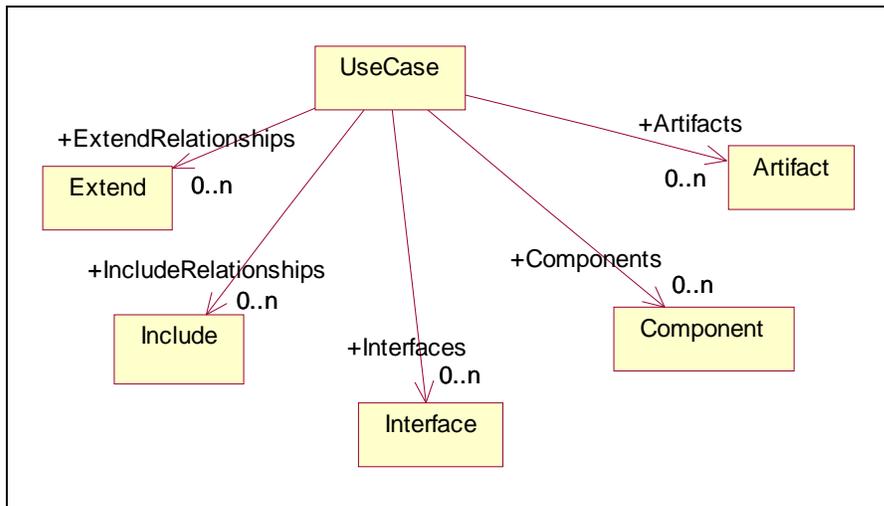

UseCases define the behavior of a system or other semantic entity without revealing the entity's internal structure. Each UseCase specifies a sequence of actions, including variants, that the entity can perform, interacting with actors of the entity.

### Class Hierarchy:

Element>ExtensibleElement>ModelElement>NamedModelElement>Classifier>UseCase

### SubClasses of UseCase

This class has no subclasses.

### Properties Specific to UseCase

Properties	Inherited From
Description	NamedModelElement
FullyQualifiedName	NamedModelElement
GUID	Element
IsAbstract	Classifier
IsLeaf	Classifier
IsRoot	Classifier
IsSpecification	NamedModelElement
Label	Element
Multiplicity	Classifier
Name	NamedModelElement
Persistence	Classifier
